

Breon Mitchell  
 An Annotated Bibliography  
 of Bilingual Dictionaries and Vocabularies  
 of the Languages of the World  
 held at Indiana University, Bloomington

**Indiana University's holdings** include many rare and unusual works of lexicography, including unpublished manuscripts, author's copies with revisions and annotations, association copies of special interest, and the first substantial printed vocabulary or dictionary for roughly 800 of the over 1,800 languages individually listed.

The information provided here is meant for students of lexicography, scholars of comparative linguistics, research librarians, members of the book trade, book collectors, and readers with a general interest in the languages of the world.

The **bibliography is still in progress**. The present bibliography is substantially complete for languages beginning with the **letters A-M**. For the **letters N-Z** it is presently limited to catalogued items held by the Lilly Library, with items from the Herman B Wells Library still to be added. The first portion of the bibliography, covering the letters A-E, appeared on Bibsite in March of 2016. This is the second version (A-Z: 2017), which replaces the first. The bibliography will be corrected and updated yearly.

The entries are **arranged alphabetically by language**, as they are in Wolfram Zaunmüller's *Bibliographisches Handbuch der Sprachwörterbücher* (1958), but with far more detailed descriptions and annotations, and a greatly expanded number of languages.

The **name of each language is** followed by a brief description taken from standard sources such as Wikipedia (cited as "Wiki"), Ethnologue and others. Scholarly disagreement as to the status of a language (or dialect) is generally indicated in the description. With few exceptions, the name of the language follows the primary listing in Ethnologue.

The individual dictionaries and vocabularies **are listed in chronological order**, from their earliest appearance down to the present day. **Polyglot dictionaries** are included where deemed appropriate, particularly those including rare and unusual languages. The term **polyglot** here includes both true polyglot dictionaries, and works that include bilingual vocabularies for more than two languages.

The **bibliographic descriptions vary in style and content**. In many cases they are based on the compiler's examination of works in his own collection, and reflect his personal preferences when describing pagination, binding, and other bibliographical details.

**Library binding:** indicates that the original binding has been replaced by a library binding. If the library binding preserves any portion of the original binding, this has been noted.

For **catalogued works**, an abbreviated form of the library's on-line description is provided, ranging from the detailed treatment of rare books at the Lilly Library at Indiana University to the briefer standard descriptions of items held by the Wells Library.

**Excerpts from Prefaces, Introductions, and Notes** have been provided by the compiler for their general interest and what insight they might offer into the genesis and nature of the work. "**Tr: BM**" indicates that the excerpt has been translated from its original language by the compiler.

**On-line dictionaries:** This bibliography does NOT include microfiche or on-line dictionaries held by Indiana University. On-line dictionaries for several of the lesser-known languages of the world may also be found at: [www.webonary.org](http://www.webonary.org).

**Bilingual dictionaries of major European languages** (such as French-Italian) **include only those published before 1750**. Similar limitations apply to **classical languages** (such as Greek-Latin), and dictionaries between English and the following languages: Arabic, Chinese, Japanese, and Korean, with the exception of certain dialects of those languages.

**A note on grammars:** in many cases, the only separate bilingual vocabulary of a language, or the most complete vocabulary of that language, occurs in a grammar, without being noted in the work's title or referenced in the catalogue description. Whenever known or discovered, grammars including such "hidden" vocabularies or dictionaries are included in this bibliography.

The **location of copies** is as follows:

[LILLY] Items catalogued and held by the Lilly Library, Bloomington, Indiana.

[LILLYbm] Items from "The Breon Mitchell Collection of Bilingual Dictionaries," held by the Lilly Library, for which a separate title-inventory by language is also available on the Lilly's website.

[IUW] Items catalogued and held by the Herman B Wells Library, Indiana University, stored both on and off-site.

**Major references cited:** see the end of the bibliography.

**Citation:** Individual dictionaries may be cited as "Mitchell [language name] [date of dictionary]"

e.g. Mitchell Abaza 1967.

## LANGUAGE INDEX

**To find a language:** enter the name of any language in this Index, preceded by an open bracket: e.g. "[Abaza". This will take you directly to the entry for the language. If you do not find the language you are looking for in the Index, do a general word search for the name. Alternate names and spellings of the languages of the world are included in the descriptions and should lead you to the relevant entry.

### A

[**A-PUCIKWAR**] The Pucikwar language, A-Pucikwar, is an extinct language of the Andaman Islands, India, formerly spoken by the Pucikwar people on the south coast of Middle Andaman, the northeast coast of South Andaman, and on Baratang Island. It belonged to the Great Andamanese family (Wiki).

Ethnologue: apq.

**1898:** see under **ANDAMANESE LANGUAGES: POLYGLOT.**

[**ABAKUÁ**] Abakuá is [the name and the secret language of] an Afro-Cuban men's initiatory fraternity, or secret society, which originated from fraternal associations in the Cross River region of southeastern Nigeria and southwestern Cameroon. Known generally as Ekpe, Egbo, Ngbe, or Ugbe among the multi-lingual groups in the region. It was believed that *Ñáñigos*, as the members are known, could be transformed into leopards to stalk their enemies. In contemporary Haiti, where secret societies have remained strong, an elite branch of the army that was set up to instill fear in the restless masses was named The Leopards. Among the less mystical *Ñáñigo* revenges was the ability to turn people over to slavers. In Africa they were notorious operators who had made regular deals for profit with slavers. Aside from its activities as a mutual aid society, the Abakuá performs rituals and ceremonies, called *plantes*, full of theatricality and drama which consists of drumming, dancing, and chanting activities using the secret Abakuá language (Wiki).

Ethnologue does not list Abakuá.

**198-?:** [IUW] *Vocabularios de Ñáñigo y Lucumí*, by Omandio Manyarubé, Sesecondó Iyamba Fembé. [La Habana?: s.n., between 1980 and 1987] 24 p.; 23 cm. Original yellow wrappers, lettered in red, with black and white photos of secret ceremonies on both front and rear wrappers. Abakuá-Spanish classified vocabulary, pp. 5-21. Although primarily devoted to Abakuá, the pamphlet also includes, as the title indicates, a brief Lucumi-Spanish vocabulary, pp. 21-23 (ca. 150 words). Preliminary remarks includes a discussion, pp. 3-5, of the difficulties of studying a secret language, and the nature of the language itself. Briefer remarks are offered on Lucumi, p. 21, which is said to have the same grammatical structure as Yoruba.

**1982:** [IUW] *The Afro-Hispanic Abakuá: a study of linguistic pidginization*, by Raphael A. Núñez-Cedeño, Roberto Nodal, [and] Rolando A. Alúm. Milwaukee: University of Wisconsin-Milwaukee, 1982. 38 leaves: ill., map; 28 cm. Series: Afro-American special research report. Bibliography: leaves 33-35. Abakuá-English glossary, ff. 12-26. The glossary is extracted from the works of several earlier scholars "who are considered pioneers in the study of Cuban folklore". Roberto Nodal published *The Abakuá Language in Cuba: a Glossary*, in 1976.

"At first the language was spoken solely by members of the all male society as a means of preserving the secrecy of its rites from outsiders, but later it spread out of the membership circle and has survived in Cuba having undergone inevitable alterations.... For over one hundred years students of African influence in Cuba have focused much

effort on unveiling the 'secrecy' of the Abakuá language, as well as tracing its origin and determining the influence of other African languages on its evolution... The vocabulary under study reveals a close semantic relationship of Efik and Abakuá" (pp. [1]-8).

[**ABANYOM**] Abanyom, or Bakor, is a language of the Ekoid subfamily of Niger–Congo. It is spoken by the Abanyom people in the Cross River State region of Nigeria. A member of the Southern Bantoid group, Abanyom is fairly closely related to the Bantu languages. It is tonal and has a typical Niger–Congo noun class system (Wiki).

Ethnologue: abm. Alternate Names: Abanyum, Befun, Bofon, Mbofon.

**1965:** see under **AFRICAN LANGUAGES... POLYGLOT**.

[**ABAZA**] The Abaza language (Абаза Бызшва, Abaza Byzšwa, Adyghe: Абазэбзэ) is a language of the Caucasus mountains in the Russian Karachay–Cherkess Republic by the Abazins. It consists of two dialects, the Ashkherewa dialect and the T'ap'anta dialect, which is the literary standard. Abaza is spoken by approximately 35,000 people in Russia, where it is written in a Cyrillic alphabet, as well as another 10,000 in Turkey, where the Latin script is used (Wiki).

Ethnologue: abq. Alternate Names: Abazin, Abazintsy, Ashuwa. On-line dictionaries available.

**1956:** [LILLYbm] *Russko-abazinskii slovar: okolo 30 000 slov: s prilozheniem kratkogo grammaticheskogo ocherka abazinskogo iazyka*, by Kh. D. Zhirov and N. B. Ekba. Moscow: Gos. izd-vo inostrannykh i natsionalnykh slovarei, 1956. Original green cloth over boards, lettered and decorated in gold, with black stamped panel on spine, lettered in gold. Pp. 1-5 6-646 647-648. First edition. Cherkesske Nauchno-issledovatelske Institut. Zaunmüller, col. 1. Russian-Abaza, pp. [13]-589. This is the first dictionary of the language. An Abaza-Russian dictionary appeared in 1967 [see following entry]. Second copy: IUW.

**1967:** [IUW] *Abazinsko-russkii slovar'. Okolo 14 000 slov*, by N. Kh. Adzinov. Pod red. Tugova V.B. S prilozheniem kratkogo grammaticheskogo ocherka abazinskogo iazyka. [Sostavil N.Kh. Adzinov pri uchastii Sh.A. Kudzheva i dr.] Moskva: Sov. entsiklopediia, 1967. 535 p. 21 cm. At head of title: Karachaevo-Cherkeskii nauchno-issledovatel'skii institut iazyka, literatury, istorii i ekonomiki. In Cyrillic characters. Added t.p. in Abaza. Abaza-Russian dictionary.

**2013:** [IUW] *Abaza-uryshv omonim azhvar = Abazino-russkii slovar' omonimov*, by Shkhaï Katïa. Karachaevsk: Karachaevo-Cherkesskii gosudarstvennyi universitet, 2013. 230 pages; 21 cm. Abaza-Russian dictionary.

[**ABÉ**] Abé (also spelled Abbé, Abbey, Abi) is a language of uncertain classification within the Kwa branch of the Niger–Congo family. It is spoken in Ivory Coast. The dialects of Abé are Tioffo, Morie, Abbey-Ve, and Kos. In 1995 there were estimated to be 170,000 speakers, primarily in the Department of Agboville (Wiki).

Ethnologue: aba. Alternate Names: Abbé, Abbey, Abi.

**1904:** see **1904a** under **AFRICAN LANGUAGES... POLYGLOT**.

**1972:** [IUW] *Proverbes de Côte-d'Ivoire* / G. Dumestre, L. Duponchel.

Proverbs in the various languages of Ivory Coast, with translations and explanations in French. fasc. 1. Proverbes abé et avikam. Includes French-Abé/Avikam index, pp. 108-122, keyed to the proverbs.

[**ABENAKI, EASTERN**] Abenaki, or Abnaki, is a nearly extinct Algonquian language of Quebec and Maine. There were two varieties, Eastern and Western, which differ in vocabulary and phonology, and are sometimes considered distinct languages. Eastern Abenaki was spoken by several peoples, of which the last were the Penobscot of coastal Maine. The last known speaker, Madeline Shay, died in 1993 in Penobscot, Maine. Other dialects of Eastern Abenaki, such as Caniba and Aroosagunticook, are documented in French-language materials from the colonial period (Wiki).

"The following words were obtained from a few individuals of the Penobscot tribe, who visited Cambridge in the winter of 1833-4, for the purpose of hunting, and encamped not far from the College. Unluckily, I was not informed of their vicinity until a few days before their departure, and my vocabulary is neither so full nor so correct as I could wish. The Wlas'tukweek of St. John's Indians are a tribe, numbering about 460 souls, who reside upon the river of the same name near the eastern boundary of the State of Maine.... In the orthography of the Indian words, the system proposed by the Hon. Jon. Pickering has been generally followed" (Remarks).

[**ABENAKI, WESTERN**] Abenaki, or Abnaki, is a nearly extinct Algonquian language of Quebec and Maine. There were two varieties, Eastern and Western, which differ in vocabulary and phonology, and are sometimes considered distinct languages. In 1991, Western Abenaki was spoken by 20 individuals along the St. Lawrence River between Montreal and Quebec City, mostly at Odanak, the site of the former mission village of St. Francis, and by about 50 individuals living throughout New York state and Connecticut. By 2006 five speakers were recorded (Wiki).

Original brown cloth over boards, lettered and decorated in black. Pp. 1-5 6-230. First edition. Not in Zaunmüller. Includes classified Abenakis-English vocabulary, pp. [13]-57. This copy inscribed by the author in ink: "Presented to the | Most Hon. Woodrow Wilson | President of the U. States | of America - | With greetings from | the author. | Jos. Laurent. | Nov. 13, 1913". The first dictionary of the Abenaki language was published by S. Rasles in 1833 (see above: Eastern Abenaki). Joseph Laurent was an Abenakis, "Chief of the Indian village of St Francis, P.Q." His Abenakis name was Sozap Lolô.

"The chief aim of the Editor in publishing this book is to aid the young generation of the Abenakis tribe in learning English. It is also intended to preserve the *uncultivated* Abenakis language from the gradual alterations which are continually occurring from want, of course, of some proper work showing the grammatical principles upon which it is dependent.... May this little volume, which will learn the white man how the Abenakis vocal organs express God's attributes, the names of the various objects of the creation...&c. be welcomed by the white as well as by the red man" (Preface).

"This is a dictionary of Western Abenaki as it is spoken in the last half of the twentieth century. A member of the Algonquian family of languages, Western Abenaki is so named to distinguish it from Penobscot and the extinct Eastern Abenaki dialects of what is now the state of Maine... The Abenakis['] ...homes are Odanak, Quebec and the Missiquoi region of the Champlain Valley." In 1994, Western Abenaki appears to have been spoken by fewer than a hundred speakers. "My main purpose in preparing this dictionary has been to make a record of the language which I fear may soon be spoken no more."

"In his *Historia de Abiponibus*, published in 1784...Dobrizhoffer dedicates forty pages ... to the Abipon language. ... Samuel Lafone Quevedo (*Idioma abipón...* Buenos Aires, Coni, 1896)...reunited Dobrizhoffer's observations with data from the lists of Brigniel... and compared them with notes on other languages.... Since no other studies of Abipon exist, it seemed useful to present this one, which is as coherent and exhaustive as the material permits" (Preface, tr: BM). "The Abipones [were] an aboriginal tribe living in what is now the Republic of Argentina, and now considered extinct.... Lafone Quevedo records a visit to a few Abipones in 1858, living in reduced numbers between Santa Fe and Cordoba" (Introduction).

[**ABKHAZ**] Abkhaz /æp'hɑːz/ (sometimes spelled Abxaz; Аԥсуа бызшәа [apʰswa bizʃʷa]) is a Northwest Caucasian language most closely related to Abaza. It is spoken mostly by the Abkhaz people. It is the official language of Abkhazia[a] where around 100,000 people speak it. Furthermore, it is spoken by thousands of members of the Abkhazian diaspora in Turkey, Georgia's other autonomous republic of Adjara, Syria, Jordan and several Western countries. The Russian census of 2010 reported 6,786 speakers of Abkhaz in Russia (Wiki).

"As can be clearly seen from the table of contents, it is not the goal of this book to present a complete general wordlist, as necessary as that might be. During the time I served in the Acehnese department of foreign affairs I saw that many people, above all officers, regretted that no brief Dutch-Acehnese list of the most common Achinese words exists in a handy form... **1931:** [LILLYbm] *Atjehsch handwoordenboek (Atjehsch-Nederlandsch)*, by J Kreemer. Leiden: E. J. Brill, 1931. Original natural cloth over boards, lettered and decorated in black. Pp. I-VI-XVI, 1 2-367368-372. First edition. Zaunmüller, col. 23. Aceh-Dutch, pp. [1]-367. According to the introduction, the 1889 dictionary by K. F. H. van Langen [see above] is marred by the fact that the spellings are based on the Arabic characters, and are thus ill-suited to reproduce the actual sounds of the Aceh language. Only after Dr. Snouck devised a method for reproducing the Aceh sounds accurately in the Roman alphabet could a truly adequate dictionary be produced (i.e.-Kreemer's).

[**ACHOLI**] Acholi (also Acoli, Akoli, Acooli, Atscholi, Shuli, Gang, Lwoo, Lwo, Lok Acoli, Dok Acoli) is a Southern Luo dialect spoken by the Acholi people in the districts of Gulu, Kitgum and Pader (a region known as Acholiland) in northern Uganda. It is also spoken in the southern part of the Opari District of South Sudan. Acholi, Alur, and Lango have between 84 and 90 per cent of their vocabulary in common and are mutually intelligible. However, they are often counted as separate languages because their speakers are ethnically distinct. Labwor (Thur), once considered a dialect of Acholi, may not be intelligible with it (Wiki).

My aim in compiling the present vocabulary has not been to produce a dictionary, but merely to give the common meanings of common words, in order to assist English-speaking people who re starting to learn Acoli, and Acoli who are learning English" (Introduction). "I was compelled to complete the Lwo/Acholi-English Dictionary, which I had started in 1996, by my discovery... that many Acholi, especially the younger generation, did not know much Acholi but a lot of English instead. It therefore became obvious that a dictionary should be made available in which they could find the meanings of words...they did not know.... When I read the books written by Crazzolaro and Malandra [see above for both] I found them to be the first great attempt to write the Acholi dictionary, except that Crazzolaro wrote in phonetics which the ordinary people cannot read and understand. Since both of them were non-Acholi, they did not understand some of the words and this led to wrong translation of them" (Preface). "The words dealt with in this dictionary are those spoken and understood by the central Acholi clans. This is because their language is not mixed up with the languages of the surrounding tribes. Those central clans are Payira, Patiko, Paico, Bwobo and Alero" (Introduction).

[**ADI**] Adi, also known as Abor (Abhor, Abor-Miri) and Lhoba (Lho-Pa, Luoba), is a Sino-Tibetan language of the Tani family spoken in Arunachal Pradesh, India (Wiki).

Ethnologue: adi. Alternate names: Abhor, Abor, Boga'er Luoba, Lhoba, Luoba.

Ethnologue lists Miri as an alternate name for the language Mising (alternate name: Mishing).

**1908:** [LILLY] *Aro Ishor-ke Doying-e ("The Story of God," in the Abor-Miri Language) (See English Preface.)*, by J. Herbert Lorrain (One of the Pioneer Missionaries to the Lushais and Abors). Published conjointly by The American Baptist Missionary Union, and The Calcutta Missionary Tract and Book Society, 1908. Calcutta, printed in Madras. xiii, 402 p. Contemporary black leather, lettered in gold, and ruled in blind, with the binder's sticker of the S.P.C.K. Abor [Adi]-Miri [Mising] glossary, pp. [385]-402. A retelling of the Bible in simplified form, with an English Preface recounting in detail the origins of the work. According to the author, he first learned the language and reduced it to written form. The book was then prepared, prior to teaching the natives to read and write. Other than the Preface (pp. [ix]-xiii), the entire work is in Abor-Miri, combining two dialects now considered separate languages: Abor (Adi) and Miri (Mising). The author published *A Dictionary of the Abor-Miri Language* in 1907 (second printing 1910).

"First edition, compiled by Herbert Lorrain who, together with his colleague William Savidge were the first missionaries to the hill tribes of the Abors and Miris who lived in the Himalayas between Upper Assam and Tibet. The dialects of Abor and Miri have very much in common and collectively they form what may be termed the Abor-Miri language. Lorrain left Sadiya, Assam in 1903 and this work was later finalized with the help of another missionary Rev. L.W.B. Jackson who also wrote the Abor-Miri preface" (bookseller's description: Charlotte du Rietz).

"In order...to reach the greatest possible number of readers, the Author, while writing the bulk of the work in the Padam Abor dialect, has often used words belonging more properly to the Miris, when such words seemed to him to be more universally understood than the corresponding word in Padam. Any reader, moreover, coming across a word in the text which he does not understand, has only to turn to the Glossary at the end of the book in order to find the corresponding word in his own dialect" (Preface).

**1910:** [LILLY] *A Dictionary of the Abor-Miri Language, with illustrative sentences and notes*. By J. First edition. English-Milang (roman and Devanagari), pp. 4-89. First printed vocabulary of Milang, a dialect of Adi.

“Milang is one of the subgroups of the tribe which is known as ‘Adi’. They are about 2595 in number and live in three villages: Milang, Dalbing and Pekimodi....It has been named after a man, Milang by name, whose lineage may be traced to Pédong the primeval ancestor...The Milangs used a kind of code language during times of warfare. Whatever may be the case, in language and culture they are akin to the Padams who live on both banks of the Siang river. The dialect is agglutinative in structure, some particles being linked together to express meaning as in other Adi dialects” (Introduction).

First printed vocabulary of Bokar, a dialect of Adi.

“The Bokars are one of the sub-tribes of the Adis of West Siang District....According to 1981 provisional census report their population is 3052 inhabiting forty villages...The Bokar language has two main dialects—the Upper and Lower....In view of the growing tendency towards common medium or expression among the people themselves no attempt has been made in this book to stick to any dialect. It is a simple book primarily meant for the officers newly posted to this area to enable them to speak to the local people in their language...” (Preface).

First edition. English-Kokar (Roman and Devanagari) word lists arranged thematically, pp. [59]-97. First printed vocabulary of Karko, a dialect of Adi.

“The Karkos are one of the sub-tribes of the Adis living in the East Siang District of Arunachal Pradesh....They are living in 6 villages with a population of about 1795...as per 1981 census...The study was assigned to me a few years ago, as there is no language guide book on the Karkos. Accordingly, I had undertook intensive tour for field study among the Karkos” (Preface).

[**ADI, GALO**] The Gallong or Galo language is a Sino-Tibetan language of the Tani group, spoken by the Galo people [of Arunachal Pradesh, India]. Its precise position within Tani is not yet certain, due primarily to its central location in the Tani area and the strong effects of intra-Tani contacts on the development of Tani languages. It is an endangered language according to the normal definitions, although prospects for its survival are better than most similarly-placed languages in the world (Wiki).

Ethnologue: adl. Alternate names: Adi, Adi-Gallong, Adi-Galo, Gallong, Galo, Galong.

**1963:** [LILLY] *An introduction to the Gallong language*, by Kamalesh Das Gupta [1923- ]. Shillong: North-East Frontier Agency, 1963. vi, 124 p. 23 cm. [**ADNYAMATHANHA**] Adnyamathanha (pronounced /'ɑ:dnjəmʌdɒnə/; many other names, see below) is an Australian Aboriginal language. It is the traditional language of the Adnyamathanha people. The name of the witchetty grub comes from Adnyamathanha.

Estimates of the number of people who speak Adnyamathanha are variable, though it is definitely severely endangered. According to Oates 1973 there were only 30 speakers, around 20 according to Schmidt in 1990, 127 in the 1996 census, and about 107 counted in the 2006 census (Wiki).

Ethnologue: adt. Alternate names: Ad'n'amadana, Adnyamathanha, Anjimatana, Anjiwatana, Archualda, Atynyamatana, Benbakanjamata, Binbarnja, Gadjnjamada, Jandali, Kanjimata, Keydnjmarda, Mardala, Nimalda, Nuralda, Umbertana, Unyamootha, Wailbi, Wailpi, Waljbi, Wipie.

**1992:** [LILLY] *Adna-mat-na English dictionary*, by John C. McEntee & Pearl McKenzie. Adelaide: J.C. McEntee and Peal McKenzie, 1992. x, 125 p.; 28 cm. Original light blue wrappers, lettered in black, with unlettered blue cloth spine and clear plastic

front cover. First edition [February 1992]. There was also a revised issue in May of 1992 [not yet seen]. Andyamathanha-English, pp. 1-125. Presentation copy to family members from John McEntee, with a few penciled notes, presumably by the recipients. First dictionary of this language.

“This dictionary of Adna-mat-na words from the North Flinders Ranges of South Australia has been compiled over a period of almost twenty years. It especially records the language as spoken by Pearl McKenzie and her family and ancestors....The importance of this very limited edition is that the language comes back to Mrs McKenzie in written form for her perusal and checking. This first edition dictionary should not be thought of as being complete since much of the language has been lost as older speakers have passed away” (Preface).

[**ADYGHE**] Adyghe (/ˈædigeɪ/ or /ˌɑːdiˈgeɪ/; Adyghe: Адыгабзэ, adyghabze IPA: [aːdəɣabza]), also known as West Circassian (КӀахыбзэ), is one of the two official languages of the Republic of Adygea in the Russian Federation, the other being Russian (Wiki).

A Russian-Circassian [Adyghe] dictionary was published in Odessa in 1846.

"The Circassian language is considered one of the most difficult in the world; it differs both in the nature of the words and the syntactical constructions from all other

Caucasian languages. More than this, the pronunciation is so difficult, that even the most distinguished linguists find it hard to imitate the sound of a syllable as uttered by the mouth of the Addee-ghey people.... I have composed this dictionary... whilst in company with five, ten, and sometimes twenty of the Addee-ghey people. I communicated with them in the Turkish language, and put down, in writing, in their presence, every word which I heard from them... [I]n the whole of the Dictionary... there is not a single word which I have copied from any printed book, or manuscript;... I have extracted... every word from the mouth of the Circassian" (Preface).

**[AFGHANI LANGUAGES AND DIALECTS: POLYGLOT]** Afghanistan is a multilingual country in which two languages – Pashto and Dari – are both official and most widely spoken. Dari is the official name of the Persian language in Afghanistan, it is often referred to as the Afghan Persian. Both Pashto and Persian are Indo-European languages from the Iranian languages sub-family. Other regional languages, such as Uzbek, Turkmen, Balochi, Pashayi and Nuristani are spoken by minority groups across the country. Minor languages may include Ashkunu, Kamkata-viri, Vasi-vari, Tregami and Kalasha-ala, Pamiri (Shughni, Munji, Ishkashimi and Wakhi), Brahui, Qizilbash, Aimaq, and Pashai and Kyrgyz. Linguist Harald Haarmann believes that Afghanistan is home to more than 40 minor languages, with around 200 different dialects (Wiki).

**[AFRICAN LANGUAGES AND DIALECTS: SPECIMENS AND POLYGLOT]**  
There are 1,250 to 2,100 and by some counts over 3,000 languages spoken natively in Africa, in several major language families:

Afroasiatic is spread throughout the Middle East, North Africa, the Horn of Africa, and parts of the Sahel

Nilo-Saharan is centered on Sudan and Chad (disputed validity)

Niger–Congo (Bantu and non-Bantu) covers West, Central, Southeast and Southern Africa

Khoe is concentrated in the deserts of Namibia and Botswana

Austronesian is spoken in Madagascar.

Indo-European is spoken on the southern tip of the continent.

There are several other small families and language isolates, as well as obscure languages that have yet to be classified. In addition, Africa has a wide variety of sign languages, many of which are language isolates. About a hundred of the languages of Africa are widely used for inter-ethnic communication. Arabic, Somali, Berber, Amharic, Oromo, Swahili, Hausa, Manding, Igbo, Fulani and Yoruba are spoken by tens of millions of people. If clusters of up to a hundred similar languages are counted together, twelve are spoken by 75 percent, and fifteen by 85 percent, of Africans as a first or additional language (Wiki).

Gurney also served as a member of Parliament (see *Substance of the speech of Hudson Gurney, Esq., in the House of Commons, July 10, 1828 on the third reading of Mr. Otway Cave's corporate funds bill* (London, 1828). Additional copies: LILLY; IUW.

"A very interesting work by Salt, who later became associated with Egyptology as the employer of Belzoni, friend of Burckhardt, and the owner of three important collections of Egyptian Antiquities, a substantial portion of which were later acquired by the British Museum. Salt, who had been trained as a painter, first visited Egypt when he toured India and North Africa with the Viscount Valentia, George Annesley. He returned to Africa in 1809 on a government mission to establish contact with the King of Abyssinia, which occupied him for 2 years. The volume includes an account of the Portuguese settlements on the east coast of Africa and an appendix giving the

vocabularies of the dialects spoken by different native tribes inhabiting the coast from Mozambique to the borders of Egypt. In 1815 Salt was appointed consul-general in Egypt, and he reached Alexandria in March 1816" (Blackmer 1479 and various booksellers' descriptions).

**1885:** [LILLYbm] *Polyglotta Africana orientalis or, a comparative collection of two hundred and fifty words and sentences in forty-eight languages and dialects spoken*

*south of the Equator and additional words in nineteen languages, by J[ospeh] T[homas] Last. London: Society for Promoting Christian Knowledge, 1885. Original gray cloth over boards, lettered and decorated in black. Pp. I-v vi-xii, 1 2-239 240. First edition. Not in Zaubmüller. Hendrix 1900. Includes separate double-column vocabularies for each language, including: Swahili, Lima, Bondei, Shambala, Nguru, Zeguha, Kamba, Kaguru, Itumba, Kondoa (or Solwe), Kami, Khutu, Konde, Kua (Lomwe dialect), Kua (Msambiji dialect), Yao, Gindo, Gangi, Gogo, Hehe, Ziraha, Nkwifi, Ndunda, Kwenyi, Bena, Sango (or Lori), Ungu, Bemba, Bisa, Bunga, Galaganza, Sumbwa, Sukuma, Tusi (of Ha), Nya-Turu, Nya-Mbu, Nya-Lungwa, Rua, Guha, Ganda, Rang, Anzuani (or Hinzua), Kusu, Nyuema, Taturu, Masai, Humba, and Sakalava. With a fold-out linguistic map as a frontispiece, and details on the tribes speaking all forty-eight languages, including the localities where each language is spoken, pp. 4-27. Second copy: IUW.*

"The vocabularies included [in this volume] are entirely original, and are not borrowed from the compilation of others scholars who have written on the subject of these languages. They were collected on the spot by one who was well acquainted with Swahili, the *lingua franca* of the region.... With the exception of two languages, all belong to the great Bantu family; the two excepted languages, the Kwafi and Masai, are provisionally classed in the Nuba-Fulah group. One language, the Sakalava, is non-African [of Madagascar, said to be of Malay origin].... The compiler is neither a scholar trained in comparative philology nor a man with the advantage of a high education. He went out to East Africa as a lay missionary and dwelt among the natives, and made excursions into entirely unknown regions, the accounts of which were so highly valued by the Royal Geographical Society that they were published in their Proceedings, and... he was the recipient of one of the awards of that learned society. He had the good luck to preserve his health in the trying climate of Eastern Equatorial Africa, but the misfortune to lose his young wife" (Preface, Robert Cust). "The following specimens of African languages and dialects were all made in East Central Africa between the years 1879 and 1884 inclusive. They were nearly all taken down from the mouth of those who were members of the tribe speaking the language..." (Introduction).

"In preparing this manual, we have responded to a desire often expressed by Europeans. In order to render the work as practical as possible for the region, we have preceded the vocabulary with a few grammatical notes on Kituba, the normal commercial language of the districts of the Sankuru, the Kasai, the Lulua and the Lomani, ... the language that simplifies relations among Europeans and the natives" (Preface, tr: BM).

**ca. 1900b:** [LILLY] *Vocabulaire Kihaya, Kinyarwanda, Kigwe*, [White Fathers]. N.p., n.d. [Bukoba, Tanzania: Church of Sweden Mission, c. 1900?, pre-1928]. 68 pp (unpaginated). 25 cm. Original or contemporary half red cloth and marbled paper over boards. Title page (may be half-title) reads simply: "Vocabularie Khaya, Kinyarwanda, Kigwe." May be missing true title page. Not in Zaunmüller. Hendrix 753, 1340, 1471 (giving place and publisher as indicated above). Perhaps an early work by Eugene Hurel, author of *Manuel Kinyarwanda* of 1911. With the bookplate of Humphrey Winterton. The Preface is entitled "Lexique: (Kihaya, Kinyarwanda. Kigwe)." Includes extensive (56 pp.) French-Kihaya-Kinyarwanda-Kigwe vocabulary in four columns. Earliest vocabulary of each of these languages? This copy with label indicating it was given to the Library of the Royal Colonial Institute by Dr. J. G. McNaughton in March of 1928, with library regulations pasted on the free front endpaper. McNaughton was an early director of the first hospital established at Funafuti. At that time Tuvalu was known as the Ellice Islands and was administered as a British protectorate as part of the British Western Pacific Territories. In 1916 the Gilbert and Ellice Islands Colony was established. From 1916 to 1919 the hospital was under McNaughton's supervision.

"The aim of this lexicon is to enable missionaries to enter as quickly as possible into relations with the natives, and to learn their language by using it; for only by using it can a living language be learned. ... Nor should you trust the reponse of a native when he is asked how he says something or other in his own language. It is only from his lips, when they open spontaneously in the course of conversation, that you can glean words, learn their meanings, know how they are used in phrases, how words and prepositions fit together. We must always keep an open ear and note those words... how they speak among themselves. This is the only way to progress in a language, far more than through indigestible erudition regarding technical and rarely used words" (Preface, tr: BM).

**1903a:** [LILLYbm] *Comparative Handbook of Congo Languages; being a comparative grammar of the eight principal languages spoken along the banks of the Congo river from the west coast of Africa to Stanley Falls, a distance of 1300 miles, and of Swahili, the "lingua franca" of the country stretching thence to the east coast, with a comparative vocabulary giving 800 selected words from these languages, with their English equivalents, followed by appendices on six other dialects*, compiled and prepared for the Baptist Missionary Society, London, by Walter Henry Stapleton. Yakusu, Stanley Falls, Congo Independent State: [Baptist Missionary Society], 1903. Original olive drab olive green cloth over boards, lettered in black. Pp. [6] a b-s t, i ii-xxiii xxiv-xxvi, 1 2-326 327-328. First edition. Not in Zaunmüller. Reinecke 103.288. Hendrix 1931. This copy with the printed bookplate of the Library of the North Wales Baptist College, Bangor, with the ink note "By the author," which may indicate the copy was a gift from the author to the library. Includes comparative vocabulary, pp. 268-304, of 800 English words and the following languages: Kongo [Koongo], Bangi, Lolo, Ngala, Poto, Ngombe, Soko, Kele, Swahili. Appendix 5 includes a vocabulary of 40 words in Mpombo, collected by Stapleton "during a trip up the Mobangi River in the s.s. *Peace* in January 1897...four natives living on the east bank... were induced to come on board for a few minutes, and I seized the opportunity of securing a few words of their language. They gave themselves the name of Bompombo...Either this tongue is a very degraded Bantu language, or, it may be, that here one has passed the limits of pure Bantu..." (p. 314).

"In the month of August 1890, the Rev. J.H. Weeks and myself founded the mission station of Monsembe, the first attempt made towards the evangelisation of the then dreaded cannibal Bangala tribe. The language was unknown, and, of course, unreduced. In the process of fixing terms and grammatical forms for the Gospels of St. Mark and St. John, I gathered a number of comparative notes from the other languages on the river akin to that spoken by the Bangala...The languages then dealt with were Kongo, Bangi, Lolo, Ngala, Poto, and Ngombe. Towards the end of 1897, however, I was called to take charge of the recently opened mission station at Yakusu, near Stanley Falls. Here a new people awaited me speaking yet another language...They the fact that here we had reached the...region of Arab influence...practically forced the inclusion of Swahili" (Preface).

Comparative vocabularies (all thematically arranged), French-Mékyibo [Beti]-Abouré [Abure]-Goua [Gua]-Kyama [Ebrié], pp. 17-33; French-Alaguian [Alladian]-Avikam-Ari [Abidji]-Abè [Abé]-Adyoukrou [Adioukrou], pp. 42-57; French-Dyida [Dida]-Néouolé [Neyo]-Abrioui [Pye Krumen]-Plaoui [Plapo Krumen]-Téoui [Tepo Krumen]-Krao [Western Krahn], pp. 75- 86; French-Assanti [Akan]-Abron-Zéma [Nzema]-Aféma [Anyin]-Baoule [Baoulé], pp. 112-126; French-Soninké [Soninke]-Bozo-Sya [dialect of Southern Bobo Madaré]-Mouin [Mobumrin Aizi]-Gbin [dialect of Éwé], pp. 149-156; French-Mwi [Mwan], pp. 162-163 [considered by compiler as questionable: "collected in 1900 in Bouaké (North Baoulé) from a Mouin woman from the Mankono region, filled with good will, but too elderly for me to list her information as absolutely certain" (p. 148: tr: BM)]; French-Noumou [Kpeego]-Ligbi-Huéla [dialect (Hwela) of Ligbi]-Dyoula [Jula]-Maou [Mahou], pp. 175-182; French-Bemâna [Bamanankan]-Foro [dialect (Foolo) of Djimini Sénoufo]-Tafilé [dialect (Tafire) of Tagwana Sénoufo]-Takponin [Tagwana Sénoufo]-Guimini [Djimini Sénoufo]-Nafâna [dialect (Nefana) of Wojenaka], pp. 198-208; French-Dagâri [Northern Dagara]-Birifo [Northern/Southern Birifor]-Gbanyan [Gban]-Daghoma [Dagbani]-Gouressi [Farefare]-Siti [Sicité Sénoufo]-Degha [Deg], pp. 230-242.

**1904b:** [LILLYbm] *Vocabularies of the Kamba and Kikuyu languages of East Africa*, by Hildegard [Beatrice Ginsburg] Hinde (Mrs. Sidney L. Hinde). Cambridge [Eng.]: University Press, 1904. Original tan cloth over boards, lettered and decorated in black. Pp. [2] i-v vi-xviii, 1 2-75 76. First edition. Zaunmüller 225. Hendrix 804. Includes English-Swahili-Kamba-Kikuyu [Gikuyu], pp. 2-75. With the exception of Johann Ludwig Krapf's 64 page *Vocabulary of six East African Languages*, Tübingen, L. Friederichsen, 1850, this is the earliest published vocabulary of these two languages.

"The object in publishing a Swahili vocabulary parallel with the Kamba and Kikuyu is to emphasise the intimate relationship between the three languages.... The Kamba vocabulary is in two dialects, the Ulu which is used from Machakos to the coast, and the Nganyawa, spoken in part of the Kitui District. I have given the dialect in Kikuyu (that spoken in Jogowini) with which I am personally acquainted.... Both Kamba and Kikuyu are very primitive languages and are entirely without many of the most simple words" (Preface). The Zanzibar dialect of Swahili has been employed, "since it is the most widely known".

**1905:** [LILLY] *An outline dictionary intended as an aid in the study of the languages of the Bantu (African) and other uncivilized races*, by A. C. Madan, London; New York: H. Frowde, 1905. xv, 400 pages; 17 cm. Only the English words are given, and space left for the insertion of the corresponding African words. P. 359-400 and many previous unnumbered pages are blank. Interleaved. Lilly copy with scattered Bantu words entered in ink throughout.

**1906:** [LILLY] *Liberia*, by Sir Harry Johnston. London: Hutchinson & Co., 1906. 2 vols. Original maroon cloth, stamped in gold. [do full description]. Not in Zaunmüller. Hendrix 1893. First edition. Appendix IX: The Vai syllabarium of alphabet. Comparative

vocabularies of Liberian and other West African languages, including De, Bassa, Kru, Sikon, Buzi (Loma), Mindinga, Vai, Gola, Bulum, Fula, Wolof, pp. 1136-1160.

This is a presentation copy from the author: "To Captain F.F.C. Mills R.N.R. | SS 'Jebba' | a souvenir of my pleasant | voyage. | January 1907 | H.H. Johnston."

**1911?:** [LILLYbm] *Vocabulary of English Words & Sentences translated into six languages or dialects, viz.:- Zanzibar Swahili (Ki-Unguja), Mombasa Swahili (Ki-Mvito), Lamu Swahili (Ki-Amu), Patta Swahili (Ki-Pate), Siyu Swahili (Ki-Siu), Bajun (Faza) Swahili (Ki-Tikuu)*, by A. C. Hollis. N.p: n.p, n.d. [London; New York: MacMillan, 1911?]. Bound without separate wrappers. Pp. 1 2-24. ( P. [1] serves as title page; text printed through to, and including, p. 24.) First edition. Ink note on front cover: "With / African Journal - April / 11". May have been distributed with the April 1911 issue of the *Journal of the African Society*, (same paper and print as contemporary issues).

"Two years ago when engaged on philological work for the Encyclopædia Britannica, I realised how little we knew about the variations of the Swahili dialects. Some information could be obtained from Krapf's Dictionary and a little from Steere, but it occurred to me that it would be interesting to students of African languages to have a comparative table of the principal dialects of Swahili placed side by side and exhibiting their most salient features and variations. I communicated my idea to the Hon. A. C. Hollis, Secretary for Native Affairs in the British East Africa Administration, and already well known for his remarkable ethnological studies. I sent him out a printed form and the remainder of the work was entirely his" (Prefatory Note, H. H. Johnston).

**1911-1913:** [LILLY] *The Languages of West Africa*, by Frederick William Hugh Migeod. London, Kegan Paul, Trench, Trubner & Co., 1911-1913. Two volumes. **Vol. I:** *i-vii viii 1 2-373 374-376*. + fold. map. and fold. tables. 21.5 cm. **Vol. II:** [2] *i-iv v-ix x 1 2-436*. 21.5 cm. Both volumes matching original dark-green cloth, lettered in gold. **Vol. I includes:** "Tables of Numerals," pp. 128-161, for approximately 200 West African languages, gathered from previously printed sources, and from the author's own research. The numbers include 1- 12, 20, 30, 51, 58, 59, and 100; "Language specimens," pp. 228- [348] "In this chapter are given a number of sentences translated into fifty-four languages and dialects of West Africa" [including—as listed—Fula, Wolof, Temne, Sherbro, Limba, Mandingo, Susu or Soso, Konno, Mandingo (Dafe), Songhay (Zaberma dialect), Moshi, Dagomba, Kanjarga, Dagarti, Wala, Mamprusi, Grunshi (Isala dialect), Grunshi (Ajolo dialect), Bole (Bole, Bawle), Twi (Akwapim), Ashanti, Nkoranza, Sefwhi, Wassaw, Assin, Akim (Fanti-Akim, locality Swadru), Fanti (Cape Coast dialect), Nsima (Apollonian), Ahanta, Obutu, Bwem (or, Lefena), Guang (Cherepong, Late), Ga (Accra), Adangbe, Krobo, Krepi (Northern), Krepi (Pechi, Peki, or Peki dialect), Awuna, Popo, Igara or Okpoto, Ibo (Onitcha dialect), Ibo (Unwana dialect), Nupe or Tappa, Kakanda, Igbira, and Hausa]. **Vol. II includes:** "Supplement to Numerals in Volume I," pp. 368-382, including over 100 African languages, gathered from sources both unpublished and previously published; and "Language specimens, Supplement to Chapter IX [of Vol. I]," pp. 383-392 [including—as listed—Angas, Gora, Buzi or Loma]. The author's personal copies, with his detailed manuscript annotations detailing the sources of the language specimens, giving names of informants, place, and date collected, with further revisions and additions to the language tables, a letter from a colleague with a list of numerals for the Barnan [?] language, as well as the original ink drawing for the map of languages

inserted in Volume I, a letter to the publisher concerning the map, and a further small, unpublished, language map for the "Bakwe and Bete" dialects.

**1911:** [LILLYbm] *Vocabulaire français-gmbwaga-gbanziri-monjombo, précédé d'éléments de grammaire*, by J. Calloc'h. Paris, P. Geuthner, 1911. Original green wrappers, lettered in black. Pp. 1-5 6-204. First edition. Not in Zaunmüller. Hendrix 650, 654, 1169. Includes French-Ngbaka Ma'bo-Gbanziri-Monjombo [Monzombo], pp. [30]-204. This is the earliest vocabulary of all three of these languages. Second copy: IUW.

"Gmbwaga, Gbanziri and Monjombo [were at that time considered] three dialects of the same language spoken along the Ubangi River, a tributary of the Congo River.... The natives who speak Gmbwaga and Monjombo are commonly called the Bondjos.... According to all who have know the Bondjos, they are most ferocious cannibals imaginable. The history of the Central Ubangi region is replete with scenes of the most terrible cannibalism. Today they have for the most part lost their ferocity and tendencies toward cannibalism and seem disposed to receive the benefits of civilization" (Introduction, tr: BM).

**1912a:** [LILLYbm] *In the Shadow of the Bush*, by P[ercy] Amaury Talbot [1877-1945]. London: William Heinemann, 1912. Original green cloth over boards, lettered in black and with a brown and white illustration on the front cover. Pp. i-vii viii-xiv, 1 2-500; 81 plates + folding map. First edition. Hendrix 1939. Includes as Appendix F: Vocabularies of Six Tribes: Ekoi [Ejagham], Kwa, Efik, Ekurik, Ododop, and Uyanga in the Oban District, using a list of works chosen by Sir Harry H. Johnston in parallel columns with English equivalents, pp. 424-445. This copy with the bookplate of Harry Middleton Hyatt (1895- ), author of *The church of Abyssinia* (London: Luzac, 1928) and *Hoodoo, conjuration, witchcraft, rootwork: beliefs accepted by many Negroes and white persons, these being orally recorded among Blacks and whites* (Western Pub., 1970). Second copy: IUW.

Askell Benton. London, New York, Oxford University Press, 1912. Original blue cloth, lettered in gold. 304 p. 17 cm. Includes "Bolanchi Words as Spoken at Fika," English-Bloanchi, pp. 19-24; Budduma-English list, p. 40; "Classified Lists of Words in Budduma," pp. 49-54; "Select Comparative Vocabulary of Twenty-Four Central African Idioms, by Dr. Barth, Kuka, October 20, 1852," pp. [78]-129, including the following, as given: 1. Batta (Ribaw); 2. Batta (other dialect); 3. Zany (Umbutudi); 4. Imbana (Lere); 5. Margi

(Molgoy); 6. Musgow (Luggoy); 7. Klesem; 8. Affade; 9. Mackeri; 10. Nghala; 11. Budduma (Yedina); 12. Somray; 13. Dam; 14. Kuka (Yaw); 15. Kenga; 16. Bang-bay; 17. Tshire; 18. Bua; 19. Beddanga; 20. Abu Sharib (Mararit and Menagon); 21. Koana (Bumanda); 22. Kury (Karka); 23. Gamergu; 24. Fali (Zober). Second copy: IUW.

"It is hoped that the linguistic material here published may be of some use to future inquirers, and also to those who are able to use it for purposes of comparative philology... I had hope to include in this volume selections from the unpublished MSS. of Koelle, which are referred to in the Preface of his books on Kanuri, but I am informed by his son, the Rev. C. P. Koelle, that these cannot now be found. He has kindly promised, however, to let me have them, if they ever do turn up" (Preface).

Reprinted **1968**: [IUW] as Volume I of: *The Languages and Peoples of Bornu: being a Collection of the Writings of P. A. Benton*, with an introduction by a. H. M. Kirk-Greene. London: Frank Cass, 1968. 304 pp. 19.4 cm. Original red cloth, lettered in silver. A complete reprint of the original edition of Benton's *Notes on the Languages of Western Sudan*, with a new introduction.

**1914**: [LILLYbm] *Specimens of languages from South Nigeria*, by Northcote W[hitridge] Thomas[1868- ]. London: Harrison, 1914. Original black cloth over boards, lettered in gold. Pp. 1-5 6-143 144 + 2 folding maps. First edition. Not in Zauhmüller. Hendrix 402-784-1796-1944. Includes English-Igbo, Bini and Yoruba with dialects, pp. 16-127. Second copy: IUW.

"The Specimens of Languages published in the present volume were collected in the Spring of 1912.... Numerous interpreters were employed, and from the lists ca be gathered all necessary information as to the circumstances under which the vocabularies were collected" (Preface).

**1915**: [LILLY] *An abbreviated vocabulary in Hindustani, Luganda, Lunyoro, Swahili, Nubi, designed for the use of the Uganda Medical Service*. Bukalasa: White Fathers' Printing Press, [1915]. Original maroon wrappers lettered in black.

**1916**: [LILLYbm] *Specimens of Languages from Sierra Leone*, by Northcote W[hitridge] Thomas. London: Harrison and Sons, 1916. Original (unevenly faded) dark blue cloth over boards, lettered in gold. Pp. 1-6 7-62. First edition. Not in Zauhmüller. Hendrix 1943. Includes basic English word lists giving the equivalents in the following languages: Time, Bulom, Krim, Kisi, Sella, Safroko, Biriwa, Tonko, Warawara, Susu, Koranko, Yalunka, Kono, Vai, Mendi I ('Ba), Mendi II (Pujehun), Loko, Gola, and Fula; also separate vocabularies of Kisi, Gola, Dewoi, Basa, and 'Pwese.

"These vocabularies were collected during my recent tour in sierra Leone. Apart from Time, to which some attention was devoted, I have no knowledge of the languages recorded and some of the specimens, notably Susu, in the portion relating to the personal pronouns, appear to be very erroneous.... My Vai informant appeared to have forgotten his own language to some extent, and systematically omitted the plural termination me" (Introduction). "The following vocabularies [Kisi, Gola Dewoi, Basa, and 'Pwese]... are derived from or based on unpublished vocabularies of Koelle, for the loan of which I am indebted to the authorities of the Church Missionary Society. 'Basa and Dewoi are Kru languages, the latter probably almost swallowed up by Vai; while 'Pwese ('Bese, 'Bele) belongs to the Mandingo group" (Vocabularies, p. 43).

**1918:** [LILLYbm] *Langues Sango, Banda, Baya, Mandjia. Notes grammaticales-Mots groupés d'après le sens. Phrases usuelles,--Vocabulaire*, by A. P. Éboué. Paris: Emile Larose, 1918. Original brown wrappers, lettered in black. Pp. [4] I II-III IV, 1-109 110-112. First edition. Title page headed "Afrique Équatoriale Française". Not in Zaunmüller. Hendrix 1874. Includes French-Sango-Banda-Baya-Mandjia [Mandja], pp. [62]-109. This is the one of only two published vocabularies to include Mandja (the other appeared in 1908 in the *Revue Algérienne et Coloniale*).

**1919, 1922:** [LILLYbm] *A comparative study of the Bantu and semi-Bantu languages*, 2 vols., by Sir Harry H[amilton] Johnston [1858-1927]. Oxford: The Clarendon press, 1919, 1922. Original dark blue cloth over boards, decorated in blind and lettered in gold. Pp. [Vol. 1]i-v vi-xi xii, 1 2-815 816-810; [Vol. 2]i-v vi-xi xii, 1 2-544 + folding map. First edition. Not in Zaunmüller. Hendrix 1894. Volume 1 contains "Illustrative vocabularies of 366 Bantu and 87 Semi-Bantu Languages and Dialects," pp. [45]-784, with "Bibliography of the Bantu and semi-Bantu languages," pp. [785]-815. Includes a detailed history of research into the Bantu languages, pp. [1]-14. First published vocabularies of many of these languages. Second copy: IUW.

"This work... was commenced about seven years ago, in pursuance of a plan determined... very much earlier in my life. It was already beginning to be printed in 1914, when the War broke out. The effect of the War ... was greatly to delay the setting up in type; at the same time, the indirect results of the War increased the material at my disposal.... for the campaigns in Africa took place for the most part in countries containing Bantu and Semi-Bantu languages, with the result that many vocabularies were supplied, and thus some languages were brought to light that were previously unknown" (Preface).

**ca. 1920:** [LILLYbm] "Vocabulary of English words and sentences translated into Temne, Baga, Limba, Valu, Bulom, Krim," [compiled by R. F. Honter]. This copy with a few scattered manuscript additions, and the ownership inscriptions of Jean Roehrig (contemporary) and Kadridoba Koutoutou Nirman (?) (13.12.65). Gaston Muraz was the Chief Physician of the Colonial Troops in Chad.

"In spite of repeated research, I have never seen any written specimens of Sara. Do they exist?... Nor is there a written form of the spoken Arabic [in Chad]" (Notes grammaticales, tr: BM).

**1931**: [LILLYbm] *Die drei Sprachen des Bajastammes: To, Labi, Baja*, by Günter Tessmann [1884- ]. Berlin, Seminar für Orientalische Sprachen, 1931. Original pale green wrappers, lettered in black. Pp. 69-70 71-115 116. First edition. Offprint from the Seminar for Oriental Languages in Berlin: "Sonderabdruck [von] Mitteilungen des Seminars für Orientalische Sprachen zu Berlin. Jahrgang 34, Abt. 3, Afrikanische Studien." With the printed line: "Überreicht vom Verfasser" (Compliments of the Author) on the front wrapper. Includes comparative vocabulary of six dialects of Gbaya, pp. 72-73, and paragraphs of vocabulary arranged by grammatical parts of speech as follow: German-To, pp. 71, 73-88, German-Labi [La'bi], pp. 89-99, and German-Gbaya, pp. 99-113. First published vocabulary of To and La'bi (a secret male initiation language).

"The Gbaya tribe, spread over such a large area [in Cameroon and French Equatorial Africa] is not unified, particularly not in cultural terms. I could not determine to what extent the linguistic differences are detailed. I had to content myself with collecting a list of 35 words from each sub-tribe, so that the sub-tribes could be provisionally ordered by comparing the lists.... Of To, prior to this, nothing was known... and to the best of my knowledge, there is no literature of Labi either" (pp. 70-71, 89, tr: BM).

**1932 [1969]**: [IUW] *The tribes of the Ashanti hinterland*, by R. S. Rattray, with a chapter by D. Westermann. Oxford [Eng.] Clarendon Press [1932]. 2 v. (xxxii, 604 p.) illus., ports., fold. map, diagrs. 23 cm. Original dark blue cloth over boards, lettered in

**1936:** [LILLYbm] *Vocabulary of Nigerian Names of Trees Shrubs and Herbs*, [by officers of the Colonial Field Service in Nigeria]. Lagos: Printed and published by the Government Printer, 1936. Original brown stapled wrappers, lettered and decorated in black. Pp. [2] 1-4 5-64. First edition. Not in Zaunmüller. Hendrix 2098 (listing Hanns Vischer as author, although no specific author is indicated in the book, nor is his name included among those specifically credited as compilers in the preface). Includes vernacular-scientific names, pp. 7-37, scientific-vernacular, pp. 39-55, and a list of certain English and trade names in common use, with scientific equivalents, pp. 57-64. The vocabulary collects names from 44 different Nigerian languages, identifying each plant name by language.

"This is the first time the Nigerian names of trees have been collected and published... It is hoped that this may be of use to officers, traders, missionaries and indeed all those whose work takes them into the forests of Nigeria" (Preface, J. R. Ainslie, Chief Conservator of Forests, Nigeria).

**1937a:** [LILLY] *Comparative Vocabularies of African languages*, collected by David Livingstone. "This copy was presented by the Rev. J. MacNair, of the Livingstone Memorial, Blantyre, May, 1937" on title page. No further information given.

Mimeographed copy bound in dark blue cloth over boards, lettered in gold. 1/1A-15/15A, reproducing what are apparently manuscripts lists collected by Livingstone in the 19<sup>th</sup> century. The languages included (not further identified, and not found in Ethnologue, with the exception of Batoka) are: Bakhoba, Bashubea, Balojazi, Maponda, Borotse, Batoka, Banyenko, Secuana and English.

**1937b:** [LILLYbm] *Zentralsudanische Studien: Wörterverzeichnisse der Deutschen Zentral Afrika Expedition 1910/1911, nachgelassene Aufnahmen von Gustav Nachtigal und eigene Sammlungen*, ed. by Johannes Lukas. Hamburg: Friederichsen, De Gruyter & Co., 1937. Original tan wrappers, lettered and decorated in black. Pp.[6] / 2-191 192-194. First edition. Hansische Universität Abhandlungen aus dem Gebiet der Auslandskund, Band 45, Reihe B. Völkerkunde, Kulturegeschichte u. Sprachen, Band 24. Not in Zaunmüller. Includes vocabularies for 38 different African languages of central Sudan, gathered in 1910-11, and added to by the editor from his own research in 1933. Bibliography, pp. 8-9.

"I must emphasize that those who collected this material on the Central African Expedition approached their task without any particular linguistic training. We must be clear about this fact, so that we will not be tempted to expect more from these word lists than they offer... Nevertheless their can be no doubt that this material is of great value as a pioneering work of orientation" (tr: BM).

**1949:** [LILLYbm] *I. Expedition zu den Zentralafrikanischen Kivu-Pygmäen. I. Die physische und soziale Umwelt der Kivu-Pygmäen (Twidan)*, by Peter Schumacher. Brussels: Librarie Falk, succ. Georges van Campenhout, 1949. Original gray wrappers, lettered and decorated in black. Pp. [4] I-V VI-X, 1-5 6-510, I-XXX (plates) XXI-XXII, [8]. First edition. Institut Royal Colonial Belge. Section des Sciences Morales et Politiques. Mémoires. Collection in-4°. Tome III. Not in Zaunmüller. Part III: "Die Kivu Sprachen" (The Kivu Languages), pp. 371-448, devoted entirely to comparative word lists with German meanings for the following languages used by the Kivu Pygmies: Kihunde (Hunde), Matembo (Tembo), Mashi (Shi), Runyaranda (Anda [Ruanda]), Rugoyi (Goyi), Rutwa (Twa). "Nowhere have I found a separate indigenous Pygmy language, nor any language by which the Batwa communicate in their homes" (p. [371], tr: BM). The pygmy tribes studied during this expedition live around Lake Kivu on the border between Zaire and Rwanda.

**1950:** [IUW] *Comparative linguistics: Indri, Togoyo, Ndogo, Feroge, Mangaya, Mondu*, by Stefano Santandrea. Verona, Missioni africane, 1950. 55 p. map. 25 cm. Original marbled tan wrappers, lettered in black. Museum Combonianum, n. 4. Bibliography: p. 15-16. Comparative vocabulary, English Indri-Togoyo-Ndogo-Feroge-Mangaya [Mangayat]-Mondu [Mündü], pp. 21-31.

"This work represents the first step, in print, of a series of studies meant to cover gradually all the languages of western Bahr-el-Ghazal [South Sudan], and possibly touch on those connected with them from over the western border. To begin with, I have chosen an almost unexplored field, comprising two groups and one single language. The first group consists of four languages, of which nothing has yet been written: Feroge, Mangaya, Indri, Togoyo. The second counts five, of which only the first has a literature:

Ndogo; of Sere, Bai, Bviri, together with Ndogo, a small comparative grammar of mine was duplicated at Lalyo Education Office (Equatoria province A. E. Sudan) in 1934. Only later I discovered the existence of the Tagu tribe and their language, now added to the group. Mundu has been dealt with jointly for its relationship, which is especially close in vocabulary, to the two groups in question" (Preface).

**1952a:** [LILLYbm] *A Southern Rhodesian Botanical Dictionary of Native and English Plant Names*, by H[iram] Wild. Salisbury, Southern Rhodesia: The Government Printer, 1952. Original brown cloth over boards, lettered and decorated in black. Pp. [4] i-viii, 1 2-139 140. First edition. Not in Hendrix. Includes a vernacular-botanical [English and African languages with Latin botanical names] dictionary, pp. 6-45, and botanical-vernacular, pp. 46-139. Southern Rhodesian languages represented include: Shona (including the following dialects: Shangwe, Korekore, Manyika, Ndau, Karanga, Kalanga, Zezuru), Tonga, Nguni, Ndebele, and Lozi.

"The average Rhodesian native is a first-class field botanist, largely because he makes use of so many of our indigenous species in medicine, witchcraft, for building materials, cordage and for food.... After asking [the native] the name of a species get him to repeat it several times and then repeat it back to him until he is satisfied that you have it right or as near right as he can ever expect a mere European to pronounce a word in his language. He will almost always be very patient with you and, in fact, find it quite amusing" (Introduction).

Second edition, enlarged and revised **1972:** *A Rhodesian botanical dictionary of African and English plant names*, by Hiram Wild, revised and enlarged by H. M. Biegel and S. Mavi. Salisbury, Rhodesia: Government Printer, 1972. Original green cloth over boards, lettered in gold. Pp. [4] i-xii, 1-281 282. Second edition, enlarged and revised. Includes list of common names in English and Rhodesian languages, pp. 1-77, followed by a botanical-common name dictionary with field notes, pp. 78-272. This copy with the ink stamps, dated 2 April 1973, of the Extension Office, Department of Conservation and Extension, Mount Darwin, and is signed by the extension office.

"The first edition, published in 1953 [sic], has been out of print for some time and in spite of its many shortcomings it has proved to be a considerable help to all those working in the field.... The need is considerable therefore, for an improved and up-to-date edition" (Hiram Wild, Preface to the Second Edition).

**1965:** [LILLYbm] *Ekoid Bantu Languages of Ogoja. Part I*, by David W. Crabb. London: Cambridge University Press in association with the West African Languages Survey and the Institute of African Studies, Ibadan, 1965. Original green wrappers, lettered and illustrated in purple. Pp. *i-viii* ix-xii, 1 2-108. First edition. Series: West African Language Monographs 4. Hendrix 1868. Includes English-Ekoid Bantu comparative vocabulary, pp. 52-104.

"The present work, covering as it does the phonology and comparative vocabulary of 14 languages of the Ekoid group...promises to be a unique contribution to African Linguistics. [It] marks a bold departure in field technique and one of potential importance from both the scientific and human relations point of view... The particular group of languages ...is also of special interest. It is representative of a considerable number of languages in the same general northwestern Bantu border area whose status as Bantu has been a matter of controversy. The present writer has considered almost all such languages...to be genuinely Bantu in what seemed decisive even if fragmentary evidence" (Foreword, Joseph H. Greenburg).

"A conservative estimate of the number of languages spoken in the Ogoja area...would place the number at about fifty. One of the clear genetic sub-groupings among these is the group here called Ekoid Bantu Languages, and they are distributed throughout three administrative divisions, along with other, more remotely related languages of the area.... The fourteen languages of the Ekoid Bantu group [include]...Ekparabong [listed in Ethnologue as a dialect of Ndoe], Balop, Bendeghe-Northern Etung, Northern Etung, Southern Etung, Efutop, Nde, Nselle, Nta, Abanyom, Nkim [Nkem dialect of Nkem-Nkem], Nkumm [Nkum dialect of Nkem-Nkum], Nnam, Ekajuk" (Introduction).

**1966a:** [LILLYbm] *Awutu, Larteh, Nkonya and Krachi, with glosses in English and Twi*, by J. M. Stewart. Legon: Institute of African Studies, University of Ghana, 1966. Original stapled wrappers, with cloth spine. 84 pp. First edition. Comparative African Wordlists No. 2. Hendrix 101/279/895/1223/1933. "The four languages ... are all members of the Guan (Guang) subgroup of a group called 'Akan' by ... Greenburg" spoken in Ghana. Includes the first published vocabulary of Awutu.

**1966b:** [LILLYbm] *Ga, Adangme and Éwé (Lomé) with English gloss*, by M. E. Kropp. Legon: Institute of African Studies, University of Ghana, 1966. Original stapled wrappers, with cloth spine. 79 pp. First edition. Comparative African Wordlists No. 2. Hendrix 13. These languages are all spoken in Ghana.

**1967a:** [LILLYbm] *Lefana, Akpafu and Avatime with English gloss*, by M. E. Kropp. Legon: Institute of African Studies, University of Ghana, 1967. Original stapled wrappers, with cloth spine. First edition. Comparative African Wordlists No. 3. "The three languages ... are what is commonly known as 'Togo-Remnant' languages. ... Lefana [Lelemi] and Akpafu are spoken in the Buem area of the Volta Region in Ghana... Avatime is a linguistic enclave within Éwé territory," also in the Volta Region of Ghana.

**1967-1971:** [LILLYbm] *Comparative Bantu: An Introduction to the Comparative Linguistics and Prehistory of the Bantu Languages*, 4 vols., by Malcolm Guthrie. Farnborough: Gregg Press, 1967-1971. Original bright orange cloth over boards, lettered in gold. Pp. [Vol. 1] 1-8 9-143 144; [Vol. 2] 1-6 7-180; [Vol. 3] 1-8 9-326; [Vol. 4] 1-6 7-248. First editions. From the library of Carleton T. Hodge. Hendrix 1885 ("The most comprehensive listing of Bantu cognates to date is contained in this important work"). Second copy: IUW.

"One important consideration for a study such as this is the wealth of available data, since there are over 300 distinct languages in the Bantu family. It is true that the amount of reliable information about some of these languages is still very meagre, nevertheless an increasing number of important studies are becoming available. In addition to these, research facilities that have been available to me in both Africa and London have augmented considerably the quantity of trustworthy data serving as the basis for this present work" (Introduction).

**1968:** [LILLYbm] *Benue-Congo Comparative Wordlist* [Vol. 1], ed. by Kay Williamson & Kioyshi Shimizu.: Ibadan, Nigeria: University of Ibadan, West African linguistic society, 1968. Original gray, white and yellow wrappers, lettered in black, with black linen spine. Pp. [2] i-xxxiii xxxiv-xxxviii, 1-233 234. First edition. Cover title: *Benue-Congo Comparative Wordlist Volume 1*. Includes glosses on 58 words in 194 Benue-Congo languages. These are preceded by four Adamawa-Eastern languages "for the sake of comparison, as they help to indicated which items are limited to Benue-Congo. Each gloss occupies four pages, three of which are filled with the forms of the various languages while the fourth contains a list of the 'pseudo-roots' postulated, together with any notes or comments made by members of the group" (Introduction).

"The West African Linguistic Society wishes to express its gratitude to all the contributors to this book (whose names are given under the list of languages), and to all

the members of the Benue-Congo Working Group who initiated the idea of collecting a comparative vocabulary of the Benue-Congo languages" (Acknowledgements). The second volume contains glosses on a further 59 words. IUW holds both volumes.

"The Benue–Congo group of languages constitutes the largest branch of the Niger–Congo language family, both in terms of sheer number of languages, of which Ethnologue (2009) counts 900, and in terms of speakers, numbering perhaps 350 million" (Wiki).

**1969a:** [LILLYbm] *A Comparative Vocabulary of Abuan Dialects*, by Hans Wolff. Evanston, IL: Northwestern University Press, 1969. Original light green cloth over boards, lettered in black. Pp. *i-ii iii-ix x, 1-3 4-293 294*. First edition. First printed vocabulary of the language. Hendrix 2/901/1295. From the library of Carleton T. Hodge. Second copy: IUW. Ethnologue and other sources consider Abua, Odual, Kugbo, and Ogbia as separate languages.

"This work represents the only documentation in depth of five closely related dialects of the eastern Niger Delta area-Abua, Odual, Kugbo, Eastern Ogbia, and Western Ogbia" (from loosely inserted advertisement). "At the time of his death in 1967, [Hans Wolff] was working intensively on the data he had collected [and]...had gone some way toward assembling a comparative vocabulary. The vocabulary as here presented was prepared from the original working cards, of which there were several thousand...they provide much-needed data on a most interesting group of languages for which we have had practically no documentation until now" (Jack Berry, Northwestern University).

**1970:** [LILLYbm] *Brief grammar outlines of the Yulu and Kara languages (Bahr el Ghazal, Sudan - Central African Republic) with a small comparative vocabulary of Bongo, Baka, Yulu [and] Kara*, by Stefano Santandrea. Rome: Printed by the Sodality of St. Peter Claver, 1970. Original brown wrappers, lettered in black. Pp. *1-5 6-239 240*. First edition. Hendrix 283. Includes Bongo-Baka-Yulu-Kara," pp. 197-234, arranged alphabetically in groups according to parts of speech. This comparative vocabulary was apparently first published separately by the author in Bologna, by Nigrizia, in 1963 (Museum Combonianum, n. 15); it may have been reprinted in the author's study of Bongo grammar as well in that same year. A French study of Kara and Yulu with vocabularies was published in Paris in 1987 by Pascal Boyeldieu: *Les langues fer ("kara") et yulu du nord centrafricain: esquisses descriptives et lexiques* [see under KARA]. Robert Brisson published a *Lexique francais-baka* (Douala: R. Brisson, 1984), preceded by a *Petit dictionnaire baka-francais* (Douala: [College Libermann], 1979). Second copy: IUW.

"None of these tribes [the Yulu, Binja, and Kara] is indigenous to the Bahr el Ghazal.... We know for certain that the Yulu and the Kara came into this land recently (after the defeat and death of Sanusi, 1911-1912) from what it now the Central African Republic (former Ubangi-Shari=Oubangi-Chari). The Binja formerly lived on the eastern flank of the Kara, both within and beyond the present border of Sudan, from where they gradually moved to Kafiakinji around the year 1900... In 1930-31 the three tribes were

ordered to resettle nearer to .Raga... The importance of these languages depends, more than on the number of tribesmen by whom they are spoken, on the role which they play, forming... as a link between the farthest rings of a long big chain: the Sara-Bagirmi-Bongo group" (Introductory Notes).

"The matter of finding equivalents for English terms in the three vernacular languages is complicated by the fact that each has a number of dialects; each language, also, is undergoing relatively rapid expansion in certain lexical fields and many loan words from English are in a state of partial assimilation into the languages. One purpose of this Glossary is to give a brief comparative indication of ways in which these languages are being adapted to the new demands being made upon them" (Introduction).

"A small comparative Vocabulary of Kresh Dongo Aja Banda," English-Kresh-Dongo-Aja-Banda, pp. [255]-277, with annotations.

"Nothing has been written on Kresh, the most important language of western B. el G., except *A Small Grammar* (21 typewritten pages of medium size) circulated among missionaries and officials in Raga area. It was composed ((in 1931-32) by a confrère of

ours, Fr. I Simoni, acknowledged by all as the foreigner who knew the language best... The material embodied in [the present] work was partly composed by me [with the assistance of Kornelio Tamirobo] and partly by myself, alone, in field-work among the Kresh (1940-42; 1950-52). The notes on Dongo and Woro, all my personal work, add value to this study, together with a touch of novelty, being absolutely 'virgin land.' Those on Aja, too, are the result of field-work among adults of that tribe... on a language completely unknown. The material on Baka was gathered during my stay in Rumbek (1955)... [it was included in the comparative vocabulary published in the author's *Brief Grammar Outlines of the Yulu and Kora Languages* (Rome, 1970)]. As far as I know, it [was] the first time this language appeared on the world's stage. And now the language itself (grammar, structure...) is dealt with likewise for the first time" (Reasons for this Publication, pp. 12-13).

"The data presented in these sketches will prove frustrating to both comparativists and those interested in synchronic studies. Besides only touching a small part of each language, the data and analysis often stop in 'mid-stream'. However, I felt that even such incomplete materials were worth making available. This is the only grammatical data on any of these languages, and for most of them the word lists are the longest ones available. Moreover, it is unlikely that the materials here will soon be superseded by more complete studies since they are all small languages which will probably not become the object of any major research effort" (Preface).

Original white wrappers, lettered in black and decorated in blue. Pp. *i-iv v-xvii xviii*, 1-253 254; with several linguistic maps. First edition. Series: Delta series, no. 6. Includes Proto-Edoid-English compared with up to twenty Edoid languages, pp. 132-235, and an English-Edoid index, pp. 236-245. Second copy: IUW.

"Throughout this work, we shall use the term Edoid for the group of Nigerian languages earlier called 'Edo'... and the 'Beningruppe'.... The most ridiculous of the views frequently expressed in lay circles about the relationship between Edo (Bini) and other Edoid languages is that the language of Benin City, the capitol of the great Benin Empire, is the original language of the Edoid peoples the progenitor or the ancestor language, of which all the other languages are descendants... I suggested ... that the name Edo in linguistic usage-though not necessarily in ethnological or anthropological usage - be restricted to the language of Benin City and its environs....As for the larger group of which Edo is one member, I suggested that we follow a well-established tradition of linguistic nomenclature by calling them the 'Edoid' group" (Introduction).

"North Guang Comparative Wordlist" thematically arranged, English-Chumburung-Krachi-Nawuri-Gichode-Gonja, pp. [11]-71. Includes index to the English words, pp. [73]-87.

"The wordlists included here were gathered during the period of September, 1985 through March, 1987. They were phonetically transcribed at the time of their collection and were also recorded on audio cassette (along with the noises of children playing and roosters crowing in the background). The five languages involved in this study are all from the North Guang subgroup of the Guang branch of Domoe, which is in turn, part of the greater Kwa unit of Niger-Congo" (Preface).

**1999a:** [IUW] *Barawa lexicon: a wordlist of eight South Bauchi (West Chadic) languages: Boghom, Buli, Dott, Geji, Jimi, Polci, Sayanci and Zul*, by Ronald Cosper. Muenchen: LINCOM Europa, 1999. 13, [142] p.; 21 cm. Library binding, incorporating the original yellow wrappers, lettered in black. Series: LINCOM. Wordlist: English-Boghom-Buli-Dott [dialect of Dass]-Geji [on rectos of the unpaginated leaves], English-Jimi-Polci-Sayanci [Saya]-Zul [dialect of Polci], [on versos of the unpaginated leaves].

"Since Gowers' original (1907) work on the vocabularies of the languages of Bauchi Province [which remains unpublished in manuscript at the University of Ibadan], only a small amount of work on this family has appeared [a summary of this work is included].... The term Barawa is sometimes used as an ethnonym [for the languages treated here], especially those to the West of Bauchi City" (Introduction). Ethnologue lists Dass (with Barawa as an alternate name) for the group name of these languages.

"In 1999, Ronald Cosper published Barawa lexicon: A wordlist of eight South Bauchi (West Chadic) languages: Boghom, Buli, Dott, Geji, Jimi, Polci, Sayanci and Zul. It considered most of the languages to be endangered and found that most individuals who spoke any of these languages were also bilingual in Hausa, which may have had influence on their lexicons and grammars. The book contains a lexicon of 852 words from the different Barawa languages. The words are organized based on semantic and

syntactic categories. Semantic noun categories are followed by adjectives, numerals, pronouns, prepositions, conjunctions and a number of categories of verbs" (Wiki).

"The research for this comparative dictionary was begun in the autumn of 1998. It was in September 1998 when—after a long search—I was able to get first acquainted with the famous 'Angass Manual' by H. D. Foulkes... The importance of the Angas lexicon for the Afro-Asiatic comparison soon became clear to me... Therefore, in autumn 1998, I started to set up regular phonological and lexical correspondences between Angas and its closely related neighbours.... A systematic comparison of the Angas languages, however, became possible for me only during my research on the Chadic lexicon [1999-2003]. As a result, I have prepared a complete comparative lexicon of the Angas languages, which is now published here" (Foreword).

[**AFRIKAANS**] Afrikaans (/ˌɑːfriˈkɑːnʃ/ or /-ˈkɑːnz/)[5][6] is one of the official languages of South Africa. It is a West Germanic language spoken in South Africa, Namibia, and to a lesser extent, Botswana and Zimbabwe. It evolved from the Dutch vernacular of South Holland spoken by the mainly Dutch settlers of what is now South Africa, where it gradually began to develop distinguishing characteristics in the course of the 18th century. Hence, it is a daughter language of Dutch, and was previously referred to as "Cape Dutch" (a term also used to refer collectively to the early Cape settlers) or "Dutch" (a derogatory term used to refer to Afrikaans in its earlier days). The term is ultimately derived from Dutch "Afrikaans-Hollands" meaning "African Dutch". It is the first language of most of the Afrikaner and Coloured people of Southern Africa (Wiki).

Includes Afrikaans-English, pp. [1]-276, and English-Afrikaans (with separate title page), pp. <sup>2</sup>[1]-355. This is the first true dictionary of Afrikaans.

"Simply a list of words like this is of no use whatever'-was the reply of a Dutch linguist when we submitted to him a proof sheet of this work...But this adverse criticism did not discourage us in the least. Most decidedly a Dictionary as we offer is of threefold use. Its first object is to assist in bringing about the much desired uniformity in the spelling of Cape Dutch...In the second place we trust this Dictionary will assist Afrianders in learning English; and last not least, it will assist English inhabitants of South Africa in learning Cape Dutch....And herewith we offer this work to the public. Every one that knows what a difficult task it is to compile a dictionary, especially the first dictionary of a language, will need no apology from us for the imperfections of which we feel fully conscious" (Preface-dual language).

**[AGAW LANGUAGES: POLYGLOT]** The Agaw or Central Cushitic languages are spoken by small groups in Ethiopia and, in one case, Eritrea. They form the main substratum influence on Amharic and other Ethiopian Semitic languages. The Central Cushitic languages are classified as follows (after Appleyard):

Awngi (South Agaw) spoken southwest of Lake Tana, much the largest, with over 350,000 speakers (Kunfal, spoken west of Lake Tana, is poorly recorded but most likely a dialect of Awngi).

Northern Agaw: Blin–Xamtanga: Blin (North) spoken in Eritrea around the town of Keren (70,000 speakers); Xamtanga (Central Agaw; also called Khamir, Khamta) 143,000 speakers in the North Amhara Region. Qimant (Western Agaw) nearly extinct, spoken by the Qemant in Semien Gondar Zonem (dialects Qwara – nearly extinct, spoken by Beta Israel formerly living in Qwara, now in Israel; Kayla – extinct, formerly spoken by some Beta Israel, transitional between Qimant and Xamtanga).

There is a rich literature in Agaw but it is widely dispersed: from fascinating mediaeval texts in the Qimant language, now mostly in Israeli museums, to the modern, flourishing and topical in the Bilin language, with its own newspaper, based in Keren, Eritrea. Much historical material is also available in the Xamtanga language, and there is a deep tradition of folklore in the Awngi language (Wiki).

Ethnologue lists the Agaw languages as: Awngi, Bilin, Qimant and Xamtanga (see under individual listings for each language).

This is the first dictionary of Central Cagayan Agta.

"Central Cagayan Negrito is spoken by about 300 Negritos calling themselves Agtas. They live in an area of the Cagayan Valley, northern Luzon, Philippines...Physically they are of aboriginal stock, dark-skinned, often fuzzy-haired, and close to pygmy size. They are still largely nomadic, living by hunting (with bow and arrow), or foraging for food, in the forest...There are approximately 1000 entries in the vocabulary. As well as words in everyday usage, some words have been included for their cultural interest" (Preface).

[**AHOM**] The Ahom language is a nearly extinct Tai language spoken by the Ahom people who ruled the Brahmaputra river valley in the present day Indian state of Assam between the 13th and the 18th centuries. The language is classified in a Northwestern subgrouping of Southwestern Tai owing to close affinities with Shan, Khamti and, more distantly, Thai. As the Ahom rulers of the area assimilated to the more numerous Assamese, the Indo-Aryan Assamese language gradually replaced Ahom as a spoken language, a process which became complete during the 19th century. As of 2000, Ahom was only known by approximately 200 priests of the traditional Ahom religion and only used for ceremonial or ritualistic purposes. Although the language is no longer spoken, the exhaustive 1795 Ahom-Assamese lexicon known as the Bar Amra preserves the form of the language that was spoken during the Ahom Kingdom. Ahom is an important language in Tai studies. It was relatively free of both Mon-Khmer and Indo-Aryan influences and has a written tradition dating back to the 13th century (Wiki).

Baptist Mission Press, 1920. xv, 327 p. 26.5 cm. First edition. Original black cloth over boards, spine lettered in gold. Ahom-Assamese-English, pp. [2]-327. From the library of the noted linguist Johannes Rahder, with his ownership stamps and a few notations in ink.

"It is gratifying to note that the Ahom-Assamese-English Dictionary has after all been completed. The task was a tremendous one for a man of my knowledge and ability. I had to do this work in addition to my own duties as Deputy Inspector of Schools.... But as the Administration was pleased to entrust to me the work of the compilation of the Dictionary, in addition to my own duties, I had to take the burden on my shoulder, thought it was very heavy.... Each Ahom word in Ahom character has been given first, then the Part of Speech, pronunciation, both in Assamese and English equivalent Shan words where possible, literal meanings of compound words and phrases, and meanings both in Assamese and English in order. I have spared no pains to make the book complete as far as possible. Here I would mention that I have taken help from Dr. Grierson's books entitled 'Notes on Ahoms' and 'Ahom Cosmogony'. As I have no knowledge of other Tai-languages, I have put down in my book the equivalent Shan words from his books, I am, therefore, greatly indebted to him for this" (Preface)

[**AHTENA**] Ahtna or Ahtena is the Na-Dené language of the Ahtna ethnic group of the Copper River area of Alaska. The language is also known as Copper River or Mednovskiy. The Ahtna language consists of four different dialects. Three of the four are still spoken today. Ahtna is closely related to Dena'ina. The similar name "Atnah" occurs in the journals of Simon Fraser and other early European diarists in what is now British Columbia as a reference to the Tsilhqot'in people, another Northern Athapaskan group (Wiki).

"Ahtna is the language of the Copper River area of south central Alaska. It is a member of the Athabaskan language family, a group of some thirty-five closely related languages of northern and western North America. Today Ahtna is spoken by fewer than one hundred persons, almost all of whom are over the age of forty. At this time there are about twelve hundred people of Ahtna decent." The first relatively extensive dictionary of the language appears to have been the *Ahtna Noun Dictionary* of 1975 by Buck and Kari, preceded by various briefer vocabularies. This is **by far the most comprehensive dictionary of the language**. Kari includes a complete history of Ahtna language work, pp. 9-11.

[**AINU**] Ainu (/ˈamuː/; Ainu: アイヌ・イタク Aynu=itak; Japanese: アイヌ語 Ainu-go) or Hokkaido Ainu is the sole survivor of the Ainu languages. It is spoken by members of the Ainu ethnic group on the northern Japanese island of Hokkaido. Until the 20th century, Ainu languages were also spoken throughout the southern half of the island of

Sakhalin and by small numbers of people in the Kuril Islands. Only the Hokkaido variant survives, the last speaker of Sakhalin Ainu having died in 1994. Hokkaido Ainu is moribund, though attempts are being made to revive it (Wiki).

This copy printed for "The Honourable Edward Monckton, as Subscriber to the Oriental Translation Fund" (special printed leaf preceding title page). From the library of Charles Boxer.

"Ezo (蝦夷?, also spelled Yezo or Yeso) is a Japanese name which historically referred to the lands to the north of the Japanese island of Honshu. It included the northern Japanese island of Hokkaido which changed its name from Ezo to Hokkaido in 1869, and sometimes included Sakhalin and the Kuril Islands. The word "Ezo" can also refer to the peoples that the Japanese encountered in these lands, referred to in modern times as the Ainu people. The first published description of Ezo [Yeso] in the West was brought to Europe by Isaac Titsingh in 1796. His small library of Japanese books included *Sangoku Tsūran Zusetsu* (三國通覽図説 An Illustrated Description of Three Countries) by Hayashi Shihei. This book, which was published in Japan in 1785, described the Ezo region and people. In 1832, the Oriental Translation Fund of Great Britain and Ireland supported the posthumous abridged publication of Titsingh's French translation of *Sankoku Tsūran Zusetsu*. Julius Klaproth was the editor, completing the task which was left incomplete by the death of the book's initial editor, Jean-Pierre Abel-Rémusat" (Wiki).

**1889 [1905]:** [LILLY] *An Ainu-English-Japanese dictionary (including A grammar of the Ainu language.)*, by John Batchelor [1854-1944]. Second edition. Tokyo: Methodist Pub. house; London, K. Includes compiler's preface to second edition. Zaunmüller, col. 5 (citing only third and fourth editions). First edition was published in 1889. Ainu-Japanese-English, pp. [1]-525. Earlier publications of Ainu include *Vocabularium der Ainu-Sprache*, by August Pfizmaier, Vienna, 1854, and a Ainu-Russian dictionary by M. M. Dobrotvorski, Kazan, 1875.

"Sixteen years have elapsed since the publication of the compiler's last Ainu Dictionary, and during that period time he has had the work constantly before him correcting and enlarging it. It was not his original intention to print a new dictionary and the work of revision was only done byway of recreation and for the purposes of his private work as a Missionary among the Ainu. But inasmuch as the first edition has been long out of print, and during the last decade more than five hundred friends have asked for copies, he has thought it advisable to once more place the results of this studies before the public in the form asked for" (Preface).

Contents: Preliminary material.--Grammar.—"Part II: An Ainu-English-Japanese dictionary," Ainu-Japanese-English, pp. [1]-556 [third pagination]—Part III: "An English-Ainu vocabulary," pp. [1]-98 [fourth pagination]. Original blue cloth, decorated in blind and lettered in gold. Includes compiler's preface to revised edition. Zaunmüller, col. 5.

"This book is the latest revised edition of the Author's *Ainu-English-Japanese Dictionary and Grammar*, to which an English-Ainu Vocabulary has been added. In issuing new editions of books it has been the general custom to reprint old prefaces and introductions as they have stood, but in this work the Author has departed from this rule and revised the introduction as well as the body of the book. The last edition appeared in 1905 but since that time the work has been in process of constant attention and has been considerably enlarged" (The Author's Preface, dated June 30, 1926).

[**AKAN**] Akan /ə'kæn/ is a Central Tano language that is the principal native language of the Akan people of Ghana, spoken over much of the southern half of that country, by about 58% of the population, and among 30% of the population of Ivory Coast. Three dialects have been developed as literary standards with distinct orthographies: Asante, Akuapem (together called Twi), and Fante, which despite being mutually intelligible

were inaccessible in written form to speakers of the other standards. In 1978 the Akan Orthography Committee (AOC) established a common orthography for all of Akan, which is used as the medium of instruction in primary school by speakers of several other Akan languages such as Anyi, Sehwi, Ahanta, and the Guang languages. Bound in later plain boards, edges sprinkled. English-Fante vocabulary, pp. 371-384, and a short grammar of the Fante and Ashanti languages. Appears to be the earliest published vocabulary of the language.

"The following Vocabulary has been compiled in the Fantee Dialect, as promising to be more useful to those Europeans who might frequent the African coasts, than the Ashantee, which is spoken principally in the interior; it does not appear necessary to give a vocabulary of both languages; a person who becomes acquainted with the Fantee, will very readily acquire the Ashantee, whenever he shall have occasion to mix with the people of that country. It must be recollected that the Fantees nor Ashatees have any *written language*. To put, therefore, that upon paper of which there is no example, is necessarily difficult, an can scarce bbe expected to be free from faults" (Chapter XIII, pp. 308-309).

Original gray cloth, lettered and ruled in black. Second, revised and enlarged edition. Includes English-Tshi vocabulary, pp. 1-247.

"This book, originally compiled as a 'Vocabulary of the Akra-or Ga-Language', was edited in three languages as an 'English-Tshi-Ga-Dictionary' in 1872 [published 1874] by the Rev. J. G. Christaller. Since about 15 years the first edition had been out of print, and the deficiency of an English-Vernacular Dictionary for the English learning scholars was the longer the more strongly felt. ... The undersigned, having withdrawn from the Goldcoast, felt it a pleasure to render some help to those still actively engaged in Mission- and Schoolwork by revising and enlarging this book.... It is not too much to say that this little book meets a great requirement of Government Officers and Merchants as well as of the educated native population on the Gold Coast, and it is sure to command an extensive circulation throughout this Colony" (Preface, a. Th. Mohr, dated May 1909, Kirchheim-Teck, Germany).

Contemporary unlettered black quarter-leather and marbled paper over boards. First edition. Includes Tshi-English, pp. [1]-631. First full dictionary of the language.

"This Dictionary follows 'A Grammar of the Asante and Fante Language called Tshi...' by the same author, Basel 1875... but it is hoped that the present Dictionary will be more welcome to educated Fantes on account of its more prominent practical usefulness, and tthe work has been long in coming out, it is hoped ... that it will not prove short-lived. If it has become larger than any other existing Dictionary of a Negro language, this at least has not been the intention of the author; the ample materials collected with the help of clever and intelligent natives made it a matter of course, if not a duty, to store up whatever may be sueful to his successors... The persons for whose benefit the author has written are 1. The missionaries... 2. Europeans who are interested in philology or ... called to have intercourse with the natives of the coast or inland countries... 3. The educated natives... The materials have been collected during more than 25 years study of the language" (Preface).

"The first edition of the present work—commonly called 'The Tshi Dictionary'—published in 1881, has for a number of years been out of print. As the book was much in demand by both Europeans and educated natives, it was decided that a new edition should be issued. Unfortunately, financial difficulties, the uncertainty concerning a new script, and an accident which befell the editor, delayed its appearance....The material consists, for the most part, of the contents of the former edition. To these have been added numerous words, meanings, and phrases gathered from the printed Tshi literature and from manuscripts; also contributions sent in by Rev. A. Jehle, and the Editor's linguistic collection which he brought home with him from the Gold Coast.... In order to keep price and size of the book within moderate limits, not all the material available has been inserted. For the same reason some of the Appendices also have been omitted. Of the Akuapem dialect not many words will be found wanting; which cannot, however, be said of the other dialects. Regarding this deficiency, and in other respects as well, there is still room left for improvement" (J. Schweizer, Preface).

Adinkra are visual symbols, originally created by the Akan, that represent concepts or aphorisms. Adinkra are used extensively in fabrics, pottery, logos and advertising. They are incorporated into walls and other architectural features. Fabric adinkra are often made by woodcut sign writing as well as screen printing. Adinkra symbols appear on some traditional akan gold weights. The symbols are also carved on stools for domestic and ritual use. Tourism has led to new departures in the use of the symbols in such items as T-shirts and jewelry. The symbols have a decorative function but also represent objects that encapsulate evocative messages that convey traditional wisdom, aspects of life or the environment. There are many different symbols with distinct meanings, often linked with proverbs. In the words of Anthony Appiah, they were one of the means in a pre-literate society for "supporting the transmission of a complex and nuanced body of practice and belief" (Wiki).

[**AKATEKO**] Akatek (Acateco) is a Mayan language spoken by the Akatek people primarily in the Huehuetenango Department, Guatemala in and around the municipalities of Concepción Huista, Nentón, San Miguel Acatán, San Rafael La Independencia and San Sebastián Coatán. A number of speakers also live in Chiapas, Mexico. It is a living language with 58,600 speakers in 1998, of which 48,500 lived in Guatemala and the

remaining in Mexico. Akatek is closely related to the two Mayan languages, Q'anjob'al and Jakalteq. Akatek was regarded as a dialect of the Q'anjob'al language until the 1970s, when linguists realized that it has a distinct grammar from that of Q'anjob'al. That it has been thought a dialect of Q'anjob'al is reflected in the many names Akatek has had through time. One of its primary names before it was named Akatek was Western Q'anjob'al, but it has also been called Conob and various names including Q'anjob'al and the municipality where it is spoken (Wiki).

Lee. Seattle, Washington: Lowman & Hanford, 1896. Original gray wrappers (front wrapper detached), lettered and illustrated in black. Pp. 1-5 6-23 24. First edition. Not in Zauhmüller. The first English-Aleut dictionary, since reprinted several times in facsimile. Second copy: IUW.

"The author, in placing this little book before the public, feels...he adds his mite to the useful and timely literature of the day. The ground has not been covered before, and all travelers in the Alaskan Peninsula will appreciate to its fullest extent the purpose of this work. The aborigines of this far away country have no written language, and this work aims to put before the traveler or trader a means of communication with this people which it is hoped will be of mutual benefit to both. Many years of residence in this country and thorough familiarity with its people, have, we believe, well equipped us for the realization of our task" (Preface).

It is the first fully documented dictionary of the language" (from the rear wrapper).

[**ALGONQUIN**] Algonquin (also spelled Algonkin; in Algonquin: Anicinàbemowin or Anishinàbemiwin) is either a distinct Algonquian language closely related to the Ojibwe language or a particularly divergent Ojibwe dialect. It is spoken, alongside French and to some extent English, by the Algonquin First Nations of Quebec and Ontario. As of 2006, there were 2,680 Algonquin speakers,[3] less than 10% of whom were monolingual. Algonquin is the language for which the entire Algonquian language subgroup is named. The similarity among the names often causes considerable confusion (Wiki).

**1612:** [LILLY] *A map of Virginia.: VVith a description of the countrey, the commodities, people, government and religion / VVritten by Captaine Smith, sometimes governour of the countrey. Whereunto is annexed the proceedings of those colonies, since their first departure from England, with the discourses, orations, and relations of the salvages, and the accidents that befell them in all their iournies and discoveries. Taken faithfully as they were written out of the writings of Doctor Russell. Tho. Stvdley. Anas Todkill. Ieffra Abot. Richard Wiefin. Will. Phettiplace. Nathaniel Povvell. Richard Pots. And the relations of divers other diligent observers there present then, and now many of them in England. By VV. S. At Oxford: Printed by Joseph Barnes, 1612. 2 pts. in 1 v. ([8], 39, [1]; [4], 110 p., [1] folded leaf of plates: 1 map; 19 cm. (4to) . Includes [Algonquin] Indiana vocabulary, prelim. p. [5-7].*

"John Smith included a Virginia Algonquian vocabulary in his 1612 *Map of Virginia*, 'Because many doe desire to knowe the maner of their language.' 'The maner of their language,' not 'their language': people want to hear it, not speak it, Smith perceived. After some basic nouns and short phrases, Smith's vocabulary concludes with the famously enigmatic and expansive command (or is it an offer?), 'Bid Pokahontas bring hither two little Baskets, and I will give her white beads to make her a chaine/Kekaten pokahontas patiaquagh ningh tanks manotyens neer mowchick rawrenock audowgh.' Smith represented himself as magically fluent in Virginia Algonquian. But was he giving trinkets to his love? Proffering a wampum belt of peace? Trading beads for baskets or putting beads in baskets? Seventeenth-century English readers were unlikely to be lucky enough to need to know this sentence if they journeyed to Virginia, so this is no Berlitz. Rather, Smith uses the vocabulary to show that he was at home in this other world, and yet also still himself, the English gallant. Such a perfect prospect, he implied, awaited those who would follow him. Interestingly, however, as Ives Goddard has pointed out, Smith's translations do not represent fully-inflected Algonquian. The sentences thus demonstrate either the rudimentary nature of Smith's linguistic knowledge, or, if they represent a pre-existing pidgin, the collective involvement of many Algonquians and

speakers of other languages in developing a lingua franca. Like the enigmas that arise from the English versions of the sentences alone, the presence of pidgin undermines Smith's authority to define the line between familiar and strange" (Laura J. Murray: "Vocabularies of Native American Languages: A Literary and Historical Approach to an Elusive Genre," *American Quarterly* 53.4 (2001) 590-623). **1618:** [LILLY] *Histoire de la Nouvelle-France: contenant les navigations, découvertes, & habitations faites parles François és Indes Occidentales & Nouvelle-France, par commission de noz roys tres-chrétiens, & les diverses fortunes d'iceux en l'execution de ces choses, depuis cent ans jusque à hui. "Initially, we envisioned a phonological and grammatical study of the Alladian language. Since our stay in the Côte d'Ivoire had to be shortened, we were forced to abandon the idea of presenting a complete grammatical description of the language. In its place, recognizing the rapid disappearance of certain traditional techniques and the terms relating to them, and measuring the profound vulnerability of the lexicon to non-integral loan-words which tended to supplant the original basic vocabulary, we believed it would not only be interesting, but also a matter of some urgency, to carry out a deeper ethno-linguistic study" (Avant-propos, tr: BM).

[**ALLENTIAC**] Allentiac (Alyentiyak), also known as Huarpe (Warpe), was one of two known Warpean languages. It was native to Cuyo in Argentina, but was displaced to Chile in the late 16th century before being described. The people became mestizo and lost their language soon after (Wiki).

Ethnologue does not list this extinct language.

[**ALSEA**] Alsea or Alsean (also Yakonan) was two closely related speech varieties spoken along the central Oregon coast. In 1920 there were still a few remaining speakers of Alsea on the Siletz Reservation in northwestern Oregon. First substantial two-way vocabulary of Alsea.

[**ALTAI**] Gorno-Altai (also Gorno-Altay) is a Turkic language, spoken officially in the Altai Republic, Russia. The language was called Oyrot prior to 1948. Due to its isolated position in the Altai Mountains and contact with surrounding languages, the classification of Altai within the Turkic languages has often been disputed. Altai is spoken primarily in the Altai Republic (Southern Altai) and Altai Krai (Northern Altai). Alongside Russian, Altai is an official language of the Altai Republic. The official language is based on the Southern dialect spoken by the group called the Altay-Kiži, however in the few years it has also spread to the Northern Altai Republic. Though traditionally considered one language, Southern Altai is not fully mutually intelligible with the Northern varieties. Written Altai is based on Southern Altai, and according to Ethnologue is rejected by Northern Altai children. In 2006, a Cyrillic alphabet was created for the Kumandy variety of Northern Altai for use in Altai Krai (Wiki).

Ethnologue lists Altai as two separate languages: 1) Northern Altai (atv: alternate names: Telengit, Telengut, Teleut), and 2) Southern Altai (alt: alternate names: Altai, Oirot, Oyrot).

[**ALTAIC LANGUAGES: POLYGLOT**] Altaic /æl'teɪk/ is a proposed language family of central Eurasia, now widely seen as discredited. Various versions included the Turkic, Mongolic, Tungusic, Koreanic, and Japonic languages. These languages are spoken in a wide arc stretching from northeast Asia through Central Asia to Anatolia and eastern Europe. The group is named after the Altai Mountains, a mountain range in Central Asia. The language families included in the proposal share numerous characteristics. Supporters of Altaic, sometimes called "Altaicists", view the similarities as arising from common descent from a proto-Altaic language spoken several thousand years ago. Opponents maintain that the similarities are due to areal interaction between the language groups concerned. Some linguists think that the cases for either interpretation are equally strong; they have been called the "skeptics". Another view accepts Altaic as a valid family but includes in it only Turkic, Mongolic, and Tungusic. This view was widespread prior to the 1960s but has almost no supporters among specialists today [2016]. The expanded grouping, including Korean and Japanese, came to be known as "Macro-Altaic", leading to the designation of the smaller grouping as "Micro-Altaic" by retronymy. Most proponents of Altaic continue to support the inclusion of Korean and Japanese (Wiki).

[**ALUTOR**] Alyutor or Alutor is a language of Russia that belongs to the Chukotkan branch of the Chukotko-Kamchatkan languages. The Alutor are the indigenous inhabitants of the northern part of the Kamchatka Peninsula. The language is unwritten and moribund; in the 1970s residents of the chief Alutor village of Vyvenka under the age of 25 did not know the language. In recent years the Vyvenka village school has started teaching the language. Until 1958 the language was considered the "village" (settled) dialect of the Koryak language, but it is not intelligible with traditionally nomadic varieties of Koryak. The autonym [ˈnəməlʔən] means "villager" (Wiki).

[**AMAHUACA**] Amahuaca is an indigenous American Panoan-family language spoken by several dozen people in the Amazon Basin in Perú but up to 130 and also in Brazil by 220 people. It is also known as Amawaka, Amaguaco, Ameuhaque, Ipitineri, and Sayaco. The most closely related languages are Cashinahua and Shipibo. It is an official language. There are 20 monolinguals. 30% are literate and 50% are literate in Spanish. Amahuaca uses a Latin-based script. Schools are bilingual, but the language has a negative connotation. A dictionary has been developed along with grammar rules and bible portions (Wiki).

[**AMERICAN SIGN LANGUAGE**] American Sign Language (ASL) is the predominant sign language of Deaf communities in the United States and most of anglophone Canada. Besides North America, dialects of ASL and ASL-based creoles are used in many countries around the world, including much of West Africa and parts of Southeast Asia. ASL is also widely learned as a second language, serving as a lingua franca. ASL is most closely related to French Sign Language (LSF). ASL originated in the early 19th century in the American School for the Deaf (ASD) in Hartford, Connecticut, from a situation of language contact. Since then, ASL use has propagated widely via schools for the deaf and

Deaf community organizations. Despite its wide use, no accurate count of ASL users has been taken, though reliable estimates for American ASL users range from 250,000 to 500,000 persons, including a number of children of deaf adults. ASL is not a form of pantomime, but iconicity does play a larger role in ASL than in spoken languages. English loan words are often borrowed through fingerspelling, although ASL grammar is unrelated to that of English. Many linguists believe ASL to be a subject-verb-object (SVO) language, but there are several alternative proposals to account for ASL word order (Wiki)

[**AMHARIC**] Amharic (/æmˈhærɪk/ or /ɑːmˈhærɪk/; Amharic: አማርኛ Amarəñña, IPA: [amariɲːa] ( listen)) is a Semitic language spoken in Ethiopia. It is the second-most spoken Semitic language in the world, after Arabic, and the official working language of the Federal Democratic Republic of Ethiopia. Amharic is also the official or working language of several of the states within the federal system. It has been the working language of government, the military, and the Ethiopian Orthodox Tewahedo Church throughout medieval and modern times. The 2007 census counted nearly 22 million native speakers in Ethiopia.[8] Outside Ethiopia, Amharic is the language of some 2.7 million emigrants.[citation needed] It is written (left-to-right) using Amharic Fidel, ልደል, which grew out of the Ge'ez abugida—called, in Ethiopian Semitic languages, ልደል fidel ("writing system", "letter", or "character") and ኣቡጊዳ abugida (from the first four Ethiopic letters, which gave rise to the modern linguistic term abugida). There is no agreed way of transliterating Amharic into Roman characters (Wiki).

"The appearance of a new Dictionary of the Amharic Language needs no apology. The only work of this kind hitherto published, is Ludolf's 'Lexicon Amharico-Latinum,' Frankfort, 1698. That distinguished scholar... composed an excellent Ethiopic Grammar and Lexicon. He subsequently availed himself of the assistance of Abba Gregorius... to prepare a Grammar and a Lexicon of the Amharic Language. The object of this last work was, to prepare to the way for the civil and religious improvement of Abyssinia. Considering the scanty means which he had for acquiring a knowledge of the Amharic Language, it is surprising how much Ludolf accomplished in his two Amharic works.... The typographic execution of [the present dictionary] does honour to Mr. [Richard] Watts, in every respect. As also for the Amharic type... cast by him... It is the best type which has ever been used in Ethiopic literature; and the Abyssinians, who saw it in the Pentateuch and the Psalms, were much pleased with it.... May [God] render [this dictionary] ... a channel for conveying the salutary influences of Evangelical Doctrine and of Christian Civilization, from enlightened Europe, over benighted Abyssinia!" (Preface). Includes a detailed description of Isenberg's compilation of the dictionary. Isenberg published a grammar of Amharic in 1842 [a copy is held by the Lilly Library].

"The words and phrases in this work have been taken from the mouth of natives. As many as possible of the phrases are such as have been said spontaneously, i.e. are not the products of cross-examination... I have...paid more attention to what I have heard natives say to each other than to what they have said to me, and have not excluded words or modes of expression on account of their so-called vulgarity: the object in view being to give some description not so much of what, in the opinion of learned Europeans and natives, Abyssinians ought to say as of what in point of fact they do say" (Preface to Part I; also reprinted as Preface to Part II). Armbruster also refers to the "magnificent

Vocabolario" of Guidi "my indebtedness to which I desire to acknowledge most gratefully."

"It is now nine years since the printing of this book began. In its original shape the vocabulary was completed in 1906 ... Part I and II took two years each to print, the proofs following me about in the Sudan and Abyssinia, where I was continually travelling. By 1910, when the printing of Part III began, I had accumulated much fresh material which found its way into the book as it passed through the press. Then came more travels in Abyssinia, residence at Gondar, ten days from the nearest post office, and finally the war, when the printing which had never been rapid, almost came to a standstill" (Preface to Part III).

This second edition is almost doubles the number of entries in the first (see p. viii). This copy from the library of the noted linguist Johannes Rahder, with his title note on the cover.

"I compiled this vocabulary with no pretense or illusion of creating a literary work. Having lived in Ethiopia for many years I soon realized the lack of a Italian-Amharic vocabulary and the need for one. This is what made me decide to compile this vocabulary, simply as a practical matter that might prove of value to those who wished to study the Amharic language, particularly those who in their office or business find it necessary to maintain written or verbal relations with Abyssinian businessmen, notables or employers" (p. vii, dated 1917.: tr: BM).

"This collection of Ethiopian plant names follows a preliminary list which appeared in 1956... It is ... hoped... that it will stimulate others to expand our knowledge of Ethiopian plant names so that some day a much more comprehensive list may be prepared in Amharic characters by an Ethiopian botanist: no simple undertaking in a country of this size with its many languages, dialects and inflections" (Introduction). An enlarged glossary published in Ethiopia in later years (1970, 1980, 1987) by Michael Wolde seems to have fulfilled the author's hope.

"Although Amharic is the national language of Ethiopia and English its international language, until publication of this book ... there was no concise Amharic-English, English-Amharic dictionary" (from rear cover). "Since the publication of the oldest dictionaries, Amharic has developed considerably. Progress in the field of education, literary works of the last 50 years, expansion of technology, contact with the Western world, and natural development within the language itself have all contributed greatly not only to the enrichment of the language but also to numerous changes within the existing vocabulary.... Needless to say, in Armbruster's time there was no need for expressions such as 'United Nations, Trusteeship committee, Security Council, control tower, book review, agenda, airlines, basketball, elevator,' and so on.... As a result of the inadequacy of the existing dictionaries, the student is greatly handicapped in his studies. The present dictionary is intended to remedy this situation. Since this is only a concise dictionary-particularly the Amharic-English section-...the remedy can be only partial. There is still an urgent need for a complete Amharic-English dictionary [see Kane below]" (Preface).

[AMIS] Amis is the Formosan language of the Amis (or Ami), an indigenous people living along the east coast of Taiwan. Currently the largest of the Formosan languages, it is spoken from Hualien in the north to Taitung in the south, with another population near the southern end of the island, though the northern varieties are considered to be separate languages. Government services in counties where many Amis people live in Taiwan such as the Hualien and Taitung train stations broadcast in Amis alongside Mandarin. However, few Amis under the age of 20 in 1995 spoke the language, and it is not known how many of the 138,000 ethnic Amis are speakers (Wiki).

[**AMUZGO, SAN PEDRO AMUZGOS**] Amuzgo is an Oto-Manguean language spoken in the Costa Chica region of the Mexican states of Guerrero and Oaxaca by about 44,000 speakers.[3] Like other Oto-Manguean languages, Amuzgo is a tonal language. Four varieties of Amuzgo are officially recognized by the governmental agency, the Instituto Nacional de Lenguas Indígenas (INALI).[5] They are: (i) Northern Amuzgo (amuzgo del norte, commonly known as Guerrero or (from its major town) Xochistlahuaca Amuzgo); (ii) Southern Amuzgo (amuzgo del sur, heretofore classified as a subdialect of Northern Amuzgo); (iii) Upper Eastern Amuzgo (amuzgo alto del este, commonly known as Oaxaca Amuzgo or San Pedro Amuzgos Amuzgo); (iv) Lower Eastern Amuzgo (amuzgo bajo del este, commonly known as Ipalapa Amuzgo). Three dictionaries have been published for Upper Eastern Amuzgo in recent years. For Northern Amuzgo, no dictionary has yet been published, yet it too is very actively written. Lower Eastern Amuzgo and Southern Amuzgo (spoken in Huixtepec (Ometepec), for example) are still not well documented, but work is underway (Wiki).

[**ANDAANDI**] Dongolawi [Andaandi in Ethnologue] is a Nubian language of northern Sudan. It is spoken in the Nile Valley, from roughly the 3rd cataract (south of Kerma) upstream to the bend in the Nile near ed Debba. With population displacement due to the Aswan High Dam there are communities of speakers in eastern Sudan (Khashm el Girba). Dongolawi is an Arabic term based on the town of Old Dongola, the centre of the historic Christian kingdom of Makuria (6th to 14th century). Today's Dongola was founded during the 19th century on the western side of the Nile. The Dongolawi call their language Andaandi [anda:ndi] "(the language) of our home". Nearly all Dongolawi speakers are also speakers of Sudanese Arabic, the lingua franca of Sudan. Arabic–

Dongolawi bilingualism is replacive in the sense that Dongolawi is threatened by complete replacement by Arabic (Jakobi 2008). Dongolawi is closely related to Kenzi (Mattokki), spoken in southern Egypt. They were once considered dialects of a single language, Kenzi-Dongolawi. More recent research recognises them as distinct languages without a "particularly close genetic relationship." Apart from these two languages spoken along the Nile, three extinct varieties were included under Kenzi-Dongolawi (Wiki).

[**ANDAMANESE LANGUAGES, GREAT**] The Great Andamanese languages are an extinct language family once spoken by the Great Andamanese peoples of the Andaman Islands (India), in the Indian Ocean. The last fluent speaker, of what may have been a creole based on Aka-Jeru, died in 2009. By the late 18th century, when the British first settled on the Andaman islands, there were an estimated 5,000 Great Andamanese living on Great Andaman and surrounding islands, comprising 10 distinct tribes with distinct but closely related languages. From the 1860s onwards, the setting up of a permanent British penal colony and the subsequent arrival of immigrant settlers and indentured labourers, mainly from the Indian subcontinent greatly reduced their numbers, to a low of 19 individuals in 1961. Since then their numbers have rebounded somewhat, reaching 52 by 2010. However, by 1994 seven of the ten tribes were already extinct, and divisions among the surviving tribes (Jeru, Bo and Cari) had effectively ceased to exist due to intermarriage and resettlement to a much smaller territory on Strait Island. Some of them also intermarried with Karen (Burmese) and Indian settlers. Hindi increasingly serves as their primary language, and is the only language for around half of them. The last known speaker of the Bo language died in 2010 at age 85. About half of the population now

speak what may be considered a new language (a kind of mixed or koine language) of the Great Andamanese family, based mainly on Aka-Jeru. This modified version has been called "Present Great Andamanese" by some scholars, but also may be referred to simply as "Jero" or "Great Andamanese".

[**ANDAMANES LANGUAGES: POLYGLOT**] The Andamanese languages are the indigenous languages of the Andaman Islands, spoken by the Andamanese Negritos. There are two clear families of Andamanese languages, Great Andamanese and Ongan, as well as Sentinelese, which is unknown and therefore at present unclassifiable [Wiki].

**1887:** [LILLY] *A manual of the Andamanese languages*, by Maurice Vidal Portman. London: W.H. Allen, 1887. Original leather lettered in gold. Zauhmüller, col. 11. IUW has a copy with a pasteover on the title page from the publisher Crosby & Lockwood. This copy with ink stamp of the "Superintendent's office Port Blair" (where the author was employed). Contains an introduction followed by an English-Andamanese dictionary, a section with dialogues and finally a list of "common objects." An earlier work dealing with these dialects is *Vocabulary of Dialects spoken in the Nicobar and Andaman isles*, by F.s. de Roepstorff, Fort Blair, 1874.

**1898:** [LILLYbm] *Notes on the languages of the south Andaman group of tribes*, by M. V. Portman. Calcutta: Office of the superintendent of government printing, India, 1898. Original dark green cloth over boards, lettered in gold and decorated in blind. Pp. [2] i-v vi-viii, 1 2-389 390, <sup>2</sup>1 2-191 192 + large folded map in original pocket. First edition. Zauhmüller, col. 11. "A comparative vocabulary, containing 2,286 words in English, with their equivalents in the Aka-Bea-da [Aka-Bea], Akar-Bale, Puchikwar [A-Pucikwar], Aukau-Juwoi [Oko-Juwoi] and Kol [Aka-Kol] languages," pp. <sup>2</sup>[1]-<sup>2</sup>191. An "analysis of the words in the comparative vocabulary," consisting of detailed explanations of each word, is given on pp. 189-387. Portman was "Officer in Charge of the Andamanese." Of the languages treated in this study, only Puchikwar [A-Pucikwar] is still spoken in the Andaman Islands; the others are now extinct.

"The present work forms a part of my record of the Andamanese, undertaken for the British museum and the government of India. ... The Andamanese languages are very copious, the people having names for many animate and inanimate objects, and words to express the parts of those objects, their actions, and conditions, in great detail. A complete dictionary of any one Andamanese language would contain many thousand words, and would involve years of special labour; my present intention, therefore, is rather to give a general idea of languages, and mental attitude of the people of the South Andaman Group of tribes; and, with a Comparative Vocabulary and its Analysis, to show how the words and languages are constructed, and how the different languages compare with each other. As the Andamanese race, in the Great Andaman, is now almost extinct, more than this cannot be done. A colored map showing the area occupied by each tribe accompanies the letterpress" (Preface).

[**ANEITYUM**] Anejoñ or Aneityum (also spelled Anejom, and formerly Aneiteum, Aneityumese) is an Oceanic language spoken by 900 people (as of 2001)[1] on Aneityum Island, Vanuatu (Wiki).

Ethnologue: aty. Alternate names: Aneiteum, Aneiteumese, Anejom.

**1882:** [LILLYbm] *A dictionary :of the Aneityumese language. In two parts. I. Aneityumese and English. II. English and Aneityumese. Also outlines of Aneityumese grammar. And an introduction, containing notices of the missions to the native races, and illustrations of the principles and peculiarities of the Aneityumese language*, by John Inglis. London & Edinburgh: Williams and Norgate, 1882. Original black pebbled cloth over boards, lettered in gold and decorated in blind. Pp. *i-iii* iv-xxix xxx, 31 32-200 (lacks front free endpaper). First edition. Not in Zaunmüller. Aneityumese-English, pp. [46]-112, and English-Aneityumese, pp. [121]-200. The author was "thirty years a missionary, first of the Reformed Presbyterian Church of Scotland, and then of the Free Church of Scotland, in New Zealand and the New Hebrides" (from title page). This is the first dictionary and grammar of the language.

"Utility, not literary distinction, was my aim in preparing this Dictionary. My object was to have all the words in the language at my command while engaged in translating a part, and editing the whole, of the Aneityumese Bible... The Dictionary contains all the words collected by the late Rev. Dr. Geddie, the Rev. Joseph Copeland, and myself. They are nearly five thousand in number... As the Aneityumese belongs to a new family of tongues, the Papuan, comprising, perhaps, at least a hundred dialects or languages, and which are spoken from Fiji to Papua or New Guinea, and as a Grammar and Dictionary of only one of these, namely, that of Fiji, has been published [Hazlewood and Calvert, London, 1850-1852], it appears to me that the publication of a Grammar and Dictionary of the Aneityumese language would be a contribution to this science from a quarter all but entirely new" (Preface). {Aneityumese is} "a language both copious and exact, capable of giving utterance to every thought and every idea, every want and every wish, known to those to whom it is their mother tongue. The words are all as precise in their meaning as if they had been defined by Johnson or Jamieson. The grammar is as regular and uniform as if it had been formed by Lindley Murray" (Introduction). Aneityum, now Anatom, is an island at the southern end of the former New Hebrides, now Vanuatu, a group of some seventy islands administered for 74 years by the United Kingdom and France. Vanuatu became independent within the Commonwealth in July 1980.

[**ANEM**] The Anêm language is a language isolate spoken in five main villages along the northwestern coast of New Britain island, Papua New Guinea: Malasoño (where it is spoken alongside Bariai), Karaiai, Mosiliki, Pudêlîŋ, Atiatu (where it is spoken alongside Lusi) and Bolo (where it is spoken alongside a version of Aria). It is also spoken by small numbers of people, mostly of Anêm descent, scattered among the surrounding villages. There are two main dialects. Akiblîk, the dialect of Bolo was near functional extinction in

1982, the youngest speaker being about 35 years of age then. The main dialect is spoken in the other villages named above. There are about 550 speakers. Anêm has been restructured under the influence of Lusi, the local inter-community language (Wiki).

"The author of the present work wishes to state that the vocabulary, which forms part of it, has existed in manuscript for many years. It is one of several vocabularies of various dialects of the Gypsy tongue, made by him in different countries. The most considerable-that of the dialect of the Zincali or Rumijelies (Romany Chals) of Spain-was published in the year 1841. Amongst those which remain unpublished is one of the Transylvanian Gypsy, made principally at Kolosv~r in the year 1844" (p. [5]). "The Gypsy language...may consist of some three thousand words, the greater part of which

are decidedly of Indian origin.... [T]he rest consists of words picked up by the Gypsies from various languages in their wanderings from the East" (The English Gypsy Language).

Pp. 1-2 3-14 15-16. First edition. Cf. Zaubmüller, col. 407 (listed as Black, author, London 1922). Reprinted November 1915 from the Bulletin of the New York Public Library of October, 1915. Compiled and edited from manuscripts in the New York Public Library by George F. Black. Romani-English vocabulary, pp. 5-14.

"The vocabulary is the result of inquiries made by Mr Sinclair among hundreds of Gypsies in different parts of the United States, and is confined strictly to the English-speaking Gypsies born in Great Britain or their American descendants. Mr. Sinclair says in one of his manuscripts that no one Gypsy was familiar with all the words he had noted, but many of them knew nearly all. Most of the younger generation born in the United States, however, understood very few of them. The only other vocabulary of American-Romani is that published by Professor Prince in the *Journal* of the American Oriental Society ["The English-Romany jargon of the American roads," vol. 28, pp. 271-308; 1907], to which the present list forms a valuable supplement. The Romani...is now little more than a broken jargon based grammatically on English. The vocabulary, on the other hand, abundantly shows its Indian origin" (p. 3).

[**ANGOLAR**] Angolar Creole, also Ngola (Lungua N'golá), is a minority language of São Tomé and Príncipe, spoken in the southernmost towns of São Tomé Island and sparsely along the coast. It is a creole language, based partially on Portuguese with a heavy substrate of a dialect of Kimbundu (port. Quimbundo), a Bantu language from inland Angola, where a number of enslaved Africans were abducted from to this island. According to their external history, the following three types of creole have been distinguished: plantation creoles, fort creoles, maroon creolea. (Bickerton 1988). Angolar is considered a maroon creole (Wiki).

[**ANII**] The Anii language (formerly Bassila, Basila, Baseca, Ouinji-Ouinji ~ Winji-Winji) is spoken in Benin, and central eastern Togo and central eastern Ghana. It is part of the geographic group of Ghana Togo Mountain languages (formerly known as the Togorestsprachen or Togo Remnant languages) of the Kwa branch of Niger-Congo. There are four major dialect groups in Anii, which are quite different from each other, even to the point that some of the dialects are not mutually intelligible (Tompkins and Kluge 2009). The name "Anii" was chosen in May 1979 by the Anii people as the official name for the language because it is a word that is common to all the Anii dialects. It is an interjection meaning roughly 'do you hear?', or 'do you understand?'. Some of the older names have colonial or derogatory connotations and should no longer be used, and just be kept for reference (Wiki).

[**ANTILLEAN CREOLE FRENCH LANGUAGES**] Antillean Creole is a French-based creole, which is primarily spoken in the Lesser Antilles. Its grammar and vocabulary include elements of Carib and African languages. Antillean Creole is related to Haitian Creole but has a number of distinctive features; however, they are mutually intelligible. The language was formerly more widely spoken in the Lesser Antilles, but its number of speakers is declining in Trinidad and Tobago and Grenada. While the islands of Dominica and Saint Lucia are officially English-speaking, there are efforts to preserve the use of Antillean Creole, as well as in Trinidad & Tobago and its neighbour, Venezuela. In recent decades, Creole has gone from being seen as a sign of lower socio-economic status, banned in school playgrounds, to a mark of national pride. Since the 1970s, there has been a literary revival of Creole in the French-speaking islands of the Lesser Antilles, with writers such as Raphaël Confiant and Monchoachi employing the language. Edouard Glissant has written theoretically and poetically about its significance and its history. Antillean Creole is spoken, to varying degrees, in Dominica, Grenada, Guadeloupe, Îles des Saintes, Martinique, Saint-Barthélemy (St. Barts), Saint Martin, Saint Lucia, Saint Vincent, French Guiana, Trinidad and Tobago and Venezuela (mainly in Macuro, Güiria and El Callao). Dominican, Grenadian, St. Lucian, Trinidadian, Brazilian (Lanc-Patuá) and Venezuelan speakers of Antillean Creole call the language patois. Antillean Creole has approximately 1 million speakers and is a means of communication for migrant populations traveling between neighbouring English- and French-speaking territories (Wiki).

Ethnologue lists as separate Antillean Creole French languages: Guadeloupean Creole French: gcf. Alternate Names: Guadeloupean Creole, Kreyol, Patois, Patwa; Saint Lucia Creole French: acf. Alternate Names: Grenadian Creole French, Kwéyòl, Lesser Antillean Creole French, Patois, Patwa.

the Anyuak: a tribe living in one of the most remote regions of the Upper Nile in the Southern Sudan and in Southwestern Ethiopia... When I started my research-work as a lecturer at the University of Khartoum I could not find a single document about Anyuak language [commentary continues with further discussion of potential published and unpublished sources]...I am confident that the linguists amongst the readers will forgive my shortcomings and find some inspiration to deepen the understanding of Anyuak language. [ANUTA] The Anuta language (or Anutan, locally te taranga paka-Anuta) is a Polynesian Outlier language from the island of Anuta in the Solomon Islands. It is closely related to the Tikopia language of the neighboring island of Tikopia. Anuta is generally regarded as Nuclear Polynesian language, although it bears considerable Tongic

influence. In 1977, Richard Feinberg published a two-volume dictionary [see below] (Wiki).

I present this work... not as the finished product of a trained linguist, but as a source of data upon which professional linguists may draw for their own purposes. My working knowledge of the language and the opportunity to build on my predecessors" mistakes should make the present work list superior to any of those that have gone before" (Introduction).

[**ANYIN**] The Anyin language is spoken principally in Côte d'Ivoire and Ghana. It is an Akan member of the Kwa branch of the Niger–Congo family of languages. The closest relative of Anyin is Baoulé, and it is also close to Nzema. The dialects of Anyin are Sanvi, Indenie, Bini, Bona, Moronou, Djuablin, Ano, Abe, Barabo and Alangua. The Morofo (one quarter of speakers) variety may be classified as a separate language. In Côte d'Ivoire, there are approximately 610,000 native speakers of Anyin, along with 10,000 to 100,000 second-language users. There are a quarter-million speakers of Anyin in Ghana (Wiki).

Western Apache-English, pp. 1-280, and English-Western Apache, pp. 281-485. Second copy: IUW.

"This book is dedicated to all the White Mountain Apaches for holding on to their language and using it as a communication tool to develop their self-sufficient government and make their reservation a better place to live. The process of developing and researching this dictionary took over ten years, since the work was all done on a volunteer basis, when time allowed" (Foreword, Wesley Bonito). "This dictionary... is intended primarily for the Apaches who are learning to read and write their own language.... This dictionary project... was begun in 1981. The primary sources [included] the *Western Apache Dictionary* compiled by Edgar Perry... in 1972.... The present edition is the first dictionary to list both Apache to English and English to Apache and contains over 10,500 Apache words, with 4,400 dialect variations and 2,200 entries indicating alternate expressions and forms" (Preface).

"The present Apatani-English-Hindi dictionary is the third to be published in our dictionary series. By providing Hindi and English glosses an attempt has been made to simultaneously expose the Apatani speakers to both the official and associate official languages of the country. We hope that the non-Apatani speakers who will have occasion to come into contact with them either in administration or for trade purposes will find the dictionary useful" (Foreword). "Data for the dictionary were collected in the field primarily from one informant by elicitation through the word list prepared in the Institute. They were then crosschecked with some other informants" (Editor's Note). "The materials for the present work were collected during my field work in Apatani plateau, during October-December, 1975 and April-June, 1977, [with identification and background information on informant]" (Introduction, P. T. Abraham).

"The tribe of Indians called Ipurinã, a cannibal tribe, inhabit only the River Parús, one of the largest affluents of the Amazon.... They are one of the largest of thirty-four or more tribes inhabiting the giant river... They are naturally indolent, and lounge during the greater part of their time in their hammocks, which they do not even take the trouble to weave, but beg, or barter for them with neighboring tribes.... When, however, their isolated condition, during several centuries, without any incentive from without to ambition to a higher life, is taken into consideration...they should largely be exonerated from the charge of indolence of indifference. Being so widely scattered... their number can not be easily ascertained ... they may perhaps muster 2,000 or 3,000 altogether... No effort has yet been made by Brazil to civilize this tribe... [Ipurinã] is spoken exclusively by the Indians of the Ipurinã tribe. their language has been confined to themselves, and I have not seen it in writing or heard of its being reduced to such, except by myself.... The present notes, although insufficient in quantity, are the result of the closest attention and hardest study imaginable for nearly two years, and this volume is the fifth of the kind I have written" (Preface). "[The Pamarí are] a tribe of Indians with spotted skins, inhabiting the Middle Parús... The above list of words and phrases I acquired verbally from the Pamaris themselves; I have not yet seen the language reduced to writing anywhere else" (p. 108).

[**ARABELA**] Arabela is a nearly extinct indigenous American language of the Zaparoan family spoken in two Peruvian villages in tropical forest along the Napo tributary of the Arabela river. [**ARABIC (pre-1850)**] Arabic (Arabic: العَرَبِيَّة, al-‘arabiyyah [alʕaraˈbijja] ( listen) or Arabic: عربي, arabī [ˈʕarabiː] ( listen)) is the Classical Arabic language of the 6th century and its modern descendants excluding Maltese. Arabic is spoken in a wide arc stretching across Western Asia, North Africa, and the Horn of Africa. Arabic belongs to

the Afroasiatic family. The literary language, called Modern Standard Arabic or Literary Arabic, is the only official form of Arabic. It is used in most written documents as well as in formal spoken occasions, such as lectures and news broadcasts. Arabic is a Central Semitic language, closely related to Aramaic, Hebrew, Ugaritic and Phoenician. Standard Arabic is distinct from and more conservative than all of the spoken varieties, and the two exist in a state known as diglossia, used side-by-side for different societal functions.

Some of the spoken varieties are mutually unintelligible, both written and orally, and the varieties as a whole constitute a sociolinguistic language. This means that on purely linguistic grounds they would likely be considered to constitute more than one language, but are commonly grouped together as a single language for political or religious reasons. If considered multiple languages, it is unclear how many languages there would be, as the spoken varieties form a dialect chain with no clear boundaries. If Arabic is considered a single language, it is perhaps spoken by as many as 420 million speakers (native and non-native) in the Arab world, making it one of the six most-spoken languages in the world. If considered separate languages, the most-spoken variety would most likely be Egyptian Arabic with 89 million native speakers—still greater than any other Afroasiatic language. Arabic also is a liturgical language of 1.6 billion Muslims. It is one of six official languages of the United Nations (Wiki).

**c. 1620:** [LILLY] *Arabic-Latin lexicon* [manuscript], ca. 1620? By Christoph Crinesius (1584-1629). [230] leaves; 21 cm. Cite as: Crinesius, Christoph. Arabic-Latin lexicon, ca. 1620. Lilly Library manuscripts, Indiana University, Bloomington, Indiana. Notes: German orientalist and philologist. Christoph Crinesius studied in Jena and Wittenberg where he was a pupil of the Hebrew scholar Laurentius Fabricius. In 1624 he received the appointment of Professor of Oriental Languages at Altdorf. He published works on Syriac [*Lexicon Syriacum*, Wittenberg 1612], a Samaritan grammar, and an Aramaic grammar and dictionary. Text in Arabic and Latin, and occasional Greek. Extensive manuscript Arabic-Latin lexicon, very probably in the hand of Christoph

Crinesus, inscribed on the front pastedown in a different hand from the manuscript itself, 'Opus M. Christoph Crinesii, Acad. Aldorff.' The manuscript on paper is arranged verso-recto with vellum tabs at fore-edge marking each letter of the Arabic alphabet; ruled in double columns (numbered to 539) and includes a Latin index, [29] leaves at end (11 leaves preceding the index and several pages elsewhere blank). The sources of the Arabic words and their meanings are recorded. These sources include 'Erp. Gram.' (i.e. Erpenius's *Grammatica Arabica*, first published in 1613), 'Proverb. Arab.' (i.e. Erpenius and Scaliger's *Proverbiorum Arabicorum centuriae duae*, 1614) and 'Matth.' (most likely Peter Kirsten's *Notae in Evangelium S. Matthaei*, 1611). There are also references to 'Tit.' (probably the Arabic edition of the Book of Titus published in Leiden in 1612), 'Judae' (an Arabic version of St. Jude's Epistle published in Breslau in 1611), and Kirsten's *Grammatices Arabicae* (1608).

**[ARABIC, ALGERIAN SPOKEN]** Algerian Arabic, or Algerian (known as Darja, or Dziria in Algeria) is a language derived from a variety of the Arabic languages spoken in northern Algeria. It belongs to the Maghrebi Arabic language continuum and is mutually intelligible with Tunisian and Moroccan. Like other varieties of Maghrebi Arabic, Algerian dialects have a mostly Semitic vocabulary, with significant Berber substrates and numerous loanwords from French, Ottoman Turkish and Spanish. Algerian Arabic is the native language of 75% to 80% of Algerians, and is mastered by 95% to 100% of them. It is essentially a spoken language used in daily communication and entertainment, while Classical Arabic is generally reserved for official use and education (Wiki).

**[ARABIC, CHADIAN SPOKEN]** Chadian Arabic (also known as Shuwa/Shua/Suwa Arabic (French: Arabe Choa/Chowa), L'arabe du Tchad, Baggara Arabic, and, most recently, within a small scholarly milieu, Western Sudanic Arabic) is one of the regional colloquial varieties of Arabic. (The term "Shuwa Arabic", found in 20th-century Western linguistic scholarship, properly refers only to the Nigerian dialects of this particular language, and even then, "Shuwa" is not used by those speakers themselves.) It is the first language for over one million people, including town dwellers and nomadic cattle herders (Wiki).

[**ARABIC, EGYPTIAN SPOKEN**] Egyptian Arabic is the language spoken by most contemporary Egyptians. It is more commonly known locally as the Egyptian colloquial language or Egyptian dialect. Look below for local namings. Egyptian Arabic is a variety of the Arabic languages of the Semitic branch of the Afroasiatic language family. It originated in the Nile Delta in Lower Egypt around the capital Cairo. The 80 million Egyptians speak a continuum of dialects, among which Cairene is the most prominent. It is also understood across most of the Arabic speaking countries due to the predominance of the Egyptian influence on the region as well as the Egyptian media, making it the most widely spoken and one of the most widely studied varieties of Arabic. While it is essentially a spoken language, it is encountered in written form in novels, plays, poems (vernacular literature), as well as in comics, advertising, some newspapers, and transcriptions of popular songs. In most other written media and in television news reporting, Literary Arabic is used (Wiki).

"One obstacle to our progress in good colloquial Arabic is undoubtedly our helplessness in the hands of Berberine servants. These Berbrines are foreigners, whose native Nubian dialect...is very limited and barbarous. Yet for our daily purposes we are obliged not only to learn their pronunciation, but also their grossly inaccurate *patois*, which some of us innocently suppose is good modern Arabic...this book contains the results of twelve years' study and experience of Arabic in Syria, Egypt, the Soudan, and Tripoli..."

"Having been interested for many years in the colloquial Arabic of Egypt, the compiler was struck...by the wealth of the dialect, not only in words but in forms of expression and subtle meanings, and the more he studied the subject, the more he became convinced of the necessity and utility of a vocabulary to introduce the foreigner to the still uncomprehended treasures of colloquial Arabic."

Robertson was president of the Egyptian Railway Board; Ayrût was his secretary. This copy with the ownership signature of E. Molyneux, dated 1898.

"It may seem extraordinary that one who is not a scholar in a language should attempt to write a vocabulary of it, but in this case there is a reason. The writer, desiring to learn colloquial Arabic for use in Egypt, purchased, one after another, five books, none of

which answered the purpose. Some were too classical and Syrian, using words and forms that are not intelligible in Egypt, in others the English was unintelligible. There may be a suitable book, but the author was not able to hear of it... The question of an Arabic-English vocabulary was decided in the negative... Size is an object in a book to be carried about... It is, of course, understood that the scope of the book is strictly limited to providing the easiest means of learning enough of the colloquial language to be able to get about Egypt" (Preface). An undated second printing with "Second Thousand" on the title page was also issued, in a similar binding, published by Crosby, Lockwood & Son in London, 120 pp. with 20 pp. of ads, including ads on endpapers.[offered by Zephyr Used and Rare Books in 1997].

**[ARAGONESE]** Aragonese (/æɾəɣn̄'ni:z/; aragonés [araɣo'nes] in Aragonese) is a Romance language spoken in several dialects by 10,000 to 30,000 people in the Pyrenees valleys of Aragon, Spain, primarily in the comarcas of Somontano de Barbastro, Jacetania, Alto Gállego, Sobrarbe, and Ribagorza/Ribagorça. It is the only modern language which survived from medieval Navarro-Aragonese in a form distinctly different from Spanish.

Informally known as *fabla* ("talk" or "speech"), Aragonese is also commonly referred to by the names of its local dialects such as *cheso* (from Valle de Hecho) or *patués* (from the Benasque Valley) (Wiki).

**[ARAMAIC (pre-1850)]** Aramaic (Arāmāyā) is a family of languages or dialects belonging to the Semitic subfamily of the Afroasiatic language family. More specifically, it is part of the Northwest Semitic group, which also includes the Canaanite languages such as Hebrew and Phoenician. The Aramaic alphabet was widely adopted for other languages and is ancestral to the Hebrew, Syriac and Arabic alphabets. During its approximately 3000 years of written history, Aramaic has served variously as a language of administration of empires and as a language of divine worship. It became the lingua franca of the Neo-Assyrian Empire (911–605 BC), Neo-Babylonian Empire (605–539 BC), the Achaemenid Empire (539–323 BC), the Parthian Empire (247 BC–224 AD), and the Sasanian Empire (224–651), of the states of Assur, Adiabene, Osroene, Beth Nuhadra, Beth Garmai and Hatra; the state of Palmyra, and the day-to-day language of Yehud Medinata and of Roman Judaea (539 BC – 70 AD). It was the language of Jesus,

who spoke a Western Aramaic language during his public ministry, as well as the language of large sections of the biblical books of Daniel and Ezra, and also the main language of the Talmud.

Neo-Aramaic languages are spoken today as a first language by many scattered and usually small and isolated communities of Christians, Jews, and Mandaeans of Western Asia, most numerously by Syriac Christians in the form of Turoyo, Assyrian Neo-Aramaic and Chaldean Neo-Aramaic that have all retained use of the once dominant lingua franca despite subsequent language shifts experienced throughout the Middle East. The Aramaic languages are now considered endangered (Wiki).

Ethnologue lists 19 separate languages under the heading Aramaic, including the neo-Aramaic languages.

[**ARAPAHO**] The Arapaho (Arapahoe) language (in Arapaho: Hinóno'eitít) is one of the Plains Algonquian languages, closely related to Gros Ventre and other Arapahoan languages. It is spoken by the Arapaho people of Wyoming and Oklahoma. Speakers of Arapaho primarily live on the Wind River Reservation in Wyoming, though some have affiliation with the Cheyenne people living in western Oklahoma (Wiki).

First edition. Series: University of California publications in American archaeology and ethnology. v. 12, no. 3. Includes comparative vocabulary, English-Arapaho-Southern People-Wood-lodge People-Gros Ventre, pp. 75-76, and "additional words-Arapaho proper," p. 76; Part II is a "Sketch of Arapaho proper" with numerous Arapaho-English wordlists by grammatical category. pp. 85-90, 97-108, and 113-123.

"The Arapaho recognize five former divisions of their people. As placed by them in order from south to north, these were the...South-people, the... Rock-people, the Hinana'e'ina<sup>n</sup> or Arapaho proper, the... Wood-people, and [the] Begging-people. The last is a tribe that ... has long been known as the ... Gros Ventre of the Prairie.... A very few people remembering something of the [Southern-people] dialect were living in 1899. From one of these was obtained the brief vocabulary given below.... No one was found who remembered the speech of the [Rock-people], which is said by the Arapaho to have been the most different from their own.... A brief comparative vocabulary of the four dialects on which material could be obtained is appended. This is unfortunately badly selected, and the phonetic perception and rendering are no doubt inadequate even for Arapaho and Gros Ventre, which the author has ampler opportunity to hear. Further, the words in the two other dialects were obtained from people who no longer habitually used

them, perhaps had never done so. Still, the lists contain new information, which may never be duplicated, and are therefore given with all their imperfections" (pp. 73-74).

[**ARDAMĀGADHĪ**] Magadhi Prakrit (Ardhamāgadhī) is of one of the three Dramatic Prakrits, the written languages of Ancient India following the decline of Pali and Sanskrit. Magadhi Prakrit was spoken in the eastern Indian subcontinent, in a region spanning what is now eastern India, Bangladesh, and Nepal. It is believed to be the language spoken by the important religious figures Gautama Buddha and Mahavira and was also the language of the courts of the Magadha mahajanapada and the Maurya Empire; the edicts of Ashoka were composed in it. Magadhi Prakrit later evolved into the Eastern Zone Indo-Aryan languages, including Assamese, Bengali, Odia and the Bihari languages (Bhojpuri, Maithili, and Magahi languages, among others).

"The basis of this dictionary is the 'Āre'āre as spoken around Tarapaina, in the small Malaita Passage. It seems to me the purest and best sounding of the 'Āre'āre.... Many names of customs, feasts and forms of spirit worship cannot be translated literally. I therefore gave a short explanation so as to convey the meaning. I hope and trust this dictionary may be a modest contribution to the scarcity of linguistic material of Melanesian languages of the Solomon Islands" (Preface).

[**ARGOBBA**] Argobba is an Ethiopian Semitic language spoken in an area north-east of Addis Ababa by the Argobba people. It belongs to the South Ethiopian Semitic subgroup together with Amharic and the Gurage languages. Writing in the mid-1960s, Edward Ullendorff noted that it "is disappearing rapidly in favour of Amharic, and only a few hundred elderly people are still able to speak it." Today, many Argobba in the Harari region are shifting to the Oromo language. The language is spoken in a number of pockets and has at least four regional variations (dialects) in Harar (extinct), Aliyu Amba, Shewa Robit and Shonke (Wiki).

[**ARMENIAN**] The Armenian language ([hɑjɛ'ɾɛn] hayeren) is an Indo-European language spoken by the Armenians. It is the official language of Armenia and Nagorno-Karabakh Republic. It has historically been spoken throughout the Armenian Highlands and today is widely spoken in the Armenian diaspora. Armenian has its own unique script, the Armenian alphabet, introduced in 405 AD by Mesrop Mashtots. Armenian is an independent branch of the Indo-European languages. It is of interest to linguists for its distinctive phonological developments within that family. Armenia was a monolingual country by the 2nd century BC at the latest. Its language has a long literary history, with a 5th-century Bible translation as its oldest surviving text. Its vocabulary has been influenced by Western Middle Iranian languages, particularly Parthian, and to a lesser extent by Greek, Persian, and Arabic throughout its history. There are two standardized modern literary forms, Eastern Armenian and Western Armenian, with which most contemporary dialects are mutually intelligible (Wiki).

Asmat-English word list, pp. 292-361, with two detailed maps of language distribution area and two pp. of photographs.

"The language of the Asmat Papuans, Asmat, is one of a number of related Papuan languages which are spoken over an extensive area of the coast plain of South-West New Guinea (Irian Barat)...It is still not known with certainty how far inland the Asmat language-area extends. It was only recently that this coastal area was brought under Government control and that part of the low-lying plain abutting into the mountainous country in the centre is still practically *terra incognita*...Nothing is known about the languages to the north and the north-east of the Asmat language-area...The Asmat people dwell in villages situated along the rivers. The largest villages have between 1,000 and 2,000 inhabitants; the smallest less than 100. The total Asmat population is estimated to be 40,000 persons. The people of the central Asmat region call themselves *ásmat ow*, which probably means 'tree people... According to the Asmat people, the territory they inhabit...is enclosed within, and lies at the bottom of, a gigantic coconut... It was only in the recent past that the Asmat region was brought under control - the area was notorious for head-hunting... the Roman Catholic Mission had opened its first Mission station there in 1953... The Flamingo Bay dialect is spoken by about 2,600 people who live in five villages...situated in the immediate vicinity of Flamingo Bay." (Introduction). This is the first word list of this dialect of the language. *A Dictionary of the Asmat Language* by P. Drabbe (Syracuse, Ind: Our Lady of the Lake Press, 1959) includes a vocabulary of the Ajam dialect of Asmat.

"After thirty years familiar acquaintance with the people, I am fully persuaded that it is a mistake to ignore their language.... If suitable encouragement were given, the educated Assamese would soon supply vernacular School Books, and a new impulse in favor of education would manifest itself among the masses. In no other way can education ever be popularized among them. In regard to the present work, it is the first Dictionary of the language ever published, and has necessarily been a difficult task. In the fourteen thousand words here collected, will be found many in daily use by the people, that no Bengali scholar will understand. Many of these words have been written as they dropped from the lips of the people.... As the language has hitherto had no standard... I am aware that this first edition, like all other first attempts of the kind, must be left more or less imperfect. No word however has been allowed to pass without careful examination; and when doubts have existed, the oldest and best informed of the people have been consulted" (Preface).

"The publication [of this dictionary], it is hoped, will fill a great want. The Dictionary of Bronsen, published in 1867 [see above], at the American Baptist Mission Press, Sibsagar, is now-a-days out of print. Bronson's work did not pretend to be an etymological dictionary.... Assam and Assamese have now so far advanced as to demand something more complete than Bronson's Dictionary.... The duty of editing this work has not been a light one... [T]he English portion has been found in much need of revision and in places it has been found necessary to rewrite it altogether" (Introduction, P. R. Gurdon).

[ASSINIBOINE] The Assiniboine language (also known as Assiniboin, Hohe, or Nakota, Nakoda, Nakon or Nakona, or Stoney) is a Nakotan Siouan language of the Northern Plains. The name Assiniboine comes from the term Asiniibwaan, from Ojibwe, meaning "Stone Siouans". The reason they were called this was due to the fact that Assiniboine people used heated stone to boil their food. In Canada, Assiniboine people are known as Stoney Indians, while they called themselves Nakota or Nakoda, meaning "allies" (Wiki).

It is specifically aimed at two types of users. First, as originally conceived... it will be a readily available tool to research linguists who are interested in comparing Chasu with other languages. ... Second... it is addressed to the general user, especially

one whose mother tongue or whose parents' mother tongue is Chasu. I hope that Chasu speakers, who happen to get a copy of this lexicon, will be highly motivated to learn about their language and have confidence in it. In this regard, the lexicon is designed to set standards and conventions in orthography as well as encourage literacy development among the Asu" (Introduction).

[**ASURINI OF XINGU**] Xingú Asurini (Asurini of Xingu) is a Tupi–Guaraní language of the state of Pará, in the Amazon region of Brazil. The entire population speaks the language, and most speakers are monolingual (Wiki),

"It was not always possible in the relatively short time to check over the linguistic notes by repeated listening to different speakers. We were the first to come and there was no interpreter. Of the 400 expressions and phrases that I gathered, I present here a small list only of words I could check. Among the words is a series of loan words. As I shall attempt to prove later on, this material permits the language of the group to be classified among the Tupi languages" (The Language, p. 36).

[**ASURINI, TOCANTINS**] Akwáwa is a Tupi–Guarani dialect cluster spoken in Pará in western Brazil. There are three distinct dialects:

Asurini (of Tocantins or Trocará), or Akwawa

Suruí (of Tocantins or Pará), or Akewara

Parakanã, Awaeté

Both the name Asurini and Suruí are used for related peoples and their languages: Suruí of Jiparaná, Suruí of Rondônia, Asurini of Xingú, etc.

Ethnologue: asu. Alternate Names: Akwawa-Asurini, Akwaya, Assurini, Asurini, Asurini do Tocantins, Asurini do Trocará.

[**ATONG**] Atong is a Sino-Tibetan language related to Koch, Rabha, Bodo and Garo. It is spoken in the South Garo Hills and West Khasi Hills districts of Meghalaya state in Northeast India, southern Kamrup district in Assam, and adjacent areas in Bangladesh. The correct spelling "Atong" is based on the way the speakers themselves pronounce the name of their language. There is no glottal stop in the name and it is not a tonal language.

There is no current estimate of the number of speakers available; according to the Linguistic Survey of India, it was spoken by approximately 15,000 people in the 1920s. Because the Atong consider themselves, and are considered by the Garos to be a sub-tribe of the Garos; they are not counted as a separate ethnic or linguistic community by the Indian government.

Almost all Atong speakers are bilingual in Garo to a greater or lesser extent. Garo is seen as a more prestigious language. Because there is a Bible translation in Garo, but not in Atong, it is the language used in all churches and most Atong speakers are Christians. Garo is also the language of education in schools in the Atong-speaking area, although some schools provide education in English.

A reference grammar of the language has been published by Seino van Breugel. An Atong-English dictionary[5] and a book of stories in Atong[6] are published by and available at the Tura Book Room.

In India, Atong is considered a dialect of Garo. The word 'dialect' has to be understood in a political sense here, as a form of speech with no official status. The

Atong people are members of the Garo Scheduled Tribe. The 'language' of that Scheduled tribe is Garo. The word 'language' here is also politically defined as 'official speech variety'. The 'language' of the Garo Scheduled Tribe is a Standardised form of speech used in education, administration, the press and literature. Within the academic discipline of Linguistics, though, Atong and Standard Garo are different languages, because they have different sound systems, vocabulary and grammar (Wiki).

[**ATSUGEWI**] Atsugewi is a recently extinct Palaihnihan language of northeastern California spoken by the Atsugewi people of Hat Creek and Dixie Valley. In 1962, there were four fluent speakers out of an ethnic group of 200, all elderly; the last of these died in 1988. The name properly is Atsugé, to which the -wi of the Achumawi or Pit River language was erroneously suffixed (Wiki).

In 1996, Kouadio included in his doctoral thesis [at the University of Grenoble] a lexical inventory of 2920 entries, incorporating those of Cooper in large part" Introduction, tr: BM].

#### [AUSTRALIAN ABORIGINAL LANGUAGES: SPECIMENS AND POLYGLOT]

The Australian Aboriginal languages comprise up to 27 language families and isolates, spoken by the Aboriginal people of the Australian mainland and a few nearby islands. The relationships between these languages are not clear at present. Despite this uncertainty the indigenous languages of Australia are collectively covered by the technical term "Australian languages". By convention these do not include the languages of Tasmania or the eastern Torres Strait language Meriam Mer. In the late 18th century, there were between 350 and 750 distinct Aboriginal social groupings, and a similar number of languages or dialects. At the start of the 21st century, fewer than 150 Indigenous languages remain in daily use, and all except roughly 20 are highly endangered. Of those that survive, only 10% are being learned by children and those languages are usually located in the most isolated areas (Wiki).

**1831:** [LILLYbm] "Description of the Natives of King George's Sound (Swan River Colony) and Adjoining Country," written by Mr. Scott Nind, and communicated by R. Brown, Esq., F.R.S. Read 14 February, 1831. Extracted from: *Papers Read before the Royal Geographical Society, Paper III, pp. 21-51. Papers on the Colony of Swan Rivers*, I-III, and VI, pp. 1 2-52, 255-258. New gray wrappers with plastic covers and spine, with typed paper label on front cover: "John Barrow, Esq. | State of the Colony of Sway River". English-Aboriginal vocabulary, pp. 47-51, double columned. This is the first printed vocabulary of the language of this tribe.

"Of their language we have as yet little knowledge; the vocabulary will show that it abounds in vowels, and is by no means wanting in harmony. It differs entirely from that of the natives on the eastern coast; and even tribes very nearly situated differ so considerably, that I do not think at two hundred miles they would at all understand each other.... They seemed at times very merry and good-tempered; had much fawning and flattery: at first they commenced pilfering, but for a length of time depredations were very rare, and numerous articles stolen by strangers were returned" (p. 47).

**1842:** [LILLY] *A descriptive vocabulary of the language in common use amongst the aborigines of western Australia, embodying much interesting information regarding the ... natives and the natural history of the country*, by George Fletcher Moore. London: W.S. Orr & Co., 1842. Original brown cloth, stamped in blind and gold, with dark brown leather label stamped in gold on spine. Pp. *i-iii iv-xiii xiv* [2] 1 2-171 172 + 4 pp. adverts. First edition. Zaunmüller, col. 23. "Australian-English" and "English-Australian" vocabulary, pp. [1]-171. A presentation copy: 'J. P. Furlong | with compliments | and best wishes | of | G. F. Moore' on front free endpaper.' A copy of this vocabulary was offered in 2014 "in original green cloth" by Hordern House Rare Books, with the following description: "a good mostly unopened copy in original green cloth, with 4-pp. advertisements bound in. Moore, a lawyer, landed proprietor and diarist, arrived at the Swan River Settlement on the brig *Cleopatra* in 1830; over the following decades he

became a large land-holder at his property Millendon and was appointed advocate-general. Less than a month after arriving in the settlement, Moore accompanied the colonial secretary on a search-party to find Aborigines implicated in a robbery. From this period on he would express sympathetic concern for the local tribes, and made a sustained effort to learn their language and understand their stories. This work is based on the preliminary studies of the explorer George Grey. Moore greatly expanded and enhanced the material, producing a genuinely descriptive vocabulary of the language in common use amongst the Aborigines of Western Australia. As with all good works of this sort, Moore's work makes fascinating reading, as it includes detailed observations regarding the habits, manners and customs of the natives and the natural history of the country. Throughout, Moore's work gives a real insight into the lives of the settlers themselves; thus 'Janjin? the native pear tree. It bears a thing which looks provokingly like a good fruit'.

**1843:** [LILLY] *Vocabulary of the language spoken by the aborigines of the Southern and Eastern portions of the settled districts of South Australia, viz., by the tribes in the vicinity of Encounter Bay, and (with slight variations) by those extending along the coast to the Eastward around Lake Alexandrina and for distance up the River Murray: preceded by a grammar, showing the construction of the language as far as at present known*, by H[einrich] A[ugust] E[dward] Meyer. Adelaide, J. Allen, 1843. Extracted. Pp. i-v vi-vii viii, 9 10-111 112. First edition. Zaunmüller 23. First vocabulary of this language.

**1845:** [LILLY] *A descriptive vocabulary of the native language of W. Australia*, by J. Brady. Rome: S.C. de propaganda fide, 1845. 50 p.; 13 cm. Original unprinted pale yellow wrappers. Not in Zaunmüller.

“The words contained in this Vocabulary are those in most common use in the vicinity of Perth and the adjacent districts. Nothing is said here about the grammar of the language, because it is not sufficiently known... In an unwritten tongue and amongst an ignorant and scattered population it will not be thought extraordinary that in a wide range of country I sometimes found many variations in the expression of the same word, which could not perhaps be fairly considered as amounting to a difference of dialect.” (Preliminary Observations). Hordern House Rare Books description (2014): " Aboriginal vocabulary from Western Australia. A ... rare and interesting vocabulary of a Western Australian Aboriginal language, designed for use in the Western Australian missions and particularly for the famous Benedictine settlement at New Norcia, north of Perth. John Brady, an Irishman, was persuaded to offer his services to the Australian mission while visiting Rome in 1837. Originally detailed for Norfolk Island, he actually ended up for several years the chaplain at Windsor near Sydney. It was during this time that he first became interested in Aboriginal languages, an interest which he continued after being sent by Bishop Polding to the Swan River settlement in 1843. He established a church in Perth within months, and was soon consecrated as Bishop of Perth. Sailing for Europe to garner support for his fledgling mission, he published his Descriptive vocabulary in both English and Italian versions, before returning in 1846 together with an ill-suited array of friends and supporters, whose attempts at cooperation quickly foundered. Most notable among the group of 27 missionaries who sailed with Brady was the famous Dom Salvado, later associated with the New Norcia mission. Although Brady left Western Australia in 1852 after several run-ins with church authorities, he never resigned his see,

and was still Bishop of Perth when he died in France in 1871. This English edition was followed by the Italian version. The two editions of his vocabulary were Brady's only published works, and this is by far the rarer of the two. Ferguson knew this first issue from two copies, his own, and one in the South African Public Library. It is now known to be held in the State Library of New South Wales and the National Library of Australia [and at the Lilly Library]."

Adelaide: printed by Andrew Murray, Rundle-Street, 1846. Contemporary marbled paper over boards, spine with black leather label, lettered in gold. Pp. *i-v* vi-viii, *1* 2-64. First edition. Not in Zauhmüller. Murray River-English, pp. [27]-64. This is the first printed vocabulary of this language.

"This Vocabulary was prepared at the request of His Excellency Captain Grey, and forwarded in October, 1845. At that time, the Europeans had been several years in contact with Natives speaking four dialects, and Vocabulary of three dialects had been prepared and published by the Missionaries of the Dresden Lutheran Missionary Society, and it was thought desirable, by His Excellency, to have the fourth placed on record. I have procured the materials, mainly, through the aid of an interpreter, who knows the Adelaide and Murray dialects; and had it not been for his assistance; I could not have gathered many of the grammatical remarks, which are now given, in the few months that I have been engaged with this dialect. The terms 'dialect' is scarcely applicable to the languages of New Holland. They differ in root more than the English, French, and German languages differ from each other; and if Natives of one language happen to meet those of another, they are obliged to converse in English, to make themselves understood" (Preface).

**1850**: [LILLY] *A key to the structure of the aboriginal language, being an analysis of the particles used as affixes, to form the various modifications of the verbs; shewing the essential powers ... of the language spoken by the aborigines in the vicinity of Hunter River, Lake Macquarie, etc., New South Wales. "It is trusted that the work in its present form will answer the end for which it was intended, namely-as an assistant to parties engaged in civilizing, Christianizing, and otherwise ameliorating, the condition of this most unfortunate race of human beings" (Preface).

"The object of the present introduction is to lay before the reader... the leading features of a very interesting race of people, who are generally supposed to possess but little of the intellectuality with which their more favored white brethren are favoured. Than such a conclusion nothing could be more unreal in fact, or unjust to those to whom the imputation is implied, few people possessing closer reasoning powers, or having observing faculties of a higher order." "Second edition" **1859:** [LILLYbm] *Language of the aborigines of the Colony of Victoria and other Australian districts: with parallel translations and familiar specimens in dialogue, as a guide to aboriginal protectors and others engaged in ameliorating their condition*, by Daniel Bunce. Geelong: Thomas Brown, 1859. Original brown quarter-cloth spine and bright orange paper on boards, lettered and decorated in black. Pp. i-iii iv-xii, 1 2-

60 61-62. "Second edition" indicated on title page, and with a new Preface to the Second Edition, pp. xi-xii.. Otherwise an exact reprint of the 1856 printing. English-Aboriginal vocabularies as follow: English- Colony of Victoria, pp. [1]-46, English-Condamine River, pp. [50]-51, English-Grafton Range, pp. 51-52, English-Darling Downs, pp. 52-53, English-District of Wide Bay, pp. 54, English-New England (3 words), p. 54, English-Omio-Snowy Mountains, p. 54-55, English-Castlereagh and Macquarie River Districts, pp. 55-56, English-Bunya-Bunya Forest, pp. 56-57.

"It is now eight years since this work was first presented to the public; its object being to assist in improving the moral and physical condition of the Aborigines. At that time there were but slight symptoms of mortality as compared with the present time, owing to an overindulgence in the use of that great and fearful bane to all the various tribes and races of Indians, 'Fire Water,' or Ardent Spirits. It was with no trifling degree of satisfaction that the author responded to a call from the Committee lately organized by the State to enquire into, and if possible improve their present condition. He regrets, however, to discover that one of his suggestions has not been adopted, namely:--By allowing the whole of the tribes a large area of country... to form one great family, where they may adopt their primitive habits of ...digging for mynong, burrowing for wombats and porcupines, collect the oorong, or gum from the Wattles, and similar congenial pursuits, without having the fear of the Law before their eyes" (Introduction to the Second Edition).

**1851b:** [LILLY] *Memorie Storiche dell'Australia: particolarmente della missione Benedettina di Nuova Norcia e degli usi e costumi degli Australiani*, by Rosendo Salvado (1814-1900). Roma: S. Congreg. de Propaganda Fide, 1851. xii, 388 p.: front. (fold. map); 22 cm. Original green wrappers, lettered and decorated in black. First edition. Northern-Southern Aboriginal-Italian lexicon, pp. 364-375. With ink inscription in Italian referring to receiving the book as a gift from the author while hosting him in 1883.

Second edition **1852:** [LILLY] *Memorie storiche dell' Australia, particolarmente della missione Benedettina di Nuova Norcia e degli usi e costumi degli Australiani*, by Rosendo Salvado [1814-1900]. Napoli: V. Preggiobba, 1852. 376 p., 1 L. front. (fold. map). Original blue wrappers, lettered and decorated on black. Second edition (first edition appeared in 1851). Northern-Southern Aboriginal-Italian lexicon, pp. 346-359.

Spanish translation **1853:** [LILLY] *Memorias historicas sobre la Australia, y particularmente acerca la mision benedictina de Nueva Nursia, y los usos y costumbres de los salvajes*, by Rosendo Salvado (1814-1900). Barcelona: Impr. de los Herederos de la V. Pla, 1853. Contemporary quarter-leather and marbled paper over boards. Antiquariaat Forum description: "Bishop Rudesindo Salvado, leading man of the Benedictine party in New Nursia, died on the eve of Australia's federation. He was hailed as the greatest friend of the Aborigines, and condemned as a greedy land-grabber. Salvado was certainly a towering figure in the history of West Australia. He was sent by Bishop Brady to the Victorian Plains... Good

relations were established with the local Aborigines, and Salvado began to learn their language and customs. He devoted the rest of his life to the Aboriginal people. A dictionary translating the differences between the northern and southern Australian Aboriginal tongue into Spanish is included. In 1946 the present Spanish edition was republished to mark the centenary of the Benedictines in Australia, and as a tribute to Dom Salvado. Palau 288371; Ferguson 15422."

**1867:** [LILLYbm] *Vocabulary of dialects spoken by aboriginal natives of Australia*, Melbourne: Mastermann, printer, 1867. Original blue wrappers, lettered and decorated in black. Pp. *i-iv v-xiv xv-xvi*, + 6 folding tables (p. [iv] misnumbered v). First edition. Intercolonial Exhibition, 1866 at head of title page. Not in Zaunmüller. Wrappers reproduce title page. Includes six folding tables comparing various indigenous vocabularies: 18 columns per sheet. Listing order left to right: French, English, 14 aboriginal dialects/languages from Victoria, S. Australia, Tasmania, New Caledonia. Approximately 120 words per sheet/column. This was the first attempt to systematically collect information on the native languages:

"It may form the groundwork of future more extended enquiries of a like nature, in the progress of which the intercourse with the Aborigines may lead to improvement in their intellectual and social, as well as their physical condition; while all employed may have the satisfaction of redeeming, in some degree, the obligations they owe to the humble race,—the primitive possessors of the soil" (letter from Redmond Barry, President of the Exhibition, printed as preface). It was, however, far from the hoped-for success, as may be seen from the Preface: "On the occasion of the Intercolonial Exhibition held in Melbourne in the year 1866, it was considered desirable to illustrate, as completely as possible, all connected with the history, habits, customs and languages of the aboriginal inhabitants of Australasia....In order to save trouble and insure uniformity of action a vocabulary was prepared and widely distributed with the hope that materials sufficient to justify the deduction of some general principles as to the probable origin of the various forms of speech in use, and for the construction of a grammar, might be collected....It is to be regretted that the efforts made to secure information ...relating to the languages of the natives have not been attended with the success expected. This is accounted for by reason of the dispersion of the remnant of the native races, the difficulty of arresting and engaging the continued attention of individuals of the tribes in an investigation imperfectly understood by them, of the still greater difficulty of procuring the assistance of intelligent persons sufficiently well acquainted with the languages of the natives to explain the nature of the enquiry, [and] possessing moreover the inclination and leisure requisite to enable them to devote themselves to [the task]" (Preface, unsigned). The pamphlet also reproduces the letter from Redmond Barry's letter accompanied the original circulated vocabulary list.

**1874:** [LILLY] *The Narrinyeri: an account of the tribes of south Australian aborigines inhabiting the country around the Lakes Alexandrina, Albert and Coorong, and the lower part of the river Murray: their manners and customs. Also, an account of the mission at Point Macleay*, by George Taplin. Adelaide: J.T. Shawyer, printer, 1874. 107 p.: ill., front.; 22 cm. Original cloth with largely obliterated printed label on front cover. Rebacked with new endpapers. Includes "Comparative Table of the Words of Four

South Australian Tribes of Aborigines," pp. 85-86 (71 words: English-Narrinyeri-Adelaide-Moorundee-Parnkalla).

**1875:** [LILLYbm] *Kámilarói, and other Australian languages. Second edition, revised and enlarged by the author; with comparative tables of words from twenty Australian languages, and songs, traditions, laws and customs of the Australian race*, by William Ridley. Sydney: T. Richards, government printer, 1875. Pp. i-vi, 1-34-172. 27 x 20 cm. Original dark green pebbled cloth over boards, lettered in gold. Second edition, revised and enlarged. Zaunmüller, col. 23. First edition was entitled *Kamilaroi, Dippil, and Turrubul: languages spoken by Australian aborigines* (Sydney, 1866), 88 pp. English-Kamilaroi [Gamilaraay] vocabulary, pp. [17]-37, English-Wailwun [Wangaaybuwan-Ngiyambaa], pp. [47]-50, English-Kogai, pp. [55]-56, English-Pikumbul [Bigambal], pp. [59]-60, English-Dippil [Gabi-Gabi], pp. [63]-70, English-Turrubul [Thurawal], pp. [80]-87, English-Turuwul [Thurawal], pp. [99]-100, English-Language of George's River, Cowpasture, and Appin, pp. [103]-107, English-Wodi-Wodi [Wadi Wadi], pp. [111]-114, English-Language of Twofold Bay, p. 115; comparative table of words in fifteen languages: Kámilarói [Gamilaraay], Wiradhuri, Wailwun [Wangaaybuwan-Ngiyambaa], Lower Hunter, Turuwul [Thurawal], George's River, Wodi-Wodi [Wadi Wadi], Kogai, Pikumbul [Bigambal], Kiñki, Palamba, Dippil [Gabi-Gabi], Turrubul [Thurawal], Victoria, North-West Coast), pp. 122-129; comparative table of words in five languages (Witaoro, Jajaoroñ, Denñenwurro, Burapper, Tā-ũnguroñ), p. 130. Second copy: IUW, in library binding.

"The information presented in the following pages, on the Kámilarói, Dippil, and Turrubul languages, was chiefly obtained by the author during three years' missionary effort among the Aborigines of Australia, including journeys over Liverpool Plains, the Barwan or Darling, and its tributaries, the Namoi, the Bundarra, the Macintyre, and the Mooni; also, along the Balonne or Condamine, across Darling Downs, by the Brisbane River, and in a circuit about Moreton Bay. In the year 1871 the author again visited the Namoi and the Barwan, for a few weeks, at the request of the Government, in order to obtain further information on the language and traditions of the Aborigines. The shortness of the time spent in research will account for the fragmentary character of this contribution to the Philology of Australia" (Prefatory Note).

**1879:** [LILLYbm] *The Native Tribes of South Australia, comprising The Narrinyeri, by the Rev. George Taplin. The Adelaide tribe, by Dr. Wyatt, J.P. The Encounter Bay Tribe, by the Rev. A. Meyer. The Port Lincoln Tribe, by the Rev. C.W. Schürmann. The Dieyerie Tribe, by S. Gason. Vocabulary of Woolner District Dialect (Northern Territory) by John Wm. Ogilvie Bennett, with an Introductory Chapter by J.D. Woods*. Adelaide: E. S. Wigg & Son, 1879. Original dark blue cloth, lettered, decorated and illustrated in gold and in blind. Pp. [4] i-iii iv-xlii xliii-xlvi 1 2-316 [2]. First edition of this collection, with eight color lithographic plates. Not in Zaunmüller. Includes Narrinyeri-English list of family relationships, pp. 52-54, Narrinyeri place names, p. 130, and a "Comparative Table of the Words of Four South Australian Tribes of Aborigines," pp. 131-132 (71 words: English-Narrinyeri-Adelaide-Moorundee-Parnkalla); a "Vocabulary of the Adelaide and Encounter Bay Tribes, with a few words of that of Rapid Bay," pp. 169-180, double-columned; a "Catalogue of animals, etc," in Dieyerie, pp. 285-289, and a Dieyerie-English vocabulary, pp. 296-307, double-columned; and a "Vocabulary of the Woolner District Dialect," English-Woolner, pp. [312]-315. This

copy with scattered annotations in pencil to the vocabularies. The edition was also issued without plates. "An early collected reprint of works already scarce at the time; the lithographs and lengthy (34-page) introduction by Woods were new to this edition. Ferguson 13095 (noting variant bindings)" (bookseller's description: Michael Treloar). *Second copy*: Early twentieth-century black leather and blue cloth over boards, gilt paneled spine lettered in gold, with raised bands, top edge gilt. With the bookplates of Hector Orams and Bernard Gore Brett.

"The object of this publication is to preserve and to place before the public, in a collected form, some of the few accounts that have been written respecting the native tribes of South Australia.... The Adelaide tribe is extinct, and so are those that dwelt near Gawler, Kapunda, the Burra, the Rufus, etc. In none of these places can a single trace of them be found. They have left no memorials behind them, and their language as a language exists no more. Some relics of it have been preserved in the glossaries of Teichelmann, Wyatt, Eyre, etc., whose love for science or whose curiosity led them to make notes of words, etc. as their intercourse with the natives permitted, but for the rest it is as if the Adelaide tribes had never existed" (Introduction, J.D. Woods).

**1881**: [LILLY] *Australian aborigines, the languages and customs of several tribes of aborigines in the western district of Victoria, Australia*, by James Dawson [1806-1900]. Melbourne [etc.]: George Robertson, 1881. viii, 111, [1] ciii, [1] p. front., ports., fold. facsim. 28 cm. Original red cloth, decorated and lettered in gold. First edition. Not in Zaunmüller. This copy withdrawn University of London, is a presentation copy from the author to "his friend" Dr. Pettigrew, dated 1881.c

**1888**: [LILLY] *The aborigines of Central Australia: with a vocabulary of the dialect of the Alice Springs natives*, by W. H. Willshire. [S.l.: s.n.], 1888 (Port Augusta: D. Drysdale) 32 p.; 18 cm. In original drab printed wrappers, spine imperfect. Lilly Library copy with the book label of John Lawson. Hordern House Rare Books description (2014): **Item Description**: "Important notes on Alice Springs. Scarce pamphlet on the customs and language of the central Australian tribes by William Henry Willshire (1852-1925), a policeman implicated in the abuse and wilful murder of Aboriginal persons under his protection. Although Willshire's book makes for sometimes disturbing reading, it is still of particular significance as a very early attempt to record the traditions and language of the Aboriginal tribes around Alice Springs, which had its first European settlers in 1872. Willshire himself was posted there in 1881, and had the task of establishing the Native Police corps of central Australia in 1884. For all the book's flaws, that is, it is nonetheless a remarkably early (the earliest?) western account of the Aborigines of central Australia, and of note for its perspective on relations between the local tribes and settlers. Willshire's later career was marred by various criminal proceedings due to his increasingly violent tendencies and his cruel "dispersal" of Aborigines. He was denounced by the Hermannsburg missionaries after three chained prisoners were shot in the back while "escaping" from his custody, and in 1891 he was indicted for the murder of two sleeping men by Francis James Gillen, the eminent ethnologist then working on his great studies of the Aborigines of Central Australia. A long and controversial case ensued and Willshire was ultimately acquitted amidst overwhelming support from outback settlers who raised bail of £2000 by public subscription. As a rule, Willshire's published works reveal more of European attitudes than Aboriginal culture: 'Sometimes vivid, they reflected the settlers'ethos: containing

some reasonable anecdotal ethnology and word lists, they are distinguished more for their sexual overtones, boastful sadism and racial triumphalism' (ADB). Although deeply saddening and distasteful, this pamphlet is a significant historical record of this violent chapter in Australia's history."

**1889:** [LILLY] *The Parkengees, or Aboriginal Tribes of the Darling River*, by S. Newland, Esq. J.P. Adelaide: H.F. Leader, Government Printer, 1889. Original gray self-wrappers lettered in black. Separately paginated offprint(?) from the proceedings of the Geographical Society of Australasia. South Australian Branch. Paper read Sept. 29, 1887. pp. 1-3 4-16. First edition. Includes "Vocabulary of Aborigines of the Upper Darling, English-Parkengees, double-column, pp. 15-16.

**1891a:** [LILLYbm] *The aborigines of Central Australia, with vocabularies of the dialects spoken by the natives of Lake Amadeus and of the western territory of Central Australia*, by W[illiam] H[enry] Willshire. Adelaide, C. E. Bristow, Government Printer, 1891. Later green cloth over boards, lettered in gold. Pp. [2] 1-5 6-51 52-54. First edition. Not in Zaunmüller. Includes an English-Lake Amadeus and George Gill Range vocabulary, pp. 42-46, double-columned, and (reprinted from the author's 1888 privately printed publication [see above]) an English-Alice Springs vocabulary, pp. 48-51, double-columned. This copy with Baldwin Spencer's pencilled initials on the title-page, and a pencilled marginal reference to native drawings on p. 30. Sir Baldwin Spencer (1860-1929), was one of the early authorities on Australian aborigines and author of numerous important scholarly works, including *The native tribes of central Australia* (London: Macmillan, 1899).

"It has been said that the Australian aborigines are fast dying out. If that be true, this little *brochure* will help to preserve the language of natives of the western territory of Central Australia....It may be interesting to some people to know that in eight years the author used nine pocket-books alone to jot down words, &c., of the aboriginal dialect. They were used for that purpose whilst travelling through the bush, and anything fresh was jotted down whilst on the back of a camel. I have kept back a great many words that were appertaining to indecency, as I am of opinion that the vocabulary could be made interesting without them. The native children from their infancy are taught to utter bad and indecent languages; consequently they know no better. They are also taught to be cruel to little birds, lizards, insects, &c. This I could never suffer, and many a little black youngster have I rebuked for cruelty, in his own language, so I am aware that I was properly understood" (Dedication). "The vocabulary of words ... is that spoken by the natives who inhabit the George Gill Ranges, Lake Amadeus, Tempe Downs, Erldunda, and a large portion of the western territory of central Australia.... I am not writing to profit by it in a pecuniary sense. I do this for the good of my country-South Australia-and for the benefit of the Geographical Society and Australian Natives' Association, two admirable institutions.... No doubt some who read this humble production will be aware that some two years ago I had published a little pamphlet entitled 'The Aborigines of Central Australia' with a vocabulary of the Alice Spring native dialect included, which I have again included in this little work" (p. 42). [Includes the author's] experiences when in charge of Native Police; notes on cattle stations, spearing of cattle by natives; brief notes on...marriage...infanticide; methods of hunting, tracking...circumcision and subincision, female introcision, cave drawings.

**1891b:** [LILLYbm] "A Grammar and Vocabulary of the Language of the Aborigines of the MacDonnell Ranges," by Rev. H. Kempe of the Mission Station, River Finke, in: *Transactions of the Royal Society of South Australia*, Vol. XIV, Part I, pp. [1]-54, Adelaide: W.C. Rigby, July, 1891. Original cream wrappers, lettered and decorated in black. Pp. [4] 1 2-192 plus 9 plates. First edition. Not in Zaunmüller. Aboriginal-English, pp. 37-54, double columned. This is the first printed vocabulary of the language.

"These pages are submitted in the hope that they will prove interesting to the philologist, as exhibiting the peculiar structure of the language spoken by a people generally considered among the lowest in the scale of mankind, and will contribute a little towards perpetuating the knowledge of a language of one of the Australian tribes of natives before their probable entire extinction at a no very remote period. The vocabulary is that of the tribe inhabiting the River Finke, and is also, with only slight variations in the dialect, that of the tribes in the MacDonnell Ranges eastward to Alice Springs, but not the westward of the River Finke, and extending southward to the Peake" (Preface).

**1895:** [LILLYbm] "Remarks on the Native Tongues in the Neighborhood of Part Darwin," by T. A. Parkhouse, in: *Transactions of the Royal Society of South Australia*, Vol. 19, Part 1 (with three plates), (July 1895), pp. [1]-18. Original gray wrappers, lettered and decorated in black. Pp. [1]-121 122 + 3 plates (of shells and bones). Includes aboriginal vocabularies as follow: English-Larraki'a (Laragia), pp. 7-14; English-Wulnar (Wulna), p. 15; English-Awarra (Waray), p. 15-16, English-Aggrakundi, pp. 16-17; English-"Natives of the Katherine", pp. 17-18. First published vocabularies of these languages. Parkhouse was "formerly accountant and Paymaster S.A. Railways, Port Darwin."

**1898:** [LILLYbm] "Native Vocabulary of Miscellaneous New South Wales Objects," by Jas. Larmer, in: *Journal and Proceedings of the Royal Society of New South Wales*, 1898, pp. 223-229. Includes aboriginal vocabularies gathered in the early 1830's by James Larmer in his profession as government surveyor, as follows: Brisbane Water and Tuggera Beach Lakes, p. 224; Hunter's River, p. 224; Hunter's River, Brisbane Water and Newcastle, pp. 224-225; Bateman's Bay, pp. 225-226; Ulladulla, p. 226; Braidwood, p. 226; Yeo Yeo and Naraburra, p. 227; Upper Calara or Lachlan, p. 227; Junction of Lachlan and Murrumbidgee, pp. 227-228, Native Names of Points of Land in Port Jackson (South Shore), pp. 228-229; and Native Names of Points of Land, North Short of Port Jackson, p. 229.

**1903:** [LILLY] "Die Sprache des Tyeddyuwürri-Stammes der Eingebornen von Victoria," by R. H. Mathews. Sonderdruck aus Band XXXIV (der dritten Folge IV. Band) der *Mitteilungen der Anthropologischen Gesellschaft in Wien*. Vienna: Selbstverlag der Anthropologischen Gesellschaft, 1903. Original printed gray wrappers. This is a grammar only, and includes no vocabulary list as such beyond those used as examples, but is included for its general interest.

**1907:** [LILLY] "The Arran'da Language, Central Australia," by R. H. Mathews. Reprinted from *Proceedings of the American Philosophical Society*, Vol. XLVI, 1907," pp. 322-329. With original printed wrappers. "Arranda Vocabulary," English-Arranda, pp. 336-339. First printed vocabulary of this language.

**1909:** [LILLY] "The Dhudhuroa Language of Victoria," by R. H. Mathews. Reprinted from the *American Anthropologist*, Vol. II, No. 2, April-June, 1909, pp. 278-284. Offprint without special wrappers. "Dhudhuroa Vocabulary," English-Dhudhuroa, pp. 281-284. First printed vocabulary of this language.

**1917:** [LILLYbm] "Vocabularies of Three South Australian Native Languages-Wirrung, Narrinyeri, and Wongaidya," by J. M. Black, in: *Transactions and Proceedings of the Royal Society of South Australia*, Vol. XLI, pp. 1-13, Adelaide: Royal Society of South Australia, 1917. Original tan wrappers, with gray cloth spine, lettered and decorated in black. Pp. iii-v vi-viii, 1-706 plus 43 plates. First edition. Zaubmüller, col. 23. This copy with ink stamps from the California Academy of Sciences Library and the Library of the State Mining Bureau. Includes Wirrung [Wirangu]-English vocabulary, pp. 3-8, Narrinyeri-English, pp. 8-12, and Wongaidya [Nugunu]-English, pp. 12-13.

"This vocabulary [of Wirrung] was obtained in 1915 from natives camped near Murat Bay. The language is closely related to Parukalia...and more distantly to the extinct Adelaide language [see Teichelmann, 1840]" (p. 3). "This is well-trodden ground, the Narrinyeri language having been investigated at different times by two missionaries [including H.A.E. Meyer's vocabulary of 1843]...My vocabulary, obtained in 1892 from a native called Karammi, shows considerable dialectic variation from what may be called 'standard Narrinyeri,' as established by Mr. Taplin in his grammar and vocabulary [Adelaide, 1879]" (pp. 8-9). "This small [Wongaidya] vocabulary was obtained about the year 1880 in Baroota from natives of the tribe which then wandered through the country on both sides of the Flinders Range... even in those days it was a small and degraded people, and is now probably extinct or nearly so" (p. 12).

**1923:** [LILLYbm] *Australian Aboriginal Native Words and their Meanings*, by Sydney J[ohn] Endacott. Melbourne: Sydney J. Endacott, 1923. Original light reddish-brown paper over boards, lettered and decorated in brown. Pp. 1-6 7-48 (with three photos of aborigines). First edition. Zaubmüller, col. 23 (listing only third edition of 1944, not identified as such). Australian Aboriginal-English, pp. 7-48.

"Australian people are now displaying a commendable inclination to favor the use of musical native aboriginal names for their homes, and the idea could perhaps be extended to other things or places that require a name, with advantage to the furthering of the growth of a distinct national feeling. This little book has been compiled to supply the demand for a substantial and reliable list of pleasant-sounding words, with their meanings, to choose from for these purposes" (Preface). "It may be of interest here to mention that the following words, sometimes met with in the earlier Australian books and journals, are not Australian aboriginal words: budgeriee, bael, gin, lubra" (The Australian Aborigines).

**1930:** [LILLYbm] *The aboriginal word book*, by Justine Kenyon. Melbourne: The Lothian Publishing Co. Pty. Ltd., 1930. Original cream wrappers, lettered and decorated in red, with a photo of an aboriginal on the front cover. Pp. 1-2 3-48. First edition. Not in Zaubmüller. Aboriginal-English, pp. 9-48, each word identified as coming from one of nine different geographical areas of Australia.

"In a separate list are given some Tasmanian words for the use of dwellers in that fair isle or for those of the mainland who care, in a little way, to perpetuate the memory of that ill-fated race" (Introduction).

Second edition **1951**: [LILLYbm] *The aboriginal word book*, by Justine Kenyon. Melbourne: The Lothian Publishing Co. Pty. Ltd., 1951. Original cream wrappers, lettered and decorated in red, with a photo of an aboriginal on the front cover. Pp. 1-2 3-19 20. Second edition, "completely revised." Not in Zauhmüller. Aboriginal-English, pp. 7-[20].

"The words in this book can be implicitly relied upon. They are the authentic translation by experts of aboriginal words. These meanings are in many cases quite different to those understood by explorers of a hundred years ago. If you want an aboriginal word for the name of your house, see that you get one with a meaning you can trust. The meanings in this book are authentic and can be relied upon" (from inside front cover).

**1933**: [LILLYbm] *Australian aboriginal place-names and their meanings*, by James R[obert] Tyrrell [1875-1961]. Sydney: Simmons, limited, 1933. Original black and orange illustrated paper over boards, lettered in black and white, with a photograph of an aboriginal mother and child on rear cover Pp. 1-7 8-56. With illustrations and photos. First edition. Aboriginal place names with English equivalents, pp. [7]-56. This copy with a pasted in review slip from the publishers. Also loosely inserted are two pages of further manuscript place names and English equivalents.

"Unfortunately, many of the aboriginal tribes have become extinct, and the opportunity for recording the meaning of a great number of place-names has been lost forever. However, a few of the more intelligent of the early settlers became interested in the primitive people they had dispossessed, learning their language to a greater or lesser extent, and studying their customs. From them and other sources the list of words in this book has been obtained" (Foreword, Keith Kennedy). "The illustrations in this volume are from photographs taken in the eighties and nineties of the last century, by Henry King and Charles Kerry. They are of interest as showing the fine physique and the diversity of aboriginal types" (J. R. T).

**1955**: [LILLYbm]. *Australian Aboriginal Words. Aboriginal-English. English-Aboriginal*, compiled by Rex Ingamells. Melbourne: Hallcraft Publishing Company, 1955. Original stiff red wrappers, lettered and decorated in white; dust jacket red, black and white, lettered and decorated in yellow, black and white. Pp. 1-11 12-63 64. First edition. Not in Zauhmüller. Australian Aboriginal-English, pp. 13-39, Tasmanian Aboriginal-English, pp. 43-44, English-Tasmanian Aboriginal, pp. 44-45, English-Aboriginal (general), pp. 49-63.

"There was no such thing as a single Aboriginal language... This booklet is a mixed selection of words chosen with a purpose from numerous sources. It is a list for the entertainment and use of modern Australians who feel sufficient interest in the original Australians to delight in these echoes from their speech, and perhaps to perpetuate words that aptly take the fancy in the naming of stations, houses, business enterprises, patents, and so on. I feel no other excuse is needed for presenting, cheek by jowl, words spoken of old in particular segregation of such areas as Arnhem Land, Cape York Peninsula, Gippsland, the Murray River, the Swan River, the MacDonnell Ranges.... Since most Australian Aboriginal speech has passed forever, never to be spoken again in proper dialect, here are simply memorials that may be freely used and may fitly lend colour to our transplanted European life in this country" (Foreword).

**1958:** [LILLYbm] *Vocabularies of the Four Representative Tribes of South Eastern Queensland [Gabi-Gabi, Yugumbir, Yagara, Wakawaka] with Grammatical Notes thereof and some Notes on Manners and Customs. Also A List of Aboriginal Place Names and their Derivations*, by F. J. Watson. Supplement to *Journal of the Royal Geographical Society of Australasia (Queensland)*, No. 34, Vol. XLVIII, n.d. [1958]. Original orange wrappers, lettered in black. Pp. 1-3 4-115 116. First edition. A separately printed brochure. English-Kabi [Gabi-Gabi] and Kabi [Gabi-Gabi]-English, pp. 10-39; English-Yugumbir and Yugumbir-English, pp. 40-65; English-Yugarabul [Yagara] and Yugarabul [Yagara]-English, pp. 66-77; English-Wakka [Wakawaka] and Wakka [Wakawaka]-English, pp. 78-86; all double-column.

**1960's:** [LILLYbm] *Aboriginal Words and Their Meanings*, by Joah H. Sugden. Sydney: Dymock's Book Arcade. Ltd., n.d. [circa 1960's]. Decorated cloth over boards, lettered in black and white. 32 unnumbered leaves [pp. 1-64]. No edition indicated. This copy with ownership signature of O. Taylor dated 1967. Aboriginal-English, pp. [7]-[60].

**1965:** [LILLYbm] *Aboriginal Words of Australia*, [by Alexander Wyclif Reed]. Sydney; Wellington, Auckland: A. H. & A. W. Reed, 1965. Illustrated by E. H. Papps. [**AUSTRALIAN ABORIGINES SIGN LANGUAGE**] Many Australian Aboriginal cultures have or traditionally had a manually coded language, a sign-language counterpart of their oral language. This appears to be connected with various speech taboos between certain kin or at particular times, such as during a mourning period for women or during initiation ceremonies for men, as was also the case with Armenian Women's Sign Language, but unlike Plains Indian sign languages, which did not involve speech taboo, or deaf sign languages, which are not encodings of oral language. There is some

similarity between neighboring groups, and some contact pidgin similar to Plains Indian Sign Language in the American Great Plains (Wiki).

[**AVESTAN**] Avestan /ə'vestən/, formerly also known as "Zend", is one of the Eastern Iranian languages within the Indo-European language family known only from its use as the language of Zoroastrian scripture, i.e. the Avesta, from which it derives its name. Its

area of composition comprised ancient Arachosia, Aria, Bactria, and Margiana, corresponding to the entirety of present-day Afghanistan, and parts of Pakistan, Tajikistan, Turkmenistan, and Uzbekistan. The Yaz culture of Bactria-Margiana has been regarded as a likely archaeological reflection of the early Eastern Iranian culture described in the Avesta. Avestan's status as a sacred language has ensured its continuing use for new compositions long after the language had ceased to be a living language. It is closely related to Vedic Sanskrit, the oldest preserved Indo-Aryan language (Wiki).

"This volume is issued by the Government of New South Wales, as a record of the language of native tribes that are rapidly disappearing from the coasts of Eastern Australia....In all New South Wales there are only five thousand full-blood blacks; only four or five hundred in Victoria; and in Tasmania the native race became extinct in 1876. They have decayed and are decaying in spite of the fostering care of our Colonial Governments.... In an Appendix I have collected several Grammars and Vocabularies as a contribution to a comparative knowledge of the dialects. The map and other illustrations are new, and were prepared for this work. The Gospel by St. Luke herein [in Awabakal] is now of no practical value except to a linguist; but it is unique, and it shows the structural system of the language" (The Editor's Preface).

"The earliest of individual efforts to deal with any single language of the Australian group was made by the Rev. L. E. Threlkeld, who, for many years, was engaged as a missionary among the blacks of the Lake Macquarie district, near Newcastle, New South Wales. His Grammar of their language was printed in Sydney in 1834... A few years previously, Mr. Threlkeld has translated the Gospel of St. Luke into the same language. This translation remained in manuscript and had disappeared. This "Grammar" and the "Key" and the "Gospel" are now published in a collected form in the present volume" (Introduction, Fraser).

[**AWAJÚN**] Aguaruna [Awajún] is an indigenous American language of the Jivaroan family spoken by about 45,000 Aguaruna people in Peru. The speakers live along the western portion of the Marañón River and also along the Potro, Mayo, and Cahuapanas rivers. Native speakers currently prefer the name Awajún. According to the Ethnologue, there are almost no monolingual speakers; nearly all also speak Spanish. The school system begins with Aguaruna only; as the students progress, Spanish is gradually added. There is a positive outlook and connotation in regard to bilingualism. 60 to 100% are

[**AZERBAIJANI**] Azerbaijani (/ˌɑːzərˈbɑːdʒɑːni/, /-ˈzɑːni/) or Azeri (/ɑːˈzɛəri/, /əˈ-/), also referred to as Azerbaijani Turkish or Azeri Turkish ([azərbajdʒan dili]), is a Turkic language spoken primarily by the Azerbaijani people, who are concentrated mainly in the South Caucasus geographical region. Azerbaijani is primarily spoken in Iranian Azerbaijan but it has no official status. Furthermore, the largest population of ethnic Azerbaijanis in the world live in Iran, far outnumbering those in the neighboring Azerbaijan Republic. The language has official status in Azerbaijan and also in Dagestan (a federal subject of Russia), and is also spoken to lesser varying degrees in Georgia, Iraq, and Turkey. Azerbaijani is a member of the Oghuz branch of the Turkic languages. It has two primary divisions, North Azerbaijani and South Azerbaijani, and is closely related to Turkish, Qashqai, Turkmen and Crimean Tatar, sharing mutual intelligibility with each of those languages to some extent (Wiki).

**[BADE]** Bade (also spelled Bede, Bedde, or Bode) is a West Chadic language spoken by the Bade people in Yobe State and Jigawa State, Nigeria. Their traditional ruler is the Emir of Bade. Dialects are Gashua Bade (Mazgarwa), Southern Bade (Bade-Kado), Western Bade (Maagwaram), and extinct Shirawa. Speakers are shifting to Hausa. Blench first considered Shirawa to be a distinct language, but in later works showed that a manuscript wordlist proves it was merely a dialect of Bade (Wiki).

Original yellow, white and pink wrappers, lettered in blue, orange and black, with a color photo of natives working in a river on the front cover. Yobe Languages Research Project. Bade-English Hausa dictionary, pp. 1-144.

"This is the first published dictionary of the Bade language, spoken in northern Yobe State, Nigeria. The original basis for the dictionary was a sizable collection of words assembled in 1973-75 when the editor lived in Gashua.... The original vocabulary list came mainly from stories, histories, proverbs, and so forth provided by many speakers, all of which were transcribed and checked with the indispensable help of the Muhammadu Mai Gari and Buba Nasara. The original list has been considerably expanded and many corrections have been made during the current project. ... The compilers view this as the First Edition of the dictionary. The relatively small group of people who, have assembled the information in this dictionary could not hope to do justice to the richness of Bade" (Introduction).

[**BAFIA**] The Bafia languages are a clade of Bantu languages coded Zone A.50 in Guthrie's classification. According to Nurse & Philippson (2003), the languages form a valid node. They are: Fa' (Lefa), Kaalong (Dimbong), Kpa (Bafia) [Cameroon], Ngayaba (Tibea). Hijuk was listed as unclassified A.50 in Guthrie, but according to Ethnologue it is quite similar to Basaa (Wiki)

"The history of the Bagirmese consists solely of a long series of war-like expeditions... Bagirmi is the language of the present-day sedentary Bagirmese. Most of them speak no other. It is spoken as well between Chari and Legone by ancient captives, those who have been freed, or Bagirmese traders, who are rather numerous in this region. There are an estimated 30,000 natives who speak Bagirmi. Although this is not a great

number, the study of Bagirmi is of interest because it is part of a wide-spread family of Central African languages which stretches from Chari to the basin of the Nile" (tr: BM).

Bahamian is spoken by both white and black Bahamians, although in slightly different forms. Bahamian also tends to be more prevalent in certain areas of the Bahamas. Islands that were settled earlier or that have a historically large Afro-Bahamian population have a greater concentration of individuals exhibiting creolized speech; the creole is most prevalent in urban areas (Wiki).

"Until very recently [Bahamian English] has either been undervalued, hence neglected, or even condemned-in other words, it has not been taken as a subject of scientific study" (Foreword). "The *Dictionary of Bahamian English* is the first comprehensive study of the words Bahamians use when talking informally. It demonstrates that Bahamian English forms a link between the Caribbean creoles, such as Jamaican English, and the English spoken today by many black people in the United States...[M]ixed or creolized English, once spoken on plantations in the American South as well as in the Caribbean proper, disappeared almost completely in the United States as social and linguistic forces drew Black English closer and closer to standard English. In the Bahamas, however, American plantation creole of the eighteenth century was preserved by the slaves of American loyalists brought there in the 1780's. This creole English has not only survived but flourished, developing along its own lines in this predominantly black country" (Introduction).

"This French-Baka dictionary appears long after the Baka-French (1979). It could have been done much sooner if we had followed the format of the 'reverse' dictionary; with the words simply given in French, without reference to phrases or expressions. We have attempted instead to make it an instrument for the study of the Baka language by including French phrases and expressions in the translations or their equivalents. I made use not only of the Baka-French dictionary... but also the French-Bulu dictionary of Serge Janes (Sangmélina, B. P. 105, ... 1981). The Baka in the Djoum region speak fluent Fang, which is closely related to Bulu... As with the Baka-French, we are aware of not having reached the end of our research... But in spite of its imperfections, and its small number of words, we feel this dictionary may be of some use as it is" (Introduction; tr: BM).

[**BAKHTIARI**] Bakhtiari dialect is a dialect of Southern Luri spoken by Bakhtiari people in Chaharmahal-o-Bakhtiari, Bushehr, western Khuzestan and parts of Isfahan and Lorestan provinces. It is closely related to the Boir-Aḥmadī, Kohgīlūya, and Mamasanī dialects in northwestern Fars. These dialects, together with the Lori dialects of Lorestan (e.g. Khorramabadi dialect), are referred to as the "Perside" southern Zagros group, or Lori dialects. "Luri and Bakhtiari are much more closely related to Persian, than Kurdish." The Bakhtiari dialect is considered as middle Persian dialect which could

survive through history. There do exist transitional dialects between Southern Kurdish and Lori-Bakhtiāri', and Lori-Bakhtiāri itself may be called a transitional idiom between Kurdish and Persian, with most of the language originating from Persian (Wiki).

"Bakhtiari, a Southwestern Iranian language in the Luri language continuum, is spoken by over a million people in the Zagros Mountains of Iran. Almost a century after Lorimer's (1922) publication on the phonology of Bakhtiari, the present study re-examines this topic in the light of contemporary linguistics, the study of lexicon and texts, and crucially, native speaker intuition. This new research clarifies some of the important questions left by Lorimer and in doing so, leads to surprising insights into the basic structure of the system, which shows some fundamental divergences from Middle and New Persian, and even from the other Luri languages. The first part of the book situates the language within its larger geographic and genetic context, defines the language and its varieties, and provides a summary of research on the language. The second section, which constitutes the core of the study, is devoted to an in-depth analysis of the phonological system, including segmental phonology (inventory, contrast, allophonic processes, and distribution), syllable structure and an array of morphophonological processes, as well as stress and intonation. The final three sections of the book comprise an interlinearized Bakhtiari folktale, tables of verb paradigms, and a semantically organized lexicon containing 1500 items."--Page 4 of cover.

[**BALI**] Balinese or simply Bali is a Malayo-Polynesian language spoken by 3.3 million people (as of 2000) on the Indonesian island of Bali, as well as northern Nusa Penida, western Lombok and eastern Java. Most Balinese speakers also know Indonesian. In 2011, the Bali Cultural Agency estimates that the number of people still using Balinese language in their daily lives on the Bali Island does not exceed 1 million, as in urban areas their parents only introduce Indonesian language or even English, while daily conversations in the institutions and the mass media have disappeared. The written form of the Balinese language is increasingly unfamiliar and most Balinese people use the Balinese language only as a spoken tool with mixing of Indonesian language in their daily conversation. But in the transmigration areas outside Bali Island, Balinese language is extensively used and believed to play an important role in the survival of the language (Wiki).

Both dialects are apparently treated here for the first time, although the author refers to the work of van der Tuuk (see above), which may deal with these dialects in some way. The study is divided into two sections, Sembiran (pp. 5-13) and Spang (pp. 26-26). A 13-word Sembiran-Balinese-Indonesian vocabulary is included pp. 8-9, and a 19-word Spang-Balinese-Indonesian vocabulary is given on p. 25. More recently, I Nyoman Sedeng has studied

the Sembiran dialect in *Morfosintaksis bahasa Bali dialek Sembiran: analisis tatabahasa peran dan acuan*, Denpasar, Bali: Udayana University Press, 2010.

**1977:** [LILLY] *A basic Balinese Vocabulary*, by N. Shadeg. Denpasar: Darna Bahkti, 1977. ff I-VI pp. 1-194 195-198. Original green wrappers, lettered and illustrated in black. "1000 basic words" English-Indonesian-Balinese, pp. 1-38, and "3000 basic sentences" pp. 41-151, with single English-Balinese words followed by various Balinese sentences using the Balinese word. The title page gives the date 1953 followed by "1977 (revised)" but it appears from the introductory material that this is the first actual publication of the book, based on material which the author began gathering in the early 1950's.

**1978:** [LILLY] *Kamus Bali-Indonesia*, Panitia Penyusun Kamus Bali-Indonesia. Bali (Indonesia: Province).; Dinas Pengajaran. [Denpasar]: Dinas Pengajaran, Propinsi Daerah Tingkat I Bali, 1978. 651 pages; 22 cm. Original dark blue cloth, lettered in gold. First edition. Bali-Indonesian, pp. [25]-651.

**1979:** [LILLYbm] *A Balinese-English Dictionary*, by C[harles] Clyde Barber. Aberdeen: University of Aberdeen, 1979. Two vols. Original white wrappers lettered in black, with red linen spines. [Vol. 1] [2] i-ix x, 1-433 434; [Vol. 2] 433-809 810 (pagination error, p. 433 twice). First edition. Aberdeen University Library, Occasional Publications No. 2.

"The dictionary here offered is a translation into English and a complete re-arrangement of R. van Eck's 'Eerste Proeve van een Balineesch-Hollandsch Woordenboek' (Utrecht, 1876), supplemented from other sources. These are: (1) the enormous Kawi-Balinese-Dutch dictionary of H. van der Tuuk (ca. 1900); (2) the *Kamus Bali Indonesia* (Dénpasar, Bali, 1978) undertaken by a committee of Balinese scholars... (3) the *English-Balinese-Indonesian Vocabulary* (1977, Dénpasar) of the Revd Peter N. Shadeg... Until 1978 it was practically impossible to obtain any books in Balinese... It was some consolation to discover that both v. d. Tuuk's great work and the *Kamus* lack numerous words which I had on my slips, proving that neither of them contains the whole rich treasure of the vocabulary of Balinese" (Preface). Barber was "quondam Senior Lecturer in German" at the University of Aberdeen.

**[BALUAN-PAM]** Baluan-Pam is an Oceanic language of Manus Province, Papua New Guinea. It is spoken on Baluan Island and on nearby Pam Island. **1925:** [LILLYbm] *English-Balochi Colloquial Dictionary*, 2 vols. [Vol. I: Ab-Lo; Vol. II Lo-Zi], by George Waters Gilbertson, assisted by Gháno Khán Haddiání. Hertford: published by the author, printed by Stephen Austin & Sons, 1925. Original dark brown cloth over boards, decorated in blind and lettered in gold. [Vol. 1] *i-v vi-xl*, 1-2-400; [Vol. 2] [4] 401-826 827-828. First edition. Zaunmüller, col. 25. English-Baluchi, pp. [1]-400, and Baluchi-English, pp. 401-[794]. Zaunmüller lists two earlier dictionaries: T. J. L. Mayer: *English-Balochi Dictionary*, Lahore, 1910, and Miles Longworth Dames: *A Textbook of the Balochi Language*, Lahore, 1891, with a Balochi-English dictionary.

"Balochi, as we all know, has no literature behind it. We have had nothing to fall back upon as a guide. To add to our difficulties, if any were needed, our fellow worker was 'called to his fathers' before the work was half finished....We have been trying to get into communication with the good man....So far we have not succeeded. We hope to be more fortunate later on, with the help of Messrs. Oliver Lodge and Conan Doyle. It has been said that scholars are like hens: that they lay better when they have to scratch for their food...we have left a good deal of scratching to be done by the hens, and by the cocks, too. To the scholar we have merely indicated where the 'kitchen-midden' is, and where and how much such scratching has yet to be done" (Foreword).

**1963:** [LILLYbm] *A Vocabulary of Marw Baluchi*, by Josef Elfenbein. Naples: [Istituto Universitario Orientale di Napoli], 1963. Original cream wrappers, lettered in black and decorated in green. 1-7 8-106 107-108. First edition. Quaderni della sezione linguistica degli annali, II. Baluchi-English vocabulary, pp. [11]-84, and English-Baluchi index, pp. [85]-106.

"There have been available for some years several collections of Baluchi materials, in many dialects. The use of these materials has, however, always been severely handicapped by the lack of published glossaries. This word list will, it is hoped, serve to supply this lack, at least as regards the texts published in the Marw dialect, one of the largest of these collections. A sketch of the grammar of this dialect of Baluchi was published by Sokolov in 1956...and the present word list is in a sense complementary to it."

**1985:** [LILLYbm] *Baluchi glossary. A Baluchi-English glossary: Elementary Level*, by Mumtaz Ahmad. Keningston, Maryland: Dunwoody Press, 1985. Original green imitation leather over boards, lettered in gold. Pp. *i-ii iii-viii*, 1-2 3-150 151-152. First edition. "The present work...will fill a gap in the field of available Baluchi teaching materials in English. The glossary consists of 2,500 entries of Baluchi words and phrases most frequently used in everyday discourse and in the contemporary Baluchi newspapers, periodicals, and publications of general interest in Pakistan and Iran...Baluchi has six major dialects...The present work is based on the Rakhshani dialect [classified by Ethnologue as a Western Balochi dialect] (because of its central location, wide intelligibility, and socio-cultural importance in contemporary Baluchi society" (Preface).

[**BAMANANKAN**] The Bambara (Bamana) language, Bamanankan, is a lingua franca and national language of Mali spoken by perhaps 15 million people, 5 million Bambara people and about 10 million second-language users. "I've given the name *Petit Dictionnaire* to this book because it's smaller format allows it to be carried in the pocket. It may not be complete, but it almost all common words and should therefore prove useful.... I have the pleasure of hoping that this little dictionary, dedicated to Monsieur le Gouverneur du Haut-Sénégal et Niger, will be of service not only to the increasing number of Europeans learning the language, but also to local administrators and in particular to all my colleagues who received my *Petit Manuel Français-Bambara* so warmly. I believe that the book's utility will extend even further, since the Bambara language has spread widely throughout a large part of French West Africa" (Introduction, tr: BM),

"Banda is the language spoken throughout the central portion of the Oubangui-Chari colony, right in the center of Africa.... In this work we introduce all the words known to us, together with their various dialectical forms. It must not be forgotten that Banda is not a written language and has no tradition of script; moreover, it is in a constant state of development which results in a flood of forms, often insignificant, but occasionally of more importance.... When I arrived in 1911 in the country of the Bandas... I found, in addition to the small but well informed volume of Father Cotel, the excellent manuscript lexica of Father Daigre, who spent several years among the Togbo populations. It is these works that have formed the scaffold for the present dictionary. I have had to correct the prior material at time, and often augment it, but it still remains the fundamental basis of my knowledge of the Banda language" (Introduction). The dictionary of Banda by Cotel, also French, was published in 1907 in Brazzaville [a copy is available on microfiche at IUW].

"Yugambeh is the name currently accepted for the northern and more easterly dialects of a language that was spoken, in a number of dialects, from the Logan and Albert Rivers, in Queensland, down to the Northern Rivers area of N.S. W. and west to Warwick in Queensland" (What is in this Dictionary). "There was never one name for the language, nor just one name for even a particular dialect group... Although in the last forty years scholars have used the name Banjalang... for the 'whole' language, this name is not acceptable to all who speak the language or whose ancestors spoke it. To speakers of some dialects to call their language 'Banjalang' is as unacceptable as to call Dutch 'German'" (General Introduction).

[**BANGALA**] Bangala is a Bantu language spoken in the northeast corner of the Democratic Republic of the Congo, in South Sudan, and the extreme western part of Uganda. A divergent form of Lingala, it is used as a lingua franca by people with different languages and rarely as a first language. The estimated number of speakers varies between 2 and 3.5 million. It is spoken to the east and northeast of the area where Lingala is spoken.

Ethnologue: bxg. Alternate Names: Ngala.

**1903:** [LILLYbm] *Suggestions for a grammar of "Bangala" (the Lingua Franca of the Upper Congo), with 2000 words and many useful phrases*, by Walter H[enry] Stapleton. Yakusu, Stanley Falls, Congo Independent State: Baptist Missionary Society, [1903]. Original green quarter-cloth and tan paper over boards, lettered and decorated in black. 116 pp. First edition. Hendrix 956. Printed in Bolobo, Congo Independent State. English-Bangala vocabulary, pp. 51-98. Not in Zaunmüller. Reinecke 103.289. This copy with the bookplate of the Baptist Missionary Society Mission House Library. A second edition of the English version, revised and enlarged by Frank Longland, appeared in 1914 (see below).

"[This is] a pamphlet [on the subject of a common language] for circulation amongst the white men of the Congo who may feel the time has come for some attempt to be made towards the solution of the language difficulty" (Preface). "It is quite impossible that the State officials should learn all the languages spoken in the Congo basin... and no one language at present serves for a region of even moderate extent... Seeing the difficulty the Government decided some years ago that 'Bangala' should be used as the *lingua franca*... Out of this felt necessity has grown up a jargon called 'Bangala' which is spreading rapidly over the whole of that part of the Congo basin which has never passed under the domination of the Arabs. In the Oriental Zone a broken Swahili is, for the moment, a strong competitor ... 'Bangala' has come and scorn it as we may, it has come to stay... Could not the white man introduce into this *lingua franca* those grammatical forms of expression which would make it [the basis for a common language], and without which it will, and must remain an utterly ineffective jargon?... I cannot shut my eyes to the fact that already thousands have been born to the State forces to whom 'Bangala' is the only mother tongue they know... We can attempt to direct and control this movement, shaping the 'Bangala' gradually into a language which will serve for the State station, colony, and mission school... and as an effective medium of

interchange of thought and idea between the widely scattered tribes of this region of Darkest Africa" (Introduction).

This copy with the bookplate of the Baptist Missionary Society Mission House Library. Not in Zaunmüller. Stapleton died in England in 1906.

"When Mr. Stapleton produced his first edition, a good number of his friends thought he was wasting his time and his philological talents on a project of such little value, but he himself was satisfied to know that his efforts would aid in improving relationships between whites and their native workers. Knowing that he hoped to publish a similar language for general usage among the inhabitants of the district of Stanleyville, I have taken the liberty of inserting the Kingwanya [Swahili] equivalents to the Bangala words in this book, thinking that it will render it even more appreciated and useful" ("Preface to the Second Edition" dated 1910) (tr: BM).

"The Dictionary presented here is based on the oral and written corpus of material for the Bangala language, to which, to some measure, is added the idiolect of the author, whose native language is Bangala.... For a long time the scientific public ignored the Bangala language, which was at best considered a dialect of Lingala, is nevertheless spoken by around two million people. It is a second language, and in a few rare cases (as a consequence of urbanization) the first language, of those living in the north of Zaire, the south of Sudan and the extreme west of Uganda" (Introduction, tr: BM).

[BANGI] The Bangi language, or Bobangi, is a relative and main lexical source of the Lingala language spoken in central Africa. Dialects of the language are spoken on both sides of the Ubangi and Congo Rivers (Wiki).

**1899:** [LILLY] *Grammar and Dictionary of the Bobangi Language as Spoken over a Part of the Upper Congo, West Central Africa, compiled and prepared for the Baptist Missionary Society's Mission in the Congo Independent State*, by John Whitehead. London: Baptist Missionary Society and Kegan Paul, Trench, Trübner & Co., 1899. 500 pp. Original purple publisher's cloth, spine lettered in gilt. First edition. Zaunmüller, col. 26. Hendrix 407. The first dictionary of the language. Second copy: LILLY.

"The representatives of the original [Bobangi] tribe are fast disappearing, and the few that remain may be counted on the fingers...[yet] the Bobangi language is the most important one from Stanley Pool to beyond Bangala. It is also the basis of the eclectic 'trade' language used by the officers of the Congo Independent State, by traders and other travellers...[NB: this is denied by Stapleton (see Lingala, 1903): 'This observation is scarcely borne out by the facts']. These facts justify the present publication of a Dictionary and Grammar of the real Bobangi language as far as it has been possible to gather it."

Whitehead included additional words to his dictionary forty years later in A.G.W. MacBeath's Bobangi primer, published in Bolobo in 1940 (see below).

Reprinted **1964:** [LILLYbm] *Grammar and Dictionary of the Bobangi Language as Spoken over a Part of the Upper Congo, West Central Africa*, compiled by John Whitehead. Ridgewood, NJ: Gregg Press, 1964. Stiff wrappers with cloth spine. Reprint of original edition of 1899. Second copy: IUW.

J. Whitehead," approximately 100 Bobangi words with English definitions. "We need to become like little children to enter the kingdom of African speech...The spelling of Bobangi has been standardized now that fifty years of literary education have passed....This book was drafted and wrought out after it was learned that Mr. Whitehead's Grammar and Dictionary of Bobangi was exhausted.... However scarce copies of Mr. Whitehead's Dictionary may become... it is quite indispensable, and should be begged, borrowed or stolen! That quite inexhaustible treasure house must be always at the student's elbow. By the kindness of Mr. Whitehead I have been able to include, here and there amid grammar but especially in the select vocabulary of indeclinables and on page 100, some additional notes that he had prepared, to cover some omissions from his dictionary."

[**BANGUBANGU**] Bangubangu is a Bantu dialect cluster spoken by the Bangubangu people of the Democratic Republic of the Congo. The dialects are about 80% similar, apart from Hombo which is only 70% similar to the main dialect. It is possible that they are distinct languages. Christine Ahmed (1995) classifies the small "Bangubangu of Mutingua" apart from the rest, with the Luba rather than Hemba languages; this is presumably a Hombo dialect (Wiki).

[**BANIVA**] Abane (Avane), or Baniwa of Guainia, is an Arawakan language of Venezuela with a few speakers in Brazil. Aikhenvald counts  $\approx$  200 speakers while Ethnologue reports the language is extinct; Ethnologue counts Xie Warekena in Brazil as a dialect of Guarekena rather than of Abane as in Aikhenvald, but this only amounts to ten speakers. Abane is one of several languages in the region called Baniwa. Ethnologue (2015) distinguishes "Baniva" for the Baniwa of Guainia and "Baniwa" for the Baniwa of Içana, but they are merely spelling variants, and either spelling may be used for either language (Wiki).

Ethnologue: (Baniva) bvv. Alternate Names: Abane, Avani, Ayane. Distinct from Baniwa in Rio Negro region. No known native speakers.

More than 100 questionnaires were filled in with Bantawa data from different locations in the eastern districts of the Kinging... To make the dictionary maximally useful to linguists interested in Tibeto-Burman studies in general, it was decided to limit the material to be published in the present volume to native Bantawa vocabulary, excluding in the process almost all Nepali loanwords..." "Why a book on Baoulé?... Because many people need one. Those who have lived in our country for many years and who, having learned to love its inhabitants, have also come to love its spoken language, one of the most beautiful of the Ivory Coast.... Our country would today know its great authors in prose and poetry if it had been a written language." (Introduction, tr: BM).

Thanks to the additional vocabulary I was able to collect during my stay on the Ivory Coast during 1978-1980, I have been able to enlarge the dictionary by approximately 30%. This also gave me the opportunity to make corrections and to offer more precise definitions in German. A further ground for this revision lies in the increasing importance of Baoulé. It is expected that Baoulé will be introduced into the schools in the near future" (Introduction: tr: BM).

[**BASQUE**] Basque (/bæsk/ or /bɑːsk/; Basque: euskara, IPA: [eu̯s̺ˈkara]) is the language spoken by the Basques. Linguistically, Basque is unrelated to the other languages of Europe and indeed, as a language isolate, to any other known language. The Basques are indigenous to, and primarily inhabit, the Basque Country, a region that straddles the westernmost Pyrenees in adjacent parts of northern Spain and southwestern France. Native speakers live in a contiguous area that includes parts of four Spanish territories and the three "ancient provinces" in France. Gipuzkoa, most of Biscay, a few municipalities of Álava, and the northern area of Navarre formed the core of the remaining Basque-speaking area before measures were introduced in the 1980s to strengthen the language. Under Restorationist and Francoist Spain, public use of Basque was frowned upon, often regarded as a sign of separatism; this applied especially to those regions that did not support Franco's uprising (such as Biscay or Gipuzkoa). Overall, in the 1960s and later, the trend reversed and education and publishing in Basque began to flourish. As a part of this process, a standardized form of the Basque language, called Euskara Batua, was developed by the Euskaltzaindia in the late 1960s. A language isolate, Basque is believed to be one of the few surviving pre-Indo-European languages in Europe, and the only one in Western Europe. The origin of the Basques and their languages are not conclusively known, though the most accepted current theory is that early forms of Basque developed prior to the arrival of Indo-European languages in the area, including the Romance languages that geographically surround the Basque-speaking region. The Basque alphabet uses the Latin script (Wiki).

"The Batak inhabit a rugged part of northeastern Palawan, the fifth largest island in the Philippines. As a cultural and linguistic entity, the Batak form a hunting, gathering, and quasi-shifting-cultivating, loosely organized group of bands...The Batak population

has been estimated to number between 800 and 1000 individuals...recent reports indicated that the remnants of the group are rapidly disappearing. Most of the linguistic data contained in this field vocabulary were obtained while the author was engaged in ethnographic field work on Palawan Island in 1950-1951" (Abstract). "I have also incorporated into this field vocabulary the Batak word list collected by McKaughan and Gridley (1954, [unpublished manuscript])." (Introduction).

[**BAYOT**] Bayot (Baiot, Baiote, Bayotte) is a language of southern Senegal, southwest of Ziguinchor in a group of villages near Nyassia, in northwestern Guinea-Bissau, along the Senegalese border, and in the Gambia. Bayot has traditionally been considered the most divergent Jola language, in the (geographic) Atlantic branch of the Niger–Congo language family. However, half of its vocabulary, including basic terms such as pronouns, are not Jola or even Atlantic, and may not be Niger–Congo, though grammatically it behaves as a typical Jola language. It is therefore often left unclassified pending further research (Wiki).

[**BELARUSAN**] Belarusian (/belə'ru:siən/; беларуская мова bielaruskaja mova [b'ela'ruskaja 'mova]) is an official language of Belarus, along with Russian, and is spoken abroad, chiefly in Russia, Ukraine, and Poland. Before Belarus gained independence from the Soviet Union in 1991, the language was known in English as Byelorussian or Belorussian, transliterating the Russian name, белорусский язык, or alternatively as White Ruthenian (/ru:'θi:njən/) or White Russian. Following independence, it also became known as Belarusian. Belarusian is one of the East Slavic languages and shares many grammatical and lexical features with other members of the group. To some extent, Russian, Ukrainian, and Belarusian are mutually intelligible. Its predecessor stage is known as Old Belarusian (14th to 17th centuries), in turn descended from Old East Slavic (10th to 13th centuries). At the 1999 Belarus Census, the Belarusian language was declared as a "language spoken at home" by about 3,686,000 Belarusian citizens (36.7% of the population). About 6,984,000 (85.6%) of Belarusians declared it their "mother tongue" (Wiki).

[**BELIZE KRIOL ENGLISH**] Belize Kriol English (also Kriol or Belizean Creole) is an English-based creole language closely related to Miskito Coastal Creole, Jamaican Patois, San Andrés-Providencia Creole, Bocas del Toro Creole, Colón Creole, Rio Abajo Creole and Limón Coastal Creole. Population estimates are difficult; virtually all of the more than 70,000 Creoles in Belize speak Kriol. Kriol is the lingua franca of Belize and is the first language of some Garifunas, Mestizos, Maya, and other ethnic groups. It is a second language for most others in the country (Wiki)

"At a time when we are on the threshold of political independence, when national consciousness is high, when increased educational opportunities and communication are rapidly modifying our speech, it is fitting that the language in which our most meaningful proverbs, songs and stories are told, should be recorded." (E.P. Yorke, Chief Education Officer, Belize, Foreword). "I do not profess to be an authority on the Belizean Creole dialect... If in my attempt to produce this work I will have established a basis for a more elaborate and perhaps comprehensive effort, I would feel rewarded in adding one more contribution to the culture of my countrymen" (Introduction). "With the possible exception of the Maya Indians, the original settlers of Belize were Africans brought over by Englishmen who were engaged in wood-cutting, hence the creolisation in Belize, thereby adding to the list of pidgin survivors, 'Belizean Creole.'.. Belizean Creole comes out of English and the first sentence uttered by the Belizean child is Belizean Creole... Belizean Creole should be regarded as a language - not a dialect - and apart from the verses written by the late James Martinez... and by the late James A.C. Elliott..., nothing in writing has heretofore been attempted in Belizean Creole. ...I shall make every attempt... to be consistently simple in the spelling of the Belizean Creole words. I hope

that I shall meet with some measure of success in this respect. I am, therefore, devoting a section of this work to a Belizean Creole-English dictionary..." ("The Belizean Creole"). George McKesey was a Belizean Creole himself, orphaned at an early age, teaching on a salary of \$6.00 a month in later life, and then a stage comedian and singer. He contributed to the development of broadcasting in Belize by serving as radio announcer for Radio Belize. Several of his radio programs touching on Belizean Creole, dating from the mid-1950's, are included, pp. 68-89.

"The purpose of the books is to provide a guide to the spelling of words in Belize Kriol.... This is not a dictionary. It will be a helpful tool for the further collection of words and definitions towards the creation of a dictionary of the Kriol language of Belize... The English words are not definitions. They show close approximations in meaning to the Kriol words aligned... A workshop was held in Belize City in June, 1994 to develop an organized writing system for Belize Kriol... The spelling system created at that workshop is that which is followed here" (Introduction).

[**BELLA COOLA**] Nuxalk /'nu:hɒlk/, also known as Bella Coola /'bɛlə 'ku:lə/, is a Salishan language spoken by the Nuxalk people. Today it is spoken only in the vicinity of the Canadian town of Bella Coola, British Columbia by perhaps 20 elderly people. While the language is still sometimes called Bella Coola by linguists, the native name Nuxalk is preferred by some, notably by the Nuxalk Nation government. [**BENGA**] Benga is a West Bantu language spoken by the Benga people of Equatorial Guinea and Gabon. It has a dialectical variation called Bapuku. Benga-speakers inhabit a small coastal portion of Rio Muni, the Cape of San Juan, suburban enclaves of Rio Benito and Bata, the islands of Corisco, Small Elobey and Great Elobey (Wiki)

[**BENGLISH**] Bengali (/beŋ'gɔ:li/) or Bangla (/ba:ŋla:/; Bangla ['baŋla]) is the language native to the region of Bengal, which comprises the present-day nation of Bangladesh and of the Indian states West Bengal, Tripura and southern Assam. It is written using the Bengali alphabet. Bengali is the national language in Bangladesh and second most spoken language in India. With about 250 million native and about 300 million total speakers worldwide, it is the seventh most spoken language in the world by total number of native speakers and the eleventh most spoken language by total number of speakers. The importance of this language to the countries of South Asia is illustrated by the history of the national anthems of Bangladesh, India and Sri Lanka, and the national song of India, all first composed in the Bengali language (Wiki).

**1788:** [LILLYbm] *The Indian vocabulary. To which is prefixed the forms of impeachments*, [by Weeden Butler (1742-1823)]. London: John Stockdale, 1788. Contemporary brown half-calf and marbled paper over boards, decorated in gold, with black leather label. Pp. [4] *i-ii* iii-xvi, 1 2-136, +<sup>2</sup>1 2-14 15-16. First edition. Not in Zaunmüller. This copy with the ink ownership signature of Mary J. Douglas, dated May, 1817. Bengali-English, pp. [1]-133, preceded by "Forms of Impeachment," pp. iii-xiii. This appears to be the first substantial, separately published Bengali-English vocabulary and is the earliest title listed under "Indian terms" in the article on dictionaries in the 13<sup>th</sup>

ed. of the *Encyclopedia Britannica*. The earliest bilingual Bengali dictionary in any language is Portuguese, published in Lisbon in 1743.

Second copy: [LILLY] *The Indian vocabulary: to which is prefixed the forms of impeachments* [by Weeden Butler]. London: J. Stockdale, 1788. xvi, 136 pages; 16 cm (8vo). Bound in contemporary catspaw calf, flat spine with red morocco title label, rubbed; hinges restored. Lilly Library copy front endpaper inscribed: "R. Gardner. 1795" Lilly Library copy is interleaved and annotated on more than 100 pages by a contemporary hand, probably R. Gardner, an East India employee. "First edition of a rare work that was published to provide explanations of Indian words for those interested in following the trial of the governor general of British India, Warren Hastings (1732-1818). Presumably many of the words were printed here for the first time" (Bookseller's description: Glen Horowitz).

"The Event of Mr. Hasting's Trial, which at present engrosses the general attention... every publication capable of rendering assistance to those whom curiosity may lead to be present at so important a scene, will, no doubt, be received with the approbation of the public". Warren Hastings (1732-1818) was the first governor-general of British India. Edmund Burke led the call for his impeachment in the British Parliament in 1786, censuring his actions as governor-general as part of a broader struggle between the India Company and the British government for ultimate control of India. "The actual trial did not commence until 1788 [hence the addition of the forms of impeachment to this otherwise apolitical vocabulary]. For seven long years Hastings was upon his defence on the charge of 'high crimes and misdemeanors.' During this anxious period he appears to have borne himself with characteristic dignity, such as consistent with no other hypothesis than the consciousness of innocence. At last, in 1795, the House of Lords gave a verdict of not guilty on all charges laid against him" (*Encyclopedia Britannica*, 13<sup>th</sup> ed.).

"The necessity of such a work as the following Vocabulary... has been long universally allowed. The lists of words generally printed with publications which relate to the East-Indies, have always been found so short and incomplete, as even frequently to be incapable of assisting the reader through the pages to which they were prefixed or subjoined. It is from this consideration, of the insufficiency of all Vocabularies of Bengal words hitherto published, that the Editor of the following has been induced, with considerable pains and application, to collect into one series, all such terms (in whatsoever publications they lay scattered) as could, by their explanation, in any respect tend to the elucidating and better understanding of East-India affairs" (Preface).

**1818, 1825:** [LILLYbm] *A dictionary of the Bengalee language in which the words are traced to their origin and their various meanings given, Vol. I. Second edition., with corrections and additions; Vol. II-Part [I]-II*, by William Carey [1761-1834]. Serampore: printed at the Mission-Press, 1818, 1825. Two vols. bound in three. Worn contemporary brown-half leather and orange cloth over boards; spines with black leather label, title lettered in gold, and author lettered in gold directly on spine; five raised bands. Pp. Vol. I: [2] *i-iii iv-vii viii, 9 10-616*; Vol. II: [4] *1 2-790 791-792, 793-796 797-1544*.

Second edition, revised and enlarged. Zaunmüller, col. 29. The first, one-volume edition, was published in 1815. The present edition carries a Preface in Vol. by Carey dated 1818. The title page for Vol. II of this copy may be that of the second part of Part II.

"Till of late, the Bengalee language was almost wholly neglected by Europeans, under the idea of its being a mere jargon, only used by the lower orders of people.... Since the institution of the College of Fort Williams, this prejudice has gradually been giving way. The Bengalee language has become the object of study.... The number of books yet published in the language is very small... no work has yet been published on any one science, nor a treatise upon any particular subject.... The want of a Dictionary of the Bengalee language has long been felt, especially by the students in the College of Fort Williams. Induced by this acknowledged want and... after many delays, [the author] presents it to the public. He has endeavoured to introduce every simple word used in the language" (Preface).

Third edition of volume 2 **1839**: [LILLY] *A dictionary of the Bengalee language. Vol. 2, English and Bengalee*, by William Carey. Serampore: Sold at the Press, and also by Mr. P.S. Derozario, Church Mission Press, and by all the principal booksellers in Calcutta, 1839. 432 p.; 23 cm. In later supplied grey wrappers, photocopy of t.p. pasted to upper wrapper. The two volume "A dictionary of the Bengali language" was issued 1827-1828 and 1827-1839, with vol. 1 abridged from Dr. Carey's quarto dictionary by John C. Marshman and vol. 2 compiled by John C. Marshman. See BM 33:1017 and NUC pre-1956.

**1828a**: [LILLYbm] [First part of title in Bengali script] *Or a Dictionary of the Bengali Language with Bengali Synonyms and an English Interpretation, compiled from native and other authorities*, by William Morton. [Bombay?]: Bishop's College, printed by H. Townsend, 1828. Recent green cloth over boards, lettered in gold, signed Kokil & Co. on the binding. Pp. i-vi, 1 2-660 661-662. First edition. Not in Zaunmüller. This copy with the ink stamp "Peoples free reading room and library, Dhobi Talao branch" and "Cancelled" stamp dated 1966. Bengali-English, pp. [1]-660, and Errata and Addenda, pp. [661-662]. Morton was the first missionary appointed to India by the Incorporated Society for the Propagation of the Gospel of Foreign Parts.

"Early on his arrival to this country, the Compiler became sensible of the want of such a compendium, a mean between the meagreness of a mere vocabulary and the diffuseness of the more elaborate species of Dictionaries. At the period when this work was undertaken, there were extant only the vocabulary of Mr. Foster and the large quartos of Dr. Carey [second edition, 1825].... In no accredited Dictionary of any literary language are the gross vulgarisms of the boor and the low artizan admitted to hold a place, which decency and good taste refuse them. Dr. Carey's great work is as much depreciated in value as it is augmented in bulk, by a mass of matter utterly irrelevant to the study of the provincial tongue; in nearly every instance, the Sanscrit Dictionary of Dr. Wilson being transcribed verbatim in its pages, to the utter confusion of the student, who is thus set afloat on an unknown ocean of words without pilot of compass.... The Abridgement of Carey's Dictionary being merely a reduction of the bulk of that work, retaining all its peculiarities though meagre in its explanatory portion, has been of no additional service" (Preface). With further detailed criticisms of Foster and Carey.

**1828b:** [LILLYbm] *A Companion to Johnson's Dictionary in English and Bengalee, to which is prefixed an introduction to the Bengalee language, adapted for the use of both Native and European students. Vol. II*, by John Mendies.. Serampore: The Serampore Press, 1828. Contemporary brown half-leather without lettering. Pp. [4] 1 2-530. First edition. Not in Zaunmüller. This copy with the ink stamp of the Mercantile Library of New York. Bengali-English, pp. [1]-524. Intended as a companion volume to the English-Bengali edition of 1822.

"[The author's] original design was to publish a second edition to his Dictionary, together with the present volume as a companion to it, in two volumes at once; but want of means and other unforeseen obstacles, have prevented him from carrying his design into immediate execution. However, he pledges himself to the public, that not long hence the second edition of his Abridgement of Johnson's 'Dictionary in English and Bengalee' will be published upon a more improved plan, so as to give general satisfaction... The present volume... contains upwards of Thirty-Six Thousand selected words from the works of eminent Oriental Scholars, besides many other useful words and other synonymous terms not to be found in any Dictionary extant" (Advertisement).

**1851:** [LILLYbm] *Abridgment of Johnson's Dictionary, English and Bengali. Peculiarly calculated for the use of European and native students. The Second, Improved edition. To Which are subjoined abbreviations commonly used in writing and printing; and a short list of French and Latin words and phrases in common use among English authors*, by John Mendies. Calcutta: Printed for the compiler by J. Thomas, at The Baptist Mission Press, 1851. Original brown cloth over boards, lettered in gold, recased. Pp. *i-iii* iv-viii, 1 2-390 391-392. Second edition. Not in Zaunmüller. First edition was 1822. English-Bengali, pp. [1]-386.

"By the infinite mercy of God I have been spared to complete this second, and improved Edition of Johnson's Dictionary in English and Bengali... Antecedent to the year 1822, the year of the publication of my first Edition, when Dr. Carey's great Dictionary was going through the Press, I made it a constant practice to cull from his work, as well as from other sources, as many Bengali words, as would suit my purpose... For effecting this I enjoyed great advantages; being a reader and corrector of the [Serampore and Baptist Missionary] Press, the proof sheets of the whole of Dr. Carey's Dictionary must necessarily pass through my hands... At that time, with the exception of the scarce and high-priced Vocabulary of Mr. Foster [not in Zaunmüller], and another English and Bengali Vocabulary by Mohanprasad Thakur [not in Zaunmüller], I know of no other work then extant whereby the wants of the middling class of Native English students could have been supplied, and this circumstance gave rise to Johnson's Dictionary in English and Bengali" (Preface).

[**BEOTHUK**] The Beothuk language (/bi:'ɒtək/ or /'beɪ.əθɒk/), also called Beothukan, was spoken by the indigenous Beothuk people of Newfoundland. The Beothuk have been extinct since 1829 and there are few written accounts of their language, so little is known about it.

Beothuk is known only from four word lists written down in the 18th and 19th centuries. They contain more than 400 words but no examples of connected speech. However, a lack of any systematic or consistent representation of the vocabulary in the wordlists makes it daunting to establish what the sound system of Beothuk was, and words listed separately on the lists may be the same word transcribed in sundry ways. Moreover, the lists are known to have many mistakes. This, along with the lack of connected speech leaves little upon which to build any reconstruction of Beothuk... From 1968 onwards John Hewson has put forth evidence of sound correspondences and shared morphology with Proto-Algonquian and other better-documented Algonquian languages, though if valid Beothuk would be an extremely divergent member of the family. Other researchers claimed that proposed similarities are more likely the result of borrowing rather than

cognates. The limited and poor nature of the documentation means there is not enough evidence to draw strong conclusions. Owing of this overall lack of meaningful evidence, Ives Goddard and Lyle Campbell claim that any connections between Beothuk and Algonquian are unknown and likely unknowable (Wiki).

This is the first full treatment of the vocabulary of the language.

"The Beothuk Indians of Newfoundland were among the first peoples of the North American continent to be contacted by Europeans. Cartier in his first voyage of 1534 relates how he reached the Newfoundland coast in the month of May, and comments that the natives were tall and well built, and had the habit of covering themselves with red ochre. This custom, commented on by many of the early explorers and writers, gave rise to the term 'Red Indian', which has since become a generic term for North American Indians....[Eventually] hostilities against the Beothuk by both white settlers and Micmac reached such a point that the Beothuk were hunted like wild animals and shot on sight, man, woman and child...By 1823 this once numerous tribe...was reduced to a mere handful, a total of fifteen individuals" (Historical Background). a series of early vocabularies of Beothuk reproduced in facsimile and transcribed: "The definitive vocabularies so established are put together in a single listing (by English gloss) in an appendix" [pp. 149-167].

[**BERBER LANGUAGES**] Berber or the Amazigh languages or dialects (Berber name: Tamaziyt, Tamazight, [tæmæ'zɪyt], [θæmæ'zɪyθ]) are a family of similar and closely related languages and dialects indigenous to North Africa. They are spoken by large populations in Algeria and Morocco, and by smaller populations in Libya, Tunisia, northern Mali, western and northern Niger, northern Burkina Faso, Mauritania, and in the Siwa Oasis of Egypt. Large Berber-speaking migrant communities have been living in Western Europe since the 1950s. In 2001, Berber became a constitutional national language of Algeria, and in 2011 Berber became a constitutionally official language of Morocco, after years of persecution. Berber constitutes a branch of the Afroasiatic language family, and has been attested since ancient times (Wiki).

Bidyara-Gungabula-English, pp. 189-218. This is the first published vocabulary of these two languages.

"The preparation of this preliminary grammar of Bidyara and Gungabula has been hastened by the interest being taken in the language and customs of the Aborigines of the Charleville-Augathella area by Mr. F.G.W. Ford of Charleville. Mr Ford, whose work as the only dental surgeon serving a large area of Western Queensland brings him into contact with and gives him the confidence of many Aborigines, is hoping to arouse the interest of the younger Aborigines in their culture and language. As one means to this end he has been attempting to learn the language from some of the older speakers. It is hoped that this grammar and vocabulary will be useful to him and to any young Aborigines or other local people who may be interested.... The work... has been financed by the Australian Institute of Aboriginal Studies" (Preface).

"Present day Bidyara and Gungabula people are concentrated in two main groups; one at Augathella and Charleville... and the other at Clermont... The only neighboring language about which they seem to know anything much is the 'Maranoa Language' or 'Mitchell Language', which seems superficially to be almost identical.... Gungabula

people now regard the Bidyara country as also their own.... Their language is now virtually identical to that of the Bidyara but the main informants agree that there were greater differences in the early days" (Introduction).

**[BIGAMBAL]** Bigambal (Bigambul) is an extinct and unclassified Australian Aboriginal language. It has been classified variously in the Wiradjuric or Bundjalung branches of Pama–Nyungan. Original brown wrappers, lettered and decorated in black. Pp. [4] 1-54 55-56. First edition. Carnegie Institution of Washington, Publication no. 154. Reinecke 87.78: "For several years the standard monograph on Pacific PE, though it contains irrelevant material, is insufficiently aware of the transformation of Beach-la-mar into Melanesian Pidgin (confusing the two), and is ignorant of Suchardt's articles. Though the writer knew Beach-la-mar at first hand, the lexicon is from printed sources". Beach-la-mar-English, pp. 33-53. In spite of Reinecke's rather harsh judgment, this is the earliest scholarly approach to the jargon listed, and offers the first extensive printed vocabulary of the language. The printed sources are carefully identified for each word. The author was Sometime Consul-General of the United States in Samoa and Tonga, and member of several academic societies. Second copy: IUW.

"[Beach-la-mar] is a jargon of wide extent but of scanty record. . . . Thus it has lacked a historian, its records are scattered through a few books of travel in the South Sea whensoever the crudities of its diction have seemed to the recorder sufficiently droll to add a comic touch to descriptive pages. Even of record of such sort we find but a brief collection, as will be shown in the notes and bibliography following the vocabulary of this treatise" (p.3). The bibliography of 15 sources is included on p. 54.

**[BLACKFOOT]** Blackfoot, also known as Siksika (ᑭᓴᓴᑭ) – the language's denomination in ISO 639-3 – Pikanii, Pied Noir, and Blackfeet, is the Algonquian language spoken by the Blackfoot tribes of Native Americans, who currently live in the northwestern plains of North America. Nearly all speakers live in Canada. There are four dialects of Blackfoot, three of which are spoken in Alberta, Canada and one of which is spoken in the United States: Siksiká (Blackfoot), to the southeast of Calgary, Alberta; Kainai (Blood), spoken in Alberta between Cardston and Lethbridge; Aapátóhsipikani (Northern Piegan), to the west of Fort MacLeod; and Aamsskáápipikani (Southern Piegan), in northwestern Montana. There is a distinct difference between Old Blackfoot (also called High Blackfoot), the dialect spoken by many older speakers; and New Blackfoot (also called Modern Blackfoot), the dialect spoken by younger speakers (Wiki).

"The Bobo language is spoken in the Bobo-Joulaso region of western Upper Volta by a population often erroneously referred to as the 'Bobo-Fings'. It is a Mande language... The central part of this work is a Bobo-French dictionary. André Prost... used documents compiled over a period of 25 years by Pierre Le Bris to prepare this dictionary, and in addition has carefully noted the tones of the language.... A French-Bobo vocabulary is also furnished. A tentative grammar, the first to be published for Bobo, is prefixed to this work" (Resume, English). "There are many dialects of Bobo. The one studied here is Sya, spoken in Bobo-Dioulasso (of which the most ancient quartier is Sya), and the neighboring villages (Tounounma, Kiri, Sakabi, etc.).

[**BODO**] Bodo (बड़ो [bɔ̃ɔ]), or Mech, is the Sino-Tibetan language of the Bodo people of north-eastern India and Nepal. It is one of the official languages of the Indian state of Assam, and is one of the 22 scheduled languages that is given a special constitutional status in India. "Boro is a Tibeto-Burman language spoken by about 362,000 persons mainly in the three districts of Assam (eastern India), viz., Darrang, Nowgong and Kamrup. It is also used by a few hundred speakers of the districts Goalpara, Sibsagar, Lakhimpur and Garo Hills. The name of the language, which also happens to be the name of the community speaking it, is pronounced with a high tone on the second syllable. It is written Bodo, Bara, Baro etc. by earlier scholars. The tribe is also known by the name Kachari. Boro as a language, has a prominent position in the family of Tibeto-Burman languages, with the well-cultivated Garo (307,000 speakers), Tripuri (299,000 speakers), Mikir (154,000 speakers) and a few other languages being considered as its closest allies" (Preface).

When I asked the Seminar for Oriental Languages in Berlin for literature on the Papuan languages, I received the following response: 'There is no one in the seminar who works with Papuan languages, nor is there any material on them in the Seminar library.' That was a half year before my departure for New Guinea in the year 1894. There was nothing else to do but to take each word of the language directly from the mouth of the native.... Consider the time and energy devoted to purely functional missionary tasks: construction, clearing paths, treating the sick, etc. Added to these is the likelihood of malaria, to which the European is so susceptible, the time travelling takes if one doesn't use the native canoes, etc. If all these things are taken into consideration, it's

not so surprising that it has taken... eleven years to come to the Grammar" (Foreword, tr: BM).

[**BORA**] Bora is an indigenous American language spoken in the jungle regions of South America. Bora is a tonal language which, other than the Ticuna language, is a unique trait in the region. Bora proper has 94% mutual comprehensibility with the Miraña dialect. The majority of its speakers reside in Perú and Columbia. Around 2,328 Bora-speakers live in the Northeast Yaguasyacu, Putumayo, and Ampiyacu river areas of Peru. The written form of Bora was developed by Wycleff Bible Translators Wesley and Eva Thiesen with the help of the natives of the village of Brillo Nuevo on the Yaguasyacu

river. Wesley and Eva Thiesen's daughter Ruth is also the first recorded non-native to learn the language. First, Bora to Spanish school books were developed. Then the New Testament Bible was translated. Finally, a comprehensive dictionary and grammar book was developed to document and preserve the language's grammar rules. Early linguistic investigators thought that Bora was related to the Huitoto (Witoto) language, but there is actually very little similarity between the two. Bora contains 350 noun classes, the most discovered of any languages thus far (Wiki).

**[BOUYEI]** The Bouyei language (autonym: Haausqyaix also spelled Buyi, Buyei, or Puyi;[3] Chinese: 布依语; pinyin: bù yī yǔ, Vietnamese: tiếng Bó Y or tiếng Giáy) is a language spoken by the Bouyei ethnic group of southern Guizhou Province in mainland China. Classified as a member of the Northern Tai group in the Tai languages branch of the Tai–Kadai language family, the language has over 2.5 million native speakers and is also used by the Giay people (Vietnamese: Giáy) in some parts of Vietnam. There are native speakers living in France or the United States as well, which emigrated from China or Vietnam. About 98% of the native speakers are in China. The contemporary Bouyei script was developed after the abandonment of the Bouyei-Zhuang Script Alliance Policy in 1981, and was designed from 1981 to 1985. It is focused and phonologically representative, and takes the Wangmo County dialect as its foundation.... The Yay language described by William J. Studies on Yay are relatively few with Auguste Louis Bonifacy's 1907 publication 'Etude sur les Tay de la rivièrre Claire'probably the earliest. In that study, Bonifacy lists 146 works in six Tai languages, including one labeled Giây [Yay].... [The present] monograph [is] the most thorough and exhaustive treatment of Yay yet published.... In sum Gedney's work with Yay is a major contribution to the field of linguistics, and it will long stand as the definitive study" (Introduction).

**[BOZO]** Bozo, or Boso, meaning house of straw, is a Mande language spoken by the Bozo people, the principal fishing people of the Inner Niger Delta in Mali. According to the 2000 census, the Bozo people number about 132,100. The Bozo dialect cluster is often considered to be one language, but there is quite a bit of diversity. Ethnologue recognises four languages on the basis of requirements for literacy materials. Bozo is part of the northwestern branch of the Mande languages; the closest linguistic relative is Soninke, a major language spoken in the northwestern section of southern Mali, in eastern Senegal, and in southern Mauritania. The Bozo often speak one or more regional languages such as Bamana, Maasina Fulfulde, or Western Songhay. The language is tonal, with three lexical tones (Wiki).

Ethnologue lists four separate languages under the Boso family: 1) Kelengaxo Bozo [bzx]; 2) Tiemacèwè Bozo [boo]; 3) Tieyaxo Bozo [boz]; 4) Jenaama Bozo [bze].

"My first volume on The Brahui Language was published in 1909. By rights this second volume should have followed a year or two later. But an array of obstacles halted publication: [including, among others listed] the strain of war, the stresses of the years that followed; the counterfascination of unriddling the Original Order of Shakespeare's Sonnets as an Indian Foreign Secretary's recreation...I have drawn freely from any dictionary or vocabulary... which promised to throw light, however indirect, on Brahui.... Actual records of Brahui itself are few and slight; and so laboriously did I comb them out during a very long sojourn in Baluchistan, that any words or forms which they included and I omit may safely...be ascribed to casual slips of ear or pen or printer" (Preface, vol. 2). "I doubt whether the total [number of speakers] of Brahui proper could safely be put at much over 300,000.... Outside India the Brahui stirs scientific interest because he speaks a Dravidian language in almost the last part of India where one would expect to hear a Dravidian language spoken—the extreme north-west....The Brahuis themselves...seem to feel that it is steadily dying out.... But ...there are signs which make me feel that Brahui's powers of resistance have been underestimated. The pessimism among Brahuis arises, I fancy, rather from a consciousness of their own political decline than from any positive symptoms of decay in the language itself" (The Brahui Problem).

[**BRETON**] Breton /'brɛtən/ (Brezhoneg IPA: [brɛ'zõ:nɛk] or IPA: [brəhð'nek] in Morbihan) is a Southwestern Brittonic Celtic language spoken in Brittany. Breton was brought from Great Britain to Armorica by migrating Britons during the Early Middle

Ages; it is thus an Insular Celtic language, and as such not closely related to the Continental Celtic Gaulish language which had been spoken in pre-Roman Gaul. Breton is most closely related to Cornish, both being Southwestern Brittonic languages. Welsh and the extinct Cumbric are the more distantly related Brittonic languages.

The other regional language of Brittany, Gallo, is a langue d'oïl. Gallo is consequently close to French, although not mutually intelligible, and a Romance language descended from Latin (unlike the similarly-named ancient Celtic language Gaulish). Having declined from more than 1 million speakers around 1950 to about 200,000 in the first decade of the 21st century, Breton is classified as "severely endangered" by the UNESCO Atlas of the World's Languages in Danger. However, the number of children attending bilingual classes has risen 33% between 2006 and 2012 to 14,709 (Wiki).

"Among the languages of Costa Rica in Central America of which we know at least a little...there is only one, namely the language of the Bribri Indians, where we have at least a vague idea of its structure.... [After my own first sketch of the language based on a single available source, William Gabb] I learned through my highly-esteemed friend Dr. A. S. Gatschet of the Bureau of Ethnology that Mr. H. Pittier de Fabrega, Director of the Instituto Físico-Geográfico de Costa Rica, had gathered a rich collection of ethnographic and linguistic material during his research expeditions... I have now studied this material carefully and passed on to Mr. Pittier, who is not a professional linguist, various suggestions and ideas which he has faithfully incorporated. For example... he had originally intended to give a German-Spanish-Bribri vocabulary, but has rearranged it as a Bribri-German-Spanish one in light of Gabb's work, which included an English-Bribri vocabulary; moreover he went through this vocabulary with a Bribri Indian, for which American linguistics owes the author special thanks" (Foreword, Friedrich Müller, tr: BM).

It has fallen to my lot to be the first author to investigate the constitution of the Bungandity language and supply the elements of its grammar. The whole of this article has been prepared by me from notes taken down by myself from the lips of the aboriginal speaker rules of the language of this tribe, whose name she erroneously gave as Booandik [*The Booandik Tribe of South Australian Aborigines* (Adelaide, 1880)]. Mr. E.M. Curr, in 1886, also published a short vocabulary of this language [*The Australian Race*, III, pp. 462-465], but its grammatical structure was left untouched.... The following vocabulary contains about 245 of the most commonly used words in the Bungandity language, with their English equivalents. Every word has been noted down carefully by myself from the old men and women in the native camps, and much time and care have been bestowed upon the work".

[**BUNGKU-TOLAKI LANGUAGES: POLYGLOT**] The Bungku–Tolaki languages are a group of languages spoken primarily in South East Sulawesi province, Indonesia, and in neighboring parts of Central and South Sulawesi provinces. Mead (1998:117) presents the following tree-model classification for Bungku–Tolaki. This classification is based on the historical-comparative method in linguistics.

Eastern

Moronene

East Coast: Bungku, Bahonsuai, Kulisusu (Koroni, Kulisusu, Taloki), Wawonii, Mori Bawah

Western

Interior: Mori Atas, Padoe, Tomadino

West Coast: Tolaki, Rahambuu, Kodeoha, Waru

This classification supersedes Mead (1999) [see below], an earlier classification proposed by Mead in 1994. Based on a lexicostatistical comparison, his earlier classification proposed 'Bungku,' 'Mori,' and 'Tolaki' as primary subdivisions under Bungku–Tolaki. In view of more recent evidence from shared sound change and innovations in pronoun sets, the unity of the proposed Mori group (comprising Bahonsuai, Mori Bawah, Mori Atas, Padoe and Tomadino) could not be maintained. Additional information can be found at Mori language (Wiki).

Ethnologue includes 15 separate languages under the Bungku-Tolaki heading.

[**BUNUN**] The Bunun language (Chinese: 布農語) is spoken by the Bunun people of Taiwan. It is one of the Formosan languages, a geographic group of Austronesian languages, and is subdivided in five dialects: Isbukun, Takbunuaz, Takivatan, Takibaka and Takituduh. Isbukun, the dominant dialect, is mainly spoken in the south of Taiwan. Takbunuaz and Takivatan are mainly spoken in the center of the country. Takibaka and Takituduh both are northern dialects. A sixth dialect, Takipulan, became extinct in the 1970s. The Saaroa and Kananabu, two smaller minority groups who share their territory with an Isbukun Bunun group, have also adopted Bunun as their vernacular (Wiki).

[**BURE**] Bure, also known as Bubbure, is an Afro-Asiatic language belonging to the Bole-Tangale group of the West branch of the Chadic family. It is spoken in northern Nigeria in the village of Bure (10°31'06.16"N, 10°20'03.00"E, Kirfi Local Government, Bauchi State, Nigeria) and in some small settlements nearby. The language is used mostly by a very few speakers, of great-grandparental generation. Except for Hausa, which is lingua franca in the area, Bure is surrounded by other Chadic languages such as Gera, Giiwo and Deno (Bole group). Compared to other languages of the same group (e.g. Bole or Karekare), the endangerment of Bure is by far the most critical (Wiki).

[**BURIAT**] Buryat (Buriat) /'bɔriæt/[3] (Buryat Cyrillic: буряд хэлэн *buryaad khelen*) is a variety of Mongolic spoken by the Buryats that is classified either as a language or as a major dialect group of Mongolian. The majority of Buryat speakers live in Russia along the northern border of Mongolia where it is an official language in the Buryat Republic, Ust-Orda Buryatia and Aga Buryatia. In the Russian census of 2002, 353,113 people out of an ethnic population of 445,175 reported speaking Buryat (72.3%). Some other 15,694 can also speak Buryat, mostly ethnic Russians. There are at least 100,000 ethnic Buryats in Mongolia and the People's Republic of China as well. Buryats in Russia have a separate literary standard, written in a Cyrillic alphabet. It is the same as the Russian alphabet with additional letters: Y/ү, Ө/ө and Һ/һ (Wiki).

Ethnologue lists Buriat as two languages: 1) Mongolia Buriat: bxm: alternate names: Buriat-Mongolian, Burraad, Buryat, Mongolia Buriat, Northern Mongolian; and 2) Russia Buriat: bxr: alternate names: Buriat-Mongolian, Buryat, Northern Mongolian.

[2] *i* ii-vii *viii*, *I* 2-6 (addenda, with additional inserted addenda slip), *I* 2-4 5-6 (corrigenda and abbreviations), *I* 2-1188 (dictionary), *I* 2-6 (Burmese proverbs, aphorisms and quaint sayings). Revised and enlarged edition. Zauhmüller, col. 31 (listing only seventh edition of 1911 and new edition of 1953). This copy from King's College London Library, with their ink stamp on two pages, counter-stamped "Cancelled." Second copy: IUW.

"The special features of this present dictionary are...that it has a considerable number of new words not contained in former ones...that most of the words have examples to them showing their use...that the *exact* pronunciation of many words is given...that it contains many proverbs, aphorisms, old and quaint sayings which have hitherto not been published...It has often appeared to the compiler that the Burmese affect to despise their own language and unduly exalt Pali. This seem a great pity, for ...it is in many respects as expressive as any language could well be" (Preface).

"The *Burmese-English Dictionary* project was inaugurated in 1924 by the Burma Research Society with financial assistance from the Government of Burma. In 1931 it was taken over by the University of Rangoon which published Parts I and II. By agreement between the University of Rangoon and the School of Oriental and African Studies, University of London, the project was transferred in 1950 to the School, which assumed full responsibility from that date for the preparation and publication of the *Dictionary*" (Note on verso of title page). "The editors have regretfully decided that this will be the last Part of the Dictionary to be issued. It has become increasingly clear that with the resources currently available there is no prospect of completing a dictionary of this scope in the foreseeable future, and little good would be achieved by trying to take the work any further. To terminate the project at the end of the words beginning with [Burmese script] at least insures that the work covers a coherent and self-contained section of the lexicon" (Editorial Note).

[**BURU** (Indonesia)] Buru or Buruese (Indonesian: Bahasa Buru) is a Malayo-Polynesian language of the Central Maluku branch. In 1991 it was spoken by approximately 45,000 Buru people who live on the Indonesian island of Buru (Indonesian: Pulau Buru). The most detailed study of Buru language was conducted in the 1980s by Charles E. Grimes and Barbara Dix Grimes – Australian missionaries and ethnographers, active members of SIL International (they should not be confused with Joseph E. Grimes and Barbara F. Grimes, Charles' parents, also known Australian ethnographers) (Wiki).

"[Through this work] I hope to contribute to our growing knowledge of the people of Buru, and to spread among them as well the message of Evangelism" (Foreword, tr: BM). Hendriks was a missionary for ten years on the island of Buru, where he learned the language. Here he offers a brief grammar of the language, a Dutch-Buru, Buru-Dutch vocabulary, and sample legends with ethnological annotations.

[**BURUSHASKI**] Burushaski /bɒrʊ'ʃæski (Burushaski: burúšaskī / یېروشسک), the language of the Burusho people, is a language isolate spoken in northern Gilgit-Baltistan, Pakistan. As of 2000, Burushaski was spoken by some 87,000 people in Hunza-Nagar District, northern Gilgit District, and in the Yasin and Ishkoman valleys of northern Ghizer District. Their native region is located in northern Gilgit-Baltistan and borders Afghanistan's Pamir corridor to the north. Burushaski is also spoken by about 300 people

in Srinagar in Jammu and Kashmir. The Yasin variety, also known by the Khowar exonym Werchikwar, is much more divergent. Intelligibility between Hunza-Nagar and Yasin is difficult, and Yasin is sometimes considered a distinct language (Wiki).

"The following vocabularies are based on the material collected in 1923-24.... One important question remains to which I can give no precise or certain answer. What proportion do the Burushaski words in this Vocabulary bear to the total word stock of the language? When I returned to Hunza in 1934 one of my hopes was to record sufficient new words to make my collection fairly complete as regards words in daily use and known to everyone... but I had not realised what a lengthy business it is to collect and adequately record even a few hundred words after the first couple of thousand in constant daily use have been noted. How many new words I actually recorded I have no idea, but I am certain that they will go only a short way towards making the vocabulary complete" (Preface to Vol. III).

We deeply regret that he did not live to see the book out of press and to receive our thanks for his helpful co-operation in bringing out this publication, which sheds light on a hitherto little known language" (p. [vi]). "In the Census of 1931 the population of Yasin was recorded as 8,084, of whom 7,518 were Werchikwar-speakers. These included 2,506 who were bilingual, speaking both Werchikwar and Khowar.... The Werchikwar Vocabulary here presented is based mainly on a collection of words which I obtained by word of mouth from Muslim, son of Bal, of Nazbar, Yasin.... The words I got from him I wrote down on separate slips, evidently very hastily. There are over 3,000 of these slips. I have now not the slightest recollection how the words came to be chosen.... Muslim was bilingual, speaking both Werchikwar and Khowar.... I learned that his actual

mother-tongue was Werchikwar. He had also a working knowledge of Hindustani" (Introduction).

[**CADDO**] Caddo is the only surviving Southern Caddoan language of the Caddo language family. It is spoken by the Caddo Nation of Oklahoma. By 2009, there remained only 25 Caddo speakers who acquired the language as infants or children in a non-academic context, and none of these speakers spoke only Caddo, which situation made Caddo a critically endangered language. Caddo has several mutually intelligible dialects; some of the more prominent dialects include Kadohadacho, Hasinai, Hainai, Natchitoches, and Yatasi. Today, the most commonly used dialects are Hasinai and Hainai. Caddo is linguistically related to the members of the Northern Caddoan language family; these include the Pawnee-Kitsai (Keechi) languages (Arikara, Kitsai, and Pawnee) and the Wichita language. Kitsai is now extinct, and Pawnee, Arikara, and Wichita each have fewer surviving speakers than Caddo does. Another language, Adai, is postulated to have been a Caddoan language while it was extant, but because of scarce resources and the language's extinct status, this connection is not conclusive, and Adai is generally considered a language isolate (Wiki).

Ethnologue: cad. Alternate Names: Caddoe, Kado, Kadohadacho.

[CAFUNDÓ] Cafundó (Portuguese pronunciation: [kafũ 'dɔ]), or Cupópia ([ku 'pɔpjɛ]), is an argot ("secret language") spoken in the Brazilian village of Cafundó, São Paulo, now a suburb of Salto de Pirapora. The language is structurally similar to Portuguese, with a large number of Bantu words in its lexicon. Cafundó was at first thought to be an African language, but a later study (1996) by Carlos Vogt and Peter Fry [see below] showed that its grammatical and morphological structure are those of Brazilian Portuguese, specifically the rural hinterland Southeastern variety, caipira. Whereas its lexicon is heavily drawn from some Bantu language(s). It is therefore not a creole language, as it is sometimes considered. The name cafundó means "a remote place" or "a hard-to-reach place", referring to the quilombo of Cafundó. The speaker community is very small (40 people in 1978). They live in a rural area, 150 km from the city of São Paulo, and are mostly of African descent. They also speak Portuguese, and use cafundó as a "secret" home language. A cafundó speaker and an African-born Bantu (Angolan or Mozambican) speaking Portuguese and Bantu languages can understand each other, because Angolan and Mozambican Portuguese also have their particular Bantu-derived characteristics (Wiki).

Ethnologue no longer lists Cafundo, included as "Cafundo Creole" in earlier editions.

[CAHUIIIA] Cahuilla /kə'wi:ə/ (ʔivĩuʔat IPA: [ʔivĩʌʔat] or Ivilyuat), is an endangered Uto-Aztecan language, spoken by the various tribes of the Cahuilla Nation, living in the Coachella Valley, San Gorgonio Pass and San Jacinto Mountains region of Southern California. Cahuilla call themselves ʔivĩuʔailem or Iviatam—speakers of Ivilyuat (Ivi'a)—or táxliswet meaning "person." A 1990 census revealed 35 speakers in an ethnic population of 800. With such a decline, Ivilyuat is classified as "critically endangered" by the UNESCO Atlas of the World's Languages in Danger as most speakers are middle-aged or older with limited transmission rates to children. Three dialects are known to exist: Desert, Mountain and Pass, as well as some other sub-dialects (Wiki).

[**CALÓ (Chicano)**] Caló (also known as Pachuco) is an argot or slang of Mexican Spanish that originated during the first half of the 20th century in the Southwestern United States. Caló has evolved in every decade since the 1940-1950s. It underwent much change during the Chicano Movement of the 1960s as Chicanos began to enter US universities and become exposed to counterculture and psychedelia. Caló words and expressions became cultural symbols of the Chicano Movement during the 1960s and

1970s, when they were used frequently in literature and poetry. That language was sometimes known as Floricanto. By the 1970s, the term Pachuco was frequently shortened to Chuco. The Pachuco originated from El Paso, which was the root of the city's nickname, "Chuco Town". Pachucos usually dressed in zoot suits with wallet chains, round hats with feathers and were Chicanos (Wiki).

Ethnologue lists Caló as a dialect of American Spanish.

"The 'Dictionary of Calo' which we publish here in the second edition, is the fruit of patient lexicographic labor on the part of the author, who over a period of thirty years while discharging his various professional duties came in direct daily contact with criminals and was able to take down the argot spoken by these offenders in their jail-house jargon. Among his various works, the 'Dictionary of Calo' is probably the author's most popular. "The Tirilones are an economically deprived Latin-American people who have settled in the southern section of El Paso, Texas, and number between 25 and 30 thousand. In addition to English and Spanish, many of the people in the area use a third 'language,' which the author refers to as *Caló*... Used as a cover for such illegal activities as fighting, smuggling and dope peddling, *Caló* has always been a male language. No respectable female would admit that she understood a word of *Caló*." *Caló* has spread [1965] to other sections in El Paso, and to other areas such as Los Angeles and Tucson. This is the first Caló-English vocabulary.

[**CALÓ (Romani)**] Caló (Spanish: [ka'lo]; Catalan: [kə'lo]; Galician: [ka'lo]; Portuguese: [kə'lo]) is a language spoken by the Spanish and Portuguese Romani. It is a mixed language (referred to as a Para-Romani language in Romani linguistics) based on Romance grammar, with an adstratum of Romani lexical items through language shift by the Romani community. It is often used as an argot, a secret language for discreet communication amongst Iberian Romani. Catalan, Galician, Portuguese, and Spanish caló are closely related varieties that share a common root. Spanish caló, or Spanish Romani, was originally known as zincaló. Portuguese calão, or Portuguese Romani, also goes by the term lusitano-romani (Wiki).

"Here I wish, in whatever small way, to awaken the interest of scholars for a language of a people who live among us, and demonstrate that, equidistant from overly romantic and unjustly severe judgements, they merit the attention of all, even if they do not merit excessive honor on the one hand, or the indignity of those negative views on the other" (Introduction, tr: BM).

**1930:** "Vulcanius' Romani Vocabulary," in: *Journal of the Gypsy Lore Society*, Third Series, Vol. IX, Part 1, 1930. Original cream wrappers, lettered and decorated in black. Romani-Latin, pp. 20-25, with annotations.

"At one time or another all the older Romani vocabularies have been republished in the *Journal* with the exception of that printed in 1597 by Vulcanius in his book, *De literis & lingua Getarum*. As it was used by Pott and edited by Miklosich in his *Beiträge*, it may seem superfluous to print it again. But to collect the particular words contained in it from Pott would be a tedious business; Miklosich's *Beiträge* are not readily obtainable and not

at the disposal of everyone; and the vocabulary has special interest, not only on account of its age...but also because it was probably collected in France, from which very few specimens of Romani have come" (pp. 16-17).

"The dialect chosen for this dictionary is the Kalderash dialect. This choice is not justified by any supposed superiority of the dialect, but because of its widespread diffusion. In fact this dialect has become international, and speakers may be found in many countries, both in the Old World and the two Americas, as well as in Australia and in South Africa" (Introduction, my trans.).

[**CAMTHO**] Iscamtho is quite different from the original Tsotsitaal. It originates in a different criminal argot created in the 1920s by the AmaLaita gang and known as Shalambombo. It is not based on Afrikaans, but on Bantu grammars, mainly Zulu and Sotho. The Zulu-based and Sotho-based varieties are the most widespread in Soweto, but one can actually build Iscamtho over any grammar of the South African Bantu languages, such as Xhosa, Tsonga, Tswana, Venda and others. But as Zulu is the dominant language in Soweto, and as Sotho in Soweto often unifies Sesotho, Setswana and Sepedi in one single variety and is the second most popular language in the township, Iscamtho is more often used "in" Zulu or "in" Sotho. Tsotsitaal has been a model for Iscamtho, due to the cultural prestige of Sophiatown. But the youth abandoned it in the 1970s, when Afrikaans came to be no more associated with the power of the state, as it had been so far, but was recognized as the language of apartheid and oppression (especially after the 1976 Soweto Uprising). Iscamtho then became the one youth language in Soweto (Wiki).

**2003:** [IUW] *Tsotsi-taal: a dictionary of the language of Sophiatown*, by Louis Molamu. Pretoria: University of South Africa, c2003. xxix, 130 p.; 24 cm. Library binding incorporating the orange and multicolored original wrappers, lettered in green,

white, yellow, and black, with a color photo of men around a fire-can. First edition. Tsotsitaal-English, pp. 1-120. With bibliography.

"At the outset, it is important to note that the study does not claim to contain the complete lexicon of Tsotsitaal. This volume contains approximately 3 000 entries.... The dictionary also represents, unfortunately, the voices of male speakers predominantly—bearing testimony to the quintessentially and almost exclusively masculine identity associated with Tasotsitaal" (Introduction and Sources of Information).

"This groundbreaking and practical dictionary is addressed to professional people who require access to a fountain of linguistic and historico-cultural material.... The material also offers an innovative introduction to Tasotsitaal to the wider general public" (from the rear wrapper).

[**CAPANAHUA**] Wiki gives "Kapanawa" as one of three dialects of Shipibo, an official language of Peru. Ethnologue lists Kapanawa as an alternative name for Capanahua, which it considers a separate language.

Ethnologue: kaq. Alternate Names: Capa Baquebo, Capanawa, Kapanawa, Nuquencaibo. Population: 50 (Crevels 2007). Some may be in voluntary isolation (2013 Ministry of Education). No monolinguals. Ethnic population: 390 (2007 census). Location: Loreto region: Tapiche-Buncuya rivers area. Dialects: Pahenbaquebo. Lexical similarity: 50%–60% with Shipibo [shp]. Few children speakers: one-third have passive knowledge but generally do not acquire Capanahua (Crevels 2007). Use of Spanish between two Capanahua speakers can be interpreted as rejecting the other person as an outsider. "Capacho" is a pejorative term. Christian, traditional religion.

Series: Lehrbücher des Seminars für Orientalische Sprachen zu Berlin, Bd. 29. Zaunmüller, col. 220. German-Carolinian, pp. [67]-103, and Carolinian-German, pp. [104]-134. First dictionary of the language. The first English dictionary is that of Jackson & Marck, 1991 (see below). Second copy: IUW.

"In my repeated visits to the [Central Carolinian Islands], Saipan Carolinians served as my interpreters, whose dialect is identical to that spoken on Oleai, Lamutrik, Satawal, Poloat, and the islands lying between them, and is closely related to the dialect of Truk.

The Saipan Carolinians came from the following islands: in 1815 a number of people migrated there from Truk. In 1865-1869 over 1000 workers arrived from Lamutrik, Satawal, Elato, Biserat, Onon; in 1905 around 100 Sonsol Merir people; 1907, 200 from Oleai; 1908, 500 from Mortlock, these only temporarily due to the devastation of their own islands by typhoons. The richness of the Saipan Carolinian language in synonyms may be explained by the heterogeneous origin of the inhabitants, which in turn makes this dialect more suitable for communication than any other Carolinian dialect...[Previous material] was not used [in preparing this volume], nor, with the exception perhaps of a translation of the Bible by American missionaries from English which is difficult to use, does it exist, or at least I know of none" (Introduction, tr: BM).

Original white wrappers, lettered and illustrated in green. *i-vi vii-xxv xxvi, 1-2 3-453 454*. with loosely inserted errata slip. First edition. PALI Language Texts: Micronesia. Second copy: IUW.

"Carolinian is a member of the Trukic subgroup of the Micronesian group of Oceanic languages. This is the first English dictionary of the three Carolinian dialects spoken by [two to three thousand] descendants of voyagers who migrated from atolls in the Central Caroline Islands to Saipan in the Northern Mariana Islands. The Dictionary provides English definitions for almost 7,000 Carolinian entries [pp. 3-195] and an English-Carolinian finder list [pp. 199-453]. A special effort was made to include culturally important words, particularly those related to sailing, fishing, cooking, house building, traditional religion, and family structure. With this work, the compilers also establish an acceptable standard writing system with which to record the Carolinian language" (from the rear cover).

[**CARRIER**] The Carrier language is a Northern Athabaskan language. It is named after the Dakelh people, a First Nations people of the Central Interior of British Columbia, Canada, for whom Carrier is the usual English name. People who are referred to as Carrier speak two related languages. One, Babine-Witsuwit'en is sometimes referred to as Northern Carrier. The other, Carrier proper, includes what are sometimes referred to as Central Carrier and Southern Carrier (Wiki).

Ethnologue lists two languages under Carrier: 1) Carrier: crx. Alternate Names: Central Carrier, Dakelh; and 2) Southern Carrier: caf.

Wilkinson of Summer Institute of Linguistics. [Fort Saint James, B.C.: Carrier Linguistic Committee], 1974. Original dark blue cloth over boards, lettered and decorated in gold; dust jacket yellow and red, illustrated in red and lettered in black. Pp. *i-iv v-xiv xv-xvi*, 1-397 398-400. First edition. This is the first true bilingual dictionary of the language.

"This dictionary has been prepared for members of the Central dialect of Carrier. They number approximately 2000 and live in the Stuart Lake Area of British Columbia" (d.j. flap). "Ten years of linguistic field work laid the foundation for the recent intensive gathering of needed material to produce this dictionary" (Acknowledgements). " This dictionary provides a major and significant contribution to the history, culture and folklore of the Carrier Indians, one of Canada's most advanced and peaceful Native Indian tribes" (Prologue, Fred J. Speckeen). "The contents of the dictionary stand as a monument to the rich heritage of the Carrier Indian people and to their capacity to emerge successfully in adapting to modern demands while experiencing cultural stress. The total body of Carrier expressions in the dictionary was produced by Carrier members of the Dictionary committee.... The approximately 3,500 entries of the dictionary could easily have been expanded to one-hundred thousand plus. However, time and finances have dictated the present size" (Introduction).

[**CATAWBA**] Catawba is one of two Eastern Siouan languages of the eastern US, which together with the Western Siouan languages formed the Siouan language family. The last native speaker of Catawba died before 1960. Red Thunder Cloud, apparently an impostor born Cromwell Ashbie Hawkins West, claimed to speak the language until he died in 1996 (Goddard 2000). The Catawba tribe is now working to revive the Catawba language.

[**CATALAN**] Catalan (/ˈkætələn/; autonym: català [kətəˈla] or [kataˈla]) is a Romance language derived from Vulgar Latin and named after the medieval Principality of Catalonia, in northeastern modern Spain. It is the national and only official language of Andorra, and a co-official language of the Spanish autonomous communities of Catalonia, including the Balearic Islands and Valencia (where the language is known as Valencian). It also has semi-official status in the commune of Alghero, These territories are often called Catalan Countries. Catalan evolved from Vulgar Latin in the Middle Ages around the eastern Pyrenees. 19th-century Spain saw a Catalan literary revival, culminating in the early 1900s (Wiki).

**[CAUCASIAN LANGUAGES: POLYGLOT]** The Caucasian languages are a large and extremely varied array of languages spoken by more than ten million people in and around the Caucasus Mountains, which lie between the Black Sea and the Caspian Sea. Linguistic comparison allows these languages to be classified into several language families, with little or no discernible affinity to each other. However, the languages of the Caucasus are sometimes mistakenly referred to as a family of languages (Wiki).

**1788:** [LILLY] *Memoir of a map of the countries comprehended between the Black sea and the Caspian; with an account of the Caucasian nations, and vocabularies of the languages*, by George Ellis. London: Printed for J. Edwards, 1788. iv, 80 p.: map; 27 cm. (4to) First edition according to Lowndes, as cited below. Bound in plain paper and patterned boards; spine damages. References: Lowndes, II, 659. ESTC, T56650.

**1814:** [LILLY] *Kaukasische Sprachen: Anhang zur Reise in den Kaukasus und nach Georgian*, by Julius von Klaproth. Halle: Waisenahus, 1814. Contemporary quarter-leather and marbled paper over borads. 288 p.: fold tab.; 21 cm. Zaunmüller 125 (listed under Evenki).

**[CAUCASIAN LANGUAGES, WEST: POLYGLOT]** The Northwest Caucasian languages, also called West Caucasian, Abkhazo-Adyghean, or sometimes Pontic (as opposed to Caspian for the Northeast Caucasian languages), are a group of languages spoken in the northwestern Caucasus region, chiefly in three Russian republics (Adygea, Kabardino-Balkaria, Karachay–Cherkessia), the disputed territory of Abkhazia (whose sovereignty is claimed by Georgia), and Turkey, with smaller communities scattered throughout the Middle East (Wiki).

**1887:** [LILLY] “Five West Causcasion Vocabularies,” compiled by Mr. Peacock and communicated by Robert N. Cust, in: the *Journal of the Royal Asiatic Soc. of Gt. Brit. and Ireland*, v.19, pt.1, (January 1887).” London: Trübner & Co, 1887. Complete issue, paginated 59-189, plus preliminaries. 22 cm. Includes 11 p. comparative vocabularies of English, Georgian, Abkhaz (here “Abkahzian”), Laz, Mingrelian and Svan (here “Swanetian”).

“When I visited Trans-Caucasia in 1882 for the purpose of collecting information regarding the Languages of the Caucasus, the result of which was published in Vol. XVII of the Journal, I became aware of the scantiness of the Vocabularies, and I mentioned this to Mr. Peacock, the Vice-Consul of H.B. M. at Batim, who has resided some time at Poti, and had made excursions into regions not often traversed. He was good enough to undertake the duty of collecting Vocabularies, and I forwarded to him a copy of the Standard Form of Words and Sentences prepared by the Bengal Asiatic Society [instructions for form included in a footnote]. After some delay, owing to the heavy press of his official duties, and a visit to England, when I had the pleasure of seeing him, and again encouraging him on the subject, he has forwarded to me the subjoined Vocabularies, which are highly important” (Robert N. Cust, p. 145).

**[CAYMAN ISLANDS ENGLISH]** Cayman Islands English is an English creole spoken in the Cayman Islands. While not much has been written on Cayman Islands English, according to one text, it "seems to have borrowed creole features similar to Jamaica and Central America without having undergone creolization" (John Holm 1989:479-80). The creole is similar to varieties of Belizean Creole (Wiki),

Ethnologue lists Cayman Islands English as a dialect of English.

**1981:** [LILLYbm] *Duppies Is: some accounting of the capricious activities of the Cayman Islands' friendly ghosts...and...a dictionary of words and phrases of the Islanders*, by Robert S[evier] Fuller. Grand Cayman: Cayman ARTventures, c. 1981. Original stiff white wrappers, lettered in black, with colored illustrations on front and rear covers. Pp. I ii-v vi, 1-70. Edition not indicated, but post-1981. First edition was published in 1967 under the title *Duppie is. An exposé of the caprices of the ghosts of Grand Cayman and a dictionary of words and phrases of the Islanders* [Georgetown, Grand Cayman]: Cayman Authors, Ltd.] by Bob Fuller, also 70 pp. (see Reinecke 68.2). Cayman-English words and phrases, pp. 64-70. "Practically all dialect has been edited out of the stories to avert local criticism" (Reinecke p. 396).

There were approximately 11,000 speakers in 1975. "Cayman Islands English is marked by archaisms, nautical terms, and Americanisms...[p. 396]. "The dialect, which was carried to the Bay Islands, appears to be only slightly creolized. We have only ... a little lexical material in Fuller (1967) [p. 374]" (Reinecke).

**[CAYUGA]** Cayuga (In Cayuga Gayogohó:nq') is a Northern Iroquoian language of the Iroquois Proper (also known as "Five Nations Iroquois") subfamily, and is spoken on Six Nations of the Grand River First Nation, Ontario, by around 240 Cayuga people, and on the Cattaraugus Reservation, New York, by less than 10. Six Nations Polytechnic in Ohsweken, Ontario offers Ogwehoweh language Diploma and Degree Programs in Mohawk or Cayuga. Immersion classes in Cayuga are taught at Gaweni:yo High School, on the Six Nations of the Grand River reserve. The Cayuga language maintenance project was funded by the Canadian Government in 2010, and is being "carried out in partnership with the Woodland Cultural Centre." A Cayuga e-dictionary can be downloaded for PC or MAC, free of charge. As of 2012, 79 people are said to be fluent speakers of Cayuga (Wiki).

[CAYUSE] The Cayuse language (Cailloux, Willetpoos) is an extinct unclassified language formerly spoken by the Cayuse Native American tribe in the U.S. state of Oregon. The Cayuse name for themselves was Liksiyu (see Aoki 1998). Similarities to Molala, the language of people to the south of them in central Oregon, are thought to have been due to contact (Wiki).

Ethnologue does not include this extinct language.

[CEBUANO] Cebuano, referred by most of its speakers as Bisaya or Binisaya (English: Visayan), is an Austronesian language spoken in the Philippines by about 20 million people, mostly in Central Visayas, most of whom belong to the Bisaya ethnic group. It is the most widely spoken of the languages within the so-named Bisayan subgroup and is closely related to other Filipino languages. It has the largest native language-speaking population of the Philippines despite not being taught formally in schools and universities. It is the lingua franca of the Central Visayas region and most parts of Mindanao. The name Cebuano is derived from the island of Cebu where the prestige register is spoken (Wiki).

Ethnologue: ceb. Alternate Names: Binisaya, Bisayan, Sebuano, Sugbuanon, Sugbuhanon, Visayan.

**1913:** [LILLYbm] *The Subanu; studies of a sub-Visayan mountain folk of Mindanao. Ethnographical and geographical sketch of land and people*, by John Park Finley & William Churchill. Washington: Carnegie Institution of Washington, 1913. Original dark green cloth over boards, decorated in blind and lettered in gold. Pp. *i-iv* v *vi*, 1-236, with folding maps as frontispiece and at end of volume. First edition. Carnegie Institution of Washington publication, no. 184. Not in Zaunmüller. Subanu-English vocabulary, pp. 179-216, and English-Subanu, pp. 217-230, double-columned, and a bibliography, pp. 231-232, including dictionaries such as Gisbert, *Diccionario Español-Bagobo*, and Bennasar, *Diccionario Tiruray-Español*, both Manila, 1892 and neither in Zaunmüller.

"The material [for] this study of the Subanu speech was collected partly by Colonel Finley himself during the active and somewhat militant years of this term as governor of Zamboanga and partly at his order... The extension of the American system to dominions oversea, the adjustment of American polity to the at present unassimilable and non-

homogeneous peoples of a distinctly lower culture plane...are so new that our people who stay at home in ease have no slightest conception of the character and mass of administrative details which are laid upon our new proconsuls... I have known the trials of ruling Samoa...[of facing] the hostile front of war with no greater show of force than the American ensign hoisted aboard a 21-foot rowboat, where my British and German colleagues could back their authority with steel cruisers.... I can sympathize with the efforts it has cost my collaborator... to compile this material... work in a field which lies wholly outside his professional duty... [material] which must be approached with sympathy as well as reverence" (Pitfalls of the Vocabulist, p. 45).

**1958:** [LILLYbm] *Visayan-English Dictionary*, by Rodolfo Cabonce. [Manila?]: n.p., [1958]. Original blue wrappers, lettered in black. 231 leaves. First edition. Visayan-English only. This copy with the ownership signature of C. Douglas Chrétien, dated Manila, January 1958, "gift of Father John McCanon S.J., Ateneo de Manila" and a loosely inserted note in ink from McCanon to Chrétien, passing on three copies of the work. The linguist C. Douglas Chrétien was author of *The Dialect of the Sierra de Mariveles Negritos* (1951) and *A Classification of 21 Philippine Languages* (1962) among others. He has written "Cebuano" on the title page (see end of this entry). Earliest separate English language Cebuano dictionary.

"The present dictionary is primarily intended for the Catholic missionaries to learn Visayan and not for the Visayans to learn English...The dictionary is by no means exhaustive. But we have tried to bring in all that is necessary for the sufficient knowledge of the student." Included under "Cebuano Dictionaries" in Wolff bibliography (undated "mimeographed"; see below).

**1967:** [LILLY] *Cebuano-English dictionary*, by Juan Ruijter. Lawaan, Cebu: Sacred Heart Seminary, [1967]. 338 p. 22 cm. Original dark blue cloth, lettered in gold. First edition. Cebuano-English, pp. 1-338. Lilly copy with stamp of the Catholic Trade School, Cebu City. Included under "Cebuano Dictionaries" in Wolff bibliography as published in 1967 (see below). The dictionary itself has no indication of date.

"This dictionary is called 'Cebuano-English' instead of Visayan-English because local words have been avoided as much as possible. In a Visayan-English Dictionary local words in a particular Province or District should be included. In this Dictionary words exclusively used in local sub-dialects (f.i. Leyte, Bohol, Negros Or. and Mindanao) have been eliminated. The words in this Dictionary have been collected mostly from Magazines and books, especially from the Bible, speeches, sermons and radio-broadcastings" (Preface).

"Cebuano is also called Sugbuanon and is one of more than a dozen languages or dialects which are given the name Bisayan or Visayan.... Somewhere between one-quarter and one-third of the population of the Philippines speaks Cebuano natively. But despite its numerical importance and wide use Cebuano lags far behind Tagalog (Pilipino) in prestige and development as a means of literary and scientific expression. In the schools the emphasis is almost entirely English: Cebuano composition is not a school subject, and students read nothing in Cebuano in the first two grades.... In fact it is almost a matter of pride not to know Cebuano well."

Earliest dictionary (of five listed, one unpublished) is Juan Encarnacio's *Diccionario Bisaya-Español*, Manila, 1885; Cabonco (see above) is earliest separate English-language dictionary published. A *Bisayan-English-Tagalog Dictionary* was published by Hermosissima in 1966, and a *Cebuano-English Dictionary* by Jan Ruijter in 1967 (see above).

[**CHAGATAI**] Chagatai (چغتای Jağatāy[2]) is an extinct Turkic language which was once widely spoken in Central Asia, and remained the shared literary language there until the early 20th century. It was also spoken by the early Mughal rulers in the Indian subcontinent, where it influenced the development of Hindustani. Ali-Shir Nava'i was the greatest representative of Chagatai literature. As part of the preparation for the 1924

establishment of the Soviet Republic of Uzbekistan, Chagatai was officially renamed "Old Uzbek",<sup>[5][6][3][7][8]</sup> which Edward A. Allworth argued "badly distorted the literary history of the region" and was used to give authors such as the 15th-century author Ali-Shir Nava'i an Uzbek identity. It was also referred to as "Sart". In China it is sometimes called "ancient Uyghur". Early development of the language is sometimes known as Middle Turkic, or even simply Turki (Wiki).

[**CHAM**] Cham is the language of the Cham people of Southeast Asia, and formerly the language of the kingdom of Champa in central Vietnam. A member of the Malayo-Polynesian branch of the Austronesian family, it is spoken by 204,000 people in Cambodia and 79,000 people in Vietnam. There are also small populations of speakers in Thailand and Malaysia. Other Chamic languages are spoken in Cambodia and/or Vietnam (Raglai, Rade, Jarai, Chru and Haroi), on Hainan (Tsat) and in Aceh, North Sumatra (Acehnese). Cham is divided into two primary dialects. Western Cham is spoken by the Cham in Cambodia as well as in the adjacent Vietnamese provinces of An Giang and Tây Ninh. Eastern Cham is spoken by the coastal Cham populations in the Vietnamese provinces of Bình Thuận, Ninh Thuận, and Đồng Nai. The two regions where Cham is spoken are separated both geographically and culturally. The more numerous Western Cham are predominantly Muslim (although some in Cambodia now practice Theravada Buddhism) and use either the Arabic script or the Western version of the Cham alphabet while the Eastern Cham practice both Islam and Hinduism and use the Eastern version of the Cham alphabet. Ethnologue states that the two dialects are no longer mutually intelligible (Wiki).

Ethnologue, as indicated above, considers Eastern Cham (cjm: Alternate Names: Bhamam, Chiem, Chiem Thành, Tjam) and Western Cham (cja: Alternate Names: Cambodian Cham, Cham, New Cham, Tjam) as two separate languages.

"This is the *only* recent publication in Guam of the Chamorro-English Dictionary, and it justifies the need to preserve the language for posterity in the libraries, and tourist bureaus of the world. As the English language is spoken daily by many Guamanians and other islanders of the Marianas, the use of the Chamorro will continue to decline. Consequently, this culture will forever be lost, if publication of this book is not done by the untiring efforts and sacrifices of this author" (Preface).

[**CHANTYAL**] Chantyal is spoken by approximately 2,000 of the 10,000 ethnic Chantyal. The Chantyal live in the Baglung and Myagdi Districts of Nepal. The Chantyal language is a member of the Tamangic group (along with Gurung, Thakali, Manangba, Nar-Phu and Tamang) of the Sino-Tibetan family. Within its group, it is lexically and grammatically closest to Thakali (Wiki).

Ethnologue: chx. Alternate Names: Chantel, Chantel Kham, Chentel, Chhantel, Chhantyal, Khamkura.

**1999:** [LILLYbm] *Chantyal dictionary and texts*, by Michael Noonan, with Ram Prasad Bhulanja, Jag Man Chhantyal & William Pagliuca. Berlin; New York: Mouton de Gruyter, 1999. Original brown and beige cloth over boards, lettered in black and white. Pp. [8] 1 2-615 616-618. First edition. Series: Trends in linguistics. Documentation 17. English-Chantyal, pp. [7]-483, Chantyal-English index, pp. [495]-532, and bibliographical references (p. [605]-615). This is the first dictionary of the language.

"The Chantyal [ts<sup>h</sup>bntjal] people are a relatively small ethnic group, numbering no more than 10,000. They can be divided into two groups, the Myagdi Chantyal and the Baglung Chantyal, named for the districts they inhabit within the Dhaulagiri Zone of central Tibet. Until the recent immigration to towns and cities, the interaction between the two groups was, in general, quite limited. The Baglung Chantyal ceased to speak the Chantyal language some time in the 19<sup>th</sup> century and now know only the national language, Nepali; the majority of the Myagdi Chantyal continue to speak Chantyal in their home villages. There are approximately 2000 or so who still speak the Chantyal language. The Chantyal language belongs to the Tamangic group of the Bodish languages.... The other Tamangic languages are Gurung, Manangba, Nar-Phu, Tamang, and Thankali" (Introduction).

[**CHARA**] Chara (alternatively Ciara or C'ara) is an Afro-Asiatic language of the North Omotic variety spoken in the Southern Nations, Nationalities, and People's Region of Ethiopia by 13,000 people. Chara is geographically situated to the southeast of Nayi, west of Kullo, northeast of Mesketo, and northwest of Gofa. Chara speakers live in the Southern Nations, Nationalities, and People's Region, in the Debub Omo Zone, on both sides of the Omo river. Chara speakers are scattered in three villages in Ethiopia: Geba a meša, Buna Anta, and Kumba. Native speakers may also speak Melo, Wolaytta (54% lexical similarity with Chara) to the east, and Kafa to the west (Wiki).

Ethnologue: cra. Alternate Names: Ciara.

Spanish-Chatino, pp. 1-44, and Chatino-Spanish, pp. 49-92, double-columned. First dictionary of the language. Second copy: IUW.

"The present work undeniably fills a major lacuna in materials on the Chatino language, one of the most important in the state of Oaxaca. Based on research, we may say that 20,000 people speak Chatino, and for slightly less than half of those it is their sole language... The Verano Institute of Linguistics published the first dictionary of Chatino in 1951...the primary purpose of which was to help those living in the region speak Spanish. It was much sought after and popular among the Chatinos in the area, and the printing of 400 copies was soon exhausted. This first brief vocabulary has been extensively enlarged by Leslie G. Pride, author of the present dictionary, which like all modern dictionaries of this type, fulfills all necessary needs" (Prologue, tr: BM). "There are three principal dialects of Chatino; this vocabulary represents the dialect spoken in Tataltepec de Valdez in the eastern part of the state [of Oaxaca]...The vocabulary contains a selection of more than 2,000 words" (Introduction, tr: BM).

**[CHATINO, WESTERN HIGHLAND]** Highland Chatino is an indigenous Mesoamerican language, one of the Chatino family of the Oto-Manguean languages. Dialects are rather diverse; Ethnologue 16 counts them as three languages as follows: Eastern Highland Chatino (Lachao-Yolotepec dialect); Western Chatino (Yaitepec, Panixtlahuaca, and Quiahije dialects); Nopala Chatino. Neighboring dialects between the three groups are about 80% mutually intelligible; diversity among the three Western dialects is almost as great (Wiki)

"This dictionary is based on fieldwork by the first author in the Maringe area of [the island of] Santa Isabel during sixteen months of 1975 and 1976 and two months in 1984" (Preface). "The island of Santa Isabel is the home of at least nine identifiable languages and dialects.... [There are] three major, mutually unintelligible Isabel languages: (1) Zabana (or Kia) in the northwest, (2) Cheke Holo (or A'ara, Maringe or Hograno) in the Maringe-Hograno areas, and (3) Bughotu in the southern peninsula. Speakers of Gao, a fourth distinct language spoken in the south-east corner of the island...are gradually shifting to neighbouring languages. [1987 figures for speakers of Cheke Holo are 7,584]" (Introduction). This is the first dictionary of the language.

[**CHEROKEE**] Cherokee (Cherokee: Tsalagi Gawonihisdi) is the Native American Iroquoian language spoken by the Cherokee people. It is the only Southern Iroquoian language and differs significantly from the other Iroquoian languages. Cherokee is a polysynthetic language and uses a unique syllabary writing system. Today, Cherokee is one of North America's healthiest indigenous languages because extensive documentation of the language exists; it is the Native American language in which the most literature has been published. Such publications include a Cherokee dictionary and grammar as well as translated portions of the New Testament of the Bible from 1850–1951, and the Cherokee Phoenix (Tsalagi Tsulehisanvhi), the first newspaper published by Native Americans in the United States and the first published in a Native American language (Wiki).

Original stiff pink, brown, yellow and white wrappers, lettered in black, with the head of a native American on the front cover. First edition, printed on demand. Lilly copy printed in Lexington, Kentucky on February 6, 2014.

"*Cherokee Language and Dictionary* is intended to educate those inspired to learn the Cherokee language. It will not provide your accent, will not teach the dialect or flow of the language. ...Rarely have books been written to help with this language. It is intended to assist the reader in the values and concepts of the Cherokee language. This is the first in a series of Speaking and Writing the Cherokee Language.... Truth Seeker began compiling information for this book nearly thirty years ago" (from the rear wrapper). "Cherokee writing is the creation of Sequoyah, one of the great names in the history of the American Indian. Convinced that the key to the white man's power lay in his possession of a written language, he set about bringing this secret to his own people. In 1821, after 12 years of work, he produced a syllabary of 86 characters, representing every sound in the Cherokee language."

[**CHIBCHAN LANGUAGES: POLYGLOT**] The Chibchan languages (also Chibchan, Chibchano) make up a language family indigenous to the Isthmo-Colombian Area, which extends from eastern Honduras to northern Colombia and includes populations of these countries as well as Nicaragua, Costa Rica, and Panama. The name is derived from the name of an extinct language called Chibcha or Muyscubun, once spoken by the people who lived on the Altiplano Cundiboyacense of which the city of Bogotá was the southern capital at the time of the European invasion. However, genetic and linguistic data now indicate that the original heart of Chibchan languages and Chibchan-speaking peoples may not have been in Colombia at all, but in the area of the Costa Rica-Panama border, where one finds the greatest variety of Chibchan languages (Wiki).

Ethnologue lists 20 languages under the Chibchan family.

First publication of a glossary prepared by Franco, a missionary, of languages spoken by groups in the Isthmus of Panama. Published by Pinart as volume IV in a series, although this was the only volume in the series to be published. Ethnologue does not include the now extinct language Dorasque.

[**CHICHEWA**] Chewa, also known as Nyanja, is a language of the Bantu language family. The noun class prefix *chi-* is used for languages, so the language is also called Chichewa and Chinyanja (spelled 'Cinyanja' in Zambia, and 'Cinianja' in Mozambique). In Malawi, the name was officially changed from Chinyanja to Chichewa in 1968 at the insistence of President Hastings Kamuzu Banda (himself of the Chewa tribe), and this is still the name most commonly used in Malawi today. In Zambia, Chewa is spoken by other people like the Ngoni and the Kunda, so a more neutral name, Chinyanja '(language) of the lake' (referring to Lake Malawi), is used instead of Chichewa (Wiki).

Ethnologue: *nya*. Alternate Names: Chewa, Chinyanja, Nyanja, Nyanja-Chewa.

Bound in original brown publisher's cloth, blocked in blind, gilt spine title.

"Apart from a few words recorded by Gamitto, the first extensive record of the Chewa language was made by Johannes Rebmann in his *Dictionary of the Kinyassa Language*, published in 1877 but written in 1853-4. Rebmann was a missionary living near Mombasa in Kenya, and he obtained his information from a Malawian slave, known by the Swahili name Salimini, who had been captured in Malawi some ten years earlier. Salimini, who came from a place called Mphande apparently in the Lilongwe region, also noted some differences between his own dialect (which he called Kikamtunda, the language of the plateau) and the Maravi dialect (Kimaravi) spoken further south; for example, the Maravi gave the name *mombo* to the tree which he himself called *kamphoni*" (Wiki).

"The first grammar, *A Grammar of the Chinyanja language as spoken at Lake Nyasa with Chinyanja-English and English-Chinyanja vocabulary*, was written by Alexander Riddel in 1880 and partial translations of the Bible were made at the end of 19th century. Further early grammars and vocabularies include *A vocabulary of English-Chinyanja and Chinyanja-English: as spoken at Likoma, Lake Nyasa* and *A grammar of Chinyanja, a language spoken in British Central Africa, on and near the shores of Lake Nyasa*, by George Henry (1891) [see below]. The whole Bible was translated into the Likoma Island dialect of Nyanja by William Percival Johnson and published as *Chikalakala choyera: ndicho Malangano ya Kale ndi Malangano ya Chapano* in 1912" (Wiki).

Second copy: LILLY, rebound in black cloth, and with the original black cloth spine lettered in gold laid down, bearing copious annotations of "R. Blake" (most probably the Rev. R. Blake of Natal, active around 1900) with this manuscript note: "Notes— comparisons with Chichewa as spoken at Kongwe 1896-1900. This mark -- = same in both Kongwe and Blantyre [Malawi]. Other remarks show differences and variations." The vast majority of words bear either the mark indicated or more extensive annotations.

Second edition, enlarged, **1929:** [LILLYbm] *Dictionary of the Nyanja Language, being The Encyclopaedic Dictionary of the Mang'anja Language by the late Rev. David Clement Scott, D.d., M.A.*, edited and enlarged by Alexander Hetherwick. London: The Religious Tract Society, [1929]. Original black cloth over boards, lettered in gold. This copy with the ink ownership stamp of Harry Wells Langworthy, author of *Zambia before 1890: aspects of pre-colonial history* (Longman, 1972) and *Africa for the African: the life of Joseph Booth* (Christian Literature Association in Malawi, 1996).

"Clement Scott's 'Encyclopædic Dictionary of the Mang'anja Language' has been out of print for many years. Need is widely felt for a new edition to meet the demand created by an extended use of that language, not only in Nyasaland itself, but also in both Northern and Southern Rhodesia. In both these territories, Mang'anja, or, as it is now called, Nyanja, has come to occupy the place of a lingua franca. This is largely due to the employment of Nyanja-speaking natives as personal and domestic servants, as well as clerks, overseers, artisans and other skilled workers by the Europeans in both of these districts" (Preface).

"The present edition of the Nyanja Vocabulary is based on the Nyanja-English Vocabulary, "enlarged and revised by the Rev. H. Barnes," and published in 1902 by the S. P. C. K. It has been enlarged by collections of words made the Archdeacon Glossup [and others].... Since this revision has been made in England, there has been no possibility of referring to Africans as a "final Court of Appeal." The result is a large number of blanks and question marks, which call for help from missionaries at work in Africa (*particularly new-comers*), to begin at once to prepare for a more satisfactory third edition of Fr. Barnes' work" (Preface [to the new edition]).

"Cinyanja is the dialect most widely spoken in the Nyasaland Protectorate. It has been adopted by the United Missions Translation Board. It is being introduced in areas where other dialects are spoken, and it is hope that in course of time it will become the common language of this Protectorate. All the words in this dictionary have been checked with the help of natives residing in Southern Angoniland" (Introduction).

**1970's:** [LILLYbm] Manuscript Chichewa dictionary, by N. B. Njobvalema of Lilonqwe, circa 1970's. In red quarter-cloth and black marbled paper glued to boards (notebook with lined paper). Approximately 94 leaves, numbered in ink on rectos only, ff. 95-188. With glued-in typed statement in Chichewa, along with loosely inserted manuscript translation signed by N. B. Njobvalema, indicating that this is a submission to the Church Elders in a competition to create a Chichewa dictionary. This appears to be the second half of the dictionary, consisting of letters M-Z, with 3,308 words in Chichewa, indication of origin (mostly indentified as Chinyanja), and translation into English or Chichewa explanation.

**1970-1971:** [LILLYbm] Typescript materials for Chichewa Dictionary, no author indicated, dated 1970-71, approximately 200 legal size leaves, in several stages, with manuscript notes, in brown paper folder labelled "Chichewa Dictionary Notes. Stage 1" on front cover, together with a similar folder labelled "Chichewa Co-ordination Notes. Chichewa Working Group" containing various annotated publications in Chichewa, a "Chichewa Dictionary Alphabetical Scheme" (5 pp.), a series of carbon copies of letters signed by the Chairman/Coordinator of the Chichewa Working Group presenting in detail "remarks and suggestions" on the use/spelling of Chichewa in the various publications, and a carbon copy of a letter dated 30<sup>th</sup> May, 1974 to Rev. Katsulukuta, responding in detail to his translation of Genesis: "Please, find enclosed the manuscript of Genesis, which you sent me early April, 1974. I enjoyed reading it. You may want to tread my criticisms, which are as follow" [detailed suggestions for general revisions], signed by the Chairman of the Chichewa Working Group. With: *Chichewa Orthography Rules. This copy with loosely inserted printed presentation slip, inscribed in ink by the author, Blodwen Lloyd Binns, from the Biology Department of the University of Strathclyde, Glasgow, Scotland.

"The Malawian names form an extensive and quite varied collection; they have been presented in a tentative manner in their many orthographic and linguistic forms....[I]t is clear that some time for usage and further enquiry should elapse before a stable and acceptable set of names can be formulated. For this reason the book has been made up with blank pages, so that users may enter their additions and amendments" (Introduction).

[**CHICHIMECA-JONAZ**] Chichimeca or Chichimeca Jonaz is an indigenous language of Mexico spoken by around 200 Chichimeca Jonaz people in Misión de Chichimecas near San Luis de la Paz in the state of Guanajuato, Mexico. The Chichimeca Jonaz language belongs to the Oto-Pamean branch of the Oto-Manguean language family. The Chichimecos self identify as úza and call their language eza'r. (Wiki).

"I have published elsewhere a grammatical study of the languages of Pame and Jonaz (or Chichimeca), based on observations my wife and I made during field work in 1934 and 1935. At that time, Pame was spoken in several villages or hamlets.... Pame is rapidly disappearing. The young people no longer speak it, except in Ciudad del Maiz, Alaquines and Santa Maria Acapulco, and to a lesser degree in Jiliapan. Chichimeca-Jonaz was still spoken in 1934 by 452 Indians living in the Chichimeca Mission in Guanajuato near San Luis de la Paz" (pp. [1]-2; tr: BM).

This issue also contains: "Une nouvelle langue tapuya de la région de Bahis (Brésil)," by A. Métraux, pp. [51]-58, with French-Katembri vocabulary, pp. 56-58. The vocabulary was gathered by the author. "Katembri" is a totally unknown language, which the author speculates may have been spoken by the Katembri, and is still known to some Kariri Indians in the village of Marandela, where this material was collected. First vocabulary of this hitherto unknown language.

"The other language, absolutely unknown, contains words which certainly are in no way related to Kariri'. Might one identify the Tapuya tribe that once lived with the Kariri

in the Marandla area?... It is not impossible that this unknown language was that of the Katembri Indians who are mentioned along with the Kariri on Nimuendajçu's map in an area corresponding exactly to present-day Mirandela. The presence of these two tribes in this region was noted in 1579. Provisionally, and awaiting further more detailed ethnographic study of the Mirandela region, I propose to attribute this language to the Katembri, adding it to the list, already so extensive, of the indigenous languages of South America" (p. 56; tr: BM).

"The documents one of us collected are the first to be published on the language of these Indians. Insufficient as they are, they lead to a definite solution to the linguistic parentage of this tribe. The Resigaro language is undoubtedly Arawakan" (p. 204, tr: BM).

[**CHICKASAW**] The Chickasaw language (Chikashshanompa', IPA [tʃikaf:anompaʔ]) is a Native American language of the Muskogean family. It is agglutinative and follows the pattern of subject–object–verb. The language is closely related to, though perhaps not entirely mutually intelligible with, Choctaw. It is spoken by the Chickasaw tribe, now residing in Southeast Oklahoma, centered on Ada. The language is spoken by as many as 2,000-3,000 people (as of 1994), although at present it is perhaps in a more imperiled state (Wiki).

This is the "first scholarly dictionary of the Chickasaw language." A Chickasaw dictionary by Jessie and Vinnie Humes, published in 1973 in Ada, Oklahoma by The Chickasaw Nation, appears to have been first dictionary of the language (see above). The Chickasaw Indians lived originally in Mississippi, just north of the Choctaws, to whom they are linguistically related. About 1830 they were moved to what is now Oklahoma. "There are considerably fewer than one thousand fluent speakers of the language today [1994], most over the age of forty."

[**CHIDIGO**] Digo (Chidigo) is a Bantu language spoken primarily along the East African coast between Mombasa and Tanga by the Digo people of Kenya and Tanzania. The ethnic Digo population has been estimated at around 360,000 (Mwalonya et al. 2004), the majority of whom are presumably speakers of the language. All adult speakers of Digo are bilingual in Swahili, East Africa's lingua franca. The two languages are closely related, and Digo also has much vocabulary borrowed from neighbouring Swahili dialects (Wiki).

Ethnologue: dig. Alternate Names: Digo, Kidigo.

"This volume, the result of seven years of fieldwork, is the only comprehensive grammar of the underdocumented Digo (Chidigo) language to date. Digo is the southernmost language of the Mijikenda cluster of Bantu languages, spoken along the coast of East Africa in Kenya and Tanzania. Besides a clear description of Digo morphology and syntax, with multiple illustrative examples, this grammar includes several glossed texts, a 1700-item wordlist, and a list of over 100 botanical names. It gives particular emphasis to semantic and discourse relations of elements which are not always analyzed from this perspective in grammatical descriptions. These include the forms and functions of Digo's complex system of demonstratives, a description of over 30 tense, aspect, and movement markers, and a detailed discussion of information structure and non-verbal clauses. This book will be of interest to linguists concerned with Bantu languages, typology, morphosyntax, and semantics. The entire Mijikenda cluster is underdocumented, and this grammar makes a significant contribution to understanding of languages of that area."--Provided by publisher.

[**CHIGA**] Kiga (also called Rukiga, Ruchiga, or Chiga) is the native language of the Kiga people (Bakiga). Kiga is a very similar language to the Nkore language. It was first written in the second half of the 19th century. Kiga is so similar to Nkore (84%–94% lexical similarity) that some argue they are dialects of the same language, called Nkore-Kiga by Charles Taylor (Wiki).

[**CHIMARIKO**] Chimariko is an extinct language isolate formerly spoken in northern Trinity County, California, by the inhabitants of several independent communities. While the total area claimed by these communities was remarkably small, Golla (2011:87–89) believes there is evidence that three local dialects were recognized: Trinity River Chimariko, spoken along the Trinity River from the mouth of South Fork at Salyer as far upstream as Big Bar, with a principal village at Burnt Ranch; South Fork Chimariko, spoken around the junction of South Fork and Hayfork Creek, with a principal village at Hyampom; and New River Chimariko, spoken along New River on the southern slopes of the Trinity Alps, with a principal village at Denny (Wiki).

[**CHIN LANGUAGES**] The Kukis languages, also known as Kuki-Chin (Kuki/Chin), Chin/Kuki/Mizo, or Kuki Naga, are a branch of 50 or so Sino-Tibetan languages spoken in northeastern India, western Burma and eastern Bangladesh. Most speakers of these languages are known as Kukī in Assamese and as Chin in Burmese; some also identify as Lushei. The Mizo people are ethnically distinct (Wiki).

Ethnologue distinguishes at least ten different languages in the Chin family.

"The Chittagong Hill Tracts [in present-day Bangladesh, on the Bay of Bengal] are inhabited by peoples of differing languages, religions and social customs, such as, in addition to the Marma: the Chakma, Tipera, Mrong, Lushai, Kumi, Mro, Chek and the Khyang. The number of the last of these, moreover, is extremely small. At the beginning

of this century, authors estimated them at 500 souls and, although we are lacking detailed statistics, they have evidently been able to remain at this number, since it corresponds at this time to the evaluations of those officials we've been able to consult. The Khyang are spread out in a dozen villages, for the most part in the "mauza" or administrative division of Chemi. This mauza is situated between two rivers: the Sangu to the south and the Kurnalfuli to the north. This is the last hill district before the Chittagong District" (tr: BM).

[**CHINESE (pre-1900)**] Chinese (汉语/漢語 Hànyǔ), also known as Sinitic, is a branch of the Sino-Tibetan language family consisting of hundreds of local language varieties, many of which are not mutually intelligible. The differences are similar to those within the Romance languages, with variation particularly strong in the more rugged southeast. These varieties have been classified into seven to ten groups, the largest being Mandarin (e.g. Beijing dialect), Wu (e.g. Shanghainese), Min (e.g. Taiwanese Hokkien), and Yue (e.g. Cantonese). Chinese varieties differ most in their phonology, and to a lesser extent in vocabulary and syntax. Southern varieties tend to have fewer initial consonants than northern and central varieties, but more often preserve the Middle Chinese final consonants. All have phonemic tones, with northern varieties tending to have fewer distinctions than southern ones. Many have tone sandhi, with the most complex patterns in the coastal area from Zhejiang to eastern Guangdong (Wiki).

[CHINESE, GAN] Gan (simplified Chinese: **赣语**; traditional Chinese: **贛語**; Gan: Gon ua, alternatively Chinese: **江西话**, Jiāngxī huà; Gan: Kongsī ua) is a group of Chinese varieties spoken as the native language by many people in the Jiangxi province of China, as well as significant populations in surrounding regions such as Hunan, Hubei, Anhui, and Fujian. Gan is a member of the Sinitic languages of the Sino-Tibetan language family, and Hakka is the closest Chinese variety to Gan in terms of phonetics. [CHINESE, HAKKA] Hakka /'hækə/, also rendered Kejia, is one of the major languages within the Sinitic branch of Sino-Tibetan and it is spoken natively by the Hakka people in southern China, Taiwan, Hong Kong and throughout the diaspora areas of East Asia, Southeast Asia, and around the world. Due to its primary usage in scattered isolated regions where communication is limited to the local area, Hakka has developed numerous variants or dialects, spoken in Guangdong, Fujian, Jiangxi, Guangxi, Sichuan, Hunan, and Guizhou provinces, including Hainan island, Malaysia, Hong Kong, Singapore and Taiwan. Hakka is not mutually intelligible with Mandarin, Wu, Southern Min, or other branches of Chinese. It is most closely related to Gan and is sometimes classified as a variety of Gan. Taiwan, where Hakka is the native language of a significant minority of the island's residents, is an important world center for study and preservation of the language. Pronunciation differences exist between the Taiwanese Hakka dialect and China's Guangdong Hakka dialect; even in Taiwan, two local varieties of Hakka exist. The Meixian dialect (Moiyen) of northeast Guangdong in China has been taken as the "standard" dialect by the People's Republic of China. The Guangdong Provincial Education Department created an official romanization of Moiyen in 1960, one of four languages receiving this status in Guangdong (Wiki).

[**CHINESE, JIN**] Jin (simplified Chinese: 晋语; traditional Chinese: 晉語 pinyin: jìnyǔ), or Jinese, Jinhua or Jinyu, alternatively Shanxinese (Chinese: 山西话 Shānxī Huà), is a group of dialects of Chinese. Its exact status is disputed among linguists; some prefer to classify it under Mandarin, but others set it apart as an independent branch. Jin is spoken over most of Shanxi province except for the lower Fen River valley, much of central Inner Mongolia and adjoining areas in Hebei, Henan, and Shaanxi provinces. Cities covered within this area include Taiyuan, Zhangjiakou, Hohhot, Jiaozuo, and Yulin. In total, Jin is spoken by roughly 45 million people (Wiki).

[**CHINESE, MANDARIN**] Mandarin (/ˈmændərɪn/; simplified Chinese: 官话; traditional Chinese: 官話 pinyin: Guānhuà; literally: "speech of officials") is a group of related varieties of Chinese spoken across most of northern and southwestern China. Because most Mandarin dialects are found in the north, the group is also referred to as the "northern dialect(s)". When the Mandarin group is taken as one language, as is often done in academic literature, it has more native speakers (nearly a billion) than any other language. A northeastern-dialect speaker and a southwestern-dialect speaker may have difficulty communicating, except through the standard language. Nonetheless, there is much less variation across the huge Mandarin area than between the non-Mandarin varieties of southeast China. This is attributed to the greater ease of travel and communication in the North China Plain compared to the more mountainous south, combined with the relatively recent spread of Mandarin to frontier areas. The capital has been within the Mandarin area for most of the last millennium, making these dialects very influential. Some form of Mandarin has served as a national lingua franca since the 14th century. In the early 20th century, **a standard form based on the Beijing dialect**, with elements from other Mandarin dialects, **was adopted as the national language**. Standard Chinese, which is also referred to as "Mandarin", is the official language of the People's Republic of China and Taiwan (Republic of China) and one of the four official languages of Singapore. It is also one of the most frequently used varieties of Chinese among Chinese diaspora communities internationally (Wiki).

[CHINESE, MIN BEI] Northern Min (simplified Chinese: **闽北**; traditional Chinese: **閩北**; pinyin: Mǐnběi), is a group of mutually intelligible dialects of Min spoken in Nanping Prefecture of northwestern Fujian. The Chinese varieties of Fujian province were traditionally divided into Northern and Southern groups. However, dialectologists now divide Min more finely. By this narrower definition, Northern Min covers the dialects of Shibe (石陂, in Pucheng County), Chong'an (崇安, in Wuyishan City), Xingtian (兴田, in Wuyishan City), Wufu (五夫, in Wuyishan City), Zhenghe (in Zhenghe County), Zhenqian (镇前, in Zhenghe County), Jianyang and Jian'ou (Wiki).

The Fuzhou dialect (**福州話**, Foochow, also known as the Foochow dialect, Hoochow, Fuzhounese (**福州語**, Hók-ciū-ngū), or Fuzhouhua, is the

standard dialect of Min Dong, which is a branch of Min Chinese spoken mainly in the eastern part of Fujian Province. Native speakers also call it Bàng-uâ (平話), meaning the language spoken in everyday life. In Singapore and Malaysia, the variety is known as Hokchiu in Min Nan, Hujiu which is the Min Dong pronunciation of Fuzhou. Centered in Fuzhou City, the Fuzhou dialect covers eleven cities and counties: Fuzhou, Pingnan, Gutian, Luoyuan, Minqing, Lianjiang (including Matsu), Minhou, Changle, Yongtai, Fuqing and Pingtan. Fuzhou dialect is also the second local language in northern and middle Fujian cities and counties, like Nanping, Shaowu, Shunchang, Sanming and Youxi" (Wiki).

[CHINESE, MIN NAN] Southern Min, or Min Nan (simplified Chinese: 闽南语; traditional Chinese: 閩南語 pinyin: Mǐnnányǔ; Pêh-ōe-jī: Bân-lâm-gí/Bân-lâm-gú), is a branch of Min Chinese spoken in certain parts of China including southern Fujian, eastern Guangdong, Hainan, and southern Zhejiang, and in Taiwan. The Min Nan dialects are also spoken by descendants of emigrants from these areas in diaspora. In common parlance, Southern Min usually refers to Hokkien. Amoy and Taiwanese Hokkien are both combinations of Quanzhou and Zhangzhou speech. The Southern Min dialect group also includes Teochew, though Teochew has limited mutual intelligibility with Hokkien. Southern Min is not mutually intelligible with Eastern Min, Cantonese, or Standard Chinese (Wiki).

1899: [LILLYbm] *Chinese-English Dictionary of the vernacular or spoken language of Amoy, with the principal variations of the Chang-Chew and Chin-Chew dialects*. New edition, with corrections by the author, by Carstairs Douglas. London: Publishing Office of the Presbyterian Church of England, 1899. Contemporary black half leather and brown cloth over boards, lettered in gold; recased. Pp. *i-vii* viii-ix xx, 1 2-612. Second edition. Zaunmüller, col. 41. First edition was 1873. Amoy-English, pp. [1]-605. "[Amoy] is not a mere colloquial dialect or patois; it is spoken by the highest ranks just as by the common people, by the most learned and by the ignorant; learned men indeed add a few polite or pedantic phrases...but the main body and staple of the spoken language of the most refined and learned classes is the same as that of coolies, labourers, and boatmen... [Amoy] is a distinct language, one of the many and widely differing languages which divide among them the soil of China...The language of Amoy, including [its] subordinate dialects, is believed to be spoken by about eight or ten million. This is the first dictionary of the spoken language" (Preface). This copy beautifully filled in by hand with marginal Chinese characters in black ink for each entry. Chinese-Amoy dialect dictionary.

"Amoy (Chinese: 廈門話 Pêh-ōe-jī: Ē-m̄ng-ōe or Ē-m̄i<sup>h</sup>-ōa), also known as Amoy Min, Xiamenese or Xiamen dialect, is a Hokkien dialect spoken in Southern Fujian province (in Southeast China), in the area centered on the city of Xiamen. Amoy Min is often known by its Hokkien or Min Nan in Southeast Asia. It is one of the most widely researched varieties of Min Nan, and has historically come to be one of the more standardized varieties" (Wiki).

1923: [LILLYbm] *Supplement to Dictionary of the vernacular or spoken language of Amoy* [Rev. Carstairs Douglas, M.A., LL.D., Glasg.], by Thomas Barclay.

Shanghai: The Commercial Press, Ltd., 1923. Original black leather over boards, lettered in gold. Pp. [8] i ii-iv v-vi, I 2-276 [4]. First edition. Zaunmüller, col. 41. Amoy-English, pp. [1]-271, with Chinese printed characters, romanized versions, and English. "[Douglas' Dictionary] was recognized at once on all hands as a work of marvellously full and accurate scholarship. And during the half-century that has elapsed since its publication, it has been of incalculable benefit to all students of the language. During that time a great change has come over China. Western civilization, to a great extent, has been welcomed, and new ideas in every department of thought and action have filled the minds of the people. These new ideas have demanded for the expression new terms...Accordingly some ten years ago I received an invitation from my Amoy colleagues to make a collection of these new words and phrases, to be published as a Supplement to the Dictionary. ...The necessity for such an undertaking will at once be manifest...[for example] under the word "ti'n, electricity" in the Supplement there are over 100 phrases given. In the Dictionary itself there are only two phrases noted, and neither of these refers to electricity" (Preface).

**2016:** [LILLY] *Penang Hokkien-English Dictionary with an English-Penang Hokkien Glossary*, by Tan Siew Imm. Penang: Phoenix Printers, 2016. xii, 526 p. 21 cm. Original multi-colored wrappers, lettered in white, with a color photo of two children on a bicycle on front cover. First edition. Penang Hokkien-English, pp. 1-312, pp. English-Penang Hokkien, pp. 315-526.

"Penang Hokkien (Chinese: 檳城福建話; Péh-ōe-jī: Peng-siâ<sup>n</sup> Hok-kiàn-oā) is a local variant of Hokkien Chinese spoken in Penang, Malaysia. It is the lingua franca among the majority Chinese population in Penang as well as other northern states of Malaysia surrounding it. Penang Hokkien is a subdialect of Zhangzhou (漳州; Hokkien:

Chiang-chiu) Chinese, together with widespread use of Malay and English borrowed words. It is markedly distinct from Southern Peninsular Malaysian Hokkien and Taiwanese Hokkien. It is predominantly a spoken dialect: it is rarely written in Chinese characters, and there is no standard romanisation" (Wiki).

"There are a few problems encountered in compiling this dictionary. One is deciding on an orthography system to represent an essentially oral language. One of the objectives of this project was to represent the spelling such that the user should find it easy and friendly to use" (p. iv).

**[CHINESE PIDGIN ENGLISH]** Chinese Pidgin English (also called Chinese Coastal English or Pigeon English, simplified Chinese: 洋泾浜英语; traditional Chinese:

洋涇浜英語 pinyin: Yángjīng bāng yīngyǔ) is a pidgin language lexically based on English, but influenced by a Chinese substratum. From the 17th to the 19th centuries, there was also Chinese Pidgin English spoken in Cantonese-speaking portions of China. Chinese Pidgin English is heavily influenced by a number of varieties of Chinese with variants arising among different provinces (for example in Shanghai and Ningbo). A separate Chinese Pidgin English has sprung up in more recent decades in places such as Nauru (Wiki).

Reinecke 86.45 ("At least eight reissues, styled editions...Literary adaption of Pidgin English, apparently close to authentic Chinese Pidgin English"). Pidgin-English vocabulary, pp. 119-136; Pidgin-English place names, pp. 137-139.

"Pidgin-English is that dialect of our language which is extensively used in the seaport towns of China as a means of communication between the English or Americans and the natives... For those who expect to meet with Chinese, either in the East or California, this little book will perhaps be useful, as qualifying them to converse in Pidgin."

**1902:** [LILLYbm] *A Vocabulary of Pidgin English and Words used on the China Coast*, compiled by Joseph W. Graeme. Shanghai: U. S. S. Monterey, June, 1902. Typescript bound by Kelly & Walsh in full black cloth, lettered in gold. Ff [3] 1 2-33. First edition. Blue mimeographed typescript on onion skin. "Clearly produced in an extremely small edition. The *Monterey*, a Monitor, served as station ship at Shanghai, after service in Subic Bay, and also voyaged upriver to Nanking, with Special Commissioner T.F. Sharretts. Not in Taylor, *Catalog of Books on China in the Essex Institute*" (Bookseller's description). With the ownership inscription in pencil of Louise Carman Snow.

Ethnologue lists only one location in which Chinese Pidgin English is currently a spoken language: the Republic of Nauru, a 9 square mile coral island north-east of the Solomon Islands. "The Pidgin English of the Chinese ports originated at Canton and spread as far north as Shanghai and the Yangtse... and temporarily to Tientsin. Apparently it took shape about the first quarter of the eighteenth century.... During the

twentieth century its use declined until it is now [1975] used only between a few Chinese in Hong Kong... The Pidgin... has never been analyzed in detail" (Reinecke, p. 540).

[**CHINESE, WU**] Wu (simplified Chinese: 吳語; traditional Chinese: 吳語 pinyin: wúyǔ, Suzhou Wu: IPA: [ɦəu<sup>22</sup> ny<sup>44</sup>], Shanghai Wu: IPA: [ɦu<sup>22</sup> ny<sup>44</sup>]) is a group of linguistically similar and historically related varieties of Chinese primarily spoken in Zhejiang province, the municipality of Shanghai, and southern Jiangsu province. Major Wu dialects include those of Shanghai, Suzhou, Ningbo, Wenzhou, Hangzhou, Shaoxing, Jinhua, and Yongkang. This dialect group (Southern Wu in particular) is well-known among linguists and sinologists as being one of the most internally diverse among the spoken Chinese language dialect groups, with very little mutual intelligibility among varieties within the dialect group (Wiki).

"Since so many people speak the Shanghai or kindred dialects, and there are so many missionaries and foreigners living in this region, it has long been felt that an English-Chinese Vocabulary of the Shanghai Dialect was a great desideratum. Dr. Edkins had prepared a small work in 1853 [published 1869], which has been very useful in its day, but its range was too limited. No one volunteering to undertake the work, the happy thought occurred to one or more of the missionaries to divide the work of preparation among the different missionaries of Shanghai, assigning to each a certain portion; the whole to be based upon Morrison's Vocabulary of the Ningpo Dialect as a guide. but to be enlarged and improved upon. The work was undertaken in 1896, but like many other good schemes the work has met with various hindrances, and is only now completed in its fifth year" (Preface).

The number of speakers of the Hangzhounese has been estimated to be about 1.2 to 1.5 million. It is a dialect of Wu, one of the Chinese varieties. Hangzhounese is of immense interest to Chinese historical phonologists and dialectologists because phonologically, it exhibits extensive similarities

with the other Wu dialects; however, grammatically and lexically, it shows many Mandarin tendencies." (Wiki).

Nicknamed the "Devil's Language" for its complexity and difficulty, it is the most divergent division of Wu Chinese, and is sometimes considered a separate language.[citation needed] It features noticeable elements of Min, which borders it to the south. [CHINESE, YUE] Yue or Yueh (English pronunciation: /'ju:ei/ or /ju:'ei/) is a primary branch of Chinese spoken in South China, particularly the provinces of Guangdong and Guangxi. The name Cantonese is often used for the whole branch, but linguists prefer to reserve that name for the variety of Guangzhou (Canton) and Hong Kong, which is the prestige dialect. Cantonese and Taishanese are spoken by substantial overseas populations in Southeast Asia, Australia, and Northern America, particularly as a result of waves of mass migrations from Hong Kong. Yue dialects are not mutually intelligible with other varieties of Chinese (Wiki).

French-Cantonese, pp. [1]-442. The first edition appeared in 1902. From the library of the noted linguist Johannes Rahder, with his ownership stamps and penciled notations in the preliminary section.

"The desire to provide evangelical workers with a means for learning the Cantonese language perfectly and fluently led us to edit and publish this Dictionary, which we now offer to the public in a second edition, revised and considerably enlarged.... Our goal, then and now, is solely to facilitate the study of the language spoken in Canton. Now, moreover, we have enriched our work with a large variety of expressions, without, at the same time, claiming that they are current in every district; it is up to each reader to make his own use of the material in light of the manner of speaking in the place where he lives and works" (Preface, tr: BM).

"A convenient pocket dictionary of Cantonese is so evident a need that no apology is necessary for the presentation of this volume.... The first section of the book is a Cantonese-English dictionary. 4,576 characters, including duplicates, are listed, with about 4,000 phrases.... The spelling used is the system of Romanization adopted by the Missionary body of South China in 1888. This Romanization is the only system in practical use today.... The third section of the book is the English Index. This makes an English-Cantonese dictionary within the same covers" (Introduction).

[CHINESE, XIANG] Xiang (Hsiang, simplified Chinese: 湘語; traditional Chinese:

湘語) or imprecisely Hunanese (Chinese: 湖南話), is a group of linguistically similar and historically related varieties of Chinese, spoken mainly in Hunan province but also in a few parts of Guangxi, Sichuan and Shaanxi. Scholars divided Xiang into five subgroups, Chang-Yi, Lou-Shao, Hengzhou, Chen-Xu and Yong-Quan. Among those, Lou-shao, as known as Old Xiang, still exhibits the three-way distinction of Middle Chinese obstruents, preserving the voiced stops, fricatives, and affricates. Xiang has also been heavily influenced by Mandarin, which adjoins three of the four sides of the Xiang speaking territory, and Gan in Jiangxi Province, from where a large population immigrated to Hunan during the Ming Dynasty. Xiang speakers played an important role in Modern Chinese history, especially in those reformatory and revolutionary movements such as Self-Strengthening Movement, Hundred Days' Reform, Xinhai Revolution and Chinese Communist Revolution. Some examples of Xiang speakers are Mao Zedong, Zuo Zongtang, Huang Xing and Ma Ying-jeou (Wiki).

[**CHINOOK**] Chinookan is a small family of languages spoken in Oregon and Washington along the Columbia River by Chinook peoples. Chinookan consists of three languages with multiple varieties [this count includes Kathlamet [Cathlamet] as a separate language; Ethnologue considers Kathlamet a dialect of Wasco-Wishram]. There is some dispute over classification, and there are two ISO 639-3 codes assigned: chh (Chinook, [also called] Lower Chinook) and wac (Wasco-Wishram, [also called] Upper Chinook) (Wiki).

Ethnologue: chh. Alternate Names; Lower Chinook, Shoalwater.

The first separately printed vocabulary of the Chinook language (as opposed to Chinook Jargon [Chinook Wawa]).

"It should be premised that the following Vocabulary was collected at different times and from different Indians, and has never been revised with the assistance of one person. It undoubtedly contains words of two dialects, the Chinook proper and the Clatsop, and probably also of the Wakiakum....The only apology for publishing it in its present form is, that the Indians speaking the Chinook language are so nearly extinct, that no other, better digested, is likely to be made, and that even thus it affords means for a much more extended comparison of this with other Indian languages than now exists" (Preface to the Vocabulary).

**1907-1930:** see Vols. 8 and 9 under **INDIGENOUS LANGUAGES OF NORTH AMERICA: POLYGLOT**.

[**CHINOOK WAWA**] Chinook Jargon (also known as chinuk wawa) originated as a pidgin trade language of the Pacific Northwest, and spread during the 19th century from the lower Columbia River, first to other areas in modern Oregon and Washington, then British Columbia and as far as Alaska and Yukon Territory, sometimes taking on characteristics of a creole language. It is related to, but not the same as, the aboriginal language of the Chinook people, upon which much of its vocabulary is based. Many words from Chinook Jargon remain in common use in the Western United States and British Columbia and the Yukon, in indigenous languages as well as regional English usage, [to the point where most people are unaware the word was originally from the Jargon. The total number of Jargon words in published lexicons numbered only in the hundreds, and so it was easy to learn It has its own grammatical system, but a very simple one that, like its word list, was easy to learn (Wiki).

Montreal, 1871. 16mo, pp. 68; 2 full-page wood engravings; original pictorial wrappers, and bound in later red cloth with gilt lettering. An Ayer Linguistic duplicate with an Ayer accession label on the rear pastedown, an Ayer presentation bookplate on the front pastedown, with a Newberry Library release stamp beneath. Ownership signature of James C. Pilling at the top of the title page.

"The first two missionaries to Oregon, Rev. F. N. Blanchet, V.G., and his worthy companion Rev. Mod. Demers, arrived from Canada to Vancouver on the 24th of November 1838. They had to instruct numerous tribes of Indians, and the wives and the children of the whites, who spoke only the Chinook. The two Missionaries set to work to learn it, and in a few weeks Father Demers had mastered it, and began to preach.

"He composed a vocabulary which was very useful to other Missionaries. He composed several canticles which the Indians learned and sang with taste and delight. He

also translated all the Christian Prayers in the same language. Such is the origin of the Chinook Jargon, which enabled the first two Missionaries in the country, to do a great deal of good among the Indians and Half-breeds" (Preface - which is quoted extensively by Pilling, and here marked off with his penciled 'X'). Pilling, *Chinook*, p. 20; Pilling, *Proof-Sheets 1018*." (bookseller's description: Rulon-Miller).

**1891:** [LILLYbm] *Dictionary of the Chinook jargon as spoken on Puget Sound and the Northwest: with original Indian names for prominent places and localities with their meanings, historical sketch, etc.*, [attributed to Samuel Fuller Coombs]. Seattle, Wash.: Lowman & Hanford, [1891]. Original tan wrappers, lettered and decorated in black, with head of Indian on front wrapper. Pp. 1-9 10-38 39-40. First edition. Not in Zaubmüller. Reinecke 113.42 ("Pilling erroneously gives the authors as Coombs.... It follows Gill very closely."). Chinook Jargon-English, pp. [9]-32.

This copy with the ownership signature "Mr Emil Ganz" in pencil on rear cover. This is possibly the Emil Ganz of "Dictation from Emil Ganz [1838- ]: Phoenix, Maricopa County." One of a series of dictations regarding people and events in Arizona Territory, collected by an agent of H.H. Bancroft [1832-1918]. Although this copy has the appearance of the 1890's, with contemporary advertisements from Lowman & Hanford on the inner wrappers, there is no indication anywhere of a date, except for the reference to "the last census", presumably 1890.

"The last census... shows but about fifty tribes in the state of Washington and many of them but a few representatives-over one-half have become extinct.... The Chinook Jargon can be more easily learned by first briefly studying the Dictionary and then converse with Indians. Their peculiar guttural articulations is beyond the power of our alphabet to apply any given rules, and scarcely any grammatical rules can be applied" (Preface).

**1889:** [LILLYbm] *Chinook as spoken by the Indians of Washington Territory, British Columbia and Alaska. For the use of traders, tourists and others who have business intercourse with the Indians. Chinook-English. English-Chinook*, by C[harles] M[ontgomery] Tate. Victoria, B.C.: M. W. Waitt & Co., [1889]. Original tan wrappers, lettered and decorated in black. Pp. 1-5 6-47 48. First edition. Not in Zaubmüller. Lowther 845. Reinecke 113.174 ("First edition is referred to as a 'revised dictionary.' 'It follows Gibbs very closely'-Eells"). Chinook Jargon-English, pp. 5-23, and English-Chinook Jargon, pp. 24-47.

"In issuing this revised Dictionary of the Chinook Jargon, the object is to place in the hands of those who have business intercourse with the Indians of the Pacific Coast, as well as to tourists and others, a means of making themselves understood by the natives where the Chinook is spoken. This work has been carefully revised: the spelling simplified, and the arrangement of words and sentences concentrated, so that the pronunciation, and the way the words are used may at once be seen" (Preface). "Tate, a Methodist missionary born in Yorkshire, came to British Columbia in 1870, worked among the Indians, founding a boarding school there. He was a consistent and staunch advocate of better treatment of the Indians" (bookseller's description: William Reese). Second and third copies: LILLY.

Second, revised edition **1914**: [LILLYbm] *Chinook jargon as spoken by the Indians of the Pacific Coast. For the use of missionaries, traders, tourists and others who have business intercourse with the Indians*, by C[harles] M[ontgomery] Tate. Victoria, B.C.: Printed by Thos. R. Cusack, 1914. Original gray wrappers, lettered in black. Pp. 1-3 4-48. Not in Zaunmüller. Hendrix 113.175 (does not note revised title). Chinook-English, pp. [3]-23, and English-Chinook, pp. 24-35. Preface dated March 1<sup>st</sup> 1914.

This copy with ownership signature and stamps of Byrdie McNeill, dated 1943, Wrangell, Alaska. McNeill was author of a 1940 M.A. thesis at the University of Oklahoma entitled *Education of the Alaskan native since 1867*.

"[The Chinook Jargon] is still the principal linguistic medium between natives and whites. I give herewith a few examples of some of the jargon words in most common use. T. N. Hibben and Co. of Victoria have published a book entitled "Dictionary of the Chinook Jargon, or Indian Trade Language of the North Pacific Coast," and tourists will find it an interesting study to provide themselves with one of them" (p. 139).

**1898**: [LILLY] *Chinook and shorthand rudiments, with which the Chinook jargon and the Wawa shorthand can be mastered without a teacher in a few hours. By the editor*

of the "*Kamloops wawa*", by Le Jeune, J. M. R. (Jean-Marie Raphael), 1855-1930. Kamloops, B.C., 1898. 15, [1] p. 16 cm. From the library of Robert Spurrier Ellison, with his bookplate.

**1909a:** [LILLYbm] *Dictionary of the Chinook Jargon*, compiled by Frederick J. Long. Seattle: Lowman & Hanford Co., 1909. Original brown wrappers, lettered and decorated in dark brown. Pp. [2] 1-7 8-41 42-46. First edition. Not in Zauhmüller. Reinecke 113.141. English-Chinook, pp. [7]-26, and Chinook-English, pp. [29]-41, as well as the Lord's Prayer in Chinook and a few sample conversations. Second copy: LILLY.

"This is a vocabulary of the language as spoken today: all obsolete words have been eliminated." In compiling this "pocket Lexicon of the Chinook Jargon" the author is "indebted to Mr. George Gibbs" and his "Dictionary of the Chinook Jargon, or Trade Language of Oregon" as published in 1863.

**1909b:** [LILLYbm] *The Chinook Jargon and How to Use It. A Complete and Exhaustive Lexicon of the Oldest Trade Language of the American Continent*, by George C[oombs] Shaw. Seattle: Rainer Printing Company, 1909. Original red cloth over boards, lettered and decorated in red, with a mounted photo of a Chinook Indian on the front cover. Pp. I-IX X-XVI, 1 2-65 66-68. First edition. Not in Zauhmüller. Reinecke 113.162: "One of the most nearly complete word lists; little historical material." Chinook-English, pp. [1]-30, a Chinook-English index, pp. [31]-33, supplemental Chinook-English vocabulary, pp. [34]-36, and English-Chinook, pp. 42-65.

"In offering the present work to the public, it is the author's hope to supply, with respect to other dictionaries of the Chinook Jargon, a desideratum hitherto unsupplied in the fifty or more editions of small vocabularies issued during a period of seventy years. It has been the aim to give the origin and derivation of every word treated, whenever such is known, and to record under each every authoritative reference thereto. Also a reference to the authority is noted."

Issue in wrappers **1909:** [LILLYbm] identical to the hardbound issue, but in original red wrappers, lettered and decorated in black, with the same mounted photo of a Chinook Indian on the front cover. This copy with a signed presentation from the author: "To Hon. James A. Wood | Director of Exploitation | A-Y-P-E. | Compliments of the author, | George C. Shaw | 115 - 32<sup>nd</sup> Ave. | Seattle. | 4-30-1909. Includes a loosely-inserted advertising leaflet printed on one side only headed "The Chinook Jargon and How to Use It" describing the book: "sells at fifty cents the copy in paper, and \$1.50 in cloth... More than 100,000 Chinook Jargon Dictionaries have been sold, and over 30,000 people in the Pacific Northwest speak Chinook... A person of average intelligence can study the illustrated uses and soon have at his tongue's end many Chinook sentences, after which a little practise will enable one to converse with any Indian west of the Rocky Mountains and north of California... Mr. Shaw's work... is the only complete and exhaustive lexicon every published." Second copy: LILLY.

**1891:** [LILLY] *Gill's dictionary of the Chinook jargon, with examples of use in conversation (compiled from all vocabularies, and greatly improved by the addition of necessary words never before published)*, compiled by John [Kaye] Gill. Portland, Or.: Published by J.K. Gill company, 1891. Thirteenth edition. Original pale brown wrappers,

Fifteenth edition **1909**: [LILLYbm] *Gill's dictionary of the Chinook jargon, with examples of use in conversation and notes upon tribes and tongues. Fifteenth Edition*, compiled by John [Kaye] Gill. Portland, Or.: Published by J.K. Gill company, 1909. Original brown wrappers, lettered in black, with illustration of a Native American in red and black. Pp. [4] 1-3 4-84 86-88. Zaunmüller, col. 385 (1933, with no indication it is a later edition). Reinecke 113.87. English-Chinook, pp. [11]-38, and Chinook-English, pp. [47]-76. Second copy with illustration in black only: LILLY.

Seventeenth edition **1933**: [LILLYbm] *Gill's dictionary of the Chinook jargon, with examples of use in conversation and notes upon tribes and tongues. Seventeenth Edition*, compiled by John [Kaye] Gill. Portland, Or.: Published by J.K. Gill company, 1933. Original gray textured wrappers, lettered and decorated in black. Pp. [4] 1-3 4-80 81-84. Zaunmüller, col. 385 (1933, with no indication it is a later edition). Reinecke 113.89 (not seen by Reinecke). English-Chinook, pp. [11]-38, and Chinook-English, pp. [47]-74. This edition has been entirely re-set. since the 1909 "fifteenth edition".

Eighteenth edition **1960**: [LILLY] *Gill's dictionary of the Chinook jargon, with examples of use in conversation and notes upon tribes and tongues. English-Chinook and Chinook-English. Eighteenth Edition*, compiled by John [Kaye] Gill. Portland, Or.: Published by J.K. Gill company, 1960. Original orange wrappers, lettered in black, with a drawing of a Native American with bow and arrow on front cover. Pp. 1-3 4-80. Zaunmüller, col. 385 (1933, with no indication it is a later edition). Reinecke 113.90 (not seen by Reinecke). English-Chinook, pp. [11]-38, and Chinook-English, pp. [47]-74, conversational phrases, grace and hymn, pp. 75-79, Lord's Prayer, p. 80.

**1913**: [LILLYbm] *The Chinook book: a descriptive analysis of the Chinook jargon in plain words, giving instructions for pronunciation, construction, expression and proper speaking of Chinook with all the various shaded meanings of the words*, by "El Comancho" W[alter] S[helley] Phillips [1867-1940]. Seattle: [R. L. Davis printing co.], 1913. Original tan wrappers, lettered and decorated in black. Pp. 1-5 6-118 119-120. First edition. Not in Zaunmüller. Reinecke 113.148 ("Comprehensive, painstaking,

but unscientific"). alphabetical list of Chinook Jargon words with full explanations in English, pp. 11-105, "Counting in Chinook", p. [1-6], and "List of Fewest Words Needed to carry on an Ordinary Conversation in Chinook," pp. [1-7]-109. This is a presentation copy from the author, inscribed on the inner front wrapper in green ink: "Yours Truly | "El Comancho" | Seattle April 22 | 1913".

"This book is written with the object of reducing to understandable English one of the most flexible of primitive languages ever known. In a few years the men who have spoken this unwritten jargon and depended on it as a means of communication with savage peoples will have crossed the great divide and with them will go the only authority on Chinook. Having talked Chinook for nearly thirty years, with both Indians and whites, and being a trained writer...I thought it 'up to me' to record the Chinook jargon in as nearly an authoritative way as it is possible to do in English....If this book is taken as a Chinook standard of spelling there should be no further confusion in recording anything in Chinook and I hope for the sake of the jargon that this will be done.... Herein I have recorded the words and meaning of the fully developed jargon with the idea of preserving it for all time for it is too good an 'infant language' to be lost to the world. May those who come after us develop it still further until it becomes a world language, for it is easily understood and spoken by men of many tongues and has a flexible quality that is really remarkable" (Preface).

"Second edition" **1913**: [LILLY] *The Chinook book: a descriptive analysis of the Chinook jargon in plain words, giving instructions for pronunciation, construction, expression and proper speaking of Chinook with all the various shaded meanings of the words*, by "El Comancho" W[alter] S[helley] Phillips [1867-1940]. Seattle: [R. L. Davis printing co.], 1913. Original tan wrappers, lettered and decorated in red and black. Pp. 1-5 6-118 119-120. This is in fact a re-issue of the otherwise identical first edition with "*Second Edition*" on front wrapper. Not in Zaunmüller. Reinecke 113.148 (this "edition" not mentioned). This is a presentation copy from the author's daughter: "To Tom Parker | from | El Comancho's | daughter | Lieleota De Staffarry | April 15-1934 | Santa Barbara-Cal."

**1924**: [LILLY] *Chinook Rudiments*, by [Rev. J. M Le Jeune]. [Kamloops, B.C.], 1924, printed in *Kamloops Miscellany*, No. 1739, 3 May 1924. Original self-wrappers. Pp. 1 2-36. Reinecke 113.134. This copy with contemporary evidence of authorship: ink stamp "Rev. J. M. LeJeune, O.M.I., Kamloops, B.C." at bottom of p. [1]. Second copy: LILLY.

**1935**: [LILLYbm] *Chinook: A History and Dictionary of the Northwest Coast Trade Jargon; the Centuries-Old Trade Language of the Indians of the Pacific. A History of Its Origin and Its Adoption and Use by the Traders, Trappers, Pioneers and Early Settlers of the Northwest Coast*, by Edward Harper Thomas. Portland, Oregon: Metropolitan Press, 1935. Original red cloth over boards, lettered and illustrated in black, with "Metropolitan" at base of spine. Pp. [10] 1 2-179 180-182. First edition. Not in Zaunmüller. Reinecke 113.182 ("Material largely from Shaw (1909) of which it may be regarded as a second edition. Ca. 307 words in the Chinook Jargon-English section, with many phrases to illustrate their use, plus ca. 204 Chinook Jargon words in more restricted local use. Bibliography pp. 48-59, with notes from Eells manuscript dictionary"). Chinook-English, pp. [64]-109, with index, pp. 111-114, supplementary Chinook-English

pp. [115]-118, and English-Chinook, pp. [123]-179. Bibliography of "Books on the Jargon," pp. 48-56. This copy with the ownership inscription of George Coombs Shaw, author of *The Chinook Jargon and How to Use It* (1909), and heavily annotated throughout by him, with scathing comments, corrections and objections, terming it "an atrocious work, an abomination", and two loosely inserted notes of a similar nature.

Later issue by Binfords and Morts, n.d. **ca. 1970**: [LILLYbm] photographic reprint of text on different paper, bound in original orange-tan cloth over boards, lettered and decorated in blue; d.j. turquoise, white, tan, and black, lettered in white and black. D.j. gives "Binfords & Mort" of Portland as publishers; "Binfords & Mort" at base of spine. According to OCLC, a second edition (not identified as such) was published by Binfords & Mort in 1970, 171 pp., with the bibliography, pp. 167-171.

**1947**: [LILLYbm] cover title] *A Dictionary of the Chinook Jargon*, by B. J. Spalding. Pender Island, B.C.: [published by the author], 1947. Original white wrappers, lettered in black, with an illustration in red and green on the front cover. Pp. [1-16] unnumbered. First edition. Not in Zaunmüller. Reinecke 113: 169. English-Chinook, pp. [3-15], approximately 400 words. Second copy: LILLY..

"In this year 1947 A.D. the Chinook Jargon implies about as much to the average person living in the Pacific North West as does the Lingua Franca of the Mediterranean and the Dutch Surinam, similar Jargons of other parts of the world. And in 1847, a hundred years ago, the Chinook Jargon was the international language spoken here.... Fifty years ago Chinook was commonly used between Indians, Whites and Orientals. Today it is nearly as extinct as are the buffalo and sea otter.... Surely this language, which is so essentially part of our background, deserves recognition and not be permitted to go into 'limbo'. It is with this hope of arousing interest that this little Dictionary has been compiled" (pp. [1-2]).

[**CHIN, THADO**] Thadou (Thado, Thaadou, Thado-Ubiphei, Thado-Pao) is a common Kukish language spoken widely in the northeastern part of India and Burma. The Saimar dialect was reported in the Indian press in 2012 to be spoken by only four people in one village in the state of Tripura. The variety spoken in Manipur has partial mutual intelligibility with the other Kukish varieties of the area including Paite, Hmar, Vaiphei, Simte, Kom and Gangte languages (Wiki).

London, Macmillan and Co., limited, 1912. xxii, p., 1 l., 250 p. col. front., illus., plates (3 col.) fold. map. 23 cm. Original blue cloth over boards, lettered in gold, with a tribal native depicted in gold on the front cover. Bibliography: p. xvii-xix. Includes a "Comparative Vocabulary of Thado and Lushai languages, with notes on the other Chin Languages and Manipuri or Meithei," pp. 229-235.

"The following comparative vocabulary gives in the first two columns the Thado and English words as given by Mr. Hodson. The first word in the column of remarks is always Lushai, and where it has not exactly the same meaning as the Thado word the correct meaning is given; then follow, where necessary, the equivalents in other

dialects... Mr. Hodson's vocabulary has no pretensions to be a complete dictionary of the Thado language" (p. 228).

**[CHIN, TIDIM]** Tedim (Tiddim or Tedim Chin), is a Kukish language of India and Burma. Sukte is a dialect of Tedim. Tedim was the primary language spoken by Pau Cin Hau, a religious leader from the late 19th through early 20th centuries. He also devised a logographic and later simplified alphabetic script for writing materials in Chin languages, especially Tedim (Wiki).

Original green cloth over boards, lettered in gold; d.j. tan, lettered and decorated in green. First edition. London Oriental Series, Vol. 15. Tiddim Chin-English vocabulary, pp. 146-162, doubled-columned.

"Tiddim Chin (or Kamhau), spoken on the north-west frontier of Burma, has hitherto received scant attention from linguists, and no grammar or dictionary has so far appeared" (from the inside flap of the d.j.). "The material on which this study is based was gathered in the course of a four weeks' visit to Tiddim, in the Northern Chin hills, in the autumn of 1954.... I have been glad to draw upon an excellent little book by VZT and J. Gin Za Twang entitled *How to Spell, Pronounce and Learn Tiddim-Chin Words*, published by the Baptist Board of Publications in Rangoon in 1953" (Introduction).

**[CHIPAYA]** Chipaya is a native South American language of the Uru–Chipaya language family. The only other language in the grouping, Uru, is considered by some to be a divergent dialect of Chipaya. Ethnologue lists the language vitality as "vigorous," with 1200 speakers out of an ethnic population of around 1800. Chipaya has been influenced considerably by Aymara, Quechua, and more recently, Spanish, with a third of its vocabulary having been replaced by those languages. The Chipayan language is spoken in the area south of Lake Titicaca along the Desaguadero River in the mountains of Bolivia and mainly in the town of Chipaya located in the Sabaya Province of the Bolivian department of Oruro north of Coipasa Salt Flats. Native speakers generally refer to it as Puquina or Uchun Maa Taqu ("our mother language"), but is not the same as the extinct Puquina language (Wiki).

**[CHIPPEWA]** Chippewa (also known as Southwestern Ojibwa, Ojibwe, Ojibway, or Ojibwemowin) is an Algonquian language spoken from upper Michigan westward to North Dakota in the United States. It represents the southern component of the Ojibwe language. Chippewa is part of the dialect continuum of Ojibwe (including Chippewa, Ottawa, Algonquin, and Oji-Cree), which is closely related to Potawatomi. It is spoken on the southern shores of Lake Superior and in the areas toward the south and west of

Lake Superior in Michigan and Southern Ontario. The speakers of this language generally call it Anishinaabemowin (the Anishinaabe language) or more specifically, Ojibwemowin (the Ojibwa language). There is a large amount of variation in the language. Some of the variations are caused by ethnic or geographic heritage, while other variations occur from person to person. There is no single standardization of the language as it exists as a dialect continuum: "It exists as a chain of interconnected local varieties, conventionally called dialects." Some varieties differ greatly and can be so diverse that speakers of two different varieties cannot understand each other. In the southern range of where the language is spoken, it is mostly spoken by the older generations of the Anishinaabe people, and many of its speakers also speak English (Wiki).

Ethnologue: ciw. Alternate Names: Minnesota Ojibwe, Ojibway, Ojibwe, Southwestern Ojibwa.

First edition. Includes Chippewa-English, pp. 1-171 in first section; second section is English-Chippewa arranged alphabetically by parts of speech, pp. 1-95.

"I didn't invent the language - it was already there and has been for centuries - passed from generation to generation without benefit of written form. I simply have endeavored to create what I believe to be a simplified, sensible and consistent set of spelling rules for guidance in representation of the spoken sounds - which sounds, quite fortunately, are congenial to the English speaking tongue and ear...My major resource for the words themselves was the well-known Bishop Baraga dictionary and an unknown author's work of about the same vintage...Both spelled poorly in my judgment and offered a lexicon that could never take hold. But both provided me with the substance of my work, without which I would have done very little...Suffice it to say that my 'language book' is based on their combined efforts and I am terribly grateful to both of them" ("Just a word of explanation-"). This copy inscribed by the author: "To Keith Funston. / - With admiration for a man / who speaks without 'forked tongue'! / Coy Eklund / 7/6/76". [**CHITIMACHA**] Chitimacha (/ˌtʃɪtməˈʃɑː/ chit-i-mə-shah or /tʃɪtɪˈmɑːʃə/, chit-i-mah-shə) is a language isolate historically spoken by the Chitimacha people of Louisiana, United States. It went extinct in 1940 with the death of the last fluent speaker, Delphine Ducloux. Although no longer spoken, it is fairly extensively documented in the early 20th-century work (mostly unpublished) of linguists Morris Swadesh and John R. Swanton. Swadesh in particular wrote a full grammar and dictionary, and collected numerous texts from the last two speakers, although none of this is published. Language revitalization efforts are underway to teach the language to a new generation of speakers. Tribal members have received Rosetta Stone software for learning the language. As of 2015, a new Chitimacha dictionary is in preparation, and classes are being taught on the Chitimacha reservation (Wiki).

"The Sitimaxa (Chitimacha) language of southern Louisiana has not been spoken since the death of its last native speakers, Chief Benjamin Paul and Delphine Decloux, in 1934 and 1940 respectively. We are fortunate, however, to have both excellent written grammar and vocabulary materials on the language gathered by the professional linguist Morris Swadesh and Mary Haas in the 1930's as well as recordings of many stories and tribal folk-tales made for them by Chief Paul and Mrs. Decloux. These resources provide the materials for the present volume, which is designed to be used for beginning learners of this unusually beautiful and expressive language"--Page 4 of cover.

[**CHOCO LANGUAGES**] The Choco languages (also Chocoan, Chocó, Chokó) are a small family of Native American languages spread across Colombia and Panama. Choco consists of perhaps ten languages, half of them extinct: the Emberá languages (also known as Chocó proper, Cholo); Noanamá (also known as Waunana, Woun Meu); Anserma (†); Cenu (†) ?; Cauca (†); Sinúfana (Cenufara) (†) ?; Quimbaya (Kimbaya) (†) (not Choco?); Caramanta (†) ?; Anserma, Cenu, Cauca, Sinúfana, and Kimbaya are all extinct now. Quimbaya is known from only 8 words. Kaufman (1994) states that Quimbaya may not be a Choco language (Wiki).

[CHOL] The Ch'ol (Chol) language is a member of the western branch of the Mayan language family used by the Ch'ol people in the Mexican state of Chiapas. There are two main dialects: Ch'ol of Tila spoken by 43,870 people of whom 10,000 are monolinguals

in the villages of Tila, Vicente Guerrero, Chivalito and Limar in Chiapas; Ch'ol of Tumbalá spoken by 90,000 people of whom 30,000 are monolinguals in the villages of Tumbalá, Sabanilla, Misijá, Limar, Chivalita and Vicente Guerrero. The Cholan branch of the Mayan languages is considered to be particularly conservative and Ch'ol along with its two closest relatives the Ch'orti' language of Guatemala and Honduras, and the Chontal Maya language of Tabasco are believed to be the modern languages that best reflect their relationship with the Classic Maya language (Wiki).

[**CHOROTE, IYO'WUJWA**] Iyo'wujwa (Chorote) is a Matacoan language spoken by about 2,000 people, mostly in Argentina where it is spoken by about 1,500 people; 50% of whom are monolingual. Alternate names include: Choroti, Manjuy, and Manjui. There are about 650 speakers in Paraguay and 8 in Bolivia. Of the 650 in Paraguay, approximately 480 are considered monolingual. These speakers in Paraguay only refer to themselves as Manjui or Inkijwas. They refer to the ones residing in Argentina as the Iyo'wujwas, though some who reside with these people in Argentina have migrated from Paraguay. Most of the Manjui under 40 years old can read and write in their own language and were taught in their own schools. The principal location of these people is a settlement called Santa Rosa, in the province of Boquerón. Other locations include Mcal. Estigarribia, Pedro P. Peña, and Yakaquash (Wiki).

[**CH'ORTI'**] The Ch'orti' language (sometimes also Chorti) is a Mayan language, spoken by the indigenous Maya people who are also known as the Ch'orti' or Ch'orti' Maya. Ch'orti' is a direct descendant of the Classic Maya language in which many of the pre-Columbian inscriptions using the Maya script were written. This Classic Maya language is also attested in a number of inscriptions made in regions whose inhabitants most likely

spoke a different Mayan language variant, including the ancestor of Yukatek Maya. Ch'orti' is the modern version of the ancient Mayan language Ch'olan (which was actively used and most popular between the years of A.D 250 and 850) (Wiki).

[**CHUKCHI**] Chukchi /'tʃʊktʃi:/ (Chukchee) is a Palaeosiberian language spoken by Chukchi people in the easternmost extremity of Siberia, mainly in Chukotka Autonomous Okrug. According to the Russian Census of 2002, about 7,700 of the 15,700 Chukchi people speak Chukchi; knowledge of the Chukchi language is decreasing, and most Chukchis now speak the Russian language (fewer than 500 report not speaking Russian at all). Chukchi is closely related to Koryak, which is spoken by about half as many as speak Chukchi. The language, together with Koryak, Kerek, Alutor, and Itelmen, forms the Chukotko-Kamchatkan language family. The Chukchi and Koryaks form a cultural unit with an economy based on reindeer herding, and both have autonomy within the Russian Federation. The ethnonym Chukchi or Chukchee is an Anglicized form of the Russian ethnonym (singular Chukcha, plural Chukchi). This came into Russian from Čävča, the term used by the Chukchis' Tungusic-speaking neighbors, itself a rendering of the Chukchi word [tʃawtʃəw], which in Chukchi means "a man who is rich in reindeer". The Chukchis' term for themselves is [ɬəʔorawetʃat] (singular [ɬəʔorawetʃan]), "the real people." In the UNESCO Red Book, the language is on the list of endangered languages (Wiki).

[**CHULYM**] Chulym (Russian: Чулымский язык, Čulymskij jazyk), also known as Chulim, Chulym-Turkic, Küerik, Chulym Tatar or Melets Tatar (not to be confused with the closely related Siberian Tatar language) is the language of the Chulym. The name the people use to refer to themselves, and also to their language, is Ös, literally 'self' or 'own'. It is also spoken by the Kacik (Kazik, Kuarik). This name originated from a now extinct tribe. The language is closely related to the Shor and Khakas languages. Though all these are considered by some as one language, the Ös speakers themselves do not believe this to be the case. Chulym is a moribund language and will most likely be extinct by the 2030s. The speakers are located in Russia, in southwestern Siberia, north of the Altay Mountains, in the basin of the Chulym River, a tributary of the Ob River (Wiki).

Ethnologue: ISO 639-3clw. Alternate Names: Chulim, Chulym Tatar, Chulym-Turkish, Melets Tatar.

"The language of the Chulym Tatars or the Chulym language belongs to the Turkic languages. Two dialects can be distinguished: Lower Chulym and Middle Chulym, which, in their turn, divide into vernaculars. The Lower Chulym dialect which is now believed to be extinct belongs to 'the *ayaq/tayliq*-group' and has many features in

common with the northern dialects of Altay (Tuba, Kumandy, Chalkandu) and the dialects of Kondoma and Lower Tom of the Shor language.... 'The Middle Chulym dialect now has fewer than twenty speakers; the youngest was 54 years old in 2005' (Anderson & Harrison 2006: 47-48)" (Introduction).

[**CHUMASHAN LANGUAGES**] Chumashan (English name from č<sup>h</sup>umaš /tʃ<sup>h</sup>umaʃ/, meaning "Santa Cruz Islander") is a family of languages that were spoken on the southern California coast by Native American Chumash people, from the Coastal plains and valleys of San Luis Obispo to Malibu, neighboring inland and Transverse Ranges valleys and canyons east to bordering the San Joaquin Valley, to three adjacent Channel Islands: San Miguel, Santa Rosa, and Santa Cruz. The Chumashan languages may be, along with Yukian and perhaps languages of southern Baja such as Waikuri, one of the oldest language families established in California, before the arrival of speakers of Penutian, Uto-Aztecian, and perhaps even Hokan languages. Chumashan, Yukian, and southern Baja languages are spoken in areas with long-established populations of a distinct physical type. The population in the core Chumashan area has been stable for the past 10,000 years. However, the attested range of Chumashan is recent (within a couple thousand years). There is internal evidence that Obispeño replaced a Hokan language and that Island Chumash mixed with a language very different from Chumashan; the islands were not in contact with the mainland until the introduction of plank canoes in the first millennium AD. All of the Chumashan languages are now extinct, although they are well documented in the unpublished fieldnotes of linguist John Peabody Harrington. Especially well documented are Barbareño, Ineseño, and Ventureño. The last native speaker of a Chumashan language was Barbareño speaker Mary Yee, who died in 1965 (Wiki).

[**CHUMBURUNG**] Chumburung (Kyongborong, Nchimburu, Nchummuru) is a Guang language spoken by 69,000 persons, mostly Chumburu by tribe and living in the Kingdom of Chumburung at both sides of the southwestern leg of Lake Volta in Ghana. 3,000 of these speak the Yeji (Yedji) dialect, which is quite divergent: no closer to Chumburung proper than Kplang or Krache are. A large number of publications describing the language can be found at: <http://www.language-archives.org/language/ncu>. References to the tribe and the traditional area are rare, but here is one: <http://www.northernghanapeoples.co.uk/>; click down left on CHUMBURUNG (Wiki).

There are communities of speakers on Pohnpei and Guam as well. Estimates show that there are about 45,900 speakers in Micronesia (Wiki).

"This is one of a series of studies of Micronesian languages made by the Navy Department. The field work was done during the first eight months of 1946... Trukese was not written down until the missionaries translated numerous religious works... The arrangement of the dictionary is unusual. An attempt has been made to unite the ethnological theories of linguistics... with the more traditional etymological approach... A language is vital only when considered in relation to all facets of life. But consider the limitations of any single linguist. To do his job he must be a botanist, ichthyologist, astronomer, conchologist, craftsman, lover, magician, and much more besides. In many languages he may tap written records, but in Truk he is a pioneer and himself goes direct to the people... It is feared that some Trukese people, as well as some foreigners, will be offended by the inclusion... of many vulgar words that may not be spoken in the presence of the opposite sex. The reasons for including these are [one example is given]: Many are... in constant use. The teacher and missionary will want to know which to discourage and which to avoid himself. Vulgar words are so numerous that their avoidance is difficult... Trukese is a member of the huge Malayo-Polynesian family that extends from Madagascar to Easter Island... Trukese is spoken by nearly 10,000 natives in the Truk Islands... The Trukese-English dictionary contains approximately 5,000 words. This by no means exhausts the richness of the language. Breadfruits recorded total 56 varieties and 23 descriptive words, bananas 23 varieties, crabs 26 species [etc.]..."

[**CHUVASH**] Chuvash (Чăвашла, Çăvaşla; IPA: [tɕəvəʃˈlɑ]) is a Turkic language spoken in central Russia, primarily in the Chuvash Republic and adjacent areas. It is the only surviving member of the Oghur branch of Turkic languages. While many Turkic languages demonstrate mutual intelligibility to varying degrees, Chuvash has diverged considerably from the other languages in the group. The writing system for the Chuvash language is based on the Cyrillic script, employing all of the letters used in the Russian alphabet, and adding four letters of its own: Ä, Ę, Ç and Ý (Wiki).

[CIA-CIA] Cia-Cia (Bahasa Ciacia), also known as Buton(ese), is an Austronesian language spoken principally around the town of Bau-Bau on the southern tip of Buton Island off the southeast coast of Sulawesi in Indonesia. In 2009, the language gained international media attention as the town of Bau-Bau was teaching children to read and write Cia-Cia in hangul, the Korean alphabet, and the mayor consulted the Indonesian government on the possibility of making the writing system official. However, the project was abandoned in 2012 (Wiki).

[**CIRCASSIAN LANGUAGES:** see under **ADYGHE** and **KABARDIAN**] Circassian /sər'kæsiən/, also known as Cherkess /tʃər'kɛs/, is a dialect continuum of the North Caucasus. There are two Circassian languages, defined by their literary standards, Adyghe (КӀахыбзэ, West Circassian), with half a million speakers, and Kabardian (Къэбэрдейбзэ, East Circassian), with a million. The spoken languages, however, merge, with intermediate dialects intelligible to both standards. The earliest extant written records of the Circassian language are in the Arabic script, recorded by the Turkish traveller Evliya Çelebi in the 17th century. The terms "Circassian" and "Cherkess" are sometimes used as synonyms for the Northwest Caucasian languages in general.

[**CLALLAM**] Klallam or Clallam (native name: nəxʷsɫayəmúçən) is a Straits Salishan language that was traditionally spoken by the Klallam peoples at Becher Bay on Vancouver Island in British Columbia and across the Strait of Juan de Fuca on the north coast of the Olympic Peninsula in Washington. Klallam is closely related to North Straits Salish, but not mutually intelligible. The last native speaker of Klallam was Hazel Sampson, who died on February 4, 2014, at age 103. It continues to be spoken with varying degrees of fluency by six younger Klallam as a second language (Wiki).

**1863:** [LILLYbm] *Alphabetical Vocabularies of the Clallam and Lummi*, by George Gibbs. New York: Cramoisy Press, 1863. Original (?) unprinted turquoise contemporary wrappers (detached, spine perished), with ink title "Vocabularies of Clallam and Lummi" and "Philological Society" in ink in upper right hand corner. Vii, [9]-40. This copy 35 cm. tall, entirely untrimmed, presumably as issued for binding. First edition. Shea's Library of American Linguistics XI (although not here identified as such). Not in Zaunmüller. This copy withdrawn from the library of King's College, London. According to Platzmann, 100 copies were printed. English-Clallam vocabulary, pp. [9]-[22], English-Lummi vocabulary, pp. [23]-40.

"The tribe of Clallams, as they are usually called by the residents of Washington Territory... inhabit the southern shore of Fuca Strait, from about the Okeho River on the west, to Port Townsend on the east... The Clallam differs materially from the other Salish languages of the Puget Sound country, though less from the Lummi than the rest. Its noticeable feature is the frequent occurrence of the nasal *ng*. The Lummi tribe live on the lower part of a river heading in the Cascade Range, north-east of Mount Baker... They are, however, intruders here, their former country having been a part of the group of islands between the continent and Vancouver Island, to which they still occasionally resort... Like the Clallam, their language abounds with the nasal *ng*, both as a prefix and a termination... These two vocabularies were collected, the first at Port Townsend, during a residence of a few months, the other at Simiamoo Bay, while I was connected with the N. W. Boundary Commission." This is the first published vocabularies of these two languages.

"Around the northwestern angle of the Gulf of Mexico, and encircled by tribes belonging to ... large and better known linguistic families...there was early in the sixteenth century a great number of tribes of bands which differed markedly from their neighbors in language and showed great diversity among themselves. These tribes extended from the Mississippi River to the neighborhood of Panuco, Mexico, on the south and Monclova, Coahuila, on the west... So far as we are now aware, the ... languages belonging to the so-called Coahuiltecan, Karankawan, Tamaulipecan, and Janambrian stocks, are... extinct, and in the present bulletin all of the linguistic material drawn from them and known to be in existence is incorporated. For the sake of completeness there is included, not only hitherto unpublished vocabularies, but published material as well which it is believed should be brought together in one volume."

[**COCHIMI**] Cochimí was once the language of the greater part Baja California, as attested by Jesuit documents of the 18th century. It seems to have become extinct around the beginning of the 20th century (Modern "Cochimi"-speakers are actually speakers of Kumiai.) There were two main dialects, northern and southern; the dividing line was approximately at the Misión San Ignacio Kadakaamán, in the north of present-day Baja California Sur. The Jesuit texts establish that the language was related to the Yuman languages of the Colorado River region. It is thought to be the most divergent language of the family, which is generally called Yuman–Cochimí to reflect this. Based on glottochronology studies, the separation between Cochimi and the Yuman languages is believed to have occurred about 1000 BC (Wiki).

[**COCOPA**] Cocopah is a Delta language of the Yuman language family spoken by the Cocopah. In an effort to keep the language alive, which was spoken by fewer than 400 people at the turn of the 21st-century, the Cocopah Museum began offering Cocopah language classes to children in 1998. The language had no alphabet until the 1970s when a scholar developed one for a university dissertation. It proved to be less than ideal, and a new alphabet was developed by the tribe in the early 2000s. As the revival of the language has progressed, it has been necessary to find words for modern objects that didn't exist in the ancient language. These issues are referred to the elders of the tribe for a decision. Cocopah in Mexico use a different orthography designed by the INALI (Wiki).

[**COEUR D'ALENE**] Coeur d'Alene (Cœur d'Alène, snchitsu'umshtsn) is a Salishan language. It was spoken by only two of the 80 individuals in the Coeur d'Alene Tribe on the Coeur d'Alene Reservation in northern Idaho, United States in 1999. It is considered an endangered language. However, as of 2014, two elders in their 90s remain who grew up with snchitsu'umshtsn as their first language, and the use of the language is spreading among all age groups. Lawrence Nicodemus, "a retired judge and former tribal council member," became a scholar of the language. He had worked with linguist Gladys Reichard in his youth, and went on to create a grammar, dictionary, and instructional materials. Nicodemus taught language classes until his death at age 94 (Wiki).

[COFÁN] The Cofán language (also Kofan or Kofane; autonym: A'ingae) is the language of the Cofán people, an indigenous group native to Napo Province northeast Ecuador and southern Colombia, between the Guamués River (a tributary of the Putumayo River) and the Aguarico River (a tributary of the Napo River). Approximately 60% of Cofán speakers in Ecuador are literate in their own language. There is extensive bilingualism with Spanish on both sides of the border. Inter-marriage with Siona people and Secoya people also promotes bilingualism. The language is written in the Roman script and has ten vowels (five with and without nasalization) and twenty-eight consonants. Cofán had been classified as a Chibchan language, but this appears to be due to borrowed vocabulary (Wiki).

[**COMECRUDO**] Comecrudo is an extinct Comecrudan language of Mexico. The name Comecrudo is Spanish for "eat-raw"; Carrizo is Spanish for "reed". It was best recorded in a list of 148 words in 1829 by French botanist Jean Louis Berlandier (Berlandier called

it "Mulato") (Berlandier et al. 1828–1829). It was spoken on the lower Rio Grande near Reynosa, Tamaulipas, in Mexico. Comecrudo has often been considered a Coahuiltecan language although most linguists now consider the relationship between them unprovable due to the lack of information. In 1861, German Adolph published a travelogue with some vocabulary (Adolph called the language Carrizo) (Adolph 1861: 185–186). In 1886, Albert Gatschet recorded vocabulary, sentences, and a text from the descendants (who were not fluent) of the last Comecrudo speakers near Camargo, Tamaulipas, at Las Prietas (Swanton 1940: 55–118) (Wiki).

Each island has a different dialect and the four are conventionally divided into two groups: the eastern group is composed of Shindzuani (spoken on Ndzuwani) and Shimaore (Mayotte), while the western group is composed of Shimwali (Mwali) and Shingazija (Ngazidja). No official alphabet existed in 1992, but historically the language was written in the Arabic script. "In the year 1919 I took charge of a government native school at Oneroa, the main center of population in Mangaia, Cook Islands. I found that despite many curious and interesting divergencies in vocabulary, the grammar of the language was practically identical with that of Rarotonga, 116 miles away. The same may be said of the sister languages of Atiu and Aitutaki, a few specimens of which I have included with some 330 Mangaian words collected during my first year in Mangaia. . . . Just as in France, Latin swallowed up the ancient language of the Gauls. . . . so in the Cook Islands the Rarotongan language is ousting these quaint sister dialects, a portion of which I have rescued for philologists. . . . In this vocabulary, incomplete though it be, I have incorporated many of the fruits of nearly thirty years' careful study of the Oceanic languages" (Introduction)

"The Mangaian natives lack the punctilious etiquette and polished courtesy of the Samoans, and the charming complaisance and fascinating irresponsibility of the Tahitians. There is nevertheless something rough and ready, sturdy and independent about the Mangaian character, as if the acorn planted by early Christian missionaries had grown up into a dwarfish, but rugged and deep-rooted oak-tree, or, at least, its tropical understudy. . . . Under improved conditions of organization, when Mangaia has a proper steamship service, she will become a great orange-exporting center, and a popular tourist resort, as the island abounds in places of great natural beauty and of deep interest to botanist, archaeologist, artist and photographer" (The Mangaians).

"Maori, the language of the Cook Islands, consists of a number of mutually intelligible dialects spoken on the widely dispersed islands of the nation. The dialect of this dictionary is that of the main island of Rarotonga, but many words characteristic of other dialects are also identified." "This dictionary. . . involved the efforts of many people over 35 years."

[**COPTIC**] Coptic or Coptics the latest stage of the Egyptian language, a northern Afroasiatic language spoken in Egypt until at least the 17th century. Egyptian began to be written in the Coptic alphabet, an adaptation of the Greek alphabet with the addition of six or seven signs from demotic to represent Egyptian sounds the Greek language did not have, in the first century AD. Several distinct Coptic dialects are identified, the most prominent of which are Sahidic, originating in parts of Upper Egypt, and Bohairic, originally from the western Nile Delta in Lower Egypt. Coptic and Demotic are grammatically closely related to Late Egyptian, which was written with Egyptian hieroglyphs. Coptic flourished as a literary language from the second to thirteenth centuries, and its Bohairic dialect continues to be the liturgical language of the Coptic Orthodox Church of Alexandria. It was supplanted by Egyptian Arabic as a spoken language toward the early modern period, but language revitalization efforts have been underway since the 19th century (Wiki).

"Few foreigners have penetrated this uninviting region up to now. In spite of the 'conquering' of the land of the Coras in 1722, in spite of the erection of churches and in spite of the nominal Christianity, the Cora have to a large extent preserved their old religion and their original unassuming way of life... All at once, at the end of December 1905, I was thrust into this world of extreme contradictions, where the dependency of man on natural occurrences is all too evident, as I departed from Tepic and crossed the Rio Grande, or Rio de Santiago, with a small caravan of mules and two arrieros (mule drivers). What a wealth of work awaited me there over two short years! (Foreword, tr: BM).

[**CORNISH**] Cornish (Kernowek) is a Southwestern Brittonic Celtic language spoken in Cornwall. The language has undergone a revival in recent decades and is considered to be an important part of Cornish identity, culture and heritage. It is a recognised minority language of the United Kingdom, protected under the European Charter for Regional or Minority Languages, and has a growing number of speakers. Along with Welsh and Breton, Cornish is descended directly from the Common Brittonic language spoken throughout much of Britain before the English language came to dominate. It was the main language of Cornwall for centuries until it was pushed westwards by English, maintaining close links with its sister language Breton with which it was mutually intelligible until well into the Middle Ages. Cornish continued to function as a common community language in parts of Cornwall until the late 18th century, and continued to be spoken in the home by some families into the 19th and possibly 20th centuries, overlapping the beginning of revival efforts. A process to revive the language was begun in the early 20th century, with a number of orthographical systems in use until a Standard Written Form was agreed upon in 2008. In 2010 UNESCO announced that its former classification of the language as "extinct" was "no longer accurate". Since the revival of the language, many Cornish textbooks and works of literature have been published and an increasing number of people are studying the language. Recent developments include Cornish music, independent films, and children's books. A small number of people in Cornwall have been brought up to be bilingual native speakers, and the language is taught in many schools. The first Cornish language crèche opened in 2010 (Wiki).

"Having been appointed to labor amongst the Cree Indians of the Hudson's-Bay Company's territories, I considered that the first duty devolving upon me after arriving at my Station was to apply myself to the study of the native language. A Grammar by the late Mr. Howse was in existence, but beyond this there was no work calculated to render assistance, and I soon felt the need of a Dictionary, or copious and well-arranged Vocabulary. To supply to some extent this want, I commenced the collecting Indian words... The result has been the production of the following pages, which are now presented to the public, and form the *first dictionary*, I believe, ever published in the Cree language. The number of words contained in the Cree-English Part is about 13,500" (Preface).

"...the 'Mackay Memorial Cree Dictionary' [is] designed to meet the demand for a convenient and reliable dictionary of the Cree language... The first dictionary was known as Watkins' Dictionary... I was fortunate enough to possess one of the few of these dictionaries then in existence. The number printed must have been small; for even in my time it was declared to have gone out of print" (Foreword, J.A. Newnham). "The first dictionary of the Cree language was compiled by the Rev. E. A. Watkins, C.M.S., Missionary to the Cree Indians in the Hudson's Bay regions, and on the Prairies in the West, from 1853-1864. It was a remarkable achievement in

language study... Unfortunately Watkins' Dictionary was allowed to go out of print, and for some twenty or thirty years past those engaged in the study of the Cree language were handicapped without a dictionary at hand to consult... During the Tenth Session of the General Synod of the Church of England in Canada ... in September, 1924... a Joint Committee was formed ... for the purpose of ... raising the required funds, and for the printing and publishing of the Cree and Eskimo Dictionaries... During the Executive Committee meetings of the General Synod... to consider the work concerning the Cree Dictionary... it was found that the publication of the Eskimo Dictionary had absorbed all the funds so generously provided by the Church of the Ascension, Hamilton. This situation caused a delay in the publication of the Cree Dictionary... The Rev. E. Ahenakew has endeavoured to make the Cree-English Part a reliable vocabulary in the Plains and Western Cree dialect, and Archdeacon Faries has endeavoured to do the same in the Swampy and Eastern Cree dialects" ("Preface", Richard Faries).

[**CREE, WOODS**] Woods Cree is a variety of Cree, spoken in Northern Manitoba and Northern Saskatchewan, Canada. The exact population of Woods Cree speakers is unknown. In 1982 SIL (Summer Institute for Languages) found that the population of Woods Cree speakers was 35,000 people. However, more recently the University of Regina has documented that of the approximately 75,000 speakers of Cree across in Canada, 20,000 of them live in Saskatchewan, which is the main area where Woods Cree is spoken. Western Woods Cree is the term used to refer to the Cree languages west of the Hudson Bay. This includes the languages Rocky Cree, western Swampy Cree, and Strongwoods or Bois Fort Cree. James G.E. Smith classified the linguistic nature of the languages of Woods Cree, Northern Plains Cree, western Swampy Cree, and the extinct dialect of Misinipi Cree to all fall under the Western Woods Cree languages. In Alberta, Woods Cree is also known as Bush Cree. Precise classification of the Woods Cree language has not been sufficiently documented. Many different names and terms have been used in the description of the -th dialect of Cree spoken in the forested area north of the Canadian prairies. A more general, all-encompassing term used to describe this dialect is Woodland Cree, which is also used to describe the cultural group living in the forested area north of the prairies (Wiki).

**[CRIMEAN TATAR]** Crimean Tatar (Crimean Tatar: Къырымтатарджа Qırımtatarca, Къырымтатар тили Qırımtatar tili), also called Crimean Turkish[1] or simply Crimean, is a language spoken for centuries in Crimea. It is a Turkic language spoken in Crimea and the Crimean Tatar diasporas of Uzbekistan, Turkey, Romania and Bulgaria, as well as small communities in the United States and Canada. It should not be confused with Tatar proper, spoken in Tatarstan and adjacent regions in Russia; the languages are related but not mutually intelligible. Though only distantly related, it has been extensively influenced by nearby Oghuz Turkic languages such as Turkish, Turkmen, and Azerbaijani (Wiki).

**[CRIOULO, UPPER GUINEA]** Upper Guinea Creole (native name kriol, kiriol, kriolu and Portuguis varying with dialects; crioulo da Guiné in Portuguese) is the lingua franca of the West African country of Guinea-Bissau. It is also spoken in parts of Senegal, primarily as a trade language where it is known as "Portuguese". It is a Portuguese-based creole language, closely related to Cape Verdean creole. Kriol is spoken as a first language by approximately 15% (190,000) of Bissau-Guineans, and as a second language by approximately 50%, as of some time before 1992, and is the de facto language of national identity. The creole is still expanding but with growing interference from Portuguese (decreolization): due to television, literacy, prestige and emigration to Portugal, and the African languages: through migration of speakers of native African languages to the main urban centres where the creole is prevalent. Standard Portuguese is the official language of Guinea-Bissau, but the creole is the language of trade, public services, the parliament, informal literature, entertainment and educational programming. It is not used in news media (Wiki).

[**CROW**] Crow (native name: Apsáalooke [ə'psá:rò:gè]) is a Missouri Valley Siouan language spoken primarily by the Crow Nation in present-day southeastern Montana. It is one of the larger populations of American Indian languages with 4,280 speakers according to the 1990 US Census. Crow is closely related to Hidatsa spoken by the Hidatsa tribe of the Dakotas; the two languages are the only members of the Missouri Valley Siouan family. Despite their similarities, Crow and Hidatsa are not entirely mutually intelligible. According to Ethnologue with figures from 1998, 77% of Crow people over 66 years old speak the language; "some" parents and older adults, "few" high school students and "no pre-schoolers" speak Crow. 80% of the Crow Nation prefers to

speak in English. The language was defined as "definitely endangered" by UNESCO as of 2012. However, R. Graczyk claims in his *A Grammar of Crow* (2007) that "[u]nlike many other native languages of North America in general, and the northern plain in particular, the Crow language still exhibits considerable vitality: there are fluent speakers of all ages, and at least some children are still acquiring Crow as their first language." Currently, most speakers of Crow are 30 and older but a few younger speakers are learning it. There are increased efforts for children to learn Crow as their first language and many do on the Crow Reservation of Montana, particularly through a Crow language immersion school that was sponsored in 2012. Development for the language includes a Crow language dictionary and portions of the Bible published from 1980-2007 (Wiki).

[**CRUZEÑO**] Cruzeño, also known as Isleño (Ysleño) or Island Chumash, was one of the Chumashan languages spoken along the coastal areas of Southern California. It shows evidence of mixing between a core Chumashan language such as Barbareño or Ventureño and an indigenous language of the Channel Islands. The latter was presumably spoken on the islands since the end of the last ice age separated them from the mainland; Chumash would have been introduced in the first millennium after the introduction of plank canoes on the mainland. Evidence of the substratum language is retained in a noticeably non-Chumash phonology, and basic non-Chumash words such as those for 'water' and 'house' (Wiki).

[**CUICATEC, TEPEUXILA**] The Cuicatecs are an indigenous group of the Mexican state of Oaxaca, closely related to the Mixtecs. They inhabit two towns: Teutila and Tepeuxila in western Oaxaca. According to the 2000 census, they number around 23,000, of whom an estimated 65% are speakers of the language. The name Cuicatec is a Nahuatl exonym, from ['kʷika] 'song' ['teka] 'inhabitant of place of'. The Cuicatec language is an Oto-Manguean language of Mexico. It belongs to the Mixtecan branch together with the Mixtec languages and the Trique language. The Ethnologue lists two major dialects of Cuicatec. Like other Oto-Manguean languages, Cuicatec is tonal (Wiki).

**[DAGBANI]** Dagbani (Dagbane), also known as Dagbanli and Dagbanle, is a Gur language spoken in Ghana which is closely related to and mutually intelligible with the Mampelle and Nanumba languages which are also spoken in Northern Region, Ghana. Its native speakers are estimated around 830,000 (2000). Dagbani is also widely known as a second language in Northern Ghana especially among acephalous tribes overseen by Ya-Na. It is a compulsory subject in Primary and Junior High School in the Dagbon Kingdom, which covers the eastern part of the region. There is an insight into a historical stage of the language in the papers of Rudolf Fisch reflecting data collected during his missionary work in the German Togoland colony in the last quarter of the nineteenth century, especially the lexical list, though there is also some grammatical information and sample texts. A more-modern glossary was published in 1934 by a southern Ghanaian officer of the colonial government, E. Foster Tamakloe in 1934, with a revised edition by British officer Harold Blair. Various editors added to the wordlist and a more-complete publication was produced in 2003 by a Dagomba scholar, Ibrahim Mahama. Meanwhile, the data was electronically compiled by John Miller Chernoff and Roger Blench (whose version is published online, and converted to a database by Tony Naden, on the basis of which a full-featured dictionary is on-going, and can be viewed online (Wiki).

**[DAHALO]** Dahalo is an endangered Cushitic language spoken by at most 400 Dahalo people on the coast of Kenya, near the mouth of the Tana River. Dahalo is unique in the world in using all four airstream mechanisms found in human language. The Dahalo, former elephant hunters, are dispersed among Swahili and other Bantu peoples, with no villages of their own, and are bilingual in those languages. It may be that children are no longer learning the language. It is suspected that the Dahalo may have once spoken a Sandawe- or Hadza-like language, and that they retained clicks in some words when they shifted to Cushitic, because many of the words with clicks are basic vocabulary. If so, the clicks represent a substratum. Dahalo is also called Sanye, a name shared with

neighboring Waata, also spoken by former hunter-gatherers. The classification of Dahalo is obscure. Traditionally included in South Cushitic, Tosco (1991) argues instead that it is East Cushitic, and Kießling (2001) agrees that it has too many Eastern features to be South Cushitic (Wiki).

Original dark green cloth over boards, lettered and decorated in blind and gold. Pp. [2] *i-v* vi-xi *xii*, *I-3* 4-338. First edition. Not in Zaunmüller. Series: Smithsonian contributions to knowledge [v. 4]. Dakota-English, pp. [3]-278, double columns, and English-Dakota, pp. [279]-338, triple columns. Bibliography: p. [xii]. First dictionary of the Dakota language. "Stephen Riggs was a missionary with an unusual aptitude for languages; eventually '[he] became the recognized authority on the Siouan languages' (*DAB*). He published numerous works in Dakota, including primers, the Book of Genesis, a hymn book, *Pilgrim's Progress*, and *The Constitution of Minnesota*; he also published a Dakota edition of the Psalms which he translated from Hebrew, and an edition of the New Testament which he translated from the original Greek. [Field 1302. Sabin 71333. Not in Graff or Howes.]" (Bookseller's description).

"The preparation of this volume may be regarded as one of the contributions to science made by the great Missionary enterprise of the present age. It was not premeditated, but has been a result altogether incidental to our work. Our object was to preach the Gospel to the Dakotas in their own language, and to teach them to read and write the same, until their circumstances should be so changed as to enable them to learn the English. Hence we were led to study their language and so endeavor to arrive at a knowledge of its principles... The preparation of the Dakota-English part of the Dictionary for the press, containing more than sixteen thousand words, occupied all the time I could spare from my other missionary employments for more than a year. The labor bestowed on the English-Dakota part was performed partly by Mrs. Riggs" (Preface).

"The nation of the Sioux Indiana, or Dakotas, as they call themselves, is supposed to number about *twenty-five thousand*. They are scattered over an immense territory, extending from the Mississippi river on the east to the Black Hills on the west, and from the mouth of the Big Sioux river on the south to Devil's Lake on the north. Early in the winter of 1837, they ceded to the United States all their land lying on the eastern side of the Mississippi; and this tract at present forms the settled portion of Minnesota" (Introduction).

**1852b:** [LILLY] *An English and Dakota Vocabulary*, by a Member of the Dakota Mission [Mary Ann Clark Riggs]. New York: Printed by R. Craighead, 1852. Published by American Board of Commissioners for Foreign Missions. Original brown cloth over boards, decorated in blind, front cover lettered in gold. First separate edition. Not in Zaubmüller. It also appeared in this same year in her husband's *Grammar and Dictionary of the Dakota Language*. Riggs was the wife of Stephen R. Riggs and lived twenty-five years among the Dakotas in Minnesota. A fine copy. References: Ayer Indian Linguistics Dakota 125; Pilling Siouan p. 61: "Extracted from Riggs (S. R.), *Grammar and dictionary of the Dakota language*, and printed on smaller sheets." Original brown cloth, lettered in gold. 665 pp. Department of the Interior, Contributions to North American Ethnology, Vol. VII. Zaubmüller, col. 46.

"In 1852 the Smithsonian Institution published a grammar and dictionary of the Dakota language, prepared by Stephen Riggs.... As the English-Dakota dictionary of the edition of 1852 contained many inaccuracies, Mr. Riggs wished to furnish, as a companion volume to the present one, a revised and enlarged English-Dakota dictionary, but owing to his illness and death the preparation of that part of the work devolved on the Rev. J. P. Williamson, missionary at the Yankton Agency, Dakota."

Second edition, revised and enlarged, of English-Dakota portion **1902:** [LILLY] *An English-Dakota dictionary = Wasicun ka Dakota ieska wowapi*, compiled by John P. Williamson. New York: American Tract Society, c1902. [2], xviii, 264 p.; 18 cm. With a half-title. Bound in dark green cloth, spine lettered in gilt, all edges stained red, light tan endpapers. Zaubmüller, col. 46. English-Dakota, pp. [1]-264. This is the substantially revised and enlarged edition referred to in the Dakota-English dictionary of 1890 (see above). Second copy: [LILLYbm]. Williamson also prepared a shorter English-Dakota school dictionary in 1871 and 1886 (see below).

**1866**: [LILLY] *Lahcotah* [cover title]. *Dictionary of the Sioux Language* [drop title], compiled with the aid of Charles Guerreu, Indian Interpreter, by Lieuts. J.K. Hyer & W.S. Starring. Fort Laramie, Wy.: December 1866. [31] pp. 19.8 x 13.6 cm. Original paper wrappers, printed in black, fastened with three brass brads. First edition. Not in Pilling or Streeter. Not in Zaunmüller. "First book printed in Wyoming, one of possibly about fifty copies printed, of which only a handful survive. This is [the co-author] Lieut. William Starring's copy, with his holograph correction on page [31]. United States Army lieutenants Joseph Keyes Hyer and William Sylvanus Starring compiled this dictionary of the Sioux language with the aid of Indian interpreter Charles Guerreu. A note from Starring inside a copy at the Wisconsin Historical Society records the circumstances under which the work was compiled: 'Shut up all winter in a Rocky Mountain fort with many Indian scouts, Lieut. Hyer and I undertook to master their language. Accordingly eight of the most intelligent natives were brought into our quarters early every day. We had Webster unabridged on the table before us and made inquiry about every word in its order. Whenever we found any corresponding aboriginal expression we wrote it down, and before the close of our confinement had reached the end of our Webster.' Once the weather improved and Starring was able to travel, he went to Fort Lyon Colorado and thence to Fort Laramie in Wyoming, where this Dictionary was likely printed on a portable military press... Two settings of the work have been identified, presumably the result of the manner of the book's composition and production. In one setting, the last entry on the first page is 'Anecdote, Hoon-Kah'-kon' (as in this copy...); in the other setting the last entry reads 'Another, thing, Nah-kon'-toh-kay'" (bookseller's description: William Reese).

**1871:** [LILLY] *English-Dakota vocabulary = Wašicun iapi ieska wowapi*, edited by John P. Williamson. Santee Agency, Neb.: E.R. Pond, 1871. [6], 137 p.; 18 cm. Bound in half blue leather and blue marbled boards, purple and white decorated endpapers; leather and boards worn.

"This vocabulary has been compiled as a text book for Indian student [sic] desiring a knowledge of the English language.... The Vocabulary gives the Santee dialect. Persons being among the Yanktons or Tetonwan will notice quite a difference in the dialects, but not as great as a slight acquaintance might indicate [followed by a few examples]" (To the English Reader," pp. 1, 3).

**1881:** [LILLY] *Wicoie wowapi kin = the word book*, by Alfred L. Riggs ... New York: Published for the Dakota Mission, American Tract Society, 1881. 24 p.: ill.; 18 cm. In the Santee dialect according to Pilling. For the most part in two columns with pictures and matching vocabulary entries. With the inkstamp of the Santee Normal Training School.

In buff illustrated flexible boards with dark brown cloth shelfback; covers imperfect, loss of text, especially on lower cover. References: Pilling, J.C. Bib. of the Siouan languages, p. 60.

**1886:** [LILLYbm] *An English-Dakota school dictionary. Wašicun qa dakota ieska wowapi*, by John P[oa]ge Williamson [1835-1917]. Yankton Agency, D. T., Iapi Oaye Press, 1886. Modern black half-leather, lettered in gold, utilizing what appears to be the original gray marbled cloth and original endpapers. Pp. [6] / 2-144. First edition (enlarged and revised from Williamson's 1871 school vocabulary). Not in Zauhmüller. English-Dakota, pp. [1]-144. First dictionary of the Dakota language printed and published in the Dakota Territory. Williamson had taken on the task of revising and enlarging the English-Dakota portion of Rigg's dictionary, and this smaller dictionary for use in schools in the Dakota Territory seems to have been part of that undertaking.

"There are one hundred Dakota people who should learn to speak English to one English speaking person who should learn Dakota. In the preparation of this little vocabulary we have therefore kept in mind the advantages to be secured to the Indians, and especially the two thousand Dakota children now attending school.... The dozen score of White people engaged in Mission and School work, as Government Officials, or in the different avenues of trade among the Dakota Indians have not been overlooked. The student of the Dakota language will find this a useful hand-book.... In this vocabulary the Santee dialect has been placed first. The regular dialect changes of d and n into l for the Teton; and of hd into kd for the Yankton and gl for Teton are not noted. But a considerable number of other dialectical differences are given" (To the English Reader). Includes a preface in Dakota.

First published vocabulary of the Duber dialect of Indus Kohistani. Second copy: LILLYbm.

"The following linguistic material was collected, incidental to other ethnographic information, on a survey trip through Indus and Swat Kohistani, Swat State, July-August 1954. ...The vocabularies and brief texts were noted down on the spot, in the presence of several speakers of the language. Some sections of the vocabularies were later completed, for the sake of the comparative lists, with speakers of Torwali and Gawri visiting Pathan areas of Swat State.... All material was collected through the medium of Pashto, the lingua franca of the area...." (F. Barth, p. [119]). "F. Barth, when going to Swat in 1954 for ethno-sociological field-work among the Pathans, promised me, if possible, to bring back some information about Duberi, subsidiarily also about other Kohistani dialects. Sir Aurel Stein in 1926 took down some specimens of Duberi, but they were never published.... It is therefore valuable to get some material from Duberi... I have added some remarks on the vocabularies.... but our knowledge of Gawri-Bashkarik and Torwali, not to mention Maiya [Duberi], is very fragmentary, and many details must remain unexplained" (G. Morgenstierne, pp. 121, 123).

[**DARGWA**] The Dargwa or Dargin language is spoken by the Dargin people in the Russian republic Dagestan. It is the literary and main dialect of the dialect continuum constituting the Dargin languages. The four other languages in this dialect continuum (Kajtak, Kubachi, Itsari, and Chirag) are often considered variants of Dargwa. Ethnologue lists these under Dargwa, but recognizes that these may be different languages. Its people are Sunni Muslims. Dargwa uses a Cyrillic script. According to the

2002 Census, there are 429,347 speakers of Dargwa proper in Dagestan, 7,188 in neighbouring Kalmykia, 1,620 in Khanty–Mansi AO, 680 in Chechnya, and hundreds more in other parts of Russia (Wiki).

[**DARI**] Dari (Persian: *دري* [dæ'ri:]) or Dari Persian (Persian: *دري* *فارسي* [fɒ:rsije dæ'ri:]) is the variety of the Persian language spoken in Afghanistan. Dari is the term officially recognized and promoted since 1964 by the Afghan government for the Persian language. Hence, it is also known as Afghan Persian in many Western sources. As defined in the Constitution of Afghanistan, it is one of the two official languages of Afghanistan; the other is Pashto. Dari is the most widely spoken language in Afghanistan and the native language of approximately 25–50% of the population, serving as the country's lingua franca. The Iranian and Afghan types of Persian are mutually intelligible, with differences found primarily in the vocabulary and phonology (Wiki).

[**DATOOGA**] The Datooga language is a Nilotic language, or actually a dialect cluster, of the Southern group. It is spoken by the Datooga people of the Great Rift Valley of Tanzania.

The name is variously spelled Datog, Datoga, Tatoga, or Tatog. The Sukuma name Taturu is also sometimes used in English; the Swahili name Mang'ati comes from Maasai, where it means "enemy". However, it is not considered offensive to the Datooga, as there is a degree of pride in being the historic enemy of the Maasai and Mang'ati has become the standard name for the group in Swahili. In addition, numerous tribal and dialectal names may be found for the people or language as a whole. The Datooga have been claimed to be one of the least educated peoples in Tanzania, and there is almost no literacy in the language; literacy in Swahili has been reported to be very low in some communities. However, the Barabaig and Gisamjang dialects have been written and some work is being done on Asmjeeg (Wiki). Ethnologue: tcc. Alternate Names: Datog, Datoga, "Mangati" (pej.), Tatog, Tatoga, Taturu.

[**DAUR**] Daur is a Mongolic language consisting of four dialects: Amur Dau.r in the vicinity of Heihe, the Nonni Daur on the west side of the Nonni River from south of Qiqihaer up to the Morin Dawa Daur Autonomous Banner, Hailar Daur to the south-east of Hailar and far off in Xinjiang in the vicinity of Tacheng. There is no written standard in use, although a Pinyin-based orthography has been devised; instead the Daur make use of Mongolian or Chinese, as most speakers know these languages as well. During the time of the Qing dynasty, Daur has been written with the Manchu alphabet (Wiki).

[**DAWRO**] Gamo-Gofa-Dawro is an Afro-Asiatic language spoken in the Dawro, Gamo Gofa and Wolayita Zones of the Southern Nations, Nationalities, and People's Region in Ethiopia. Varieties are spoken by the Gamo, Gofa, Dawro; Blench (2006) and Ethnologue treat these as separate languages. Dialects of Dawro (Kullo-Konta) are Konta and Kucha. In 1992, Alemayehu Abebe collected a[n on-line] word-list of 322 entries for all three related dialects.

**Early 1850's:** *Dyak spelling book*, [by Rev. H. Barnstein]. [Banjarmasin: Rhenish Missionary Soc., not before 1835] 20 p.; 18 cm. Alphabet, syllabary and catechism.

The Rhenish Missionary Society was active in Borneo from 1835-1925 according to the World Council of Churches. They resolved to re-activate their press at Banjarmasin in 1851, while Rev. Barnstein was serving there. Cf. the *Missionary Herald*, vol. XLVII, p. 413-414. Lilly Library copy has ms. cover title "Dyak spelling book," and ms. inscription on verso "Prepared by the Rev. H. Barnstein of the Rhenish Missionary Society, aided by a converted Chinese at Banjarmasin [Banjarmasin]." In blank cream wrappers with ms. annotations.

This publication is more primitively printed than the 1853 Spelling Book of the Mission Press. Although it is similar in nature, it differs substantially in its presentation

of the alphabet and syllabary, and its remaining contents. Banjarmasin is on the opposite side of the island of Borneo from Sarawak, in the Indonesian portion.

**1853:** [LILLY] *A spelling book of the Dyak language as spoken by the Dyaks <Sabuyou> at Lundu, Samarahan, Grisek & Padungan.* Sarawak: Mission Press, 1853. 16, 4 p.; 17 cm. Title from English title supplied in ms. on front flyleaf. Printed alphabet and syllabary, followed by text entirely in Dayak. Imprint from colophon to pt. 1. Parts in gatherings of eight and two, paged separately. Issued together and separately? Pelajaran deri hal Allah = Instruction concerning God, includes the Ten Commandments on p. 2-3. Lilly Library copy has ms. pronunciation guide on verso of front flyleaf in same copperplate hand as supplied title. Lilly Library copy with inscription "Revd. Mr. Hawkins with Mr. Gomes' complts." and the bookplate of John Lawson. Lilly Library copy with a second copy of pt. 2. Side-sewn, in blank blue wrappers.

Little seems to be known about the early history of the Mission Press in Sarawak, which is one of two Malaysian states on the island of Borneo. The arrival in 1847 of Christian missionaries among the Dyaks, who were famous as headhunters, must soon have been followed by a small printing press. The Lilly has two early examples of the Mission Press, a twenty-page "Spelling Book of the Dyak Language" dated 1853, along with a Catechism in Dyak dated 1854.

The Lilly's copy bears a presentation inscription from the probable author, William Gomes. Of Sinhalese-Portuguese descent, Gomes arrived in Sarawak in 1852, worked in the Home School in Kuching, and served as missionary at Lundu from 1853 to 1867. The recipient, Rev. Hawkins, arrived in Sarawak in 1865, as the wife of Bishop McDougall later recorded in her memoirs:

"After the Banting expedition, the Bishop took Mr. Waterhouse to Lundu, and Mr. Hawkins, a missionary lately come out, went with them. They arrived on a Saturday. On Sunday there was a great gathering of Christian Dyaks: fifty-two people were confirmed, eighty received the Holy Communion, so that they were more than three hours in church, the Bishop preaching to them in Malay. On Monday Mr. Waterhouse and Mr. Hawkins paid a visit to a beautiful waterfall, about two miles from the town; and on Tuesday all the party, Mr. Gomes included, went in boats forty miles up the river Lundu, with three hundred Dyaks, to tuba fish."

No doubt Mr. Gomes took this opportunity to present his new colleague with a copy, already twelve years old, of the spelling book along with the Dyak catechism. This appears to be the earliest surviving example of the Mission Press in Sarawak and may be the earliest alphabet and syllabary of the language.

"The Dyak language, probably with dialectic variations, has yet to be reduced to writing. The small Mission Press of Sarawak has already produced an elementary book containing Dyak spelling lessons, and prayers in the Roman character. It seems that in this language the largest field remains for the exertions of the Missionaries" (*The Colonial Church chronicle, and missionary journal. July 1853- June 1854.* London, 1854).

"The first attempts to give an impression of the number and the diversity of the languages spoken on Borneo were undertaken by authors of compilations of mostly ethnographical literature. A large number of wordlists of languages mainly spoken in Sarawak and British North Borneo—collected by H. Brooke Low and others – have been reproduced by Ling Roth, but the latter was still unable to arrive at any arrangement or even a mere comparison of the wordlists he printed" (Uhlenbeck 1958: 4-5).

**[DAZAGA]** Daza (also known as Dazaga) is the language of the Daza people of northern Chad. The Daza are also known as the Gouran (Gorane) in Chad. Dazaga is spoken by about 380,000 people primarily in the Djurab desert region and the Tibesti Mountains of Chad (330,000 speakers) and in the eastern Niger, near N'guigmi and to the north (50,000 speakers). It is also spoken to a smaller extent in Libya and in Sudan where there is a community of 3000 speakers in Omdurman. There's also a small diaspora community working in Jeddah, Saudi Arabia. The two primary dialects of the Dazaga language are Daza and Kara, but there are several other mutually intelligible dialects including Kaga, Kanobo, Taruge and Azza as well. Dazaga is a Nilo-Saharan language and a member of the Western Saharan branch of the Saharan subgroup which also contains the Kanuri language, Kanembu language and Tebu languages (Wiki).

[**DEGEMA**] Dẹgẹma is a Nigerian Delta Edoid language spoken in two separate communities on Degema Island by about 22,000 people, according to 1991 census figures. Each community speaks a mutually-intelligible variety of Dẹgẹma, known by the names of the communities speaking them: the Usokun variety (spoken in Usokun-Degema) and the Degema Town (Atala) variety (spoken in Degema Town). The Dẹgẹma language is not also called "Atala" or "Udekaama", as stated in some publications. Atala is the alternative name for one of the Degema-speaking communities (Degema Town), and Udekaama is the name of a clan (which comprises Usokun-Degema and Degema Town) (Wiki).

[**DENE**] Chipewyan /tʃipə'waɪən/, ethnonym Dēnesūliné IPA: [ tènèsūliné], is the language spoken by the Chipewyan people of northwestern Canada. It is categorized as part of the Northern Athabaskan language family. Dēnesūliné has nearly 12,000 speakers in Canada, mostly in Saskatchewan, Alberta, Manitoba and the Northwest Territories. It has official status only in the Northwest Territories, alongside 8 other aboriginal languages: Cree, Dogrib, Gwich'in, Inuktitut, Inuinnaqtun, Inuvialuktun, North Slavey and South Slavey. Most Chipewyan people now use Dené and Dēnesūliné to refer to themselves as a people and to their language, respectively. English-Chutiya vocabulary, pp. 64-74. Brown was Assistant Commissioner, North Lakhimpur. This is the first extensive vocabulary of the language.

"The Deori Chutiyas are a small and secluded tribe in the Lakhimpur and Sibságar districts of Upper Assam....They number less than four thousand in all....The Chutiya language...may fairly claim to be the original language of Upper Assam....Very little appears to be known about the Chutiya language hitherto. Some time in the forties Colonel Dalton contributed a few words to the Asiatic Society's Journal; from which his acute genius discerned the connection with Kachari. It is the main object of this little work to confirm and establish that conclusion....A somewhat longer Deori Chutiya vocabulary was contributed to Hodgson's Essays ["Essays on Miscellaneous Indian Subjects"] by the Reverend Mr. Brown of Sibságar; but the usefulness of this is marred by its being mixed up with the vocabularies of a number of Nága dialects. Both these vocabularies are inaccurate, and even misleading, on such important points as numerals. Besides them, I am not aware that anything has been published about the Chutiya language. Indeed, it has recently been officially announced to be extinct by the author of the Assam Census Report for 1891. This is by no means the case; for, although the Deoris all speak Assamese fluently...still they all speak their own language; and are rather proud of it, and of the difficulty of learning it" (Introduction).

[**DHANGU-DJANGU**] Dhangu (Dhaṅu) is an Australian Aboriginal Yolṅu language, spoken in Australia's Northern Territory. The varieties of the two moieties are (a) Wan.gurri, Lamamirri and (b) Rirratjingu, Gaalpu, Ngayimil. There are two other Djangu (Djaṅu) dialects, Warramiri and Mandatja; dhangu and djangu are the words for "this" in the various dialects. **[DHARUK]** The Sydney language, also referred to as Dharug or Iyora (Eora), is an extinct Australian Aboriginal language of the Yuin–Kuric group that was spoken in the region of Sydney, New South Wales. It is the traditional language of the Darug and Eora peoples. The term Dharug, which can also be spelt Dharukk, Dharoog, Dharrag, and Dararrug, etc., came from the word for yam: *midyini*. Dharug is the root, or the *midyini*, of the languages of the Sydney basin. The Darug population was greatly diminished since the onset of colonization. During the 1990s and the new millennium some descendants of the Darug clans in Western Sydney have been making considerable efforts to revive Dharug as a spoken language. Today some modern Dharug speakers have given speeches in the Dharug language and younger members of the community visit schools and give demonstrations of spoken Dharug. Bower (2011) lists Dharuk and Iyora as separate languages.

Ethnologue lists Dharuk and Thurawal as separate languages. Here it appears that Thurawal is considered an "inland dialect" of Dharuk.

This is a collection and reorganization of four earlier published sources of the language, "which allows for easy access to an aboriginal dialect which was spoken over much of Sydney's western suburbs. In a few cases, the original English translations have been modified where common usage dictates" (Introduction). The primary sources were John Rowley's 1878 word list published in the *Journal of the Anthropological Institute of Great Britain and Ireland* under the heading "Language of the Aborigines of George's River, Cowpasture and Appin" [previously published in 1875 by William Ridley, see under **AUSTRALIAN ABORIGINAL LANGUAGES... **[DHIMAL]** Dhimal is a Sino-Tibetan language of Nepal and India spoken by about 20,000 people. There is an eastern and western dialect, which are separated by the Kankai River in Jhapa district, Mechi Zone, Nepal. Most people transcribe Dhimal into Devanagari and there are standard conventions for extra phonological distinctions (Wiki).

Ethnologue: dhi. Alternate Names: Dhemal.

Languages of the greater Himalayan region. Dhimal-English glossary, pp. 485-608. Includes bibliographical references (p. [609]-612).

"Dhimal can be divided into two mutually intelligible dialects separated geographically by the Kankāi or Kankāi Māi river. The western dialect is primarily spoken in about 40 villages in Moran and western Jhāpā districts, while the eastern dialect is only spoken in about ten villages in eastern Jhāpā and in a few communities in the adjoining areas of the Indian state of West Bengal. The speakers of the eastern dialect often refer to themselves hypocoristically as Malik (cf. Nepali mālik 'master, owner'). The western Dhimal speakers call themselves Dhimal or, in the plural, Dhemalai, and

their language dhemalai katha. In Nepali both they and their language are known as Dhimālī. Dhimal also has the distinction of being one of the few extant Tibeto-Burman speech communities indigenous to the lowlands of Nepal" (Introduction).

**[DHODIA]** Dhodia is a tribal Bhil language, which is still spoken in some parts of Gujarat, Daman and Diu, Dadra and Nagar Haveli, Madhya Pradesh, Maharashtra and Rajasthan (Wiki).

"All of the above meager evidence is neither satisfactory nor conclusive. This whole aspect of Dhodia dialect requires a thorough study by a philologist. We will therefore, leave it to future research" (p. 271).

**[DHOLUO]** The Luo dialect, Dholuo (pronounced [d̪ólúô]) or Nilotic Kavirondo (pejorative Colonial term), is the eponymous dialect of the Luo group of Nilotic languages, spoken by about 6 million Luo people of Kenya and Tanzania, who occupy parts of the eastern shore of Lake Victoria and areas to the south. It is used for broadcasts on KBC (Kenya Broadcasting Corporation, formerly the Voice of Kenya), Radio Ramogi, Radio Lake Victoria, Radio Lolwe, Radio Osienala as well as newspapers such as Otit Mach, Nam Dar etc. Dholuo is heavily used online in specially dedicated sites as well as in social media. Dholuo is mutually intelligible with Alur, Lango, Acholi and Adhola of Uganda. Dholuo and the aforementioned Uganda languages are all linguistically related to Luwo, Nuer, Bari, Jur chol of Sudan and Anuak of Ethiopia due to common ethnic origins of the larger Luo peoples who speak Luo languages. It is estimated that Dholuo has 90% lexical similarity with Lep Alur (Alur), 83% with Lep Achol (Acholi), 81% with Lango, and 93% with Dhopadhola (Adhola). However, these are often counted as separate languages despite common ethnic origins due to linguistic shift occasioned by geographical movement (Wiki).

Ethnologue considers Dholuo a separate language: luo. Alternate Names: Kavirondo Luo, Luo, Nilotic Kavirondo.

"I have used these lessons as a basis for Luo courses at the School of Oriental and African Studies for several years" (Acknowledgments). "DHO-LUO, 'the language of the Luo,' is spoken by the Luo, who according to the 1948 East African census number some 697550 persons living in the districts known for many years as Central and South Kavirondo, but now officially called Central and South Nyanza [in Kenya]....In the older literature the Luo appear under the name of Kavirondo or Nilotic Kavirondo, and

occasionally as Nyifwa or Nife... Dholuo belongs to the group of Nilotic languages which includes Shilluk, Acoli, Lano, Alur, and the language of the Jopadhola who are the nearest Nilotic neighbors of the Luo... In spite of the numbers and economic importance of the Luo, little work has been done on their ethnography. They formerly had no chiefs, and are mainly agricultural, but keep cattle, with a pastoral background. Fishing is also much practised, and wicker traps and canoes are used. The Luo provide a large proportion of the labour force of Kenya, as well as many recruits to the King's African Rifles and Police" (Introduction). [**DIDA**] Dida is a dialect cluster of the Kru family spoken in Ivory Coast. Ethnologue divides Dida into two groups, Yocoboué Dida (101,600 speakers in 1993) and Lakota Dida (93,800 speakers in 1993), which are only marginally mutually intelligible and best considered separate languages. Each is dialectally diverse: Yocoboué (Yokubwe) consists of the Lozoua (Lozwa) and Divo dialects (7,100 and 94,500 speakers), and Lakota the Lakota (Lákota), Abou (Abu), and Vata dialects. The prestige dialect is the Lozoua speech of the town of Guitry. Yocoboué is also known as Guitry, Yocoboue, Yokouboué, Gakpa, Goudou (Gudu), and Kagoué (Kagwe). Lakota is also known as Dieko, Gabo, Satro, Guébie (Gebye), Brabori, and Ziki (Wiki).

[**DIDO**] Tsez, also known as Dido (цезӀаг мец cezyas mec or цез мец cez mec in Tsez) is a Northeast Caucasian language with about 15,354 speakers (2002) spoken by the Tsez, a Muslim people in the mountainous Tsunta District of southwestern Dagestan in Russia. The name is said to derive from the Tsez word for "eagle", which is most likely a folk etymology. The name Dido is derived from the Georgian word დიდი (didi), meaning "big". Tsez lacks a literary tradition and is poorly represented in written form. Avar and Russian are used as literary languages locally, even in schools. However, attempts have been made to develop a stable orthography for the Tsez language as well as its relatives, mainly for the purpose of recording traditional folklore; thus, a Cyrillic script based on that of Avar is often used. Tsez is not taught in school and instead Avar is taught for the first five years and Russian afterwards. Tsez grammar was first analyzed by the Georgian linguist Davit Imnaishvili in 1963 (Wiki).

**[DINKA]** Dinka, or Thuɔŋjäŋ, is a Nilotic dialect cluster spoken by the Dinka people, the major ethnic group of South Sudan. There are five main varieties, Ngok, Rek, Ajaar, Dinka Leekrieth and Bor, which are distinct enough to require separate literary standards and thus to be considered separate languages. Jaang, Jieng or Moinyjieng is used as a general term to cover all Dinka languages. Rek is the standard and prestige dialect. The Dinka are found mainly along the Nile, specifically the west bank of the White Nile, a major tributary flowing north from Uganda, north and south of the Sudd marsh in

southwestern and south central Sudan in three provinces: Bahr el Ghazal, Upper Nile, and Southern Kurdufan (Wiki).

[6]).

"Why should one go on using the term 'Dinka' which has arisen probably from a misunderstanding, taking the name of a Chief 'Deng Kak' for the name of the tribe, and changing it into Denka or Dinka. This explanation of the word 'Dinka' was given me first by a student of the Secondary School, Rumbek and is surely the only right one. The Arabs of the Darfur and Southern Kordofan and all the tribes of the Bahr-el-Ghazal call them by their own name 'Jange' (these so called Dinkas call their tribe 'Jang' the Eastern tribes call themselves 'Jieng' ). Hence the title of this Dictionary" (Note, p. [7]). The puzzling reference to the title of the Dictionary, which simply uses Dinka, may indicate the author's original desire for a longer title like that of the revised edition listed below.

It was first known in the west via the Vagciriku, who had migrated from the main Vamanyo area and spoke Rucgiriku, a dialect of Rumanyo. The name Gciriku (Dciriku, Diriku) remains common in the literature, but within Namibia the name Rumanyo has been revived. [**DOGON, TORO SO**] The Dogon languages are a small, close-knit language family spoken by the Dogon of Mali, which are generally believed to belong to the larger Niger–Congo family. There are about 600,000 speakers of a dozen languages. They are tonal languages, most like Dogul having two tones, some like Donno So having three. The Dogon consider themselves a single ethnic group, but recognize that their languages are different. In Dogon cosmology, Dogon constitutes six of the twelve languages of the world (the others being Fulfulde, Mooré, Bambara, Bozo, and Tamasheq). The best-studied Dogon language is the escarpment language Toro So (Tɔrɔ sɔɔ) of Sanga, due to Marcel Griaule's studies there and because Toro So was selected as one of thirteen national languages of Mali (Wiki).

"The Dogon occupy the region called 'the cliffs of Bandiagara,' in the southwest part of the central Nigerian plateau. Their culture, well known to ethnologists, has been the subject of numerous important studies. However their language has never been systematically described up till now. The dictionary presented here does not entirely fill this lacuna, since it does not include all the dialects of Dogon... there are a total of around 220,000 Dogon...If our description does not deal with one of the major dialects, but with [one] spoken by about 30,000 persons, which however is the most important

numerically among those spoken on the plateau and along the cliffs, it is because of intensive ethnological work in this region by the Griaule missions in which we took part."

"Various studies have shown that among all the dialects of Dogon.... tòrò sò is the most widely understood by the greatest number of speakers. Moreover, this dialect has been the subject of a fine scholarly study (cf. the dictionary of Geneviève Calame-Griaule) and has been utilized by the Protestant Mission of Sangha since 1931 as the language of evangelism for the entire Dogon area. Thus tòrò sò has been selected for functional alphabetizing.... Enriched by a few borrowings from other dialects, it is becoming what we now call "standard Dogon" (p. 1, tr: BM).

[**DOGOSÉ**] Dogosé, or Doghose, is a Gur language of Burkina Faso. There are multiple spellings of this name, due to the difficulties of spelling the second consonant, [ɣ]. Dogosé is currently preferred, but traditional Doghose is found in much of the literature. Rarer spellings are (Doro) Doghosié, Dokhosié, Dorhossié, Dorhosye, Dorosie, Dorossé and, with a different suffix, Dokhobe, Dorobé. Dialect, which are close, are Klamaasise, Mesise, Lutise, Gbeyāse, Sukurase, Gbogorose (Wiki).

But over time the number of individual cards grew so large that I decided to make them available in book form to a broader circle of scholars of Turkic languages" (Vorwort, tr: BM).

[**DOMAAKI**] Domaakí, also known as Dumaki or Domaá, is a Dardic language spoken by a few hundred people living in Gilgit-Baltistan, Pakistan. In former times, Domaaki speakers traditionally worked as blacksmiths and musicians, but nowadays they are also engaged in a variety of other professions. In almost all places of their present settlement the Doma, who are all Muslims, have long since given up their original mother tongue in favour of the surrounding Dardic Shina. Only in the Nager and Hunza Valleys has Domaaki survived until the present day. Domaaki can be divided into two dialects: Nager-Domaaki and Hunza-Domaaki. Although there are considerable differences between these two varieties, they are not so severe as to prevent mutual intelligibility. Presently Domaaki counts less than 350 (mostly elderly) speakers – approx. 300 of them related to Hunza; around 40 related to Nager – and is thus to be considered a highly endangered language (Wiki).

The status of the Doma, or Bericho, in Hunza is definitely at the bottom of the social scale... As far as I know, the Doma accept their position as natural and find it satisfactory. I saw no signs of contempt for them on the part of the Burusho... The Dumaki vocabulary given here comprises about 611 words" (Introduction).

[**DONG (China)**] The Kam language, also known as Gam (autonym: lix Gaeml), or in Chinese, Dong or Tung-Chia, is the language of the Dong people. The Kam language can be divided into two major subdivisions, Southern Kam and Northern Kam (Yang & Edmondson 2008). Northern Kam displays more Chinese influence and lacks vowel length contrast, while Southern Kam is more conservative. Language varieties closely related to or part of Kam include Cao Miao and Naxi Yao. A northern Pinghua variety called Bendihua, spoken in Tongdao County, Hunan, has also been significantly influenced by Kam (Wiki).

Ethnologue distinguishes three Kam varieties as separate but closely related languages: 1) Northern Dong: doc. Alternate Names: Gam, Kam, Tong, Tung, Tung-Chia; 2) Southern Dong: kmc. Alternate Names: Gam, Kam, Tong, Tung, Tung-Chia; and 3) Cao Miao: cov. Alternate Names: Grass Miao, Mjiuniang, Sanjiang Miao.

[**DRAVIDIAN LANGUAGES**] The Dravidian languages are a language family spoken mainly in southern India and parts of eastern and central India, as well as in northeastern Sri Lanka, Pakistan, Nepal, Bangladesh and Bhutan, and overseas in other countries such as Malaysia and Singapore. The Dravidian languages with the most speakers are Telugu, Tamil, Kannada and Malayalam. There are also small groups of Dravidian-speaking

scheduled tribes, who live beyond the mainstream communities, such as the Kurukh and Gond tribes. It is often considered that Dravidian languages are native to India. Epigraphically the Dravidian languages have been attested since the 2nd century BCE. Only two Dravidian languages are exclusively spoken outside India: Brahui in Pakistan and Dhangar, a dialect of Kurukh, in Nepal (Wiki).

[**DREHU**] Drehu ([dɛhu]; also known as Dehu, Lifou, Lifu, qene drehu) is an Austronesian language mostly spoken on Lifou Island, Loyalty Islands, New Caledonia.

It has about twelve-thousand fluent speakers and the status of a French regional language. This status means that pupils can take it as an optional topic for the baccalauréat in New Caledonia itself or French mainland. It has been also taught at the Institut National des Langues et Civilisations Orientales (INALCO) in Paris since 1973 and at the University of New Caledonia since 2000. As for other Kanak languages, Drehu is now regulated by the "Académie des langues kanak", officially founded in 2007. There is also a respective register in Drehu, called qene miny. In time past, this was used to speak to the chiefs (joxu). Today very few people still know and practice this language (Wiki).

This is the first dictionary of the language of the chiefs.

"There exists on Lifou Island, along with Dehu, the language spoken by the population as a whole, a special language called 'Miny' which Europeans refer to as the "Language of the Chiefs" for, depending upon whether one is speaking to a Chief or to an ordinary person, one utilizes a language with a certain vocabulary" (tr: BM). What distinguishes this "language" from other ceremonial languages is that it is mutually unintelligible with Dehu, and thus may be considered, Lenormand suggests, a separate language of its own.

[**DUALA**] Douala (also spelled "Duala Diwala, Dwela, Dualla, and Dwala) is a dialect cluster spoken by the Duala and Mungo peoples of Cameroon. Douala belongs to the Bantu language family, in a subgroup called Sawabantu. Maho (2009) treats Douala as a cluster of five languages: Douala proper, Bodiman, Oli (Ewodi, Wuri), Pongo, and Mongo. He also notes a Douala-based pidgin named Jo (Wiki).

[**DUNGAN**] The Dungan language /'dɒŋɡɑ:n/ is a Sinitic language spoken by the Dungan of Central Asia, an ethnic group related to the Hui people of China. The Dungan people of Kyrgyzstan and Kazakhstan (with smaller groups living in other post-Soviet states) are the descendants of several groups of the Hui people that migrated to the region in the 1870s and the 1880s after the defeat of the Dungan revolt in Northwestern China. As the Dungans in the Russian Empire, and even more so in the Soviet Union, were isolated from China, their language experienced significant influence from the Russian and the Turkic languages of their neighbors. In the Soviet Union, a written standard of the Dungan language was developed, based on a Gansu dialect, rather than the Beijing base of Standard Chinese. The language was used in the schools in Dungan villages. In the Soviet time there were several school textbooks published for studying the Dungan language, a three volume Russian–Dungan dictionary (14,000 words) [see below], the Dungan–Russian dictionary, linguistics monographs on the language and books in Dungan. The first Dungan-language newspaper was established in 1932; it continues publication today in weekly form (Wiki).

[**DURA**] Dura is a recently extinct language of Nepal. It has been classified in the West Bodish branch of Tibetan languages, though more recent work separates it out as an independent branch of Sino-Tibetan. Many of the Dura have switched to speaking Nepali, and the Dura language has sometimes been thought to be extinct. Some of the people who have switched to Nepali for their daily speech still use Dura only for saying prayers. The ethnic Dura people mostly live in the Lamjung District, with some in the neighboring Tanahu District, of the Gandaki Zone of central Nepal. They mostly live on farms in hilly country. Different recent census counts have reported the number of Dura people anywhere from 3,397 to 5,676. The Himalayan Languages Project is working on recording additional knowledge of Dura. Around 1,500 words and 250 sentences in Dura

have been recorded. The last known speaker of the language is the 82-year-old Soma Devi Dura (Wiki).

Summary: In 'The Dura Language: Grammar & Phylogeny' Nicolas Schorer provides the definite descriptive account of this hitherto poorly documented language of Lamjung, Nepal. The Dura language is effectively extinct, although attempts at revival may be undertaken by well-intentioned members of Dura ethnicity. On the basis of a comprehensive study and analysis of all of the extant Dura language material, the book outlines the phonology, nominal and verbal morphology, lexical and syntactic properties as well as the phylogenetic position of the language in unprecedented detail. The result of the phylogenetic inquiry will help explain some of the sociocultural realities associated with the Dura community in Nepal and is a significant contribution to our understanding of the linguistic landscape of the Himalayas. [**DYIRBAL**] Dyirbal /'dʒɜːrbəl/ (also Djirubal) is an Australian Aboriginal language spoken in northeast Queensland by about 29 speakers of the Dyirbal tribe. It is a member of the small Dyirbalic branch of the Pama–Nyungan family. It possesses many outstanding features that have made it well known among linguists. In the years since the Dyirbal grammar by Robert Dixon was published in 1972, Dyirbal has steadily gotten closer to extinction as younger community members have failed to learn it (Wiki).

Ethnologue: dbl. Alternate Names: Djirubal.

"Since this vocabulary is intended solely to facilitate understanding of the grammatical examples and texts, it has not been thought appropriate to give a full statement of the 'meaning' of each item. Instead, entries are mostly confined to one or two English words that give some indication of the most 'central' meaning of the Dzirbal word" (p. 39).

"Further work on the lexicon, and its semantic structure, with particular reference to the special 'mother-in-law language'... is proceeding with a view to the eventual publication of a comprehensive dictionary-thesaurus of Dzirbal" (Preface).

**[DZONGKHA]** Dzongkha (Wylie: rdzong-kha, Roman Dzongkha: Dzongkha), occasionally Ngalopkha ("language of the Ngalop people"), is the national language of Bhutan. The word "dzongkha" means the language (kha) spoken in the dzong "fortresses"—the fortress-like dzong architecture characterises monasteries established throughout Bhutan by its unifier, Ngawang Namgyal, 1st Zhabdrung Rinpoche, in the 17th century (Wiki).

[**EBLAITE**] Eblaite /'ɛblə.ait/ (also known as Eblan ISO 639-3) is an extinct Semitic language which was used during the third millennium BCE by the East Semitic speaking populations of Northern Syria. It was named after the ancient city of Ebla, in western modern Syria. Variants of the language were also spoken in Mari and Nagar. According to Cyrus H. Gordon, although scribes might have spoken it sometimes, Eblaite was probably not spoken much, being rather a written lingua franca with East and West Semitic features. The language is known from about 15,000 tablets[5] written with cuneiform script which have been found since the 1970s, mostly in the ruins of the city of Ebla (Wiki).

This extinct language is not included in Ethnologue.

[**EDO**] Edo /'ɛdou/ (with diacritics, Èdó; also called Bini (Benin)) is a Volta–Niger language spoken primarily in Edo State, Nigeria. It was and remains the primary language of the Edo people of Igodomigodo. The Igodomigodo kingdom was renamed Edo by Oba Eweka, after which the Edos refer to themselves as Oviedo 'child of Edo'. The Edo capital was Ubinu, known as Benin City to the Portuguese who first heard about it from the coastal Itsekiri, who pronounced it this way; from this the kingdom came to be known as the Benin Empire in the West (Wiki).

Ethnologue: bin. Alternate Names: Addo, Benin, Bini, Oviedo, Ovioba.

"Dr. R.E. Bradbury['s]...monograph ...*The Benin Kingdom and the Edo-speaking Peoples of South-Western Nigeria*, is the standard reference in the field. When we learnt, therefore, that he had a number of unpublished wordlists of Edo languages, including particularly some on the Northern languages in Akoko-Edo (then part of Afenmai) Division, we asked his permission to publish them in RESEARCH NOTES. He agreed, although he stressed that they were only rough field-notes and undoubtedly contained errors. As, however, not even the most fragmentary data has yet been published on some of these languages, wordlists such as these are of great value in beginning to delimit the relationships between the languages in an extremely complex area" (Introduction, Kay Williamson). [**EFATE, NORTH and SOUTH**] Efatese is an artificial mixed language of Efate Island in Vanuatu. There are half a dozen languages spoken on Efate, of which the languages of North Efate and South Efate are not particularly closely related, and when missionary activity began on the island, at Port Havannah in the northwest of the island, a mixture of the target languages was invented for evangelism and scripture, in preference to promoting one indigenous language over the others. North Efate, also known as Nakanamanga or Nguna, is an Oceanic language spoken on the northern area of Efate in Vanuatu, as well as on a number of islands off the northern coast. The South Efate language is a Nuclear Southern Oceanic language of the Malayo-Polynesian language family, spoken on the island of Efate in central Vanuatu. As of 2005, there are

approximately 6,000 speakers who live in coastal villages from Pango to Eton. The [South Efate] language's grammar has been described by Nick Thieberger, who is working on a book of stories and dictionary of the language (Wiki).

"The following work gives, in the first place, a Dictionary of the language of Efate, New Hebrides, as complete as I can make it after upwards of twenty-one years' constant study and use of the language in performance of my duty as a missionary stationed on the island of Efate.... I may explain here that, as no Arabic or Ethiopic type are in the establishment where this work is printed, I have been reluctantly obliged to re-write all the Arabic and other Semitic words in Roman characters. For this reason I have not printed at all, as I originally intended, the second part of the Dictionary. or Asiatic-Oceanic. Whether the complete work, with proper type, will appear hereafter will largely depend on the reception accorded to the present volume" (Preface).

Second edition revised. The first edition appeared in 1939. Zaunmüller, col. 93 (dated 1952-53, which is the third, revised edition); Murphy 55: 558,559. Hendrix 493. "The crying need in Nigeria today is to provide some modicum of education for the mass of its twenty million inhabitants. This can only be achieved through a study of the local languages in order to facilitate their use as 'media' of instruction in the schools. Mr.

Adams is to be congratulated on having tackled this task in regard to the Efik language" (E.G. Morris, Foreword). "The earliest known vocabulary of the Efik language was compiled by Messrs. Waddell & Edgerley and appeared in 1849. Dr. Goldie's great work came later, but it has been out of print for a long time... The appearance of a considerable amount of secular literature during recent years made it increasingly obvious that the need for a new vocabulary was urgent, and a recommendation to that effect was made at a meeting held in Calabar in 1929... The basis of the book is the Efik spoken in Calabar... The new vocabulary is appearing in two parts, English-Efik and Efik-English, and each part may be had separately or combined in one volume" (H.W. McCowan, Introduction). This set from the library of the linguist William Bascom, Director of the Museum of Anthropology at Berkeley, with his signature. [**EGYPTIAN**] The Egyptian language was spoken in ancient Egypt and was a branch of the Afroasiatic languages. Its earliest known complete written sentence has been dated to about 2690 BCE, which makes it one of the oldest recorded languages known, along with Sumerian. It was spoken until the late 17th century, in the form of Coptic. The national language of modern Egypt is Egyptian Arabic, which gradually replaced Coptic as the vernacular language in the centuries after the Muslim conquest of Egypt. Coptic is still used as the liturgical language of the Coptic Orthodox Church of Alexandria and has several hundred fluent speakers today.

Scholars group the Egyptian language into six major chronological divisions:

- 1) Archaic Egyptian language (before 2600 BCE, the language of the Early Dynastic Period).
- 2) Old Egyptian language (2686 – 2181 BCE, the language of the Old Kingdom).
- 3) Middle Egyptian language (2055 – 1650 BCE), characterizing Middle Kingdom (2055 – 1650 BCE but enduring through the early 18th Dynasty until the Amarna Period (1353 BCE) and continuing on as a literary language into the 4th century CE).
- 4) Late Egyptian language (1353 – 700 BCE, characterising the Third Intermediate Period (1069 – 700 BCE), but starting earlier, with the Amarna Period).
- 5) Demotic (7th century BCE – 5th century CE, Late Period through Roman Egypt).
- 6) Coptic (1st – 17th centuries CE, early Roman Egypt to the early modern period).

Ethnologue does not include Egyptian prior to Coptic.

"This book grew out of our work on the great Dictionary [of ancient Egyptian] under preparation by the German Academy [published in 13 vols., 1926-1931]. Since this work has progressed as far as *śr*, three-fourths of the entries here may be considered as thoroughly revised. Of course we have also gone through the the remaing material for the rest. The *Handwörterbuch* includes the old, middle and late Egyptian, so that the only thing missing is the inscriptions of the Greco-Roman era, which is a subject unto itself.... Since this book had to be produced by hand, we were able to correct the false forms of many hieroglyphs that crept into earlier type-set versions" (Vorwort, tr: BM).

The first edition is listed on the verso of the title page as 1971.

"Some of the deepest emotions are centred around children in most cultures, and many of these names show how the parents express their own attitudes and feelings at the time when a child is born. A study of these names therefore gives us an insight into the culture of the Ekpeye people" (Foreword by Kay Williamson, dated May 1971).

[**EMAE**] The language of "Emae" is a language spoken in the villages of "Makata" and "Natanga" on the Three Hills Island in the country of Vanuatu. Of the hundred or so native languages of Vanuatu, including "Emae", not a single one is considered an official language of Vanuatu. The official languages of Vanuatu are "Bislama", French and English. Most of the "Emae" people speak "Emae", North Efate ("Nguna"), English, French and "Bislama". Less than 1% of the people who speak "Emae" as their native language are literate in the language, while 50% to 70% are literate in their second language, whether it be "Nguna", English, French or Bislama. Today, only around 400 people speak "Emae", mainly in "Makata" and "Natanga", 250 more than in the 1960s - around 150 speakers. According to Lewis, "Emae" is still underused by many of the people in the area, but 50% of children know and speak "Emae" (2014), and children speaking "Emae" will help the language thrive (Wiki).

Ray has given it any attention and his use of it was limited to brief vocabularies [S.H. Ray, "The Polynesian Languages of Melanesia", in *Anthropos* 14-15 (1919-1920)]. One small hymnal in the language was published in 1912... The material for the present outline has been gathered from a number of sources... [and] supplemented by the author himself during his visit to the New Hebrides in 1958" (Introduction).

[**ENETS**] Enets is a Samoyedic language spoken by the Enets people along the lower Yenisei River in Krasnoyarsk Krai, Russia. There are two distinct dialects, Forest (Bai) Enets and Tundra (Madu or Somatu) Enets, which may be considered separate languages.

There are only about forty speakers in total, with slightly more speaking Tundra Enets. Most speakers are middle-aged or older, and all speak Russian as a second language. It is closely related to Nenets, of which it was formerly regarded as a dialect, and to Nganasan. Although an alphabet was developed for the Enets language at the end of the 1980s, it has yet to be made official. In spite of this, it has been used to produce three books, including a Russian-Enets student dictionary. Forest Enets is the smaller of the two Enets dialects. In the winter of 2006/2007, approximately 35 people spoke it (6 in Dudinka, 20 in Potapova and 10 in Tukhard, the youngest of whom was born in 1962 and the oldest in 1945). Many of these speakers are trilingual, with competence in Forest Enets, Tundra Nenets and Russian, preferring to speak Tundra Nenets (Wiki).

Ethnologue considers Enets as two separate languages: 1) Forest Enets (enf: alternate names: Bay Enets, Pe-Bae, Yenisei Samoyedic), and 2) Tundra Enets (enh: alternate names: Madu, Somatu, Yenisei Samoyedic).

[ENGGANO] The Enggano language, or Engganese, is the poorly known language of Enggano Island off the southwestern coast of Sumatra. It appears to be an Austronesian language, though much of the basic vocabulary cannot be connected to other Austronesian languages. "Enggano is the language of the original inhabitants of the island of the same name, lying to the West of Sumatra. The material for the present dictionary... was collected by Hans Kähler from 10 July to 31 December 1937 on the island. At that time there were only about 200 natives who still spoke the language as their mother tongue. According to a native informant [in 1986]...there were six villages with around 2,000 inhabitants half of whom speak Enggano; of course differing markedly from the language as documented by Hans Kähler. Enggano may be a member of the West Malayo-Polynesian branch of the Austronesian family of languages" (Foreword, tr: BM).

**[ESKIMO-ALEUT LANGUAGES: POLYGLOT]** Eskimo–Aleut or Eskaleut is a language family native to Alaska, the Canadian Arctic, Nunavik, Nunatsiavut, Greenland, and the Chukchi Peninsula on the eastern tip of Siberia. It is also known as Eskaleutian, Eskaleutic, or Inuit–Yupik–Unangan. The Eskimo–Aleut language family is divided into two branches, the Eskimo languages and the Aleut language. The Aleut language family consists of a single language, Aleut, spoken in the Aleutian Islands and the Pribilof Islands. Aleut is divided into several dialects. The Eskimo languages are divided into two branches, the Yupik languages, spoken in western and southwestern Alaska and in easternmost Siberia, and the Inuit languages, spoken in northern Alaska, in Canada, and in Greenland. Inuit, which covers a huge range of territory, is divided into several varieties. The Alaska Native Language Center believes that the common ancestral language of the Eskimo languages and of Aleut divided into the Eskimo and Aleut branches at least 4000 years ago. The Eskimo language family divided into the Yupik and Inuit branches around 1000 years ago (Wiki).

[**ESPERANTO**] Esperanto (/ˌɛspəˈræntoo/ or /-ˈrɑː-/; [espeˈranto]) is a constructed international auxiliary language. It is the most widely spoken constructed language in the world. Its name derives from Doktoro Esperanto ("Esperanto" translates as "one who hopes"), the pseudonym under which physician L. L. Zamenhof published the first book detailing Esperanto, the *Unua Libro*, on 26 July 1887. Zamenhof's goal was to create an easy-to-learn, politically neutral language that would transcend nationality and foster peace and international understanding between people with different languages. Up to 2,000,000 people worldwide, to varying degrees, speak Esperanto, including perhaps 2,000 native speakers [this is disputed] who learned Esperanto from birth. Esperanto is seen by many of its speakers as an alternative or addition to the growing use of English throughout the world, offering a language that is easier to learn than English (Wiki).

English-Esperanto, pp. [1]-547. An English-Esperanto dictionary was published in 1905 by John O'Connor in London (see above), and an Esperanto-English dictionary in that same year and place by Achille Motteau.

"In the following pages the Esperanto student will find a large addition to his earlier equipment of word-material--not because Esperanto was an incomplete system of language, but simply because the British Esperanto lexicographers had not hitherto incorporated a great number of words which are entitled by their status of internationality to take their place here" (Introduction).

[ESSELEN] Esselen was the language of the tiny Esselen (or self-designated Huelel) Nation, which aboriginally occupied the mountainous Central Coast of California, immediately south of Monterey (Shaul 1995). It was probably a language isolate, though has been included as a part of the hypothetical Hokan proposal. Esselen may have been the first California language to become extinct. Although it was spoken by many of the early converts at Mission Carmel, its use rapidly declined during the Hispanic period. Very little information on the vocabulary and grammar of Esselen was preserved beyond a few word lists and a short bilingual catechism (for a summary see Mithun 1999:411–413 and Golla 2011:114). By the beginning of the 20th century the only data on Esselen

that investigators such as Kroeber and Harrington could collect were a few words remembered by speakers of other Indian languages in the area (Wiki).

**[ESTONIAN, STANDARD]** Estonian (eesti keel ['e:sti 'ke:l] ) is the official language of Estonia, spoken natively by about 922,000 people in Estonia and 160,000 outside Estonia. It belongs to the Finnic branch of the Uralic language family. The two different historical Estonian languages (sometimes considered dialects), the North and South Estonian languages, are based on the ancestors of modern Estonians' migration into the territory of Estonia in at least two different waves, both groups speaking considerably different Finnic vernaculars. Modern standard Estonian has evolved on the basis of the dialects of Northern Estonia. The Estonian dialects are divided into two groups – the northern and southern dialects, historically associated with the cities of Tallinn in the north and Tartu in the south, in addition to a distinct kirderanniku dialect, Northeastern coastal Estonian. The northern group consists of the keskmurre or central dialect that is also the basis for the standard language, the läänemurre or western dialect, roughly corresponding to Lääne County and Pärnu County, the saarte murre (islands') dialect of Saaremaa and Hiiumaa and the idamurre or eastern dialect on the northwestern shore of Lake Peipus. South Estonian consists of the Tartu, Mulgi, Võro and Seto varieties. These are sometimes considered either variants of South Estonian or separate languages altogether. Also, Seto and Võro distinguish themselves from each other less by language and more by their culture and their respective Christian confession (Wiki).

Ethnologue: ekk. Alternate Names: Eesti. Autonym: Eesti Kirjakeel. Ethnologue lists Estonian as a macrolanguage (est) that includes Standard Estonian (ekk) and Võro (vro).

[**ETCHEMIN**] Etchemin was a language of the Algonquian language family, spoken in early colonial times on the coast of Maine. The word Etchemin is thought to be either French alteration of an Algonquian word for "canoe" or a translation of "Skidijn" the native word for people in use by the inhabitants of the St. John, Passamaquoddy and St. Croix Rivers. The only known record of the Etchemin language is a list of the numbers from one to ten recorded by Marc Lescarbot in the early 17th century and published in his book *The History of New France* (1609). The numerals in the list match those of Malecite-Passamaquoddy, Eastern Abenaki, as well as languages of southern New England such as Wampanoag, but as a set they do not match any other Algonquian language. The Etchemin language disappeared not long after Lescarbot's visit, and it is unknown what became of the tribe. All other language records called 'Etchemin', under more detailed analysis, appear to be the neighboring Malecite-Passamaquoddy language (Wiki).

Ethnologue does not list Etchemin.

[**ETHIOPIAN LANGUAGES: POLYGLOT**] There are 88 individual languages of Ethiopia according to Ethnologue, with the 1994 Ethiopian census indicating that some 77 tongues were spoken locally. Most of these languages belong to the Afroasiatic family (Semitic and Cushitic languages; Omotic languages are also spoken, though their classification is uncertain). Additionally, Nilo-Saharan languages are spoken by the nation's minority Nilotic peoples. Of the languages spoken in Ethiopia, 86 are living and 2 are extinct. 41 of the living languages are institutional, 14 are developing, 18 are vigorous, 8 are in danger of extinction, and 5 are near extinction (Wiki).

"Jules Borelli, a French explorer, started an expedition to Shoa from the Gulf of Tadjura in 1886. He went to Ankober, then on to Antotto. Borelli had to stay in Shoa for several months as he was not given permission to continue his journey. In May 1887 he visited Harrar in the company of Arthur Rimbaud. In November 1887 he explored Djimma and the upper Omo region and in May 1888 he reached the kingdom of Kullo. Borelli gathered much news on the Ethiopian tribes and made a decisive contribution to the geography from the Gulf of Tadjura to Kullo and from Zeila to the Bonga region. His news on the course of the Omo was particularly important" (bookseller's description: Iskandar Books).

[EVEN] The Even language /er'ven/, also known as Lamut, Ewen, Eben, Orich, Ilqan (Russian: Эвэнский язык, earlier also Ламутский язык), is a Tungusic language spoken by the Evens in Siberia. It is spoken by widely scattered communities of reindeer herders

from Kamchatka and the Sea of Okhotsk in the east to the River Lena in the west, and from the Arctic coast in the north to the River Aldan in the south. Even is an endangered language, with only some 5,700 speakers (Russian census, 2010). Dialects are Arman, Indigirka, Kamchatka, Kolyma-Omolon, Okhotsk, Ola, Tompon, Upper Kolyma, Sakkyryr, Lamunkhin.

Ethnologue: eve. Alternate Names: Eben, Ewen, Ilqan, Lamut, Orich.

Not in Zauhmüller. (listing earliest Even dictionary as 1936 and the earliest Koryak dictionary as 1939). Russian-Even, pp. [7]-20, and Russian-Koryak, pp. [23]-55.

Benzing (see below) states that the arctic tribes of the [former] Soviet Union have only developed written languages and the beginning of a national literature since 1930. This small pamphlet appears to be the earliest separately printed vocabularies of the two languages, and certainly one of the earliest documents involving the language actually printed in Kamchatka.

Akademie der Wissenschaften und der Literatur: Veröffentlichung der Orientalischen Kommission, Band VI. Zauhmüller, col. 233 ("Hervorragendes Werk"). Even-German vocabulary, pp. [140]-248. Benzing prefers to refer to the language as 'Lamut' to avoid the possible confusion of the two languages, Even and Evenki. Benzing bases his study on the Ola dialect, since the Lamuts from that area are the most compactly settled and show the highest degree of economic development. They are also centrally located within the Even language area.

[**EVENKI**] Evenki /er'venki/, formerly known as Tungus, or (Solon) is the largest member of the northern group of Tungusic languages, a group which also includes Even, Negidal, and (the more closely related) Oroqen language. The name is sometimes wrongly given as "Evenks". It is spoken by Evenks in Russia, and China. The Evenki language varies considerably among its dialects which are divided into three large groups: the northern, the southern and the eastern dialects. These are further divided into minor dialects. A written language was created for Evenkis in the Soviet Union in 1931, first using a Latin alphabet, and from 1937 a Cyrillic one. In China, Evenki is written experimentally in the Mongolian script. The language is generally considered endangered (Wiki).

Knüsli. Second copy: IUW.

"This book is the new reworking of my *Wörterbuch der Éwé-Sprache* that appeared in 1905. In the intervening years, research on the Éwé language has progressed, both through repeated investigations with the help of native speakers and the appearance of a growing indigenous literature that has revealed the riches of the language in terms of its grammatical forms, its syntactic structures, its vocabulary and as a living repository of tribal culture. My study of the Éwé language stretches over almost half a century" (Foreword, tr BM).

"Since Westermann's monumental works, very little has been done in the area of dictionary making. Knowing very well that language is dynamic, it is obvious that new vocabulary has entered the language since that publication and there is the need to capture these new vocabulary and usages.... It was not until 1999 that we took advantage of the Legon-Trondheim Linguistics Project to initiate this project, aimed at upgrading Westermann's work and adding new vocabulary that has entered the language since then.... This dictionary, as the name suggests, is an encyclopedic dictionary. It therefore contains all kinds of information. It is bilingual in the sense that it provides English glosses or translation for the Ewe entries. Being a dictionary of health, it provides information about each item" (pp. 3-4).

[EYAK] Eyak is an extinct Na-Dené language historically spoken by the Eyak people, indigenous to south-central Alaska, near the mouth of the Copper River. The name Eyak comes from a Chugach Sugpiaq name (Igya'aq) for an Eyak village at the mouth of the Eyak River. It was the first Alaskan language to go extinct in recent history. The closest relatives of Eyak are the Athabaskan languages. The Eyak–Athabaskan group forms a basic division of the Na-Dené language family, the other being Tlingit. Numerous Tlingit

place names along the Gulf Coast are derived from names in Eyak; they have obscure or even nonsensical meanings in Tlingit, but oral tradition has maintained many Eyak etymologies. The existence of Eyak-derived Tlingit names along most of the coast towards southeast Alaska is strong evidence that the prehistoric range of Eyak was once far greater than it was at the time of European contact. This confirms both Tlingit and Eyak oral histories of migration throughout the region (Wiki).

[**FANAGALO**] Fanagalo is a pidgin (simplified language) based primarily on Zulu, with English and a small Afrikaans input. It is used as a lingua franca, mainly in the gold, diamond, coal and copper mining industries in South Africa and to a lesser extent in the Democratic Republic of the Congo, Namibia, Zambia, and Zimbabwe. Although it is used as a second language only, the number of speakers was estimated as "several hundred thousand" in 1975. As with India, once the British went, English became the lingua franca enabling different tribes in the same country to communicate with each other, and Fanagalo use declined. Fanagalo is the only Zulu-based pidgin language, and is a rare example of a pidgin based on an indigenous language rather than on the language of a colonising or trading power. The variety in Zimbabwe (Rhodesia) is known as Chilapalapa and is influenced by Shona, while the variety in Zambia (Northern Rhodesia), called Cikabanga (pronounced, and sometimes spelt, Chikabanga), is influenced by Bemba (Wiki).

"The only apology for perpetuating the wretched 'kitchen kafir' as it is called, is— Since the miner has to deal with so many different tribes of Africa, who themselves cannot speak the orthodox Zulu language, but can only make them selves understood, and be made to understand, through the medium of this jargon, this little pamphlet has been so designed that the miner for utility's sake can learn therefrom phrases that will be generally understood by all natives.... Immediately below the orthodox Zulu phrase the corrupt phrase as spoken on the mines is given in italics" (Introduction)

Second edition, enlarged and revised, **1938**: [LILLYbm] *Miners' Companion in English, Afrikaans, Sesuto and Mine Kaffir for the use of miners on the gold mines of the Witwatersrand and extensions*, issued by the Prevention of Accidents Committee of the Rand Mutual Assurance Co., Ltd, 1938.

Original maroon wrappers, lettered and decorated in black. Pp. [2] 1 2-114. Second edition, enlarged and revised. Reinecke 110.18 (listing only first edition of 1920, unseen). Not in Zaubmüller. English-Afrikaans, Sesuto-Mine Kaffir [Fanagolo] vocabulary, pp. 5-57, arranged in four columns. With common phrases from the mine in all four languages, pp. 58-114.

"The first edition was published in 1920, in which Zulu and Mine Kaffir words and the equivalents of a number of mine phrases were given. Owing to a change of mine methods made since the first issue, some of the phrases then included in the book were found to be out of date and the addition of phrases having reference to new systems and machines, such for instance as, scraping and scraper hoists, scatter piles, etc., has become necessary. With the cooperation and assistance of the Association of Mine Managers this new and completely revised edition has been prepared. In order to make the book more useful, an Afrikaans vocabulary and equivalent of mining phrases have been added, and Sesuto has been substituted for the little used Zulu. 'Mine Kaffir' used in this book is a dialect understood by the majority of natives on the Witwatersrand Gold Mines. Each word in the vocabulary and each phrase in 'Mine Kaffir' has been carefully considered by a Sub-Committee, which included a number of Boss Boys" (Preface, dated January, 1938).

"The first edition, published in 1920, was supervised by the late Mr. H. M. Taberer. This edition laid the foundation for subsequent issues. In 1938 the book was revised by Mr. D. G. P. Clifford. These two issues have served a very useful purpose in assisting European and Native mine workers to understand each other: to give and receive instructions in carrying out work on the mine and to issue warnings relating to dangerous practices. The *linga franca* now in common use on the mines is called *Fanakalo* (meaning 'like this') which stemmed from a patois developed out of the many languages

used by the various tribes working on the mines...Fanakalo is of great assistance to the Industry; particularly so when training Boss Boys and new boys of our Native Labour force....This edition has been revised at the request of the Prevention of Accidents Committee...*It is not intended that Fanakalo should supersede the pure Native languages; these are always used on ceremonial and other occasions*...The usefulness of Fanakalo has, however, been definitely established for the purposes indicated above" (Preface, A. "The ordinary white man in South Africa, who speaks good Zulu, is inclined to laugh at Kitchen-Kafir; but good Zulu-speaking white men are becoming scarcer every year, and those who are left are every day being brought more into contact with natives who do not understand their Zulu, but who do understand Kitchen-Kafir.... The author, therefore, feels that a time has come when a Kitchen-Kafir vocabulary should be of use, and offers this little book as the result of his notes" (Preface).

"Although a couple of vocabularies giving the Fanagalo equivalents of some English words have appeared, there has been no attempt to compile a comprehensive dictionary. This two-way dictionary ... is therefore a pioneering effort. The list of words is confined to useful, everyday terms...This inexpensive Dictionary, with its supporting collections of useful sentences and phrases, is small enough to carry round in the pocket. It is designed for the use of housewives, farmers, industrialists, motorists, sportsmen, doctors and nurses-in fact for anyone who, when employing or coming into contact with Banta men or women, finds English or Afrikaans inadequate to get ideas across" ("Facts about Fanagalo").

"The coming into being of the gold-mining industry and the establishment of large industries in South Africa brought about direct contact between White and Non-White in the work situation... The lack of a common language as a contact medium caused misunderstanding and loss of time... A lingua franca had to be found. If the need could be met... increased production would eventually be achieved. Thus, through evolution, such a language, Fanakalo, came into being and developed in its present form... It is by no means intended that Fanakalo should supersede the pure Bantu languages.... The necessity and usefulness of Fanakalo as a language medium in mingling and industry in South Africa, can, however, never be over-emphasized.... The idea behind the compilation of this text-book for Fanakalo is to give the student of Fanakalo an opportunity to master the language without the aid of an instructor..." (Preface).

[**FANAMAKET**] Tangga [Fanamaket] is an Oceanic language of New Ireland, spoken on Tanga and Feni islands and in Sena, Muliama and Varangansau villages in the Tanglamet area of Namatanai of New Ireland itself. "Señor Don Amado Osorio Zabala called upon me in London last April, and informed me that he was an agent of the Spanish Government, and had resided some time in the country of the Fan tribe, who are settled on the upper stream of the River Gabún, in South-West Africa, or thereabouts--for little is known of them except that the tribe is strong, numerous, and cannibal.... The Don handed me a carefully prepared vocabulary of the Fan language, with Spanish renderings, and asked me to get it published. This language is described at page 422 of my 'Modern Languages of Africa' (Trübner: 1883). Very little is known of it, and I welcomed this addition to our knowledge.... Don Osorio [is] well known as a successful explorer of that part of Africa which lies to the north of Corisco Bay...As there was little chance of any publisher undertaking the matter [of publishing the vocabulary] as a commercial speculation, and as I felt that, if published as a scientific serial, it would be lost sight of, I have undertaken to publish it at my own charges, as my contribution to a subject in which I have such a deep interest" (Preface).

[FAREFARE] Frafra or Farefare, also known as Gurenɛ, is the language of the Frafra people of northern Ghana, particularly the Upper East Region, and southern Burkina Faso. It is a national language of Ghana, and is closely related to Dagbani and other languages of Northern Ghana, and also related to Mossi, aka Mooré, the national language of Burkina Faso. Frafra consists of three principal dialects, Gurenɛ (also written Gudenne, Gurenne, Gudeni, Zuadeni), Nankani (Naani, Nankanse, Ninkare), and Booni. Nabit and Talni have been mistakenly reported to be Frafra dialects (Wiki).

"The people who speak Gurma are known throughout Ghana and in the surrounding lands as 'Frafra.' This name is said to be of relatively recent origin. Soldiers from Nigeria supposedly called the Gurmas by that name during the 1914-18 war because of their greeting 'faráfára.' The name, which was originally simply meant as a joke, has stuck, so that now even a 'Frafra Local Council' can exist without any feelings of insult. Only the 'old ones' protest the name. ... The major area in which the tribes speaking Gurma live is [Northern Ghana]... A large minority of Gurmas also live in the neighboring region of the Republic of Volta. Moreover there is hardly a district or larger region of Ghana, Togo, and the Ivory Coast without a group of 'Frafra' living there. They are accepted and highly considered everywhere in the south as hard-working, modest and well-behaved workers. To be sure, many of them are migrant workers, who mostly return to their homeland after a few years" (Introduction, tr: BM).

"It is clear from Rapp's introduction that the Nankanse language is closely related to Gurma. In the census of 1948, there were about 175,000 Gurmas and about 60,000 Nankanse. Rapp has taken over some terms from Nankanse from R.S. Rattray's *The Tribes of the Ashanti Hinterland*. Rattray was an outstanding ethnologist, but no linguist, and he specialized in the Nankanse tribe, which is indeed closely related to the Gurma tribe. Nevertheless, a large number of Nankanse terms could simply be transferred to Gurma; as a result many important ethnographic words which often escape the linguist could be included here" (Foreword).

"Kpana are located between the domains of Moba and Gura. Our informant has emphasized that Kpana is considered a fiefdom of Moba and that numerous marriages link the Gurma and the Moba. From the linguistic point of view this has resulted in a situation that is the inverse of the historical situation: invaders that they are, the Gurma have been partially assimilated by the people they conquered. This is particularly true for the Gurma who live in the Canton of Kpana, where the dialect is close to that of Moba, and is said to have lost its original purity. In fact, only the Gurma of Korbongou, Namandjoga, Kantinki and Matinten speak pure Gurma. The Gurma are said to number around 70,000, and around 60,000 on the Moba side" (tr: BM).

[**FAROESE**] Faroese /,fəˈroʊˈiːz/ (føroyskt, pronounced [ˈføːɪst]) is a North Germanic language spoken as a first language by about 66,000 people, 45,000 of whom reside on the Faroe Islands and 21,000 in other areas, mainly Denmark. It is one of five languages descended from Old West Norse spoken in the Middle Ages, the others being Norwegian, Icelandic, and the extinct Norn and Greenlandic Norse. Faroese and Icelandic, its closest extant relative, are not mutually intelligible in speech, but the written languages resemble each other quite closely, largely owing to Faroese's etymological orthography (Wiki).

It has 450,000 first-language speakers, which is more than half the population of Fiji, but another 200,000 speak it as a second language. The 1997 Constitution established Fijian as an official language of Fiji, along with English and Hindustani, and there is discussion about establishing it as the "national language", though English and Hindustani would remain official. "As the aspect of this little work, on a slight inspection, will appear different from that of books of this kind generally, in other languages, it appears necessary to say a few words in explanation... The reason for its apparent singularity is, that the structure of the language seemed to require it. We can find nothing in ancient or modern languages analogous to the different forms assumed by the Feejeean verb" (Preface). "A considerable number of Foreigners have been murdered during the last twenty years in various parts of Feejee. Where Christianity has exerted influence there is now no danger-but in other parts great caution is still needed" (Addenda, p. 307, with list of shipwrecks through 1852).

With the ink ownership stamp of C. H. Jenkins. This work was clearly re-issued by the publishers in this single volume form with addenda. In addition to the contents as indicated above for the first issue of the dictionary, there is a list of Fijian equivalents for Biblical names, pp.[329]-349, and an addenda to the grammar, pp. [351-352].

"These works were printed by Edward Martin, a Frenchman who was wrecked in an American ship among the Fiji Islands in a hurricane in 1848. Printing began in the Fiji Islands in Buthainambua in 1839 and continued, in fits and starts due to native politics and wars, until it was firmly established at Viwa in 1844. The mission press was the only press in Fiji until a commercial press was established in 1868. The most notable book printed during this time was David Hazlewood's often reprinted

"The first Dictionary of the Fijian language was compiled by the Rev. David Hazlewood ninety years ago, and his work was very excellently done.... The work was published in 1850. Since that time much water has flowed beneath the bridge, and not only has the language become better known, but contact with Europeans has produced its inevitable modifications and additions to the language also. Fijian has now become a vehicle of literary expression; further study has led to a wider knowledge of the flora and fauna of the country, and of many other connected subjects. These facts have led the Government of Fiji to undertake this revision of Hazlewood's Dictionary. The revision, however, has issued in a practically new work with a different manner of entry and definition... The first acknowledgment is... due to the Rev. David Hazlewood himself, whose work remains a thing to be admired and in many ways wondered at, for its

systematic arrangement and its thoroughness, and it is its own tribute to his genius" (Preface).

"The present list contains 1,320 Fijian names of plants referring to some 140 families, 370 genera and 600 different species.... To have identified and named, as the Fijians have done so many different species of plants is no mean achievement, particularly as these names have been preserved in the past without the assistance, particularly as these names have been preserved in the past without the assistance of written records" (Introduction).

[**FILIPINO**] Filipino Listeni/ˌfɪlɪˈpiːnoʊ/ ([ˌfɪl.ɪˈpiː.no]; Pilipino [ˌpɪl.ɪˈpiː.no] or Wikang Filipino), in this usage, refers to the national language of the Philippines. Filipino is also designated, along with English, as an official language of the country. It is the standard register of the Tagalog language, an Austronesian, regional language that is widely spoken in the Philippines. As of 2007, Tagalog is the first language of 28 million people, or about one-third of the Philippine population, while 45 million speak Filipino as their second language. Filipino is among the 185 languages of the Philippines identified in the Ethnologue. Officially, Filipino is defined by the Commission on the Filipino Language (Komisyon sa Wikang Filipino in Filipino or simply KWF) as "the native language, spoken and written, in Metro Manila, the National Capital Region, and in other urban centers of the archipelago."

Filipino has been variously described as "simply Tagalog in syntax and grammar, with no grammatical element or lexicon coming from ... other major Philippine languages," and as "essentially a formalized version of Tagalog." In most contexts, Filipino is understood to be an alternative name for Tagalog, or the Metro Manila dialect of Tagalog.

"[This dictionary] has been prepared with two basic groups of students in mind: students for whom English is a second language... and students studying for examination at an intermediate level.... Students sometime use a learner's dictionary that is too advanced for their real needs. It is hoped that this medium-sized dictionary will indeed be a useful reference book... [for] the intermediate learner of English" (Introduction).

[2] i ii-vii viii, 1 2-224 225-228. With 45 photographs. First edition. Commissioned by Chevron Niugini Pty. Ltd. Community Affairs Department for and on behalf of the Kutubu Joint Venture. Foe-English, pp. 79-148, and English-Foe, pp. [149]-224. This is the first dictionary of the language.

"First contacted by the Western World early in 1936...the Foe people of Lake Kutubu...have an interesting culture, a sophisticated and fascinating language and a rich oral literature of stories. Murray & Joan Rule lived among the Foe from 1951 to 1977...Despite the discovery of oil in commercial quantities in the mid 1980's to the west of Lake Kutubu in Faso country, the commencement of a large oil development project there in 1991, the foe people have preserved their identity. This book is the first in a series commissioned by the Kutubu Joint Venture, dedicated to the preservation of the heritage of those groups of indigenous peoples in whose land the development is taking place... [The Murray's] initial task was to reduce to writing and learn the language of the Foe, a mountain Papuan tribe then numbering some 2850 people...and to translate the New testament into the Foe language. This involved devising an appropriate alphabet of the Foe language, analysing its unique grammar, and then teaching the Foe to be able to read and write for the first time in their own language" (from the rear cover).

[**FON**] Fon (native name Fon gbè, pronounced [fɔ̃ŋbè]) is part of the Gbe language cluster and belongs to the Volta–Niger branch of the Niger–Congo languages. Fon is spoken mainly in Benin by approximately 1.7 million speakers, by the Fon people. Like the other Gbe languages, Fon is an analytic language with an SVO basic word order (Wiki).

Referred to as "the first systematic grammar and vocabulary of the Fon language" by Chambers, 1968 (see below).

"The extensive and fertile works of modern philology have transformed the study of foreign languages and dialects into a veritable science, attractive and illuminating. I have no other right than this to assemble these pages, which I in no way proclaim *urbi et orbi* to be perfect. The reader should seek here no more than rapid notes put to paper in minute detail. This set belonged to Carleton T. Hodge, with his signature in both volumes. A loosely inserted card indicates he purchased them in Ibadan in 1964.

"This work commenced at Abomey in 1948 when I copied out the 38 pages of vocabulary in the "Manuel franco-dahoméen" published by the Rev. Father Joulord in 1907...these 38 pages became more than 640." (How this dictionary was compiled). "Finally, in 1961, the Rev. P. Harguindéguy kindly forced my hand by typing out the dictionary on stencils in order to reproduce 150 copies. This was a great deal of work for him, if you consider that at the time the Rev. Father had just arrived in Dahomey...I am

told that, such as it is, the dictionary will be of service; that it contains a great deal of information on the customs and civilization of Dahomey; that it will at least provide a basis for discussion; that perhaps it will aid other researchers in undertaking a more extensive work on the language... Finally, at the III Congress of African Languages that took place last March in Freetown, the West African Languages Survey showed their interest in this modest project by promising to provide \$500 in exchange for forty copies of the dictionary" ("Should these Notes be Published?," tr: BM).

"Fon is the language of the traditional entity known as Dahomey, being the language of Abomey and the old kingdom; it is the language of predominance in the new administrative capital, Cotonou... The present checklist is presented as a glossary in preliminary edition; it may be considered little more than proofsheets of fieldnotes. These notes were made during the period 1962-1967, while the investigator was in Dahomey as Professor of English to President Maga, the Cabinet, and the Parliament (1962-1964), and during a return visit to the country in 1967... The purpose of this edition is to permit a basic checklist to circulate among many speakers and students of Fon in order that the investigator have their reactions to tone, vowel quality and quantity, nasality, syllable, and semantic equivalence... In many places I have also had reference to the work of Dr. Julien Alapini of Parakou, compiler of the first systematic grammar and vocabulary of the Fon language" (Foreword).

Original yellow and blue wrappers, lettered in black and white, and with a colored illustration on the front cover, matching the companion volume, *Dictionnaire Français-Fon*. Fon-French, pp. 1-552.

"This new edition of the *Dictionnaire Fon-Français* of Father Basilio Segurola would not exist were it not for Father Michel Dujarrier's passion for the Fon language. He has long called for someone to undertake this task. It meant, in effect, recreating the dictionary, since the written form of [the language] has changed; the tones has to be inserted into the text, as well as many new terms and expressions. Having received Father Dujarrier's copy of the text with all his personal additions, I set to work" (Introduction, tr: BM).

"This dictionary is the fruit of the work of two missionaries who spent their lives in Bénin and the many natives of Bénin who worked with them. Father Basilio Segurola... started the dictionary in 1948 and worked on it for 26 years, while he was teaching in the seminary at Ouidah. Father Jean Rassinoux ... arrived in Bénin in 1967, and having completed a French-Fon dictionary in 1974, undertook the task of revising and completing the Fon-French dictionary of Father Segurola at the end of his stay in Sagon (1995-2000)... Today we have the pleasure of publishing this dictionary" (from the rear wrapper; tr: BM).

**2000b:** [IUW] *Dictionnaire français-fon*, by J. Rassinoux. [Cotonou]: Société des Missions Africaines, 2000. viii, 389 p.; 24 cm. . Library binding, incorporating the original yellow and blue wrappers, lettered in black and white, and with a colored illustration on the front cover, matching the companion volume, *Dictionnaire Fon-Français*.

"This dictionary has been compiled by Father Jean Rassinoux, a missionary who has spent the major part of his life in Bénin, in Fon country. First compiled as a lexicon in 1969, it was edited for the first time in 1974. Since a new edition was needed, Father Rassinoux corrected and enlarged the French-Fon dictionary of Father Segurola, which allowed him to improve his own dictionary, which was thereby profoundly enriched.... We are pleased to publish this dictionary to aid those would wish to gain a deeper understanding of the Fon language and at the same time discover the cultural riches of the Fon people" (from the rear wrappers, tr: BM).

**2002:** [IUW] *Lexique des soins de sante primaire: Flanséegbe-fongbè = Lanme ná nò ganji wéma: Flanséegbe-fongbè*. Cotonou: Centre national de linguistique appliquée (CENALA), 2002. A list of those directly involved in gathering the material, with the financial support of the Réseau International de Néologie et de Terminologie, is given on the second leaf.

"This modest bilingual first aid lexicon French-Yórubá [Fon] is meant to fill a void noted, among many others, by our National Centre for Applied Linguistics, and external collaborators. We are still in the infancy of the creation of works of this type. We are always open to the criticism and suggestions of others, which will allow us to make improvements in the future" (Introduction, Dr. Igue, Directeur CENALA, tr: BM).

Library binding incorporating the original red-brown wrappers, lettered in white. Fon-Français, pp. 55-424. Westafrikanische Studien; Bd. 27.

"This dictionary is the result of linguistic research on the Fon language on the part of the author, from 1974-1983 in Bénin. The textual corpus of the dictionary is based on traditional genres (short stories, proverbs, recorded interviews) as well as modern texts of other types (journals, magazines, the publications of various organizations...) [as well as collaborators whose native language was Fon]" (Preface, tr: BM).

"The dictionary contains around 8,000 entries [footnote: 'With regard to the basic vocabulary, it is based, in part, upon the compilation of R. P. B. Segourola [sic], *Dictionnaire Fon-Français*, photocopy, Contonou, 1963, second printing, 1968']" (Introduction, tr: BM). No mention is made of the Segurolo/Rassinoux Fon-French dictionary published in 2000 (see above), of which the compiler was apparently unaware.

Printed by Spei Ave Maria, Porto-Novo (Bénin), Dépot Légal: second trimestre, 2012, Bibliothèque Nationale du Bénin (p. [265]). First edition. Fon-French, pp. 20-113, French-Fon, pp. 114-137, Fon-English, pp. 151-233, English-Fon, pp. 234-264.

"The author of this book was compelled to write it after noticing with great concern that not even the national library had a copy of [a] Fon-French-English dictionary contrary to what we see in other countries such as Togo, Ghana and Kenya.... [T]he question is whether we defend our language with [as] much zeal as we protect our own property. This is one of the main reasons for the publication of this dictionary.... It is an attempt to promote the use [of Fon] especially be foreigners. In a fast moving global village, such a dictionary, a communication facilitator, is indispensable" (Preface).

"[This dictionary] is the result of... long research and a somewhat revolutionary approach to learning. It offers a wide range of new vocabulary in the areas of science and technology.... Combining French and English with Fon language is a help to associations, communities, universities, researchers, [and] students who will only buy one dictionary instead of two" (Introduction).

[**FORMOSAN LANGUAGES**] The Formosan languages are the languages of the indigenous peoples of Taiwan. Taiwanese aborigines (those recognized by the government) currently comprise about 2% of the island's population. However, far fewer can still speak their ancestral language, after centuries of language shift. Of the approximately 26 languages of the Taiwanese aborigines, at least ten are extinct, another four (perhaps five) are moribund, and several others are to some degree endangered. The aboriginal languages of Taiwan have significance in historical linguistics, since in all likelihood Taiwan was the place of origin of the entire Austronesian language family (Wiki).

**[FRENCH, CAJUN]** Cajun French (French: français cadien/français cadjin) (commonly called Louisiana Regional French, and related to but distinct from the historical Colonial, or Plantation Society, French) is a variety of the French language spoken primarily in Louisiana, specifically in the southern parishes. Cajun French is derived from the original French spoken by French soldiers and settlers in Louisiana before the arrival of the Acadians. The language incorporates words of African, Spanish, Native American and English origin, unknown in Acadian French. The French of the Acadians and the French of the earlier colonial period of Louisiana, commonly known as Colonial Louisiana French, and later waves of colonists eventually merged and are now in what may be considered a single language but showing significant regional variation. Some Creoles of color speak Louisiana Creole French, a distinct creole language that is a mixture of pre-Acadian colonial Louisiana French, Spanish, African languages, and Native American languages, namely Choctaw. Cajun French is not to be confused with Louisiana Creole. The number of speakers of Cajun French is probably around 200,000.

Ethnologue: frc. Alternate Names: Acadian, Cadien, Cajan, Cajun, Louisiana French.

**1931:** [LILLYbm] *Louisiana-French*, by William A. Read. Baton Rouge: Louisiana State University Press, 1931. Original gray wrappers, lettered in black. 254 pp. First edition. University Studies Number 5. Zaubmüller, col. 145. Reinecke 48.137 ("An exceedingly thorough job of lexicography along the lines of traditional philology'-Morgan"). Includes in dictionary form lists of French (pp. [1]-75), Indian (pp. 79-110), German (p. 111), English (pp. 114-116), African (pp. 118-128), Spanish (pp. 131-150), and Italian words (p. 151), as well as an extensive list of place names in Indian, French and Spanish (pp. 152-201).

"Two varieties of French are spoken in Louisiana. The first variety is represented by a dialect not far removed from standard French... This is the speech of most Creoles and of many cultivated Acadians....The Creoles of Louisiana are generally defined as the white descendants of the French and Spanish settlers of the colonial period....The second variety of French speech in Louisiana is the Acadian...The Acadians ... are the descendants of the French who were formally expelled by the English from Acadie, or Nova Scotia, [in] 1755...They are still commonly distinguished from the Creoles of Louisiana by the term *Acadians* or the less dignified *Cajuns*... I have ventured, in spite of many misgivings, to group the dialect of the Creoles and that of the Acadians under the term *Louisiana-French*. I am debarred...from speaking of the former as the 'Creole

dialect,' because this term is applied in Louisiana to the Negro-French patois." This appears to be the first extensive published vocabulary of Cajun French. John Francis McDermott published a *Glossary of Mississippi Valley French 1673-1850* in 1941.

"Dedication: To the millions of Cajuns, living and dead, who courageously kept their faith and culture through more than three hundred years of British persecution and Anglo-American misunderstanding, ridicule and abuse..." "This dictionary was written for the purpose of preserving the Cajun language as it was spoken before it began to deteriorate after World War I. It is the Cajun that most of my contemporaries and I have spoken for the past 84 years" (Introduction). "The word Cajun applies only to those whose Acadian ancestors came to Louisiana after the eviction of 1755, whereas the broader term Acadian applies to all the descendants of the original Acadians, regardless of where they now live. Thus thousands of Acadians live in different parts of the United States and Canada. These do not speak Cajun... To some, a Cajun is a crude, ignorant, backward person who speaks little or no English. He makes his living fishing, trapping or farming a few acres of land. His principal interest in life is boozing, eating and having a good time. To be sure, there are such Cajuns, but they are an infinitesimal minority and are in no way characteristic of the Cajun people."

[**FRIULIAN**] Friulian or Friulan (About this sound *furlan* (help·info) or, affectionately, *marilenghe* in Friulian, *friulano* in Italian, *Furlanisch* in German, *furlanščina* in Slovene; also Friulian) is a Romance language belonging to the Rhaeto-Romance family, spoken in the Friuli region of northeastern Italy. Friulian has around 600,000 speakers, the vast majority of whom also speak Italian. It is sometimes called Eastern Ladin since it shares the same roots as Ladin, but, over the centuries, it has diverged under the influence of surrounding languages, including German, Italian, Venetian, and Slovene. Documents in Friulian are attested from the 11th century and poetry and literature date as far back as

1300. By the 20th century, there was a revival of interest in the language that has continued to this day. In *North America* the more common English form is Friulan for both the language and the ethnic identity of the people living in Friuli and abroad. Friulan follows the example of Friulano in Italian. *Friulan Dictionary: English-Friulan / Friulan-English*. Eds. Gianni Nazzi & Deborah Saidero. Udine: Ent Friul tal Mond. 2000 (Wiki).

[**FULA**] The Fula /'fu:lə/ language, also known as Fulani /fo'la:ni:/ (Fula: Fulfulde, Pulaar, Pular; French: Peul) is a non-tonal language spoken as various closely related dialects, in a continuum that stretches across some 20 countries of West and Central Africa. Like other related languages such as Serer and Wolof, it belongs to the Atlantic subfamily of the Niger–Congo languages. It is spoken as a first language by the Fula people ("Fulani", Fula: Fulbe) and related groups such as the Toucouleur people in the Senegal River Valley from the Senegambia region and Guinea to Cameroon and Sudan. It is also spoken as a second language by various peoples in the region, such as the Kirdi of Northern Cameroon and Northeastern Nigeria. While there are numerous varieties of Fula, it is typically regarded as a single language. Wilson (1989) states that "travelers over wide distances never find communication impossible," and Ka (1991) concludes that despite its geographic span and dialect variation, Fulfulde is still fundamentally one language. However, Ethnologue has found that nine different translations are needed to make the Bible comprehensible for all Fula speakers, and it treats these varieties as separate languages (Wiki).

Ethnologue lists Fula as a macrolanguage consisting of nine different languages. [see below under listings for **FULFULDE, PULAAR and PULAR**].

An on-line dictionary of Fulfulde (as spoken in Burkina Faso) may be found at [www.webonary.org](http://www.webonary.org).

"The Rev. Father Cominique Noye left us suddenly on 2 January 1983 without having had the joy of seeing the publication of this grand dictionary of Diamaré Fulani to which he had devoted so many hours of tireless effort, with the devoted and invaluable assistance of his friend Modibbo Souleymane Adama. They both must be thanked for this work, which, taking up the remarkable labors of the pioneer F. W. Taylor [see above, 1932]...enriches it with a host of new entries and a detailed inventory of derivatives...Having arrived late in life, and completely unexpectedly, among the Fulani, Father Noye fell passionately in love with their language, for which he never ceased to express his admiration, and which he always defended in its purest and most refined form" (Preface, Roger Labatut, tr: BM).

**1980:** [LILLYbm] *Preliminary Gaam-English-Gaam dictionary*, by Malik Agarr Ayre & M[arvin] Lionel Bender. N.p.: n.p., 1980. Original brown wrappers lettered and illustrated in black, with black linen spine. 268 pp. First edition. Hendrix 608. From the library of Carleton T. Hodge, with a pencil note which indicates he received this copy as a gift from Lionel Bender. Includes a Gaam-English lexicon, pp. 38-161, and an English-Gaam index, pp. 162-249. Second copy: IUW.

"The Gaam inhabit an isolated mountain ring in central Blue Nile Province, eastern Sudan... They are usually referred to as 'Ingessena' or 'Tabi.' Both names are misleading. 'Ingessena' is a name applied by Arabs, supposedly meaning 'thankless ones' (for the Gaam refusal to accept Islam), and 'Tabi' is the name of one of the hills inhabited by the Gaam. The people call themselves *jóg gaám* (people of the hill) and their language *kór é gaàm* (speech of the hill), so that Gaam seems to be the most appropriate name by which to refer to them. The Gaam number about 40,000. In addition to the central massif (known as the Ingessana Hills), they inhabit surrounding lowlands in all directions... The Gaam language was classified as a sub-family in itself-one of ten sub-families comprising the East Sudanic Family of the Nilo-Saharan Phylum by Greenburg (1963) in his genetic classification of all African languages." This is the first dictionary of the language.

[**GABRIELINO**] The Tongva language (also known as Gabrielino) is a Uto-Aztecan language formerly spoken by the Tongva, a Native American people who live in and around Los Angeles, California. Tongva is closely related to Serrano. The last fluent native speakers of Tongva lived in the early 20th century, but no evidence to this time

and date can prove a fluent speaker in the last 150 years. The language is primarily documented in the unpublished field notes of John Peabody Harrington made during that time. There are claims of native speakers of Tongva who have died as late as in the 1970s, but there is no independent verification of these individuals having been fluent speakers (Wiki).

Ethnologue does not include this language.

**[GAFAT]** The Gafat language is an extinct South Ethiopian Semitic language that was once spoken along the Abbay River (Nile) in Ethiopia. The records of this language are extremely sparse. Charles Beke collected a word list in the early 1840s with difficulty from the few who knew the language, having found that "the rising generation seem to be altogether ignorant of it; and those grown-up persons who profess to speak it are anything but familiar with it." The most recent accounts of this language are the reports of Wolf Leslau, who visited the region in 1947 and after considerable work was able to find a total of four people who could still speak the language. Edward Ullendorff, in his brief exposition on Gafat, concludes that as of the time of his writing, "one may ... expect that it has now virtually breathed its last" (Wiki).

Ethnologue no longer lists this language.

Second copy: IUW.

"The publication of this work was undertaken to fill a gap in our knowledge of the Ethiopic languages. The language of Gafat is mentioned in many studies of Ethiopic, but its structure and position in the Ethiopic languages could not be determined up till now since not a single study of this language was available" (Preface). "Gafat is a south-Ethiopic language which was spoken in the province of Gafat, northwest of Addis Ababa, the capital of Ethiopia. According to the latest travelers, this language is no longer spoken in the province of Gafat.... The inhabitants of Gafat now speak Amharic, the national language of Ethiopia. But it is interesting to note that the Abyssinian historian Aleqa Tayye... informs us that the inhabitants of Gafat still use [in 1927] their own language in private, when they are among themselves" (Introduction).

[**GALICIAN**] Galician (/gəˈlɪʃən/ or /gəˈlɪsi.ən/; galego [gaˈleɣo]) is an Indo-European language of the Western Ibero-Romance branch. It is spoken by some 2.4 million people, mainly in Galicia, an autonomous community located in northwestern Spain, where it is official along with Spanish. The language is also spoken in some border zones of the neighbouring Spanish regions of Asturias and Castile and León, as well as by Galician migrant communities in the rest of Spain, in Latin America, the United States, Switzerland and elsewhere in Europe. Modern Galician is part of the West Iberian languages group, a family of Romance languages that includes the Portuguese language, which developed locally from Vulgar Latin and evolved into what modern scholars have called Galician-Portuguese. Dialectal divergences are observable between the northern and southern forms of Galician-Portuguese in 13th-century texts but the two dialects were similar enough to maintain a high level of cultural unity until the middle of the 14th century, producing the medieval Galician-Portuguese lyric. The divergence has continued to this day, producing the modern languages of Galician and Portuguese. The language is officially regulated in Galicia by the Royal Galician Academy. However, independent organisations, such as the Galician Association of Language and the Galician Academy of the Portuguese Language, include Galician as part of the Portuguese language, as the Galician-Portuguese variant (Wiki).

[**GALLO.**] Gallo is a regional language of France. It is not as commonly spoken as it once was, as the standard form of French now predominates. Gallo is classified as one of the Oïl languages. Gallo was originally spoken in the Marches of Neustria, which now corresponds to the border lands of Brittany and Normandy and its former heart in Le Mans, Maine. Gallo was the shared spoken language of the leaders of the Norman conquest of England, most of whom originated in Upper Brittany and Lower Normandy. Thus Gallo was a vehicle for the subsequent transformation ("Gallicisation") of English. Gallo continued as the language of Upper Brittany, Maine and some neighbouring portions of Normandy until the introduction of universal education across France, but today Gallo is spoken by only a small minority of the population, having been largely superseded by standard French. As an Oïl language, Gallo forms part of a dialect continuum which includes Norman, Picard and the Poitevin dialect, among others (Wiki).

Ethnologue lists 6 separate languages under the heading Oïl.

[**GALOLEN**] The Galoli, or Galolen, are a people of East Timor with a population of about 50,000, primarily along the northern coast of the district of Manatuto. To the west lies the Mambai people. There is an old colony on the southern coast of Wetar island, the Talo, who speak the Talur dialect. Their language is also known as Galoli, is one of the Timor–Babar group of Austronesian languages. It is one of the national languages designated by the constitution of East Timor. Because the area was used as a trading

center for different cultures, there are a large number of foreign loan words in the vocabulary, principally from Moluccan and Malay languages. Although it is not spoken by as many people as other national languages, it was adopted by the Roman Catholic Church in the district of Manatuto and thus has become fixed in grammars and dictionaries (Wiki).

"This wordlist has been produced as part of work in a number of Gamilaraay and Yuwaalaraay language teaching programs... The book depends largely on the work of Corrine Williams, who studied Yuwaalaraay and Yuwaaliyaay in the late 1970's and on the work of Peter Austin [see above]. William's "Grammar of Yuwaalaraay" is the only work so far which gives a broad analysis of the grammar of this region. It also contains a wordlist with around 1500 items. Austin's Dictionaries of Gamilaraay contain over 500 items, and have been critical in revising interest in the language. Because these two language groups share many words, as well as the majority of their grammar, it has been decided to include

words from both groups in one list....The sources of the words are clearly given" (Preface).

"Numbering today some 700,000 souls only and with no present prospect of an increasing birth-rate, [the Ba-Ganda] are none the less a highly important element in the Uganda Protectorate, with capacity for progress, administration and commerce, accompanied by a reasonable adaptability to varying conditions - a combination of qualities which has been the envy of many in other less favoured districts of Africa. Their language is one of the purest and most archaic types of Bantu... Our knowledge of this country only dates back some sixty years to the days of Captain Speke, the first European to visit Uganda. Before this the very name Uganda was practically unknown" (Introduction). "In the autumn of 1947 the Colonial Office offered us a linguistic scholarship to come and study at the School of Oriental and African Studies in the University of London. One of the principal aims of this study was to produce a Luganda Dictionary and a Luganda Grammar... As the production of an entirely new Luganda Dictionary could not easily be undertaken in London, it was found practicable to work on one of the

existing dictionaries, and the S.P.C.K generously agreed that we should undertake the revision of their *A Luganda-English and English-Luganda Dictionary*, compiled by ... Kitching... and Blackledge. This is the revised Dictionary... written in the Standard Orthography recommended by the all-Baganda Conference of March 1947... In addition, tone-marks are used to indicate tone" (Preface).

"In making a dictionary of the Luganda language a compiler is confronted at the very outset with certain real difficulties and one of the greatest is to decide where and how a Luganda word starts. **[GARIFUNA]** Garifuna (Karif) is a minority language still widely spoken in villages of Garifuna people in the western part of the north coast of Central America. It is a member of the Arawakan languages family albeit an atypical one since, 1) it is spoken outside of the Arawakan language area which is otherwise confined to the northern parts of South America, and 2) because it contains an unusually high number of loanwords, from both Carib languages and a number of European languages, attesting to an extremely tumultuous past involving warfare, migration and colonization. The language was once confined to the Antillean islands of St. Vincent and Dominica, but its speakers, the Garifuna people, were deported en masse by the British in 1797 to the north coast of Honduras from where the language and Garifuna people have since spread along the coast south to Nicaragua and north to Guatemala and Belize. It is still widely spoken in many Garifuna villages throughout this coastal region. In recent years a large number of Garifunas have settled in larger US cities, presumably as part of a more general pattern of north bound migration. Parts of Garifuna vocabulary are split between men's speech and women's speech, i.e. some concepts have two words to express them, one for women and one for men. Moreover, the terms used by men are generally loanwords from Carib while those used by women are Arawak (Wiki).

**[GARO]** Garo, or A·chik (as it is called among the natives), is a language spoken in India in the Garo Hills districts of Meghalaya, some parts of Assam, and in small pockets in Tripura. It is also spoken in certain areas of the neighbouring Bangladesh. According to the 2001 census, there are about 889,000 Garo speakers in India alone; another 130,000 are found in Bangladesh (Wiki).

Ethnologue: grt. Alternate Names: Garrow, Mandi.

Appendix B includes English-Kachari-Garo vocabulary, pp. 161-162; Appendix E: "Comparative Vocabulary of Thibetan and Garo Words," English-Thibetan [Tibetan]-Garo, pp. [165]-166. Appendix F: "Comparative Vocabulary," English-Awé [Awe; dialect of Garo]-Atong-Ruga-Rabha-

Koch, p. [167] "Note. –The above Rabha words are those of the Rangdaniya division, and the Koch words of the Tintikiya division." An English-Garo dictionary was published in 1905 by members of the Garo Mission.

"[The Garos] are a people who are little known to the outside world, and, though living in the midst of a civilized province, have remained free from foreign influence in a remarkable degree. This is due partly to the supposed unhealthiness and inaccessibility of their hills, and partly to their natural conservatism. In this connection I have the Hill Garos in mind, for those who inhabit the plains belong to a different category, and have lost many of their tribal characteristics. Although my task has been a pleasant one, I have had to overcome some difficulties besides the initial one of acquiring the language of these people, for being by nature suspicious, they are apt to look for ulterior motives in the questions of the foreigner" (Preface).

Reprinted **1975**: [IUW] *The Garos*, by A. Playfair, with an introd. by J. Bampfylde Fuller and a new introd. by Parimal Chandra Kar. Includes the same vocabularies on the same pages as the 1909 edition.

"Major Playfair's monograph stands out as the earliest systematic account of the Garos and any discourse on the subject can hardly proceed without reference to the abiding stock source this treatise has proved to be. Its absence from the market for a long time was, therefore, keenly felt by researchers and general readers alike. The present reprint will fill in that void, and thanks are due to the publishers for this undertaking" (Parimal Chandra Kar, New Introduction).

"The following [Glossary] does not pretend to be a dictionary and does not include all morphemes used in the text. It is included only to assist one not familiar with the language to understand the Garo examples that have been given" (p. [85]).

"This grammar was originally written as a by-product of anthropological field work in the Garo Hills, Assam, India, between October, 1954 and October, 1956. I felt obliged to learn the language for practical purposes and found the organization of the linguistic data which I obtained both useful in the learning process, and a welcome change from ethnological investigations." [**GAVIÃO, PARÁ**] [Wiki redirects Pará Gavião to Timbira]: Timbira is a dialect continuum of Ge languages of Brazil. The various tribal dialects are distinct enough to sometimes be considered separate languages. The principal varieties, Krahô /'kra:hou/ (Craó), and Kanela /kæ'nɛlə/ (Canela), have 2000 speakers apiece, few of whom speak Portuguese. [Piokobjé (Bucobu, Pukobje, Paicogê), is listed as one dialect]. (Wiki). Ethnologue lists Pukobjê as an alternate name for Pará Gavião, a distinct language.

[**GAWAR-BATI**] Gawar-Bati (Narsati) is a language spoken in Chitral, Pakistan and across the border in Afghanistan. It is also known in Chitral as Aranduyiwar, because it is spoken in Arandu, which is the last village in lower Chitral, and is also across the border from Berkot in Afghanistan. There are about 9,000 speakers of Gawar-Bati, with 1,500 in Pakistan, and 7,500 in Afghanistan. The name Gawar-Bati means "speech of the Gawar", a people detailed by the Cacopardos in their study of the Hindu Kush. The Gawar-Bati Language has not been given serious study by linguists, except that it is mentioned by George Morgenstierne (1926) and Kendall Decker (1992). It is classified as a Dardic Language. The Dardic languages have been historically seen as Indo-Iranian, but today they are placed within Indo-Aryan following Morgenstierne's work. The Norwegian Linguist Georg Morgenstierne wrote that Chitral is the area of the greatest linguistic diversity in the world. Although Khowar is the predominant language of Chitral, more than ten other languages are spoken here. These include Kalasha-mun, Palula, Dameli, Gawar-Bati, Nuristani, Yidgha, Burushaski, Gujar, Wakhi, Kyrgyz, and Pashto. Since many of these languages have no written form, letters are usually written in Urdu or Pashto (Wiki).

Biddulph in his Tribes of the Hindoo Koosh... published a vocabulary of some 150 words of 'Narisati, spoken by the Gubbers in the Chitral Valley.' A short account of GB is also given in the LSI, VIII, II pp. 80-88. Since then the only addition to our scanty knowledge of this interesting language consists in three words mentioned by Lentz in his *Zeitrechnung in Nuristan und am Pamir*...The material published here was collected in Chitral in 1929" (p. 5). "In November 1949 I had an opportunity of having a hurried interview with Ali Khan, aged 75 years, malik of Ningalam, a village situated at the confluence of the Pech and the Waigel valley. He was the only one, or one of the very few, who still knew something of the ancient language of Ningalam. Now Pashto is spoken there. He had, unfortunately, forgotten much of his mother-tongue, and during the very short time at my disposal, and being surrounded by a crown of inquisitive children, it was just possible to write down a short list of words, barely sufficient for determining the general character of the dialect" (Note on Nigalam).

[**GAYO**] Gayo is the spoken language of some 80,000 people (2010) in the mountain region of North Sumatra around Central Aceh 15-20%, Bener Meriah 15-20% and Gayo Lues 20 - 40%. It is classified as belonging to the Western Malayo-Polynesian branch of

the Austronesian languages, but is not closely related to other languages. Ethnologue lists Deret, Lues, Lut, and Serbejadi-Lukup as dialects. Gayo is distinguished from other languages in Aceh. The art and culture of Gayo people and also significantly different compared with other Acehnese people. In 1907, G.A.J. "[This work] has as its objective the modernization of a language through use: specifically, it develops a specialized lexicon for speaking the Xwela language.... [It] also furnishes research scholars with a tool for comparison that establishes the general phonetic, morphological and lexicological correspondances among the Gbe languages which ends in a common language. At the same time, it builds a lexicographical data base in the national languages of Benin that can be utilized by its introduction into the formal educational system" (Introduction: tr: BM).

"For some time the need of a Gedaged-English Dictionary has been felt by the missionaries of Lutheran Mission Madang. As time went on more and more missionaries came to the mission field who did not have a sufficient command of the German language to make use of the Gedaged-Deutsches Woerterbuch by Missionary H. George.

Missionary F. Henkelman prepared a Gedaged-English Dictionary but unfortunately it was lost when the Japanese invaded New Guinea. At first it was thought that a mere translation of the Gedaged-Deutsches Woerterbuch would suffice but it soon became apparent that it would not. Some twenty years had elapsed since Missionary George left New Guinea. During that time a considerable amount of new literature in Gedaged had been produced. An intensive study of the language had revealed many new words and additional meanings of words already recorded. An examination of the present work will show that about a thousand new entries have been made" (Introduction).

[**GEEZ**] Ge'ez (/ˈɡiːɛz/; ግዕዝ, Gə'əz [ɡiʕiz]; also transliterated Gi'iz, also referred to by some as "Ethiopic") is an ancient South Semitic language that originated in the northern region of Ethiopia and Eritrea in the Horn of Africa. It later became the official language of the Kingdom of Aksum and Ethiopian imperial court. Today, Ge'ez remains only as the main language used in the liturgy of the Ethiopian Orthodox Tewahedo Church, the Eritrean Orthodox Tewahedo Church, the Ethiopian Catholic Church, and the Beta Israel Jewish community. However, in Ethiopia Amharic (the main lingua franca of modern Ethiopia) or other local languages, and in Eritrea and Tigray Region in Ethiopia, Tigrigna may be used for sermons. Tigrigna and Tigre are closely related to Ge'ez with at least four different configurations proposed. Some linguists do not believe that Ge'ez constitutes the common ancestor of modern Ethiopian languages, but that Ge'ez became a separate language early on from some hypothetical, completely unattested language, and can thus be seen as an extinct sister language of Tigre and Tigrinya. The foremost Ethiopian experts such as Amsalu Aklilu point to the vast proportion of inherited nouns that are unchanged, and even spelled identically in both Ge'ez and Amharic (and to a lesser degree, Tigrinya) (Wiki).

Ethnologue: gez. Alternate Names: Ancient Ethiopic, Ethiopic, Ge'ez, Giiz.

"Kita Tschenkéli, born on 8 October 1895 in Kutaissi (Georgia) and living in emigration since 1921, begun preparatory work for his Georgian-German dictionary in the late thirties as an adjunct to his work on a textbook of the Georgian language, while serving as a reader in Russian and Georgian at the University of Hamburg. His collection of data was totally destroyed by fire in the summer of 1943 during a bombing raid on Hamburg. Shortly before the war ended, he himself arrived in Switzerland empty handed. With unshakable courage and an energy that overcame the most difficult external circumstances, an energy found perhaps only in his homeland in the Caucasus, he started all over again on the dictionary at the age of fifty in Zurich" (Afterword, tr: BM).

"Javakhians (Georgian: ჯავახელები) are a subgroup of Georgians, mainly living in Javakheti. Javakhians are the indigenous population of Javakheti – Akhalkalaki, Ninotsminda and Aspindza municipalities of Samtskhe-Javakheti region of Georgia. In terminology, the name Javakheti is taken from "javakh" core with traditional Georgian – eti suffix; commonly, Javakheti means the home of Javakhs. Javakhians speak the Georgian language in Javakhian dialect. The self-designation of Javakhians is Javakhi" (Wiki).

[**GERMAN, PENNSYLVANIA**] Pennsylvania German (Deutsch, Pennsylvania Deutsch, Pennsilfaanisch Deutsch, Hinterwäldler Deutsch, usually called Pennsylvania Dutch) is a variety of West Central German spoken by the Amish and Old Order Mennonites in the United States and Canada, closely related to the Palatine dialects. There are possibly more than 300,000 native speakers in North America. It has traditionally been the language of the Pennsylvania Dutch, descendants of late 17th- and early 18th-century immigrants to Pennsylvania, Maryland, Virginia and North Carolina from southern Germany, eastern France (Alsace and Lorraine). and Switzerland. Although for many, the term 'Pennsylvania Dutch' is often taken to refer to the Amish and related Old Order groups exclusively, the term should not imply a connection to any particular religious group. In this context, the word "Dutch" does not refer to the Dutch people or their descendants. Speakers of the language today are primarily found in Pennsylvania, Ohio, Indiana and other Midwestern States of the United States and in Ontario in Canada. Historically, the dialect was also spoken in several other regions where its use has either largely or entirely faded. The use of Pennsylvania German as a street language in urban areas of Pennsylvania (such as Allentown, Reading, Lancaster and York) was declining by the arrival of the 20th century, while in more rural areas it continued in widespread use through the World War II era. Since that time, its use has greatly declined. The exception to this decline is in the context of the Old Order Amish and Old Order Mennonite communities, and presently the members of these two groups make up the majority of Pennsylvania German speakers. Some other North and South American Mennonites of Dutch and Prussian origin speak what is actually a Low German dialect, referred to as Plautdietsch, which is quite different from Pennsylvania German (Wiki).

"Part third is the Pennsylvania German dictionary [pp. 130-202]. Here are given... all the words in use in the Pennsylvania German language... Part fourth is a special addition to the present volume. It contains English words with the Pennsylvania German equivalent [pp. 204-280]. This will be convenient for those who desire to know what the Pennsylvania German of an English expression is." The remainder of the volume, pp. 281-415, consists of "a diagram business directory" of all the major businesses of Allentown, with copious illustrations. From the library of Carleton T. Hodge.

Third edition, second printing **1910**: *Horne's Pennsylvania German Manual. How Pennsylvania German is spoken and written. For pronouncing, speaking and writing English. Third edition. Enlarged and profusely illustrated. Part I. English Pronunciation. Part II. Pennsylvania German literature, with English translation. Part III. Pennsylvania German dictionary, with grammar and spelling rules. Part IV. English vocabulary*, by A[braham] R[easor] Horne. Allentown, Pennsylvania: T. K. Horne, 1910. Original gray cloth over boards, lettered and decorated in red. Pp. 1-5 6-372. Second printing of third edition (first printing of third edition was 1905). With several pages of illustrations with captions in English and Pennsylvania German. This copy with the bookplate of M. Luther Heisey, author of *History of Grace Evangelical Lutheran Church*, and *The famed markets of Lancaster*, both ([Lancaster, Pa.]: s.n., 1949).

"In issuing the third edition of Horne's Pennsylvania's German Manual the publisher is responding to a wide public demand. An examination of this new edition will reveal many additional illustrative features that will prove both interesting and instructive to the student and reader. In respect to the criticism passed upon Dr. Horne's method of spelling use in the Manual, let it be borne in mind that the author followed the phonetic rules... contained in the book... Since the second edition was printed there have been many additions to Pennsylvania German literature... Selections from these are embodied" (Preface to the Third Edition).

**1879**: [LILLY] *Rauch's Pennsylvania Dutch hand-book: A book for instruction. Rauch's Pennsylvania deutsch hond-booch: En booch for inshtructs*, by E[dward] H. Rauch [1826-1902]. Mauch Chunk, Pa.: E.H. Rauch, 1879. viii, [9]-238 p.; 16 cm. Original green cloth lettered in gold and decorated in blind. Not in Zaubmüller. (see Beam 2004: 261). **1887:** [LILLYbm] *Common sense Pennsylvania German dictionary containing nearly all the Pennsylvania German words in common use, with their English equivalents*, by James C. Lins. Kempton, Pa.: James C. Lins, 1887. Original black cloth over boards, lettered and decorated in blind. Pp. [8] 1-80 81-82. First edition. Zaubmüller, col. 82 (giving only 1895, the date of the second edition). (see Beam 2004: 261). Pennsylvania German-English, pp. 1-80. The Pennsylvania German is written phonetically. This copy with the date in ink on the free endpaper "December 18, 1888", with the page clipped to remove a previous owner's name. The first several pages also show a double stab mark similar to that sometimes used in review copies.

"The only apology that is offered for inflicting another dictionary upon the public is the want of a common sense treatise of the Pennsylvania German language suited to the wants of the Pennsylvania German who is studying the English language. This little volume is not prepared at haphazard. It is the outgrowth of many years of careful study of the Pennsylvania German language. Many consider such a work as folly and of little use, but after all its information cannot be picked up upon the street, nor found in the field.... There are not less than eight hundred thousand Pennsylvania Germans in Eastern Pennsylvania alone, whose brains and abilities are fully equal, if not superior to those whose mother tongue is the English, or high German. Their only deficiency is a written language" (Preface).

**1924:** [LILLY] A dictionary of the non-English words of the Pennsylvania-German dialect, with an appendix, by Marcus Bachman Lambert [1862- ]. [Lancaster, Pa.]: The Society, 1924. xxxi, 193 p. 26 cm. Series: In Pennsylvania-German society. [Proceedings and addresses] Oct 8, 1919, 1924.; v. 30. Note(s): Also published separately. "Edition 600 copies." A fine copy in the original blue and yellow gold wrappers, lettered and decorated in black. (see Beam 2004: 268-9). Second copy: IUW.

**1948:** [LILLYbm] *Glossary of 6167 English Words and Expressions and their Berks County Pennsylvania Dutch Equivalents*, by Howard Snader. Reading, Pennsylvania: Reading Eagle Press, 1948. Original brown wrappers, lettered and decorated in blue and red. Pp. 1-6 7-64. First edition. Zaubmüller, col. 81. (see Beam 2004: 275). This copy signed by the author under his photo on p. [3]. English-Pennsylvania Dutch, pp. 7-64. There was also a second printing in 1949, so identified.

"I have had a very splendid opportunity to absorb the typical Pennsylvania Dutch Dialect that has been commonly in use in agricultural districts of the Commonwealth of Pennsylvania since about 1723.... Being very much concerned about the possibility that the Dialect may become lost to future generations for lack of use from day to day, it occurred to me that a Glossary of English Words with their Pennsylvania Dutch equivalents would make a desirable and valuable contribution toward the preservation of the Dialect" (Preface).

**1951:** [LILLYbm] *Pennsylvania Dutch Dictionary and Handbook with special emphasis on the dialect that was, and is, spoken in York County, Pennsylvania*. [English-Pennsylvania Dutch], by Edwin R. Danner. York, PA: William Penn Senior High School and Atreus Wanner Vocational School, 1951. Original printed ochre and red wrappers. 178 pp. with errata sheet. First edition. Zaubmüller, col. 81. (see Beam 2004: 276).

"The first purpose of this book is to set up a comprehensive list of Pennsylvania Dutch words and a representative list of Pennsylvania Dutch phrases. The second purpose is to

suggest a spelling pattern which will enable Pennsylvania Dutch to assume its proper place as a written dialect."

**1965:** *The English Pennsylvania Dutch dictionary. A glossary of English words and expressions with their Pennsylvania Dutch equivalents together with an illustrated compilation of many unique and fascinating facets of the wonderful Pennsylvania Dutch people and their historical background, including their culture and customs, arts and crafts, folklore and folkways*, by Howard Snader. Reading, Pa.: Culinary Arts Press, c. 1965. Original stiff orange wrappers, lettered in black and white, and decorated in orange, yellow, blue and white. Pp. 1-6 7-96. First edition. (see Beam 2004: 276). English-Pennsylvania German, pp. 7-96, interspersed with various other material as indicated in the title. The Pennsylvania German are spelled as they are pronounced. "Parts of this book were originally published as a Glossary of Pennsylvania Dutch words, c1949, and by House & Garden Magazine, June 1941," p. [4].

**1977:** [LILLYbm] *The Pennsylvania German dialect. Pennsylvania German-English dictionary and Pennsylvania German proverbs and sayings, and short conversations, with English translations. Also the life story of a Pennsylvania German boy growing up, and what life is like as an: Old Order Mennonite*, by Allan M. Buehler. [Cambridge, Ontario: The Author, 1977]. Original maroon cloth over boards, lettered and decorated in gold. Pp. [2] i-vi, 1-227 228 [2]. First edition. (see Beam 2004: 281). With a loosely-inserted five-page brochure on the dialect and about the book. English-German-Pennsylvania German dictionary, pp. 4-27, triple columns.

"[One] purpose in writing this book is to try to preserve the unique Pennsylvania German dialect.... The younger generation is unfamiliar with the German phonetics. They may speak the Pennsylvania dialect at home, but are unable to read in the dialect if the German phonetics are used. I have therefore devised a simplified English phonetic system in which English sounds are used" (Author's Notes).

**1985:** [IUW] *Pennsylvania German dictionary: English to Pennsylvania Dutch*, by C. Richard Beam. Lancaster, Pa.: Brookshire Publications, 1985. ix, 180 p.; 22 cm. Original pale violet and white wrappers, lettered in purple, with a colored Pennsylvania Dutch design on front cover. Second edition. First edition appeared in 1982 (2,100 copies), and was reprinted in 1985 (described here), 1989, 1990, and 1992 (information from Preface to revised edition, 1994 printing).. English-Pennsylvania German dictionary, pp. 1-180.

"This is not the definitive dictionary of Pennsylvania German. The purpose of [this dictionary] is to place in the hands of interested individuals a dictionary which goes beyond the limits set by the late Howard Snader in his *Glossary of Pennylvais Dutch Words*, first printed in 1949, [and that of Edwin Danner, 1951].... We have limited the length of this dictionary in order to get it into print in time for the celebration of the 300<sup>th</sup> anniversary of the first permanent German settlement in America in Germantown, Pennsylvania, in 1683, and also to keep the price within reach of the average purchaser" (Preface [to the first edition]).

"In the short span of three years the 2,000 copies of this dictionary which constituted the first printing have found their way into the hands of readers here in Pennsylvania and elsewhere. In the winter of this year it became apparent that a second edition was needed.... We have attempted to correct all typographical errors for this reprint" (Preface to the Second Edition).

Revised edition **1991 [1994]**: [IUW] *Revised Pennsylvania German dictionary: English to Pennsylvania Dutch*, by C. Richard Beam. Lancaster, Pa.: Brookshire Publications, 1994. Second Printing (first printing was 1991). Xii, 212 p. 21.3 cm. Original pale violet wrappers, lettered in black and red, with a drawing of a farmer in black and white. [**GIKUYU**] Kikuyu or Gikuyu (Kikuyu: Gĩkũyũ [ɣĕkōjó]) is a language of the Bantu family spoken primarily by the Kikuyu people (Agĩkũyũ) of Kenya. Numbering about 6 million (22% of Kenya's population), they are the largest ethnic group in Kenya. Kikuyu is spoken in the area between Nyeri and Nairobi. Kikuyu is one of the five languages of the Thagichu subgroup of the Bantu languages, which stretches from Kenya to Tanzania. The Kikuyu people usually identify their lands by the surrounding mountain ranges in Central Kenya which they call Kĩrĩnyaga (Wiki).

This copy with the ink ownership signature of Frances S. Hannay. A loosely inserted envelope contains (as described by Donal Brody, Great Epic Books)::

1) "An important 2 page autograph letter in KiKikuyu discussing the presence of explorer missionaries Dr. Stumpf, Dr. Hassler and Professor Herdmann at the Africa Inland Mission at Kijabe, British East Africa. It is dated Feb. 14, 1917, which was the height of the WWI East Africa campaign. One can only conjecture that these world renowned intrepid explorers sought sanctuary at the Mission. The letter is from one G. P. Njunguna Wagitumburn to Mrs. Frances S. Hannay, whose signature is on the front pastedown";

2) "An original colored pastel drawing of an African hut and shamba style stockade surrounded by trees. 3 1/2" x 5". Crude, but charmingly evocative"; and

3) "a small 16 pp. pamphlet entitled *Kiugo kia Muti Uciu*, printed on the A.I.M. Press, in Kijabe, B.E.A., 1912, "which translates (in my rudimentary KiKikuyu) "The Medicine of God's Church" consisting of Biblical passages translated into Gikuyu; on p. 4 manuscript revisions of one passage from Mark have been entered in ink. [GILYAK] Nivkh or Gilyak /'giljæk/ (self-designation: Нивхгу диф Nivxgu dif) is a language spoken in Outer Manchuria, in the basin of the Amgun (a tributary of the Amur), along the lower reaches of the Amur itself, and on the northern half of Sakhalin. 'Gilyak' is the Manchu appellation. Its speakers are known as the Nivkh people. The population of ethnic Nivkhs has been reasonably stable over the past century, with 4,549 Nivkhs counted in 1897, and 4,673 in 1989. However, the number of native speakers of the Nivkh language among these has dropped from 100% to 23.3% in the same period, so that there are now just over 1,000 first-language speakers left (Wiki).

[**GITXSAN**] The Gitksan language /'gɪtsæn/, or Gitksanimaax (also rendered Gitksan, Giatikshan, Gityskyan, Giklsan), is a First Nations language of northwestern British Columbia. It is a Tsimshianic language, closely related to the neighboring Nisga'a language. The two groups are, however, politically separate and prefer to refer to Gitksan and Nisga'a as distinct languages. Gitksanimx is an endangered language. According to the 2006 census there were 1,175 native speakers. Gitksan is the name of the people who speak this language. It means "People of the Skeena River" ("Ksan" being the name of the Skeena in this language) (Wiki).

"The Gitksan language is spoken today by several thousand Indian people, who mainly live in a number of villages situated in the valley of the Skeena River in Northern British Columbia.... This short practical dictionary is based upon the Gitksan dialects spoken in Hazelton and Kispiox.... [It] is not meant to be a definitive complete work—it presents only a small portion of the total number of words in Gitksanimx and it undoubtedly contains some errors of spelling and translation.... We hope that his will be simply the first in a new series of written works in Gitksanimx, the rich expressive language of a proud and noble people" (pp. 1-4).

[**GOGO**] Gogo is a Bantu language spoken by the Gogo people of Dodoma Region in Tanzania. The language is spoken throughout Dodoma Region and into the neighbouring district of Manyoni. The language is considered to have three dialects: Nyambwa (Cinyambwa or West Gogo) spoken to the west of Dodoma and in Manyoni, Nyaugogo (Cinyaugogo or Central Gogo) spoken in the environs of Dodoma, and Tumba (Citumba or East Gogo) spoken to the east. The Gogo group is grouped with Kagulu, which has a 56% lexical similarity with Gogo proper, which leads some to classify Kagulu as a Gogo dialect. Gogo has about 50% lexical similarity with Hehe and Sangu (both Bena–Kinga languages (G.60), 48% with Kimbu and 45% with Nilamba. These last two are both in Zone F. Gogo is spoken by both Christians and Muslims, and is a major language of the Anglican Church of Tanzania (Wiki).

"There is no precise knowledge of the number of the Gola. H. Johnston estimates them at 150,000. In both their external appearance and their language they differ clearly from their neighbors, members of the Kru and Mandingo tribes. They are slimmer of form and lighter in color...they are farmers and active fishermen and hunters; however, working in the fields is looked down upon by them and as far as possible they relegate such work to slaves and women. The Kpelle in particular, who are hard-working farmers, live as slaves in relatively high number among the Gola, and in fact the Gola regard any member of the Kpelle tribe as a born servant, and consider themselves totally superior to them as a race" (tr: BM).

**[GONDI]** Gondi (Gōndi) is a South-Central Dravidian language, spoken by about two million Gond people, chiefly in the states of Madhya Pradesh, Gujarat, Telangana, Maharashtra, Chhattisgarh and in various adjoining areas of neighbouring states. Although it is the language of the Gond people, only about half of them still speak it. Gondi has a rich folk literature, examples of which are marriage songs and narrations (Wiki).

"The Rev. S. B. Patwardhan has been for many years in charge of the Mission out-station in Aheri, the chief town of the Gond Zemindari of that name in the Chanda District. As long ago as 1914 Mr. Patwardhan and I began a translation of the Gospel of St. John into Gondi... On my return to the Diocese, in 1926, I got in touch with Mr. Patwardhan again. During these years Mr. Patwardhan had been compiling a vocabulary of Gondi words, and at my request he put together this little manual, and later he hopes to be able to produce a dictionary of the language[which apparently never appeared]. This manual has been produced to help European and other missionaries to make a beginning of the study of Gondi" (Introductory Preface, signed Alex Nagpur, and dated November, 1935).

**1960:** [LILLYbm] *A comparative vocabulary of the Gondi dialects*, by T[homas] Burrow & Sudhibhushan Bhattacharya. Calcutta: The Asiatic Society, [1960]. Original gray-green wrappers, lettered and decorated in black Pp. 69-72 73-251 252; folded leaf of plates; map. First edition. "From the Journal of the Asiatic Society, vol. II, nos. 2, 3 & 4, 1960." Includes comparative Gondi-English vocabulary representing more than a dozen Gondi dialects, pp. 82-229, with an index of English meanings, pp. 231-248, and an index of flora and fauna in Latin and native terms, pp. 249-251.

"It is hardly an exaggeration to say that the Gondi language is inaccessible to the average student of Dravidian... The amount of material that has been accumulated in the present compilation is very considerable... and most of the dialects are represented. There is no doubt that ... the bulk of the common Gondi vocabulary is represented in this work" (Preface).

[**GONJA**] The Gonja language is a North Guang language spoken by an estimated 230,000 people, almost all of whom are of the Gonja ethnic group of northern Ghana. Related to Guang languages in the south of Ghana, it is spoken by about a third of the population in the northern region. The Brong-Ahafo and Volta regions lie to the south of the Gonja-speaking area, while Dagombas, Mamprussis and Walas are to the north. Its dialects are Gonja and Choruba (Wiki).

"This is the first ever attempt to compile a multilingual dictionary of the Great Andamanese language, which has been spoken in the Andaman Islands for thousands of years. Present-day Great Andamanese is a highly endangered language due to several

reasons, ranging from external forces, such as military, economic, cultural or educational subjugation, to internal forces, such as the community's negative attitude towards its own language.... Great Andamanese is a generic term representing languages of a family of languages once spoken by the ten different tribes living in the north, south and middle of the Great Andaman Islands. Present-day Great Andamanese is a mixture of four northern varieties.... The language represented in the dictionary draws its lexical stock from mainly four languages, i.e. Jeru, Khora, Bo and Sare. Alas, we have recently lost the last speaker of Khora... This dictionary is thus the first and last ever documented record of the extinct Khora and Bo languages" (Preface).

**[GREBO LANGUAGES]** Grebo is a dialect cluster of the Kru languages, spoken by the Grebo people of present-day Liberia and the Krumen of Ivory Coast in West Africa. The first African tribal group contacted by European explorers and Americo-Liberian colonists reaching the area of Cape Palmas were the Seaside Grebo, or Glebo. The colonists came to refer to their language as Grebo. In the absence of other qualification, the term Grebo language refers to the Glebo speech variety. Considerable ambiguity and imprecision continue to exist with respect to the scholarly use of the term Grebo; it is not always clear precisely which variety it is intended to denote. If it is being used as a group term, it is not always clear what is to be included in the group (Wiki).

"The Grebo occupy a coastal strip some 50-70 miles deep...in the extreme southwest of Liberia. To the west, along the coast, their neighbors are the Kru, and inland, the Kran. Grebo belongs to the Kru group of languages, all spoken in Liberia, and whose most important member is Kru, which has given its name to the group... Grebo was one of the earliest West African languages to be studied by European and, American scholars [including a dictionary published in Cape Palmas in 1839 by J.L. Wilson, and one published in 1867 by J. Payne in Philadelphia]... Since 1877 [a German work published in Vienna in that year by J.G. Auer] no further work on Grebo have appeared...Although it is over 100 years since the first dictionary of Grebo was published, the quantity of Grebo literature is slight, and there was a long period from the 1870's until after the last war when virtually nothing was written in Grebo."

[**GREENLANDIC**] Greenlandic is an Eskimo–Aleut language spoken by about 57,000 Greenlandic Inuit people in Greenland. It is closely related to the Inuit languages in Canada, such as Inuktitut. The main dialect, Kalaallisut or West Greenlandic, has been the official language of the Greenlandic autonomous territory since June 2009; this is a move by the Greenlandic government to strengthen the language in its competition with the colonial language, Danish. The second dialect is East Greenlandic (Tunumiisut). The Thule Inuit of Greenland, Inuktun or Polar Eskimo, is a recent arrival, and a dialect of Inuktitut. When adopting new concepts or technologies, Greenlandic usually constructs new words made from Greenlandic roots, but modern Greenlandic has also taken many loans from Danish and English. The language has been written in the Latin script since Danish colonization began in the 1700s. The first orthography was developed by Samuel Kleinschmidt in 1851, but within a hundred years already differed substantially from the spoken language because of a number of sound changes. An extensive orthographic reform undertaken in 1973 that made the script easier to learn resulted in a boost in Greenlandic literacy, which is now among the highest in the world (Wiki).

"Paul or Poul Hansen Egede (9 September 1708 – 6 June 1789) was a Dano-Norwegian theologian, missionary, and scholar, principally concerned with the Lutheran mission among the Kalaallit people of the Greenland established by his father Hans in 1721. Paul assisted his father in his work and, when his mother died and Hans returned to bury her in Denmark after a smallpox outbreak, he took over the mission for an additional six years, accepting to forgo his own desire to become a Danish naval officer. He succeeded his father as superintendent of the Greenland mission. In 1742, Egede was appointed Minister of the Vartov Lutheran Church in Copenhagen. In 1747, he became a professor of theology at the Greenland Mission Seminary established in Denmark by his father and then, in 1758, its provost. In 1779, he was elevated to Bishop of Greenland and, in 1785, made a fellow of the Royal Norwegian Society of Sciences and Letters. Egede and an Inuk named Arnarsaq translated the New Testament into Kalaallisut, the language of the West Greenland Inuit. He went on to publish a Kalaallisut–Danish–Latin dictionary (1750), a revised Kalaallisut catechism (1756), and a Kalaallisut grammar (1760), as well as a number of other books concerning the language. Paul Egede died in Copenhagen in 1789, having published in that year his journal of his life in Greenland" (Wiki).

[**GROS VENTRE**] Atsina, or Gros Ventre (also known as Ananin, Ahahnelin, Ahe and A'ani)) is the extinct ancestral language of the Gros Ventre people of Montana. The last fluent speaker died in 1981. Atsina is the name applied by specialists in Algonquian linguistics. Arapaho and Atsina are dialects of a common language usually designated by scholars as "Arapaho-Atsina". Historically, this language had five dialects, and on occasion specialists add a third dialect name to the label, resulting in the designation, "Arapaho-Atsina-Nawathinehena". Theresa Lamebull taught the language at Fort Belknap College, and helped develop a dictionary using the Phraselator when she was 109. As of 2012, the White Clay Immersion School at Fort Belknap College was teaching the language to 26 students, up from 11 students in 2006 (Wiki).

[**GUAHIBO**] The Guahibo people (also called Guajibó, or Sikuani, though the latter is regarded as derogatory) people are an indigenous people native to Llanos or savannah plains in eastern Colombia—Arauca, Meta, Guainia, and Vichada departments—and in southern Venezuela near the Colombian border. Their population was estimated at 23,772 people in 1998. Guahibo (ISO 639: GUH) is related to the Arawakan language family of South America and is divided between the dialects of the Wüinpumuín (northeast region) and Wopumuín (southwest region) although the groups understand each other. The existing dialects are: Guahibo (Sikuani), Amorua (Río Tomo Guahibo) and Tigrero. They each have their own languages but many are lost, now replaced by Spanish. Despite 55% illiteracy, there is a written form of Guahibo. There is a Guahibo newspaper, dictionary and grammar book (Wiki).

**[GUARANI, EASTERN BOLIVIAN]** Eastern Bolivian Guaraní, known locally as Chawuncu or Chiriguano (pejorative), is a Guaraní language spoken in South America. In Bolivia 33,670 speakers were counted in the year 2000, in the south-central Parapeti River area and in the city of Tarija. In Argentina, there were approximately 15,000 speakers, mostly in Jujuy, but also in Salta Province, and 304 counted in the Paraguayan Chaco. Avá (Chané, Tapieté) and Izoceño are dialects. In Argentina it is known as Western Argentine Guaraní, while in Paraguay it is locally known as Ñandeva. Eastern Bolivian Guaraní is one of a number of "Guaraní dialects" sometimes considered distinct languages. Of these, Paraguayan Guaraní is by far the most important variety and it is often referred to simply as Guaraní (Wiki).

Chiriguano-Spanish vocabulary, pp. 283-356, double-columned. "Chiriguano...is a language of more than 60,000 people living in the southeast of Bolivia and the northeast of Argentina. Wolf Dietrich presents here for the first time a modern grammar of the language, which places it in a systematic and constant relationship to Paraguayan Guaraní and other languages of the same family.... The vocabulary contains around 1,200 basic words with their etymologies [and is] the first modern attempt to present a comparative dictionary of the most important Tupi-Guaraní languages in their present and former state" (copy from d.j., tr: BM).

[**GUARANI, MBYÁ**] Mbyá Guaraní is a Tupi–Guaraní language spoken 6,000 Brazilians, 3,000 Argentines, and 8,000 Paraguayans. It is 75% lexically similar to Paraguayan Guaraní.

Mbyá Guaraní is one of a number of "Guaraní dialects" now generally classified as distinct languages.

[**GUARANI, PARAGUAYAN**] Guaraní (/ˈɡwɑːrəniː/ or /ɡwærəˈniː/),[3] specifically the primary variety known as Paraguayan Guaraní (endonym *avañe'ẽ* [avãɲẽˈʔẽ] 'the people's language'), is an indigenous language of South America that belongs to the Tupi–Guaraní subfamily of the Tupian languages. It is one of the official languages of Paraguay (along with Spanish), where it is spoken by the majority of the population, and where half of the rural population is monolingual. It is spoken by communities in neighboring countries, including parts of northeastern Argentina, southeastern Bolivia and southwestern Brazil, and is a second official language of the Argentine province of Corrientes since 2004; it is also an official language of Mercosur. Guaraní is one of the most-widely spoken indigenous languages of the Americas and the only one whose speakers include a large proportion of non-indigenous people. This is an anomaly in the Americas where language shift towards European colonial languages (in this case, the other official language of Spanish) has otherwise been a nearly universal cultural and identity marker of mestizos (people of mixed Spanish and Amerindian ancestry), and also of culturally assimilated, upwardly mobile Amerindian people. Jesuit priest Antonio Ruiz de Montoya, who in 1639 published the first written grammar of Guaraní in a book called *Tesoro de la lengua guaraní* (Treasure of the Guaraní Language), described it as a language "so copious and

elegant that it can compete with the most famous [of languages]." The name "Guarani" is generally used for the official language of Paraguay. However, this is part of a dialect chain, most of whose components are also often called Guarani (Wiki).

The first published Italian translation of both the letter of Maximilianus and the narrative of Pigafetta, accounts of the Spanish expedition around the world from 1519 to 1522, under the command of Ferdinand Magellan. Pigafetta's account professes to be a retranslation into Italian of Fabre's French abridgment of the journal, according to the last paragraph, and Church, v. I, p. 123, and no. 74, notes. The first three leaves contain "a'l lettore" which digests the progress of geographical discovery, and the last leaf (M4r.) [gives three different brief vocabularies]: *Alcune parole che vsano le genti ne le terra del Bresil*, (upper left column). -- *Parole del gigante qual presero apresso il fiume di San Iuliano*, middle and lower left column). -- *Parole che vsano li habitatori dell'Isola de Tidore*, right column). The earliest appearance of Guarani vocabulary, eight words, Italian-Guarani; the earliest appearance of Tehuelche vocabulary, thirty-eight words, Italian-Tehuelche, and the earliest appearance of Tidore vocabulary, forty-seven words, Italian-Tidore] . The vocabulary "che usano le genti nella terra del Bresil" is almost certainly Guarani; that of the "gigante qual perfero apresso il fiume di San Iuliano" (the giants living near the San Julian River) [in Patagonia] is almost certainly that of the Tehuelche people at that time; the third language is clearly Tidore.

**[GUATEMALAN LANGUAGES: POLYGLOT]** Spanish is the official language of Guatemala. As a first and second language, Spanish is spoken by 93% of the population. Guatemalan Spanish is the local variant of the Spanish language. Twenty-one Mayan languages are spoken, especially in rural areas, as well as two non-Mayan Amerindian languages, Xinka, an indigenous language, and Garifuna, an Arawakan language spoken on the Caribbean coast. According to the Language Law of 2003, the languages of Mayas, Xincas, and Garifunas are unrecognized as National Languages. It is common for indigenous Guatemalans to learn or speak between two and five of the nation's other languages, and Spanish (Wiki).

**[GUGUYIMIDJIR]** Guugu Yimithirr, also rendered Guugu Yimidhirr, Guguyimidjir, and many other spellings, is an Australian Aboriginal language, the traditional language of the Guugu Yimithirr people of Far North Queensland. It belongs to the Pama-Nyungan language family. Most of the speakers today live at the community of Hopevale, about 46 km from Cooktown. Guugu Yimithirr is one of the more famous Aboriginal, or otherwise non-English, Australian languages because it is the source language of the word "kangaroo" (Wiki).

**[GUIANESE CREOLE FRENCH]** French Guianese Creole is a French-lexified creole language spoken in French Guiana, and to a lesser degree, in Suriname and Guyana. It resembles Antillean Creole, but there are some lexical and grammatical differences between them. Antilleans can generally understand French Guiana Creole, though the notable differences between the créole of French Guiana and the créoles of the Caribbean may cause some instances of confusion. The differences consist of more French and Brazilian Portuguese influences (due to the proximity of Brazil and Portuguese presence in the country for several years.) There are also words of Amerindian and African origin. There are Guianese communities in Suriname and Guyana who continue to speak French Guiana Creole.

It should not be confused with the Guyanese Creole language, based on English, spoken in nearby Guyana (Wiki).

**[GUJARATI]** Gujarati /ɡudʒəˈrɑːti/ (ગુજરાતી Gujarātī [ɡudʒəˈrɑːt̪i]) is an Indo-Aryan language native to the Indian state of Gujarat. It is part of the greater Indo-European language family. Gujarati is descended from Old Gujarati (circa 1100 – 1500 AD). In India, it is the chief language in the state of Gujarat, as well as an official language in the union territories of Daman and Diu and Dadra and Nagar Haveli. Gujarati is the language of the Gujjars, who had ruled Rajputana and Punjab. There are about 65.5 million speakers of Gujarati worldwide, making it the 26th most spoken native language in the world. Along with Romani and Sindhi, it is among the most western of the Indic languages (Wiki).

[**GULA** (Central African Republic)] The Gula language, or Tar Gula, of the Central African Republic, commonly known as Kara, is a Central Sudanic language or dialect cluster. The term "Kara" is also attached to numerous ethnic groups of the region and their languages, and so is often ambiguous. Ethnologue lists Gula du Mamoun, Kara (of South Sudan) and Yamegi as synonyms, and Molo, Mele, Mot-Mar (Moto-Mara), Sar (Sara), Mere, and Zura (Koto) as dialects. [GURANI] Gorani (also Gurani) is a group of Northwestern Iranian dialects spoken by Kurdish people in the southernmost parts of Iranian Kurdistan and the Iraqi Kurdistan region. It is classified as a member of the Zaza–Gorani branch of the Northwestern Iranian languages. Gorani is a dialect of the Pahlawani strand of Kurdish, which diverged off from Kurmanji speakers, Badhini and Sorani alike, at around 100 BCE. The Hewramî dialect, although often considered a sub-dialect of Gorani, is a very distinct dialect spoken by Gorani/Hewrami people in a region called Hewraman along the Iran–Iraq border, and is sometimes considered to be a distinct language. Gorani is spoken in the southwestern corner of province of Kurdistan and northwestern corner of province of Kermanshah in Iran, and in parts of the Halabja region in Iraqi Kurdistan and the Hawraman mountains between Iran and Iraq. The oldest literary documents in these related languages, or dialects, are written in Gorani. Many Gorani speakers belong to the religious grouping Yarsanism, with a large number of religious documents written in Gorani. In the 19th century, Gorani as a language was slowly replaced by Sorani in several cities, both in Iran and Iraq. Today, Sorani is the primary language spoken in

cities including Kirkuk, Meriwan, and Halabja, which are still considered part of the greater Goran region (Wiki).

These are of a surprising complexity for a modern West Iranian dialect. They are far more intricate, for example, than those of any Kurdish dialect, though Hawrami forms an island in a Kurdish sea....Hawrami is a Gorani dialect and...probably the most archaic and best preserved of the group. The large cities in Northern Nigeria are very convenient for linguistic research, because people, especially young men, come together from every corner of the Northern Nigeria and a linguist can interview them easily without worrying about transportation. In the vast space like Nigerian savanna, the transportation is the biggest difficulty for researchers..."(Foreward). "Gwandara is spoken by Gwandara people... and by some of the neighbouring ethnic groups as regional lingua franca. Gwandara people live in ...Northern Nigeria, West Africa... Accurate population of Gwandara people is not available in recent statistics. But according to 1945-1950 census, it numbered to 12,000, at least... Therefore if one considers the Gwandara population in

another areas and natural increase during the past twenty years, it is reasonable to estimate that about 40,000 Gwandara live in Northern Nigeria. [Including neighboring tribes who speak Gwandara as their native or adopted tongue] nearly 50,000 people speak Gwandara... According to the tradition, [because they fled their original home to avoid accepting Islam], they were called *gwàndà rawaa dà sallà* in Hausa, which is to say 'rather dance than pray to God.'... Still nowadays, Gwandara have relatively high prestige among surrounding peoples because of their old ascendancy and remote relation to Hausa. Most of them have been converted to Islam recently, but some were converted to Christianity and few retain their traditional paganism... All five dialects [of Gwandara] are mutually intelligible. Nowadays, most of the Gwandara people speak Hausa, too."

"Gwandara people themselves recognize six dialects which are mutually intelligible: 1. Gwandara Karshi dialect: other names Gade, Gwandara; 2. Cancara dialect: another name: Kyankyara; 3. Toni dialect; 4. Gwandara Gitata dialect; 5. Gwandara Koro dialect; 6. Nimbia dialect... Karshi, Toni and Koro dialects are very close [to] each other, and it is possible to say that they are three representations of one dialect, say the eastern dialect" (Introduction).

**[GWENO]** Gweno is a Bantu language spoken in the North Pare Mountains in the Kilimanjaro Region of Tanzania. The people known as the Gweno (or more properly Asu) are a Chaga ethnic and linguistic group. The language is today spoken mostly by older adults, with younger generations having shifted to Asu and Swahili. Ethnologue considers Gweno to be moribund; the Gweno stopped raising children to speak the language about 20 years ago (Wiki).

**[GWERE]** Gwere, or Lugwere, is the language spoken by the Gwere people (Bagwere), a Bantu people found in the eastern part of Uganda. It has a close dialectical resemblance to Soga and Ganda, which neighbour the Gwere. Gwere, though closest in dialect to its eastern neighbours, also has many words similar to those used by tribes from the western part of Uganda. For example, *musaiza* (a man) resembles *mushiiza* used by the western languages with the same meaning. The Ruli, a somewhat distant people living in central Uganda, speak a language that has almost exactly the same words used in Lugwere, but with a very different pronunciation (Wiki).

Ethnologue: gwr. Alternate Names: Bagwere, Lugwere, Olugwere.

An on-line dictionary of Lugwere [Gwere] may be found at [www.webonary.org](http://www.webonary.org).

"Until now there has been no Lugwere dictionary available which could be used in schools, to encourage local writers to be more actively involved in committing their cultural stories, beliefs, and local history to paper, and to encourage the development of literature in Lugwere. This dictionary has been compiled from various sources, with most of the words being collected during a community-based word collection workshop that was held in 2001. Many other words have been added and updated by those working under the auspices of SIL International since that time" (Introduction).

[**GWI**] G|ui or G|wi (pronounced /'gwi:/ in English, and also spelled |Gwi, Dcui, Gcwi, or Cgui) is a Khoe dialect of Botswana with 2,500 speakers (2004 Cook). It is part of the G|ana dialect cluster, and is closely related to Naro. It has a number of loan words from West ʔ'Amkoe. G|ui, West ʔ'Amkoe, and Taa form the core of the Kalahari Basin sprachbund, and share a number of characteristic features, including extremely large consonant inventories (Wiki).

Ethnologue: gwj. Alternate Names: Dcui, G!wikwe, G|wi, G|wikhwe, Gcwi.

[**GWICH'IN**] The Gwich'in language is the Athabaskan language of the Gwich'in indigenous people. It is also known in older or dialect-specific publications as Kutchin, Takudh, Tukudh, or Loucheux. In the Northwest Territories and Yukon of Canada, it is used principally in the towns of Inuvik, Aklavik, Fort McPherson, Old Crow, and Tsiigehtchic (formerly Arctic Red River). There are about 430 Gwich'in speakers in Canada out of a total Gwich'in population of 1,900. In Alaska, Gwich'in is spoken in Beaver, Circle, Fort Yukon, Chalkyitsik, Birch Creek, Arctic Village, Eagle, and Venetie, Alaska. About 300 out of a total Alaska Gwich'in population of 1,100 speak the language. It is an official language of the Northwest Territories (Wiki).

[**HADIYYA**] Hadiyya (sometimes Hadiyigna or Adiya) is the Afroasiatic language of the Hadiya people of Ethiopia. Most speakers live in the Southern Nations, Nationalities, and People's Region in the Hadiya Zone around the town Hosaena. The language is a Highland East Cushitic language. The Libido language, located just to the north in the Mareko district of Gurage Zone, is very similar lexically, but has significant morphological differences. The New Testament has been translated in Hadiyya, published by the Bible Society of Ethiopia in 1993. It was originally done using the traditional Ethiopic syllabary. A later printing used the Latin alphabet. The Ethnologue quotes the 1998 census saying the number of speakers is 923,958, with 595,107 monolinguals. The 2007 census gives the number of speakers as a drastically reduced 253,894 (Wiki).

[**HAIDA**] Haida /'haɪdə/ (X̱aat Kíl, X̱aadas Kíl, X̱aayda Kíl, Xaad kil,) is the language of the Haida people, spoken in the Haida Gwaii archipelago of the coast of Canada and on Prince of Wales Island in Alaska. An endangered language by the book of UNESCO, Haida currently has about 20 native speakers, though revitalization efforts are underway. At the time of Discovery of the Haida Gwaii in 1774, Haida speakers estimated about

15,000; epidemic soon led to a drastic reduction in the Haida population, which became limited to three villages: Masset, Skidegate, and Hydaburg. Positive attitudes towards assimilation combined with the ban on speaking Haida in residential schools led to a sharp decline in the use of the Haida language among the Haida people, and today almost all ethnic Haida use English to communicate. Classification of the Haida language is a matter of controversy, with some linguists placing it in the Na-Dené language family and others arguing that it is a language isolate. Haida itself is split between Northern and Southern dialects, which differ primarily in phonology (Wiki).

Ethnologue lists Haida as a macrolanguage (hai), and treats Northern Haida (hdn. Alternate Names: Masset, Xaad Kil) and Southern Haida (hax. Alternate Names: Skidegate, Xaaydaa Kil) as separate languages.

[**HAISLA**] The Haisla language, *X̱a'islaḱala* or *Ā́ẖis̱laḱala*, is a First Nations language spoken by the Haisla people of the North Coast region of the Canadian province of British Columbia, who are based in the village of Kitaamat 10 km from the town of Kitimat at the head of the Douglas Channel, a 120 km fjord that serves as a waterway for the Haisla as well as for the aluminum smelter and accompanying port of the town of Kitimat. The Haisla and their language, along with that of the neighbouring Heiltsuk and Wuikinuxv peoples, were in the past incorrectly called "Northern Kwakiutl". The name

Haisla is derived from the Haisla word ɣà'isla or ɣà'isəla, meaning 'dwellers downriver'. Haisla is a Northern Wakashan language spoken by several hundred people. Haisla is geographically the northernmost Wakashan language. Its nearest Wakashan neighbor is Oowekyala (Wiki).

[**HAITIAN CREOLE**] Haitian Creole (/ˈheɪfən ˈkriːoʊl/; Haitian Creole: kreyòl, pronounced: [kɣejɔl]) is a French-based creole language spoken by 9.6–12 million people worldwide, and the only language of more than 95% of Haitians. It is a creole language based largely on 18th-century French with influences from Portuguese, Spanish, Taíno, and West African languages. Haitian Creole emerged from contact between French settlers and African slaves during the Atlantic Slave Trade in the French colony of Saint-Domingue (now the Republic of Haiti). Haitians are the largest creole-speaking community in the world (Wiki).

Haitian Creole does have to its credit some outstanding adaptations of major works of literature (*Antigone*, *Tartuffe*) as well as several novels."

"Haitian Creole comprises one of the four principal groups of French Creole languages: the others being: 1) those of the Lesser Antilles, 2) of Guyana and Louisiana, and 3) of the Mascarene Archipelago in the Indian Ocean. Because of significant differences in vocabulary these languages are not always mutually intelligible.... Today there is a tendency... to refer to these languages simply by the place where they are spoken: Mauritian or Haitian instead of Mauritian Creole or Haitian Creole. However, in the case of Haitian Creole, most native speakers call the language simply *kreyòl*... Haitian Creole is the principal language of communication in the Republic of Haiti, occupying the western third of the island of Hispaniola. It is the sole language for approximately 85% of the population of nearly seven million." Haitian Creole has been designated, along with French, as the official language of the republic. [**HALBI**] Halbi (also Bastari, Halba, Halvas, Halabi, Halvi, Mahari, Mehari) is an Eastern Indo-Aryan language, transitional between Oriya and Marathi. It is spoken by 500,000 people across the central part of India. It uses SOV word order (subject-object-verb), makes strong use of affixes, and places adjectives before nouns. It is often used as a trade language, but there is a low literacy rate. The Mehari dialect is mutually intelligible with the other dialects only with difficulty. There are an estimated 200,000 second-language speakers (as of 2001). In Chhtisgarh Schooled males are fluent in Hindi. Some first language speakers use Bhatari as second language. Halbi is written in the Oriya & Devanagari script (Wiki).

[**HALKOMELEM**] Halkomelem /hɔlkə'meɪləm/ (Halq'eméylem in the Upriver dialect, Hulqumínum in the Island dialect, and hənqəminəm in the Downriver dialect) is a language of various First Nations peoples in British Columbia, ranging from southeastern Vancouver Island from the west shore of Saanich Inlet northward beyond Gabriola Island and Nanaimo to Nanoose Bay and including the Lower Mainland from the Fraser River Delta upriver to Harrison Lake and the lower boundary of the Fraser Canyon. The word "Halkomelem" is an anglicization for the language, which has three distinct dialect groups: (1) an Island group, spoken by six separate but closely related First Nations on Vancouver Island and adjoining islands on the west side of the Strait of Georgia: the Snuynemuxw, Nanoose, Chemainus, Cowichan, Halalt, Lake Cowichan, Lyackson, and Penelakut, (2) a Downriver group, spoken by the Musqueam, Tsawwassen, Kwantlen, Tsleil-Waututh, Qayqayt, Kwikwetlem, and Katzie First Nations, and (3) an Upriver group, the Upper Sto:lo, spoken from the Matsqui First Nation on upstream to Yale (Wiki).

"We cannot hope to retain the language as it was once spoken. We can, however, preserve the basis of it, and this little volume is an effort to record it in ordinary print as it was originally spoken. During recent years, I have tape-recorded interviews with a number of our older native people in an effort to obtain material for publication.... These interviews have been revelation to me of the quiet dignity, modesty and sincerity of our native people. There was a total absence of ill-chosen words or idle gossip or of any attempt to create a false impression. ... Much that is of interest in native culture is lost with the passing of a language. This little vocabulary is published in the hope that it will stimulate interest in and help to preserve the Halkomelem language" (Preface).

Second edition **1969:** [LILLYbm] *A Vocabulary of Native Words in the Halkomelem Language as used by the Native People of the Lower Fraser Valley, B.C. [English-Halkomelem]*, by Oliver N. Wells. "The first edition, which was published in 1965, contained a basic list of [English] words originally published in 1836 which was used by ethnologists to classify numerous tribes... This second edition contains a list of over twelve hundred words given alphabetically." This second edition is thus the first true attempt at a dictionary of the language.

"The Hanga people live in the Northern Region of Ghana in an area to the north of Damongo...An accurate estimate of the population is not known... The total population may be about four thousand.... The main language of the area is Gonja and many adult Hanga people are bilingual in it, though the degree of fluency is questionable.... The only known linguistic articles [on this language] are by the present authors. Field work has been carried out at Langantere. Commencing in April 1971, a total of twenty four months were spent in this area prior to the completions of the original manuscript of this phonology in 1974" (Introduction).

[**HANI**] The Hani languages is a group of closely related but distinct languages of the Loloish (Yi) branch of the Tibeto-Burman linguistic group. Approximately 1.5 million people speak these languages, mainly in China, Laos, Burma (Myanmar), and Vietnam; more than 90% of the speakers of these languages live in China. Various ethnicities that

use Hani languages are grouped into a single class recognized nationality named Hani after the largest subgroup. In China, the languages of this group—which include Hani proper, Akha, and Hao-Bai (Honi and Baihong)—are considered dialects. Western scholars, however, have traditionally classified them as separate languages (Wiki).

"This is the first Hani-English English-Hani dictionary to be published. Compiled over a period of five years, it contains nearly 30,000 entries in total. There are some 1.3 million Hani people living in Yunnan Province, in the extreme Southwest of China. Their language is a member of the Lolo-Burmese subgroup of Tibeto-Burman family of languages" (from the front inside flap of the d.j.). "Considering the closeness of the Hani and Akha languages, it is likely that they were one language some 1,000 to 1,200 years ago.... Most of the Hani live in a subtropical mountainous area with fertile land and plentiful rainfall. For well over a thousand years they have been building and planting beautiful rice terraces up the sides of the Ailano and other mountains in that area.... The Hani believe that there are twelve souls that inhabit the body.... If one or more of these souls leave the body illness results.... The Hani people did not have a script until 1957, when the orthography now being used was devised by linguists in the People's Republic of China. The script is based on the Pinyin system, using letters from the Roman alphabet" (The Hani People and Language).

The Hanunóo language shows strong ... affinities to the central group of Philippine languages such as Tagalog, Hiligaynon, and Bikol... Like all other Philippine languages, Hanunóo belongs to the Malayo-Polynesian (Austronesian) linguistic family."

[**HARARI**] Harari is the language of the Harari people of Ethiopia. According to the 1998 Ethiopian census, it is spoken by 21,283 people. Most of its speakers are multilingual in Amharic and/or Eastern Oromo. Harari is closely related to the Eastern Gurage languages Zay and Silt'e. Locals or natives of Harar refer to it as Gey sinan "language of the City" (Gey is the word for "city" and how Harari speakers refer to Harar, whose name is an exonym). Originally written in the Arabic script, it has recently converted to the Ge'ez script (Wiki).

"The caution necessary for the stranger who would avoid exciting the suspicions of an African despot and Moslem bigots prevented my making any progress, during my short residence at the capital, in the Harari language. But once more safe among the Girhi Mountains, circumspection was no longer necessary. The literati who assisted in my studies were a banished citizen of Harar... an old Bedouin... and a Girhi Somal celebrated for his wit, his poetry, and his eloquence.... Our hours were spent in unremitting toil: we began at sunrise, the hut was ever crowded with Bedouin critics, and it was late at night before the manuscript was laid by. On the evening of the third day, my three literati started upon their feet, and shook my hand, declaring that I knew as much as they themselves did" (Preliminary Remarks, p. 511) followed by further detailed discussion of the genesis of this appendix.

**[HARSUSI]** Harsusi (also known as Ḥarsūsī, Harsiyyet, Hersyet, or Harsi `Aforit) is a Semitic language of Oman, spoken by the Harasis people. It is classified as a moribund language, with an estimated 600-1000 speakers in Jiddat al-Harasis, a stony desert in south-central Oman. It is closely related to Mehri. Harsusi first came to the attention of outside scholars in 1937, when it was mentioned by Bertram Thomas in his book *Four Strange Tongues of South Arabia*. While certain scholars have claimed that Harsusi is a dialect of the more widely spoken Mehri language, most maintain that they are mutually intelligible but separate languages. Harsusi, like all the Modern South Arabian languages, is unwritten, though there have been recent efforts to create a written form using an Arabic-based script. Because the Harasis people were for centuries the only human inhabitants of Jiddat al-Harasis, the language developed in relative isolation. However, as most Harasis children now attend Arabic-language schools and are literate in Arabic, Harsusi is spoken less in the home, meaning that it is not being passed down to future generations. UNESCO has categorised Harsusi as a language that is "definitely endangered" (Wiki).

Ethnologue: hss. Alternate Names: Harsi `Aforit, Hersyet, South Arabian.

**1977:** [LILLYbm] *Harsusi Lexicon and English-Harsusi Word-list*, by T[homas] M. Johnstone. London: Oxford University Press, 1977. Harsusi-English, pp. [1]-152, and an English-Harsusi word-list, pp. [153]-181. Bibliography, pp. [xxvii]-xxviii. This is the first dictionary of the language. Second copy: IUW.

"Harsusi is one of the non-Arabic languages of Oman. The group of Modern South Arabian languages to which it belongs further includes Bathari, Mehri, Sheri and Socotri. The last three of these were fairly well documented around the turn of the century, but nothing had been published on Harsusi before this *Lexicon* except the word-list compiled by Bertram Thomas ["Four Strange tongues from South Arabia" 1938]. Harsusi is closely related to Mehri but has developed separately over a long period. There are now relatively few speakers left and Harsusi will probably be replaced by Arabic within a generation or two. The writer has worked in Arabia on all of the Modern South Arabian languages except Bathari and he includes comparative material from these languages, and from certain of the Omani Arabic dialects" (blurb from front flap of d.j.). "Harsusi is a dialect of Mehri, but it has incomparably fewer speakers....the Harasis probably number not more than 600. They live in small communities of about 12-16 people...Nowadays there are very few men in such a community because of the employment available with the oil company....the Harasis are of high social status and have none of the apologetic air which characterizes many speakers of Sheri or Socotri" (Introduction).

**[HARUAI]** Haruai (less commonly Harway) is one of two languages of the Piawi family of New Guinea. The language has borrowings from Kalam. Young men are likely to know Kobon and Tok Pisin, but many Haruai are monolingual. Commonly known as Waibuk, also Wiyaw, Wovan, Taman. Dialects are North Waibuk (Hamil), Central Waibuk (Mambar), South Waibuk (Arama); word taboo is practiced but does not impede communication (Wiki).

It is written using the Devanagari script. It is also considered to be the northernmost dialect of Hindi. It is similar to Braj Bhasha and has a ≈60% lexical similarity with Bagri. It is most widely spoken in the North Indian state of Haryana. The term Haryanvi is also used for people from Haryana. Rohtaki is considered the standard form (Wiki).

[**HASSANIYYA**] Hassānīya (Arabic: حسانية Ḥassānīya; also known as Hassaniyya, Klem El Bithan, Hasanya, Hassani, Hassaniya) is the variety of Maghrebi Arabic originally spoken by the Beni Ḥassān Bedouin tribes, who extended their authority over most of Mauritania and the Morocco's southeastern and Western Sahara between the 15th and 17th centuries. It has almost completely replaced the Berber language originally spoken in this region. Although clearly a western dialect, Hassānīya is relatively distant from other North African variants of Arabic. Its geographical location exposed it to influence from Zenaga-Berber and Wolof. There are several dialects of Hassaniya which differ primarily phonetically. Today, Hassaniya is spoken in Algeria, Libya, Morocco, Mauritania, Mali, Niger, Senegal and the Western Sahara (Wiki).

[**HATAM**] Hattam, also spelled Hatam, Atam and also known by the varietal name Borai or Mansim, is a divergent language of New Guinea. It is not closely related to any other language, and though Ross (2005) tentatively assigned it to the West Papuan languages, based on similarities in pronouns, Ethnologue and Glottolog list it as a language isolate or

small independent family. Following Reesink (2002), Glottolog lists Mansim, with rumours of 50 speakers, as a distinct language: "comparisons of old wordlists (e.g. von der Gabelentz & Meyer 1882) readily confirm this difference" (Wiki).

[**HAUSA**] Hausa (/ˈhɑʊsə/) (Yaren Hausa or Harshen Hausa) is the Chadic language (a branch of the Afroasiatic language family) with the largest number of speakers, spoken as a first language by about 35 million people, and as a second language by millions more in Nigeria, and millions more in other countries, for a total of at least 41 million speakers. Originally the language of the Hausa people stretching across southern Niger and northern Nigeria, it has developed into a lingua franca across much of western Africa for purposes of trade. In the 20th and 21st centuries, it has become more commonly published in print and online. There are a few traditional dialects, differing mostly due to tonality. The language was commonly written with a variant of the Arabic script known as ajami but is more often written with the Latin alphabet known as book (Wiki).

"The Hausa language is, as far as tropical Africa is concerned, undoubtedly the language of the future. Spoken as it already is by one per cent of the population of the globe and with every prospect of obtaining a still wider currency in the near future, it seems almost incredible that it should have been so little studied in the past. The disgrace, if such it be, of this neglect rests almost entirely upon our fellow countrymen.... The fact that England has included the whole of this vast area within her sphere of influence, which means that the future of this great race lies so to speak in our hands, renders the publication of a Hausa-English dictionary the more urgent" (Preface, Vol. I). "This volume, though issued separately for the convenience of students, is intended to be used as a companion volume to the Hausa-English Dictionary already issued.... This dictionary has been seven years in course of preparation" (Preface, Vol. II).

Includes systematic classified vocabulary, Hausa-German-French-English, pp. 143-292. The Foreword includes a detailed summary and critique of earlier dictionaries and vocabularies. Second copy: IUW.

"The present work is based on a critical review of all previous material. I had the opportunity to check the results of this research with a Hausa speaker who had been for some time in Europe. For the first time in the present book, the Hausa language appears with precise indication of its pronunciation and accentuation. I consider this the main advantage of this book" (Foreword, tr: BM).

**1906b:** [LILLYbm] *Wörterbuch der Hausasprache. 1. Teil: Hausa-Deutsch*, by Adam Mischlich [1864- ]. Berlin: Georg Reimer, 1906. Later red cloth lettered in gold, with what appears to be WG (Walter de Gruyter) publisher's device. This has the appearance of a photographic reprint, although there is no indication of any kind that it is reprinted. Pp. I-IX X-XXXII XXXIII-XXXIV, 1 2-692. First edition. Zaunmüller, col. 174. Hendrix 734. Series: Lehrbücher des Seminars für orientalische Sprachen, Bd. 20. Hausa-German, pp. [1]-692. Second copy: IUW.

"The present work was compiled in Kete-Kratshi in the backlands of Togo. The author traveled to West Africa for the first time in 1890. In the first seven years he studied as a Missionary the Ga, or Acra, language as well as the Twi, or Asante, language. From that point on, after entering service for the government of Togo, he studied Hausa as far as time permitted" (Foreword, tr: BM).

**1908:** [LILLYbm] *Hausa Stories and Riddles, with Notes on the Language etc. and a concise Hausa Dictionary*, by Hermann G. Harris. Weston-Super-Mare: The Mendip Press, [1908]. Cover title: *Hausa Stories and Riddles with Notes and a Copious Hausa-English Dictionary*. Dictionary with separate title page: *A Concise Hausa Dictionary containing over twelve hundred common words and many idioms... 1<sup>st</sup> Edition*. Original cream cloth, lettered in black. Pp. i-v vi-xv xvi, 1-111 112, ff. 1 2-28, pp. 29-33 34-36. First edition. Not in Zaunmüller. Hendrix 723. Hausa-English, ff. 3-28. The separate title page for the dictionary, dated 1908, notes: "Published separately, Price 2/-, cloth 8vo. of the Author, post free" [see Hendrix 721/722]. This copy inscribed "With the author's compliments" in ink on the front free endpaper. The author was "eleven years engaged as a missionary among Arabs and Hausas in Tripoli, Tunisia, the Algerian Sahara, and Egypt".

"I have been greatly indebted to the Hausa Dictionaries of Dr. Schön and the Rev. Canon, M.A., and to Mischlich's *Hausa Wörterbuch* in preparing the notes to these stories [see above for all three]. I am also indebted to ... Major J. A. Burdon, M.A. for some notes and corrections in the Dictionary" (Preface).

"The question has, not unnaturally, arisen whether one who has never been in Hausaland proper is competent to produce a work on its language... The author of this book was in constant touch, for about eleven years, with the Hausa Colonies in Tripoli, Tunis and the Algerian Sahara, as well as in Egypt, meeting also many of them passing through North Africa either as pilgrims to Mecca or as traders. He employed Hausas for some time as his cook, personal attendant and caravan servants. He shared his bedroom and meals, too, with a Hausa Negro for some time, and thus obtained and took down from dictation the stories here printed, which, along with a Hausa Dictionary, he began to compile in the year 1892" (A Personal Question).

**1909:** [LILLYbm] *Dictionnaire haoussa*, by M[oise Augustin] Landeroin & J[ean] Tilho [1875-1956]. Paris: Imprimerie nationale, 1909. At head of title: République française, Ministère des colonies, Mission Tilho. Label of the Librairie Émile Larose pasted over imprint. Original tan wrappers, lettered and decorated in black. Pp. [6] I II-

XV XVI, 1-3 4-172, <sup>2</sup>1-3 4-163 164. First edition. Zaubmüller, col. 174 (giving publication date of 1910). Hendrix 727. Hausa-French, pp. [3]-172, and French-Hausa, pp. <sup>2</sup>[3]-163. Second copy: IUW.

"The Hausa language is simple and soft, expressive and clear, relatively rich, harmonious and nuanced, does not pose any great grammatical or phonetic difficulties, and is easy for foreigners; it has already spread over all of central Africa.... The work on the Hausa language offered here to the public is intended for the use of Europeans called to live in the land of the Hausa by giving them the means to learn quickly what they need in order to understand the dialect and thus easily check the accuracy of the black interpreters we are forced to use" (Preface, tr: BM).

**1917:** [IUW] *Hausa grammar, with exercises, readings, and vocabularies*; by Charles H. Robinson. 4th ed. London, K. Paul, Trench, Trübner & co., ltd., 1917. vi p., 1., [xi]-xii, 218 p. front. (facsim.) 2 fold. tab. (in pocket) 19 cm. Series: Trübner's collection of simplified grammars.

**1923:** [LILLYbm] *A Practical Hausa Grammar, With Exercises, Vocabularies and Specimen Examination Papers*, by F[rank] W[illiam] Taylor. Oxford: The Clarendon Press, 1923. Original dark blue-green cloth over boards, lettered in gold. Pp. 1-3 4-141 142-144. First edition. Not in Zaubmüller. There was a second edition in 1959. Hausa-English, pp. [113]-129, and English-Hausa, pp. 130-141. "The present work is the first to take into account, *inter alia*, the existence of tones in the language... Hitherto, no two writers on the Hausa language have agreed in the matter of spelling, and this was due primarily to the fact that none of them were in a position to make a scientific analysis of the sounds of the language. I have endeavoured to mark, in the text, and in the Hausa-English vocabulary...all the long vowels, and also the tones of the more common words..." (Preface).

**1934:** [LILLYbm] *A Hausa-English Dictionary and English-Hausa Vocabulary, compiled for the Government of Nigeria*, by G.P. Bargery. London: Oxford University Press, 1934. Original dark blue cloth, lettered in gold. 1228 pp. First edition. Zaubmüller, col. 174 (dated 1951). Hendrix 717. With the bookplate of Helen E. Hause, author of *Terms for Musical Instruments in the Sudanic Languages: a lexicographical inquiry* (Baltimore: American Oriental Society, 1948).

"This work owes its inception to Sir Hugh Clifford...who, while Governor of Nigeria, decided that a Hausa dictionary should be prepared under the auspices of the Government, and he entrusted to me the work of its compilation."

**1949:** [LILLYbm] *Dictionary of the Hausa Language*, by R[oy] C[live] Abraham & Malam Mai Kano. [London]: Published on behalf of the Government of Nigeria by the Crown Agents for the Colonies, 1949. Original brown cloth over boards, lettered in black. Pp. i-iv v-xxvii xviii, 1 2-992. First edition. Zaubmüller, col. 174. Hendrix 716. With printed binding sticker: "The poisonous insecticide solution used in binding this book has been specially prepared in order to render the work impervious to the ravages of insects." Hausa-English, pp. [1]-982, with addenda, pp. [983]-992. Second copy: IUW.

"The present work is the outcome of twenty-three years devoted to the study of Hausa, and Army service has resulted in the necessity of its being completed in Egypt, Abyssinia, Kenya, South Africa, France, Italy, and Russia. War conditions also have much delayed the printing. My two years' collaboration in Dr. Bargery's Dictionary of 1934 consisted largely in introducing a coherent grammatical scheme into his work and

reducing the millions of loose slips into the form of numbered paragraphs...For what was sound in that work...we must be for ever grateful to him. With the completion of that book, I became freed from any restrictions and a freelance in the field of lexicography ...To lay any claim to completeness in the case of so virile a language would be ridiculous, but it is hoped that the lacunae will be found to be few. The language is developing so rapidly that it would be no exaggeration to say that a fresh edition will be called for in twenty years [the second edition in fact appeared in London in 1962, see below]" (Preface).

Second edition **1962**: [IUW] *Dictionary of the Hausa language*, by Roy Clive Abraham. [2d ed.] London, Univ. of London Press [c1962] xxvii, 992 p.

Library binding, incorporating original black, green and white front wrapper, with the image of a television set broadcast. Includes a vocabulary of key words and phrases, pp. 86-90.

"The Hausa By TV Programme telecast by Nigerian Television Kaduna is designed to teach the language through a functional knowledge approach. For this reason heavy use is made of situational examples, with the points of grammar being discussed almost as an aside, but getting more attention as the course progresses.... This booklet contains the Study Material designed to go with the programme. It is a step by step reduction of the lessons, now presented in such a way that it can be used on its own because of the annotations. There is also a vocabulary of key words and phrases" (Introduction).

**1986?:** [IUW] *Ko ede Hausa kso gbadun Gambari = Koyi Hausa ka ji daɗin bahausha*, lati owo Apostle J. Ola. Ojo. Funtua, Katsina Province, Nigeria: Cherubim & Seraphim Movement, [1986?]. Pp. [6] 1-94. 21.3 cm. Original orange wrappers, lettered and decorated in black. Hausa-Yoruba, pp. 1-94, with both words and phrases. Except for the brief Preface, the book is entirely in Hausa and Yoruba.

"In [this book] Mr. J. Ola Ojo has made a notable contribution to the prime task of our nation: the task of keeping Nigeria together—as one united country. For the book will be found to be a source of instruction, not only to the bookworm, but also to school children, the would-be linguistic and, yea, the public at large. This book which, as far as I am aware, is the first of its kind in Hausa-Yoruba vocabulary should appeal to all persons interested in learning either or both of the languages, and it should appeal particularly to schools" (Preface, signed "Printer").

"The literary form of the Hausa language is based on the Kano dialect, which serves as a basis for this dictionary as well. Other dialect forms (Sokoto, Zaria, Katsina) are only sparingly included. ... As a result of social, political, economic and cultural developments the vocabulary of Hausa has expanded significantly in recent years. Present-day political, economic and scientific texts, nor literary works, can not be translated satisfactorily with the dictionaries available up to now. The present work contains about 8,500 entries and a further 4,000 illustrative phrases and uses... [based on] the author's reading of original literature (belles lettres, scientific and technical, journalistic) over two decades, and checked with Hausa informants during a research stay in Nigeria in 1983" (Foreword, tr: BM).

"*Hausar baka* is a set of 3 videotapes comprising about 5 hours of natural interaction in Hausa. Filmed in and around Kano, Nigeria, the more than 90 individual video segments show a broad range of cultural milieus, from domestic interaction in families through a tour of Daura, the site where, according to legend, the seven Hausa states originated. The segments are arranged in groups, beginning with greetings and simple question-answer dialogs, advancing through more complex interaction and narrative. Over fifty different individuals--men and women, children and adults--appear in the videos, representing a broad range of speaking styles" (from the Hausar baka website). The videos are copyright 1996. They are issued with a complete transcript of the videos, and this vocabulary.

[**HAVASUPAI-WALAPAI-YAVAPAI**] Havasupai–Hualapai (Havasupai–Walapai) is the Native American language spoken by the Hualapai (Walapai) and Havasupai peoples of northwestern Arizona. It is closely related to the Yavapai language. Havasupai–Hualapai belongs to the Pai branch of the Yuman–Cochimí language family, together with Yavapai and Paipai, which is spoken in northern Baja California. The two groups have separate sociopolitical identities, but a consensus among linguists is that the differences in speech among them lie only at the dialect level, rather than constituting separate languages (Campbell 1997:127; Goddard 1996:7; Kendall 1983:5-7; Mithun 1999:577-578). The Havasupai and Hualapai report that they speak the same language, and indeed the differences between their dialects have been reported as "negligible"

(Kozlowski 1976:140). For a bibliography of texts, grammars, and dictionaries that document the language, see Langdon 1996 (Wiki).

**1946:** [LILLYbm] *Comparative Vocabularies and Parallel Texts in Two Yuman Languages of Arizona*, by Leslie Spier. Albuquerque: The University of New Mexico Press, 1946. Original gray wrappers, lettered and decorated in black. Pp. 1-5 6-150 [2]. First edition. University of New Mexico Publications in Anthropology, Number 2. Not in Zaunmüller. Includes classified comparative vocabularies of Havasupai and Maricopa, with English equivalents, pp. 15-141. Second copy: IUW.

"The present paper endeavors to show the relationship of two mutually unintelligible Yuman tongues of western Arizona, Havasupai and Maricopa. [footnote: The Havasupai were visited in 1918, '19 and '21 for the American Museum of Natural History and the Southwest Society of New York; the Maricopa in 1929-30 for the University of Chicago and in 1930-31 for Yale University]....Culturally the Havasupai and Maricopa are quite different. The former tribe, in northern Arizona, shares the relatively simple culture of the Great Basin tribes with the neighboring highland Yumans and Athapascans. The Maricopa, located on the Gila River, participate in the culture of the Yuman tribes of the lower Colorado. The differences are so great that many culture elements of one group are not known to the other" (Introduction).

[**HAWAIIAN**] The Hawaiian language (Hawaiian: 'Ōlelo Hawai'i, pronounced [ʔo:'lelo hə'vɛjʔi]) is a Polynesian language that takes its name from Hawai'i, the largest island in the tropical North Pacific archipelago where it developed. Hawaiian, along with English, is an official language of the state of Hawaii. King Kamehameha III established the first Hawaiian-language constitution in 1839 and 1840. For various reasons, including territorial legislation establishing English as the official language in schools, the number of native speakers of Hawaiian gradually decreased during the period from the 1830s to the 1950s. Hawaiian was essentially displaced by English on six of seven inhabited islands. In 2001, native speakers of Hawaiian amounted to under 0.1% of the statewide population. Linguists are worried about the fate of this and other endangered languages. American missionaries bound for Hawai'i used the phrases "Owhihe Language" and "Owhyhee language" in Boston prior to their departure in October 1819 and during their five-month voyage to Hawai'i. They still used such phrases as late as March 1822. However, by July 1823, they had begun using the phrase "Hawaiian Language" (Wiki).

With an Account of the Present State of the Sandwich Islands, and a Vocabulary of their Language*, by Archibald Campbell. Edinburgh: A. Constable & Co., 1816. Nineteenth-century half-calf and marbled paper over boards. 288 pp. Includ. front. (folding map). First edition. Not in Zaunmüller. Not in Pukui/Elbert 1971. English-Hawaiian, pp. 227-255 as Appendix I, including a short series of "dialogues" in the two languages. Earlier Hawaiian vocabularies had appeared in the journals of Cook's voyages, in Dixon, in del Pino, and in Lisiansky. The first book (132 pp.) devoted entirely to English-Hawaiian vocabulary was that of Lorrin Andrews published in Hawaii in 1836 (see below). The

first English-Hawaiian dictionary was that of Artemas Bishop printed in Hawaii in 1845. Lorrin Andrews published his own full dictionary in Honolulu in 1865 (see below).

**1836:** [LILLY] *A vocabulary of words in the Hawaiian language*, by Lorrin Andrews (1795-1868). Lahainaluna [Hawaii]: Press of the High School, 1836. 132 pp. Unprinted tan wrappers, almost certainly original. First edition. Zaubmüller 174. Sabin 1000017; Streeter 3758; Lingenfelter, *Presses of the Pacific Islands*, pp. 33-44. Hawaiian-English, pp. [1]-131, with a final p. 132 listing Hawaiian words "introduced into the Hawaiian language and of course with a sufficiency of foreign letters to show their derivation, and distinguish them from native words by their orthography." First dictionary of Hawaiian. First dictionary printed in the Pacific.

"The Hawaiian press was first established in Honolulu in 1822 and later at Lahaina in 1834 by Lorrin Andrews, a missionary who claimed some experience in printing. In June of 1834 it was voted by the mission that Andrews prepare a vocabulary of the Hawaiian language. He drew upon a manuscript vocabulary of words collected by Elisha Loomis, one of the first colonizers of the islands under Hiram Bingham; and, a manuscript vocabulary of words was 'arranged, it is believed, in part by Mr. Ely, at the request of the Mission, and finished by Mr. Bishop. A copy of this was received and transcribed by [Andrews] in the summer of 1829...In using this manuscript, the same method was taken as with the vocabulary of Mr. Loomis. New words, new definitions of words before collected, increased the size of the book to a considerable extent' (compiler's Preface to the 1836 edition [which gives a detailed description of the genesis of the work])" (Bookseller's description: Rulon-Miller).

Second copy: LILLY, original sheep-backed blue paper-covered boards (and consequently a tall copy - just over 9"); sheep a bit scuffed and rubbed, small abrasion on front pastedown, all else very good. Contained in a blue cloth clamshell box. Early ownership signature on pastedown of "Dinwiddie Brazier Phillips, U. S. Navy." A native Virginian who entered the United States Navy as assistant surgeon in 1847, Phillips resigned as Passed Assistant Surgeon, U.S. Navy, on May 6, 1861. He joined the Confederate States Navy and served as surgeon on the CSS Virginia, and was present at the Battle of Hampton Roads. He later served on the CSS Richmond and the CSS Tennessee (bookseller's description: Rulon-Miller).

Second edition **1865:** [LILLYbm] *A dictionary of the Hawaiian language, to which is appended an English-Hawaiian vocabulary and a chronological table of remarkable events*, by Lorrin Andrews [1795-1868]. Honolulu, H. I.: Printed by H. M. Whitney, 1865. Modern black half leather, lettered in gold, utilizing original black marbled paper and boards. Pp. *i-iii* iv-xvi, 17 18-559 560. Second edition, a substantial enlargement of Andrews' 132-page vocabulary of 6,000 words published in 1836. Zaubmüller, col. 174 (listing the 1836 and 1922 editions only). This is the first two-way dictionary of the Hawaiian language. The author's preface includes a detailed description of how the present dictionary was compiled from special interleaved copies of the original Vocabulary belonging to various individuals (including the author) in which new words had been noted.

"The history of Hawaiian Lexicography is short.... [*A Vocabulary of Words in the Hawaiian Language*] was commenced at Honolulu in 1835, but finished at the press of the then High School at Lahainaluna and

published early in 1836. It consisted of 132 pages octavo, and contained a little over 6,000 words, and has been the principal Vocabulary in use until the present time.... The number of words in this [new] dictionary is about 15,500. The author would here state that four-fifths of the work were completed before he had any intimation that it would ever be printed. It was written solely for his own amusement and information.... An appropriation of money for the dictionary passed by the Legislature of 1860 without his knowledge, was the first intimation the Author had that such a work was desired by the Foreign community on the Islands...The work is now submitted to a candid public. The Author hopes and prays that as God has spared his life to bring it to a close, he will in some way make it useful to the increase of intelligence in this Hawaiian Kingdom" (Author's Preface).

Third edition **1922**: [LILLYbm] *A Dictionary of the Hawaiian Language*, by Lorrin Andrews, revised by Henry H. Parker. Honolulu: The Board of Commissioners of Public Archives of the Territory of Hawaii, 1922. Rebound in tan buckram, with black leather labels lettered in gold. 674 pp. First revised edition. Zaubmüller, col. 174. Originally published as a Vocabulary in 1836 (6,000 words) and then enlarged into a dictionary in 1865. "Andrews dictionary has long been out of print and increasing interest in Polynesian linguistic studies, the need of an authoritative reference book for the spelling, pronunciation, and definition of Hawaiian words, led to arrangements for the preparation of a new Hawaiian dictionary under the direction of the Board of Commissioners of Public Archives. A legislative act of 1913 made provision [for the funding of this project]."

**[HAWAII PIGDIN]** Hawaiian Pidgin English, Hawaiian Creole English, HCE, or locally known as simply Pidgin, is a creole language based in part on English, spoken by many residents of Hawaii. Although English and Hawaiian are the co-official languages of the state of Hawaii. Hawaiian Pidgin is used by many Hawaii residents in everyday casual conversation and is often used in advertising targeted toward locals in Hawaii. In the Hawaiian language, Hawaiian Creole English is called "'ōlelo pa'i 'ai", which literally means "pounding-taro language". Despite its name, Hawaiian Pidgin is not a pidgin, but rather a full-fledged, nativized, and demographically stable natural language. It did, however, evolve from various real pidgins spoken between ethnic groups in Hawaii (Wiki).

[**HEBREW (pre-1850)**] Hebrew (/ˈhiːbruː/; עברית, Ivrit [ʔivʻit] ( listen) or [ʕivʻit]) is a language native to Israel, spoken by over 9 million people worldwide, of whom over 5 million are in Israel. Historically, it is regarded as the language of the Israelites and their ancestors, although the language was not referred to by the name Hebrew in the Tanakh. The earliest examples of written Paleo-Hebrew date from the 10th century BCE. Hebrew belongs to the West Semitic branch of the Afroasiatic language family. The Hebrew language is the only living Canaanite language left.

Hebrew had ceased to be an everyday spoken language somewhere between 200 and 400 CE, declining since the aftermath of the Bar Kokhba revolt. Aramaic and to a lesser extent Greek were already in use as international languages, especially among elites and immigrants. It survived into the medieval period as the language of Jewish liturgy, rabbinic literature, intra-Jewish commerce, and poetry. Then, in the 19th century, it was revived as a spoken and literary language, and, according to Ethnologue, had become, as of 1998, the language of 5 million people worldwide. After Israel, the United States has the second largest Hebrew-speaking population, with 220,000 fluent speakers, mostly from Israel. Modern Hebrew is one of the two official languages of the State of Israel (the other being Modern Standard Arabic), while premodern Hebrew is used for prayer or study in Jewish communities around the world today. Ancient Hebrew is also the liturgical tongue of the Samaritans, while modern Hebrew or Arabic is their vernacular. As a foreign language, it is studied mostly by Jews and students of Judaism and Israel, and by archaeologists and linguists specializing in the Middle East and its civilizations, as well as by theologians in Christian seminaries.

The Torah (the first five books), and most of the rest of the Hebrew Bible, is written in Biblical Hebrew, with much of its present form specifically in the dialect that scholars believe flourished around the 6th century BCE, around the time of the Babylonian captivity. For this reason, Hebrew has been referred to by Jews as Leshon Hakodesh ("the Holy Language"), since ancient times. (Wiki).

**1809:** [LILLY] *A compendious lexicon of the Hebrew language. In two volumes. Volume I. Containing an explanation of every word which occurs in the Psalms; with notes. Volume II. Being a lexicon and grammar of the whole language, by Clement C. Moore. New York: printed and sold by Collins and Perkins, 1809. 2 volumes, 8vo, pp. xiv, blank leaf, 474, [1] errata; [2], 541; hinges a little on the tender side and the text occasionally foxed, but all in all a very good copy in contemporary full mottled calf, gilt borders on covers, red and black morocco labels on gilt-paneled spines. First edition of the first Hebrew lexicon published in the Western Hemisphere. BAL 14338 noting that some copies have the blank leaf b2 excised; the blank is present in this copy; but blank leaf a2 in volume II is excised. Although Moore (1779-1863) is best remembered today for his immortal poem "Twas the Night Before Christmas," he was highly regarded in his day as a Hebrew scholar. It was largely through his generosity that the establishment of New York's General Theological Seminary was made possible, and it was here that he taught literature and languages until his retirement in 1850. His Lexicon of the Hebrew Language is described as "a credible piece of work which fulfilled his hope that the young countrymen would find it of some service as a sort of pioneer, in breaking down the impediments which present themselves at the entrance of the study of Hebrew" (see DAB). It is significant that it appears in the same year that the Psalms in Hebrew were first published in America, and is was doubtless designed as a companion volume (bookseller's description: Rulon-Miller).*

[**HEHE**] Hehe is a Bantu language spoken by the Hehe people of the Iringa region of Tanzania, lying south of the Great Ruaha River. It was reported to have "Ngoni" features, that is, words of a Zulu-like language introduced when conquered by a Ngoni or Zulu-like people in the early 19th century. However, other "Ngoni" speeches seem to have lost most of these distinctive features over the past 150-odd years, the language more resembling those of the neighbouring peoples. In 1977 it was estimated that 190,000 people spoke Hehe. There has been some Bible translation (British and Foreign Bible Society). Hehe may be mutually intelligible with Bena (Wiki).

[**HEILTSUK**] Heiltsuk /'heiltsək/, also known as Bella Bella and Haihais, is a dialect of the North Wakashan (Kwakiutlan) language Heiltsuk-Oowekyala that is spoken by the Haihai (Xai'xais) and Bella Bella First Nations peoples of the Central Coast region of the Canadian province of British Columbia, around the communities of Bella Bella and Klemtu, British Columbia. Bella Bella is the headquarters of the Heiltsuk Nation government. Heiltsuk is spoken in the villages of Bella Bella and Klemtu, both located on coastal islands in British Columbia not far from Bella Coola and Ocean Falls. It is one of the four Northern Wakashan languages, the others being Haisla (spoken in Kitimaat), Oowekyala (in Rivers Inlet), and Kwakwala (in Alert Bay, Port Hardy, and various settlements). Heiltsuk is considered to be a dialect of Heiltsuk-Oowekyala, which, like neighbouring Haisla and Kwak'wala, are part of the Northern Wakashan language group. Heiltsuk has both conversational and ceremonial forms (Wiki).

Ethnologue considers Heiltsuk a separate language, with Heiltsuk-Oowekyala one of its dialects): hei. Alternate Names: Hailhzaqvla.

[**HERERO**] The Herero language (Helelo, Otjiherero) is a language of the Bantu subfamily of the Niger–Congo group. It is spoken by the Herero and Mbanderu peoples in Namibia (206,000) and Botswana as well as by small communities in southwestern Angola. There are a quarter million speakers. Because of missionary Gottlieb Viehe's (1839–1901) translation of the Bible into Herero at the end of the 19th century, the spoken language was transcribed to an alphabet based on the Latin script. Father Peter Heinrich Brincker (1836–1904) translated several theological works and songs. Otjiherero is taught in Namibian schools both as a native tongue and as a secondary language, and is included as a principal material at the University of Namibia. Otjiherero is also one of the six minority languages that are used by the Namibian State Radio (NBC). Gamsberg Macmillan, as of 2008, has published the only dictionary [to include preliminary matter in Herero as well (see below)] (Wiki).

"Many years ago the late Dr. W.H. Bleek expressed the wish that I should write a Herero-English or English-Herero Dictionary.... Since... by the providence of God, I have been laid aside by a throat complaint which has prevented me from going on with active missionary work, I thought I might now try what, for want of leisure, I could not have attempted before" [includes a list of his sources]. (Preface). "Otyi-Herero is one of the finest and most original idioms of the great African Bantu family... [A] mere glance at the annexed tables will suffice will suffice to show that is wealth in pronominal forms is truly marvellous, and probably without a parallel in the whole realm of language."

Brincker was a missionary in the Rhein Missionary Society.

"It is no surprise that the meanings and grammatical forms of Herero given here often differ substantially from those in the "Grundzügen einer Grammatik des Herero mit Wörterbuch von Dr. C. H. Hahn, Berlin, 1857", for 27 years separate that work from the present one, years in which research on this language, in which the Gospel has been steadily preached, has of course not lain fallow.... It is our most fervent desire, and thus a goal of this work, to clear the way linguistically for the Germans to Kuando... and the upper and middle Zambesi ... by way of Okavango.... Both of the dialects dealt with in the present volume, if not spoken everywhere, are at least understood. The treasures of this fertile and well-watered region... could be reached and used just as easily by Germans as by the English traders and hunters who now (for the past year) have been transporting their goods by ox wagon from Walfischbai to Kuando. The fever in those regions doesn't appear to be nearly so dangerous as commonly believed.... What an extensive area the Mission has already made accessible to English trade!--One should note that, and act before it is too late.--" (Preface, tr: BM).

"Since the land of the Hereros has been placed under the protection of the German empire and more and more Germans are settling in this country, there has been a natural increase in interest in the language of the inhabitants. There is a noticeable desire among the new settlers for a practical introduction to the major elements of the Herero language. Others, particularly missionaries and officials, require a more detailed grammar of the language. Linguists in Germany wish a more scholarly treatment. I have tried my best to meet all these needs in this little book.... In compiling the attached lexicon I had to keep within certain bounds, both in the words selected and their meanings and examples, to keep the book to a reasonable size. It is sufficient for everyday use. Anyone wishing a complete dictionary should turn to that of Brincker [see above]" (Foreword, tr: BM).

"We have lacked up to now a reliable and sufficient German-Herero dictionary...The present book is the result of years of hard research. I began in 1871 on the basis of a scant vocabulary by Missionary Rath that was filled with omissions, and I have been working on it ever since... My dictionary has one drawback of course. It contains many words and forms that are not to be found in Brincker's Herero-German dictionary. But I don't know how to remedy that. I have neither the time nor the strength to produce an Herero-German dictionary... The Herero [in German South-West Africa] are now scattered about on farms, trains, diamond fields, mines, and so on, where they can understand their German and Dutch employers only with difficulty... The serious consequences of such misunderstandings are only too obvious. It would also be a pity if under these conditions the Herero were to lose their language, and exchange it for one that is neither German nor Herero" (tr: BM).

[**HINDI, FIJI**] Fiji Hindi or Fijian Hindi, known locally as "Hindustani", is the language spoken by most Fijian citizens of Indian descent, though a small number speak other languages at home. Despite its name, it is not derived from the Hindustani language, but rather is a variety of Awadhi that was influenced by Bhojpuri and other Bihari languages. It has also borrowed a large number of words from the non-Indo-Aryan Fijian and English. A large number of words, unique to Fiji Hindi, have been created to cater for the new environment that Indo-Fijians now live in. First-generation Indians in Fiji, who used the language as a lingua franca in Fiji, referred to it as Fiji Baat, "Fiji talk" (Wiki).

[**HINDI, MODERN STANDARD: post-1947**] Hindi (Hindi: हिन्दी hindī), sometimes spelled हिंदी, also called Modern Standard Hindi (Hindi: मानक हिन्दी mānak hindī), is a standardised and Sanskritised register of the Hindustani language. Hindi is an official language of the Union of India, and the lingua franca of the Hindi belt languages. In the 2001 Indian census, 258 million people in India reported Hindi to be their native language. However, this number includes tens of millions of people who are native speakers of related languages but who consider their speech to be a dialect of Hindi. Hindi is the fourth-most natively spoken language in the world, after Mandarin, Spanish and English (Wiki)

"Hindi was originally a variety of Hindustani spoken in the area of New Delhi. Its development into a national language had its beginnings in the colonial period, when the British began to cultivate it as a standard among government officials... Urdu by origin is a dialect of Hindi spoken for centuries in the neighborhood of Delhi... In time it came to be called Urdu ("camp language") and after further Moslem conquest became the lingua franca over much of the Indian subcontinent.... When independence was achieved in 1947, Hindi was chosen as India's national language, but its failure to win acceptance among speakers of other languages has forced it to share the title of official language with English... Hindi and Urdu are virtually the same language" (Katzner).

[**HINDUSTANI: pre-1947**] Hindustani (Hindustani: हिन्दुस्तानी,[a] ہندوستان[ب]) [ɦɪɳ̪ˈɖuːs̪ˈt̪ɑːni], lit. "of Hindustan") historically also known as Hindavi, Dehlvi, and Rekhta, is the lingua franca of North India and Pakistan. It is an Indo-Aryan language, deriving primarily from the Khariboli dialect of Delhi, and incorporates a large amount of vocabulary from Sanskrit, Persian, Arabic and Chagatai. It is a pluricentric language, with two official forms, Modern Standard Hindi and Modern Standard Urdu, which are its standardised registers, and which may be called Hindustani or Hindi-Urdu when taken together. The colloquial languages are all but indistinguishable, and even though the official standards are nearly identical in grammar, they differ in literary conventions and in academic and technical vocabulary, with Urdu adopting stronger Persian, Turkic and Arabic influences, and Hindi relying more heavily on Sanskrit. Before the Partition of India, the terms Hindustani, Urdu, and Hindi were synonymous; all covered what would be called Urdu and Hindi today (Wiki).

Ethnologue now treats Hindustani as two separate languages: Hindi (Modern Standard Hindi): hin; and Urdu (Modern Standard Urdu): urd.

With numerous long vocabulary lists, Portuguese-Hindustani, arranged by parts of speech, thematically, etc.

**1790:** [LILLYbm] *A Dictionary English and Hindoostanee to which is affixed a Grammar of the Hindoostanee Language*, by John Gilchrist. Calcutta: printed by Stuart and Cooper, 1786, 1790. Contemporary full leather, bound in two volumes, with substantial water damage and worm holes, affecting text in minor ways on several pages. Pp. [8] i ii-liii liv, 1 2-487 488,<sup>2</sup>1 2-93 94, [2] 489-1032, <sup>2</sup>95 96-184 185-192. First edition. With printed dedication dated Calcutta, August, 1786. Zaunmüller, col. 181 (dated 1787-1790). English-Hindustani, pp. [Part I][1]-487, [Part II] 489-1032. Part II with separate title page dated 1790: *A dictionary, English and Hindoostanee, in which the words are marked with their distinguishing initials; as Hinduwee, Arabic, and Persian. Whence the Hindoostanee, or what is vulgarly, but improperly, called the Moor language, is evidently formed.* The Grammar was published separately in 1796. The lengthy Preface bound at the front of this copy and recounting the whole history of the publication of the work is dated 1798. The rare 1786 title page present in this copy was superseded by a new title page [not present here] alluded to at the end of Part I of the first volume, with a new title and date of 1787, no longer mentioning the Grammar.

"As this work is now of a convenient size for being bound, it is absolutely necessary to divide the First Volume (*English and Hindostanee*) not only into Two Parts, but likewise to separate it entirely from the Grammar, which, from its Extent also, must now become a distinct publication, to be given *gratis*, however, along with the Appendix, to the *Original Subscribers only*. In consequence... along with this Number is forwarded a new Title Page, to supercede the old one.... To prevent, in future, the great Confusion and many Losses, which have already ensued from dispatching the Work by Dak, the Author is reduced to the disagreeable Necessity of discontinuing the Delivery of the Numbers, (*particularly at his own risk*), entirely, until the Rainy Season be over; when it is more than probable that the Second Part of the Volume First will be completely finished, and in this State it will be immediately distributed with Ease and Advantage to all Parties concerned" (p. 488).

"Had not the Author's constitution, prospects and spirits been already crushed by misfortunes during the prosecution of this First Volume, he would have boldly proceeded with his intended *Second Volume*, of the *Hindoostanee and English Dictionary*.... Those who are averse to be annoyed with a detail of the difficulties through which a Lexicographer in the present instance has persevered to the end of his labours, during a dreary period of 16 years, in a climate like India, had better turn over from page VI to XVI of the Preface without perusing it, than blame his want of philosophy to suffer in silence, or accuse him of weakly giving vent to sorrows that have preyed for years on his mind, in a recapitulation of them at length, throughout the above pages" (Advertisement).

**1817:** [LILLY] *A dictionary, Hindustani and English.* by John Shakespear London: Printed for the Author, by Cox and Baylis, 75, Great Queen-Street, Lincoln's-

Inn-Fields, and sold by Black, Parbury, and Allen, Booksellers to the Honourable East-India Co., Leadenhall Street, 1817. viii, 834, [6] p.; 40. 19<sup>th</sup>-century (or later) unprinted marbled paper wrappers. First edition. Zaunmüller 181. Lilly copy with presentation inscription dated 1830 from Francis Haughton to Julius Mohl (1800-1876), German orientalist, later professor of Persian at the College de France, who spent some years in the early thirties in Oxford and London. Hindustani-English only.

"Being thus derived from many different sources, and as a living language, so constructed, liable to continual increase and alteration, [Hindustani] is extremely copious, and very indeterminate both as to the words which may be used and as to the sense in which many words are adopted. Besides, **nothing in the shape of a dictionary has yet been published by those who use this dialect as their mother tongue.** Much indulgence, therefore, ought to be shewn to the first lexicographers of this language: and, though many deficiencies exist in Captain Taylor's collection, which Dr. William Hunter revised, augmented, and published at Calcutta in 1808, yet great praise is due to the authors of that work for the care and discernment which the general accuracy, good taste, and arrangement of it exhibit. The difficulty, which has already some time existed, of procuring the publication above alluded to, proves how acceptable it was to the publick...The following work, therefore, founded on the 'Hindoostanee and English' Dictionary of Dr. William Hunter, was prepared: and, though some thousands of Hindustani words...are here added to the collection...the present publication is by nearly one half less in bulk and expense than the foregoing" (Preface).

Second edition **1820**: [LILLYbm] *A dictionary, Hindustani and English*, by John Shakespear. London: printed for the author, by Cox and Baylis, 1820. Late 19<sup>th</sup> century library binding, maroon cloth over boards, lettered in gold. Pp. *i-v* vi-viii, *1* 2-884 885-888. Second edition, much enlarged. Preface slightly revised. Zaunmüller, col. 181, noting the first edition of 1817 (see above). Hindustani-English only.

**1820**: [LILLYbm] *A Dictionary, Hindoostanee and English, abridged from the Quarto Edition of Major Joseph Taylor, as edited by the late W. Hunter, M.D.*, by William Carmichael Smyth. London: printed for the editor, 1820. Contemporary brown half-leather and marbled paper over boards, red leather label on spine, lettered in gold. 866 pp. First edition thus. Not in Zaunmüller.

**1833**: [LILLYbm] *A Dictionary, English and Hinduwee*, by M.T. Adam. Calcutta: Printed at the School-Book Society's Press, 1833. Original blue-gray cloth over boards, unprinted. 232 pp. First edition. Not in Zaunmüller, who lists *Hindi Kôsha, a Dictionary of the Hindee language*, by the same author, with a publication date of 1829 in Calcutta. This copy with a pencil note "From the Auth" on the fly leaf. "An Anglo-Hinduwee Dictionary has long appeared to the compiler of the following work a desideratum, in order to facilitate a practical acquaintance with the language; of which, it may be justly said, it is one of the most extensively useful dialects spoken in India."

**1836**: [LILLY] *An English and Oordoo school dictionary, in Roman characters: with the accentuation of the Oordoo words, calculated to facilitate their pronunciation by Europeans*, by Joseph T. Thompson. Serampore: Printed for the author, 1836. 2nd ed., improved and enl. ix, 232 p.; 20 cm. Original light violet cloth (worn), with original printed label on spine. Not in Zaunmüller. First edition appeared in 1834. English-Urdu, pp. 1-231.

**1838:** [LILLY] *A dictionary of Oordoo and English, comp. from the best authorities, and arranged according to the order of the English alphabet*, by Joseph T Thompson.. Serampore: Printed for the compiler, 1838. 2 p. l., 604 p. Lilly copy lacks pp. 601-604. 26 cm. Contemporary worn brown calf over boards. First edition. A second edition seems to have been issued in 1853. Lilly copy with an ownership signature dated Calcutta 1848.

**1845:** [LILLYbm] *An introduction to the Hindustani language comprising a grammar, and a vocabulary, English and Hindustani; also short stories and dialogues, short stories in Persian and Nagari characters with some grammatical analysis; Hindustani composition or facilities for translating English into Hindustani and military words of command, Nagari and English*, by John Shakespear. London: W. H. Allen & Co., 1845. Contemporary brown half-leather and green cloth over boards, lettered and decorated in gold. Pp. [4] *i-vii* viii, 1 2-564 [4]. First edition. [Part II] English-Hindustani, pp. [88]-399, and military words of command in English and Hindustani, pp. 543-561. This copy with the ownership signature of George Moncrieff, dated Feb. 18, 1852; perhaps the father of Sir George Scott Moncrieff (1855-1924) author of *Canals & campaigns: an engineer officer in India, 1877-1885*.

"The author or compiler of the following sheets has before prepared and passed through the press, various editions of a Grammar, Dictionary, and two volumes of Selections, the utility of which is best proved by the uninterrupted public contenance shewn them, [nevertheless] a compendious work, made as easy as possible, has been judged still requisite" (Advertisement).

**1847:** [LILLY] *A dictionary, Hindustani and English*, by William Yates (1792-1845). Calcutta, Printed at the Baptist Mission Press, 1847. 589, 19 p. 22 cm. Contemporary brown half-leather and marbled paper over boards. First edition. Not in Zauhmüller. Hindustani-English, pp. [1]-564, appendices of irregular Arabic plurals and Arabic roots, pp. [565]-589, and a separately-paginated Hindustani-English Addenda, pp. [1]-19. The Preface does not mention any other dictionaries of the language. *A Pocket Dictionary of English and Hindustani* was published in London by Robert Dobbie in that same year.

"The Hindústání or Urdu is peculiarly the language of the Muhammadan population of Hindústán, and is hence the most widely diffused of all the Indian dialects... The Urdú is, moreover, as the name implies, the *camp* language of India; a circumstance easily accounted for by the long supremacy of the Musalmáns over this country" (Preface, signed Calcutta, January, 1847).

**1848:** [LILLYbm] *A Dictionary, Hindustani & English: to which is added a reversed part, English and Hindustani*, by Ducan Forbes. London: Wm. H. Allen and Co., 1848. Contemporary full brown leather over boards, with raised bands and an ocher label lettered in gold, by the SPCK in Madras, with their sticker. Pp. [Part I: Hindustani and English] *i-v* vi-xi *xii*, 1 2-585 586; [Part II: English and Hindustani, with separate title page] [2] 1 2-318. First edition. Zauhmüller, col. 181 (listing 1859, which was in fact a new edition--there were also editions in 1857 and 1866).

"A Dictionary, Hindustani and English, accompanied by a reverse part, English and Hindustani, has hitherto been a desideratum in this country. It must be obvious... that a Dictionary, intended to assist translation into both languages, which wants either counterpart, is essentially defective. After more than twenty years' experience... which

has convinced me that this deficiency, added to the exorbitant prices charged for Hindustani Dictionaries, has greatly impeded learners, I have endeavoured to remove this impediment by compiling a Dictionary of the principal colloquial language of India at once copious, portable, and of a moderate price" (Preface). This may be the first two-way dictionary of English and Hindustani.

Second edition, enlarged, **1866**: [LILLYbm] *A dictionary, Hindustani & English: accompanied by a reversed dictionary, English and Hindustani. The second edition, greatly enlarged., and much improved*, by Duncan Forbes. London: W.H. Allen & Co., 1866. Contemporary red leather, lettered and decorated in gold and blind; raised bands on spine. Pp. [4] i ii-viii, 1 2-802, 803-804, 1 2-318. Second edition, enlarged and improved. Zaubmüller, col. 181 (listing only the 1859 [should be 1857] second edition). This appears to be a new issue of the second edition. "In preparing this second edition, neither toil nor expense has been spared on the part of the author and publishers, in order to render it the most complete work of the kind ever offered to the public" (Preface). With further detailed references to previous dictionaries of Hindustani. Hindustani-English, pp. [1]-802, and English-Hindustani (with separate title page), pp. [1]-318.

**1848**: [LILLY] *An English and Hindoostanee naval dictionary of technical terms and sea phrases, as also the various words of command given in working a ship, &c. with many sentences of great use at sea: to which is prefixed a short grammar of the Hindoostanee language: the whole calculated to enable the officers of the Hon. East-India Company's and county service, to give their orders to the lascars with that exactness and promptitude, which upon many occasions, must prove of the greatest importance*, by the late Captain Thomas Rodbuck. Fourth edition. Revised and corrected by William Carmichael Smith, Esq., 1848. Pp. [2] 1 2-6 7 8-89 90 91-106. 17.3 cm. Leaf with pp. 19-20 bound out of sequence. Rebound in modern cloth with printed label on spine. "A Naval Dictionary English and Hindoostanee," pp. [7]-89, followed by English-Hindustani "Words of Command and Sea Phrases," pp. [90]-106. The first edition appeared in 1813.

"... although we have many Native Seamen in our shipping, there is no work to be had, which is calculated to enable an Officer of a ship to give his orders, or carry on a conversation with the Lascars, upon the most common occurrences connected with his several duties. To obviate this, I have not only translated all the words and phrases I could find in several English Naval works, but also availed myself of the leisure afforded by a long passage between England and India, in collecting all the words of command, &c. which I heard made use of in the actual working of the ship..." (Extract from the Preface of Captain Thomas Roebuck).

**1852**: [LILLY] *An English and Oordoo dictionary, in roman characters. Revised edition, improved and enlarged*. Calcutta: for the author, 1852. Original gray cloth, gilt lettering on spine. Pp. [8] 1 2-332. This copy with bookplate of the Baptist Mission House in London. English-Urdu-Hindi, pp. [1]-332, double column. The first edition appeared in Serampore in 1838. This edition is enlarged by about 20% and it was published posthumously. A second part, Oordoo-English, was published the following year, presumably the second edition of the 1838 edition listed above. This edition not in Vancil; not in Zaubmüller.

**1861:** [LILLY] *The Hand Book to Hindoostanee Conversation with familiar phrases and an easy vocabulary, English and Hindoostanee*. Calcutta: Printed a G. P. R. Kaully & Co. at the Calcutta Union Press, No. 6, Wellington Street, 1861. Pp. 1-5 6-63. 15,8 cm. Original green sewn wrappers, with a white printed label on front cover, lettered and decorated in black. English-Hindustani "Part II. Familiar Phrases," pp. 16-31, and "Part III. Vocabulary, English and Hindoostanee," pp. 32-63.

New edition **1870:** [LILLY] *The handbook to hindoostanee conversation, with familiar phrases, and an easy vocabulary, English and Hindoostanee*. Serampore: Tomohur Press, 1870. Original green wrappers, with printed paper label pasted to cover [this copy with label mistakenly pasted upside down on rear cover]. 64 pp. A later edition at Harvard is dated 1880. There was also a printing from the same press in 1883. The first edition appears to have been in Calcutta, printed by Saunders, 1851.

**1865:** [LILLY] *A Vocabulary English and Hindoostanee in Three Parts: containing 1.—A Nomenclature of Ordnance Stores. 2.—A List of Adjectives, Nouns, &c. 3.—A Collection of Military Terms, Phrases, Names, Titles, &c.* compiled by G. P. Hazelgrove, Ordnance Department. Bombay: Printed at the Education Society's Press, Byculla, 1865. Pp. *i-iii iv v vi vii viii I* 2-111. 21.5 cm. Original gray cloth, lettered in gold. First edition. English-Hindustani (in Roman, Persian and "Devangree or Balbodh" characters), arranged as indicated on the title page, Part I. pp.2-65; Part II, pp. 66-77; Part III, pp. 78-111. With the bookplate of John Lawson.

"The groundwork for the present compilation was a collection—in Hindoostanee—of the names of the principal Stores in the Ordnance Department made by me some ten or twelve years ago for my own private use, and added to from time to time up to this period, so as the embrace the whole of the headings in the current Nomenclature for which Native terms are to be found... I look with confidence to Government and its Military employés—for whose use chiefly I have undertaken its publication—for such support as will repay me the actual expense I have incurred in printing the work, and if it should prove of any value, as a medium, in facilitating intercourse between Europeans and the Natives of India in their transactions with each other, I shall consider it a sufficient remuneration for the time and labour it has cost me in giving it publicity" (Preface).

"The ... vocabulary comprises such words as will prove useful to the new-comer upon his arrival at either of the three Presidencies.... The letter D, prefixed to the word, denotes, that word to be peculiar to the Dukhune or Southern dialect, which prevails throughout the Deccan, or southern parts of the peninsula of India" (p. 32).

**1875:** [LILLY] *A dictionary of the Hindee language*, by John Drew Bate [1836-1924]. Benares: Printed at the Medical Hall Press, E.J. Lazarus, 1875. 805 p. 27 cm. Contemporary (and partly original?) brown cloth, lettered in gold, repaired in green cloth. Zaubmüller 181 (listing only second edition of 1918). Hindee-English, pp. [1]-805.

**1879:** [LILLYbm] *A New Hindustani-English Dictionary, with illustrations from Hindustani Literature and Folk-Lore*, by S. W. Fallon. Banares; London: E. J. Lazarus and Co.; Trübner and Co., 1879. Original brown cloth over boards, decorated in blind (spine missing). Pp. [6] *i* ii-xxiv xxv-xxviii, *I* 2-1216, *i* ii-ix (errata) *x-xii*. First edition. Zaubmüller, col. 181. Hindustani-English only. The author was at work on an English-Hindustani companion to this volume when he died in 1880 (see below).

"The chief features of the present work are the preeminence given to the spoken and rustic mother tongue of the Hindi speaking people of India; the exhibition, for the first time, of the pure unadulterated language of women; and the illustrations given of the use of words by means of examples selected from the every day speech of the people, and from their poetry, songs, and proverbs, and other folklore...The dictionary will include as an important integral part of the spoken tongue, the vocabulary of women...as yet strangely overlooked and never before given in any work known to the compiler. Some portion of this vocabulary is more or less current in the language of men; but the greater part is still confined exclusively to women...The seclusion of native females in India has been the asylum of the true vernacular, as pure and simple as it is unaffected by the pedantries of word-makers" (Introduction).
